GRADUATE

The **Graduate Catalog** is applicable to students who enroll at the University beginning Summer 2025 through Spring 2026.

The Graduate Catalog is the official listing of the policies governing graduate education at the University of Louisville. This catalog documents policies and procedures set by the Graduate Council and is updated each academic year to reflect changes and updates to policy. While every effort has been made to make the catalog accurate as of the date of publication, the University of Louisville reserves the right to change programs of study, academic policies, academic requirements, fees, course information, procedures for the confirmation of degrees, or the announced academic calendar and related deadlines without prior notice.

The University of Louisville is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). To review UofL's official SACSCOC institutional disclosure, visit the Institutional Accreditation and Membership (<https://catalog.louisville.edu/graduate/institutional-accreditation-membership/>) catalog page.

The University of Louisville reserves the right to change programs of study, academic policies, academic requirements, fees, course information, procedures for the confirmation of degrees, or the announced academic calendar and related deadlines without prior notice.

The provisions of this publication do not constitute an express or implied contract between the University of Louisville and any member of the student body, faculty, or general public.

The University of Louisville is committed to and will provide equality of educational and employment opportunity for all persons regardless of race, sex, age, color, national origin, ethnicity, creed, religion, diversity of thought, disability, genetic information, sexual orientation, gender, gender identity and expression, marital status, pregnancy, or veteran status – except where sex, age, or ability represent bona-fide educational or employment qualifications or where marital or veteran status are statutorily defined eligibility criteria for Federal or State benefit programs. If responses from the unit staff are unsatisfactory, inquiries or complaints about illegal discrimination including sexual harassment or handicap access can be made to Employee Relations and Compliance (<https://louisville.edu/hr/employeerelations/>) by calling (502) 852-6258.

The Redbook is the official statement of the organizational structure, the rules of governance and procedures, and university-wide policies of the University of Louisville. If there is any conflict between the policies, procedures or other statements contained within this catalog, *The Redbook* shall govern. A copy of *The Redbook* is available electronically.

Additional policies and information covering students can be found in the Student Handbook (<http://louisville.edu/dos/students/studentpoliciesandprocedures/student-handbook/>).

Admission criteria for many of the colleges and schools are reviewed periodically. Students should contact their anticipated unit or the Graduate School, Graduate Admissions, for information on the requirements in effect at the time of admission.

Letter from the Dean

Welcome to the University of Louisville's Graduate School.

As a graduate student at the University of Louisville, you will face many exciting and rewarding challenges. Whether you are pursuing a masters or doctoral degree or a professional certificate, you are about to discover that graduate study is quite different from your undergraduate experience. Instead of taking coursework from a broad range of disciplines, you will have a much narrower—and much deeper—focus. The opportunities to work with faculty members one-on-one are considerably greater than generally found in most undergraduate programs. Graduate programs also usually require much greater individual initiative than undergraduate courses of study, and you will be responsible for your own progress toward the degree.

Your intellectual life will revolve around your program's curriculum and the faculty and students in your cohort. You may have a faculty mentor who serves as an advisor and who will help guide you through your program of study. The relationship that you develop with your mentor will be of the utmost importance to your successful pursuit of a graduate degree. Good mentoring is critical to your success in graduate school, and the Graduate School is making every effort to ensure that the highest quality level of guidance is provided to you. The University of Louisville has a strong faculty dedicated to graduate education, research and creative works. As you learn from them, you will find yourself breaking new intellectual ground and contributing to the academic and professional conversations in your field. You will join a community of scholars composed of distinguished faculty and talented students. Each member of this learning community shares common interests in scholarship and yet individually pursues new knowledge about a particular area of science, social science, humanities, engineering, medicine or business.

Although there is a great deal to learn within the discipline that you have chosen to study, take the time to interact with faculty and students from the larger community of scholars at the university by attending talks, seminars, exhibitions and classes offered across the university's schools and colleges.

Success in graduate school depends on careful planning, and the Graduate School is committed to helping you plan your academic and professional future. We have a professional development program for graduate students with the acronym of PLAN, and during your time at the University of Louisville, we will facilitate your Professional growth, your development of Life skills, your Academic success, and your ability to successfully Network. Take advantage of the many workshops and professional development opportunities offered by the Graduate School and your own program to acquire "essential skills" like time management, teamwork, grant writing, publishing and teaching, all of which are translatable beyond the bounds of your specific disciplinary studies or your time in graduate school.

Finally, you have chosen to attend graduate school at a university in a terrific, vibrant city. Louisville offers many cultural, recreational, and entertainment opportunities, so make sure to make the most of your time here as you advance your career goals.

I wish you the best of luck in your graduate studies.

Beth Boehm, PhD

*Vice Provost for Graduate Affairs
Dean of the Graduate School*

Mission Statement of the University of Louisville

The University of Louisville pursues excellence and inclusiveness in its work to educate and serve its community through:

1. teaching diverse undergraduate, graduate, and professional students in order to develop engaged citizens, leaders, and scholars;
2. practicing and applying research, scholarship and creative activity; and
3. providing engaged service and outreach that improve the quality of life for local and global communities.

The University is committed to achieving preeminence as a nationally recognized metropolitan research university.

Revised University Mission Statement (effective 1/22/26):

Mission Statement

The University of Louisville's mission is to educate and serve the public through transformative teaching, innovative research, and engaged partnerships — advancing knowledge and improving quality of life and health across Kentucky's communities.

Vision Statement

The University of Louisville is where excellence and opportunity converge to drive transformative progress in health and societal well-being.

History of the University

On April 3, 1798, eight men declared their intention to establish the Jefferson Seminary in Louisville and called upon their fellow citizens to join them in pledging funds for land, buildings, and teachers. Occurring a few weeks after the Kentucky legislature had chartered this academy

and several others in the new state, this event marked the beginning of an advanced level of education for the young people of a frontier settlement barely two decades old. Near the end of the eighteenth century these early Louisvillians took the first steps on a journey that would link them with succeeding generations to the modern University of Louisville.

Jefferson Seminary struggled. It did not open until the fall of 1813, and in 1829 it closed. The Louisville Medical Institute (LMI), chartered in 1833, opened in 1837, and the Louisville Collegiate Institute (LCI) was chartered the same year. In 1840 LCI was renamed Louisville College and in 1844 it inherited the portion of the estate of Jefferson Seminary designated for the use of higher education in Louisville. LMI attracted large enrollments and prospered financially, but the college had difficulty remaining open. Proponents of grass roots democracy wanted to divert a portion of the medical school's resources to the college. They won a partial victory in 1846, when the Kentucky legislature created the University of Louisville proper, combining the medical school, the college and a newly created law school. Although there was now a common board of trustees, each division retained financial autonomy, and the college did not survive.

During the 19th century most of the professors in UofL's medical and law schools were drawn from the ranks of local physicians and attorneys who considered teaching a part-time vocation. By the 1880s and 1890s, however, the university felt pressure from educational reformers who not only believed schools should employ full-time instructors but who also advocated well-enforced national standards for academic training. In 1907 this trend contributed to the revival of the liberal arts college, which had been all but forgotten during the second half of the century. A much more vibrant university added new programs – the Graduate School (1915), School of Dentistry (1918), Speed Scientific School (1925), University College (1928-1982), Louisville Municipal College for Negroes (1931-1951), School of Music (1932) and Kent School of Social Work (1936) – conformity to accreditation guidelines became increasingly important. Expanded academic programs and the adherence to higher educational standards led to the appointment of full-time administrators before America's entry into World War I.

World War II and the postwar era brought major changes to UofL. Shortly after the war, a movement began to close the all-black Louisville Municipal College and desegregate the university on all levels. This was accomplished in 1950 and 1951. In 1953 the School of Business was created. Perhaps the most dramatic development of the postwar period was the movement of tax-paying citizens from the city to the suburbs. Because UofL was municipally funded, this caused a damaging drain on the school's revenue. As early as 1965, a governor's task force suggested the possibility of the university's joining the state system of higher education, which it did in 1970.

Since the late 1960s the university has added several new academic units, including the School of Education (1968), the School of Justice Administration (1969), the School of Nursing (1979), and the College of Urban and Public Affairs (1983). In 1992 the latter school was eliminated and its functions distributed to other units. In the same year the School of Justice Administration moved to the College of Arts and Sciences, and the Kent School of Social Work joined the Division of Allied Health to form the new College of Health and Social Services. In 1996 the functions of the College of Health and Social Services were realigned resulting in a separate Kent School of Social Work and a School of Allied Health Sciences. By 1999 Allied Health had given way to the School of Public Health and Information Sciences. In 2001 the School of Education became the College of Education and Human Development, and in 2003

the Speed Scientific School was renamed the J.B. Speed School of Engineering.

All of these schools have won their share of national acclaim. So too have UofL's athletic programs, with multiple NCAA Division I men's basketball championships; competitive football and baseball programs; and top-flight women's basketball and volleyball teams, among others. During "The Year of the Cardinal," in 2013, the Louisville Cardinals became the first university ever to win a BCS Bowl game, place both men's and women's basketball teams in the NCAA Final Four and reach the College World Series.

One of the nation's first city-owned, public universities, UofL has a long history of dedication to the needs of the Louisville urban area. In 2007, the university reaffirmed that mission through implementation of its Signature Partnership initiative, which formalizes its commitment to improving the lives of residents of some of Louisville's most disadvantaged neighborhoods. In 2019, the university's presence in West Louisville was expanded to include a newly remodeled building in the Portland neighborhood, dedicated to additional space for the College of Arts & Sciences' Fine Art and Anthropology programs.

The university continues to grow and innovate to meet the changing needs of the commonwealth. New academic programs and innovative forms of instruction further UofL's place in helping meet the needs of students and of the 21st-century economy. Expanded and improved campus facilities include new housing options, the Student Rec Center, updates to the Floyd Street corridor, expansion and remodeling of the Student Activity Center, expanded and updated facilities on the Health Sciences Campus and the Belknap Academic Building – over 150,000 square feet of new space including new state-of-the-art classrooms and laboratories, group study areas, gathering spaces, and a Student Success Center – which opened in fall 2018.

After celebrating its 225th anniversary in 2023, UofL remains uniquely positioned to create a thriving future for Louisville, for Kentucky and for the world.

Administration

Dr. T. Gerard (Gerry) Bradley, President, University of Louisville

T. Gerard (Gerry) Bradley became the 20th permanent president at the University of Louisville on March 26, 2025.

Board of Trustees

In accordance with the statutory authority of the Commonwealth of Kentucky and implemented in the By-Laws of the Board of Trustees and the governmental procedures for the university, the Board of Trustees is the governing body of the University of Louisville. Within the limits set by the Federal and State Constitution and federal and state law, the Board shall actively engage in policy making, be responsible for aiding the university to perform at a high level of excellence, adopt an annual budget and ensure that the financial resources of the university are sufficient to provide a sound educational program, and periodically evaluate the university's progress in implementing its missions, goals and objectives.

It selects the President of the university; upon recommendation of the President, it makes all appointments to the faculty and all appointments

of individuals in administrative capacities who serve at the pleasure of the Board.

The Board of Trustees grants all degrees conferred by the university.

More information on the Board of Trustees, including current membership can be found on the Board of Trustees website (<https://louisville.edu/president/boards-commissions/board-trustees/>).

About the Graduate School

The legislative functions of the Graduate School are vested in the Graduate Council, which consists of elected representatives of the Graduate Faculty. The Council establishes minimum guidelines and policies that maintain high standards for administering graduate education at the University of Louisville. The dean of the Graduate School serves as chair of this body and of the Graduate Faculty.

The dean and the dean's staff are responsible for the administration of the rules and regulations of the Graduate School and are expected to maintain and safeguard the standards and policies of the school as outlined by the Graduate Faculty and the Graduate Council.

Graduate students participate in the operation and decision-making process of the Graduate School through the Graduate Student Association (<https://louisville.edu/graduate/gsc/>)—to which all graduate students belong—and its executive committee, the Graduate Student Council, which consists of one elected representative from each graduate program. A representative of the Graduate Student Council serves as a voting member of the Graduate Council.

Graduate students are actively sought as members of many of the standing committees of the Graduate School, and they are urged to participate and become involved in the administration of the Graduate School through these channels.

Mission Statement of the Graduate School

The mission of the Graduate School is to advocate and provide support for graduate education, graduate students, and interdisciplinary programs, and to promote the advancement of knowledge through the teaching and training of post-baccalaureate students.

By fostering the spirit of inquiry and research in the members of its faculties, it not only strengthens undergraduate instruction but also advances knowledge.

Through its graduate courses, it furnishes advanced preparation for those who are planning to become investigators or teachers in the social sciences, humanities, and natural sciences.

It also partners with the academic units to support graduate students, financially and professionally, and help those units recruit, retain, and prepare students for successful careers.

Application and Admission

It is the applicant's responsibility to consult the appropriate department, school or program for application deadlines and specific program requirements. The university reserves the right to change programs of study, academic requirements, tuition and fees (<https://louisville.edu/bursar/tuitionfee/>), schedule of courses (<https://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>), the announced academic calendar (<http://louisville.edu/calendars/academic/undergrad-grad/>) and deadlines without prior notice.

Minimum Application Requirements for All Graduate Programs

- Application for graduate admission
- Application fee
- Official transcript(s) from all previous colleges and universities attended
- Letters of recommendation (at least two) (check program requirements)
- Standardized Test Scores (check program requirements)

Some programs require additional materials, such as a personal statement, writing sample, etc. (consult specific program requirements in the graduate catalog (<https://catalog.louisville.edu/graduate/programs-study/>)).

Application for Admission

Apply online at louisville.edu/graduate/apply (<http://graduate.louisville.edu/apply/>).

Credentials should be sent to the address below:

2211 South Brook Street, Houchens Building, Suite 105
Louisville, KY 40292

Programs have different deadlines and may require additional credentials or materials. Applicants should consult the pertinent program section of this catalog and check directly with the department.

The application and supporting documents become the property of the University of Louisville and will not be returned to the applicant or forwarded to another university.

If you do not enroll, your academic credentials will be retained in the Graduate School for two years.

Application Fee

A non-refundable application processing fee is required. When applying online, the fee may be paid with a credit card or electronic check. Applications will not be processed until the application fee is received.

There are two types of waivers available to students, 1) General Application Fee Waivers, and 2) Program-Based Fee Waivers.

General Fee Waiver

For an applicant's application fee to be waived, they must provide the appropriate documentation. This includes:

- Veterans, and or serving on Active-Duty, in the National Guard, or in the Reserves in; the U.S. Army, the U.S. Navy, the U.S. Air Force, the U.S. Marine Corps or the U.S. Coast Guard
- Participation in one of the following:

- Medicaid
- S.N.A.P. (Supplemental Nutrition Assistance Program, formerly known as EBT and Food Stamps Program)
- Supplemental Security Insurance (SSI)

Documentation may include, but is not limited to:

- IDs, DD 214, or military orders
- Most recent correspondence
- Verification document or letter

Documentation can be submitted at the time of application or be sent to gradadm@louisville.edu.

Program-Based Fee Waiver

Program-Based Fee Waivers are occasionally granted by academic departments on a case-by-case basis.

Deadlines

Programs have different deadlines and may require additional credentials or materials. Applicants should consult the pertinent program section of this catalog and check directly with the department.

Transcripts

All applicants must submit **official transcripts showing** all degrees awarded and all undergraduate and graduate work (all courses) completed from each accredited college/university previously attended. Transcripts must be original documents bearing the institutional seal and official signature of the Registrar or copies verified by a school administrative officer. The minimum requirement for admission is the baccalaureate degree or its equivalent from a postsecondary institution that holds institutional accreditation from an accrediting agency recognized by the U.S. Department of Education (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies/>).

International applicants

International applicants with transcripts that are not in English, in addition to submitting official copies of native language records, must also submit a notarized, verbatim translation in English prepared by an appropriate university or government official. The records must show both the degree granted and all coursework taken during the course of study. Applicants who have attended colleges, universities, postsecondary programs outside of the United States. Currently, all international students must have their credentials reviewed by an approved evaluation company that can provide an evaluation of their transcripts. Please see NACES (www.naces.org/members) or AICE (<https://aice-eval.org/endorsed-members/>) for approved evaluation agencies.

Test Scores

The Graduate Record Exam (GRE) is not required for consideration for university fellowship and scholarship awards. GRE scores may be required for admission to some graduate programs. Please check directly with the department regarding test requirements. **The University of Louisville institution code for score reporting is 1838.**

Letters of Recommendation

A minimum of two letters of recommendation are required; however, some graduate programs require more. Letters should be written by someone who can speak to the applicant's academic and/

or professional capabilities. Letters of recommendation may be sent to gradadm@louisville.edu or by regular mail to the address listed above.

Proof of English Language Proficiency

All applicants for whom English is not the native language must also submit proof of English proficiency.

TOEFL 79 iBT, 213 cBT, 550 pBT, 9.0 (Essentials) <http://www.ets.org/toefl>

IELTS 6.5 (no sub-score lower than 5) <http://www.ielts.org/>

Duolingo English Test 105 <https://englishtest.duolingo.com>

PTE Academic 55 (no sub-score lower than 53)

Proof of Language proficiency is waived for International Students with citizenship from one of the following English-speaking countries:

American Samoa, Anguilla, Antigua and Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, Botswana, Cameroon, Canada (except Quebec), Cayman Islands, Christmas Island, Cook Islands, Denmark, Dominica, England, Eswatini (Swaziland), Falkland Islands, Fiji, Finland, The Gambia, Ghana, Gibraltar, Grand Cayman Islands, Grenada, Guam, Guyana, Northern Ireland, Republic of Ireland, Isle of Man, Jamaica, Kenya, Kiribati, Lesotho, Liberia, Malawi, Malta, Marshall Islands, Micronesia, Montserrat, Namibia, Netherlands, New Zealand, Nigeria, Niue, Norfolk Islands, Norway, Palau, Papua New Guinea, Pitcairn Islands, Scotland, Seychelles, Sierra Leone, Singapore, South Africa, South Sudan, St. Helena, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Sweden, Tanzania, Tonga, Trinidad and Tobago, Turks and Caicos Islands, Tuvalu, Uganda, United Kingdom, Vanuatu, Virgin Islands, Wales, Zambia, Zimbabwe

Students holding a bachelor's or advanced degree from an accredited institution in the countries such as United States, Canada (except Quebec), the UK and Australia may also be exempt from this requirement.

International Students

All international students shall comply with regulations of the U.S. Department of Homeland Security's Student and Exchange Visitor Program and all related policies of the University of Louisville International Center.

All international students must be registered with the University of Louisville International Center and must present evidence of financial resources that are adequate to support their educational and living expenses in the United States for the duration of their studies. Documentation showing that a University Fellowship or Graduate Assistantship has been awarded is normally considered evidence of adequate financial resources.

The International Student and Scholar Services (ISSS) staff, as a part of the International Center, serves as an administrative, advising, and programming unit for all international students at the University of Louisville. The staff is trained to assist international students in solving problems, handle matters with immigration, and answer general questions about life in Louisville or in the United States.

Please refer to the International Center website (<https://louisville.edu/internationalcenter/>).

Admissions

Upon receipt of the application for graduate studies, application fee and credentials, the graduate program will evaluate the application package and specify the admission status and any conditions of admission. The official admission letter will come from the Graduate School.

The minimum undergraduate GPA for unconditional admission into a graduate program is 2.75. Programs may refer students with a 2.5 - 2.74 for admission, and they will be admitted with Special Conditions requiring them to achieve a 3.0 in their first nine credit hours. Students who do not achieve a 3.0 or meet other departmental conditions outlined in the admission letter may be subject to academic dismissal from their program.

No applicant with a grade-point average of less than 2.50 will be admitted to a program of graduate study. Under unusual circumstances, programs may wish to make a case that a student's record demonstrates great potential despite a low GPA and must make the case in a variance request to the Vice Provost for Graduate Affairs. The student may be admitted provisionally on probation, with the condition that they earn a 3.0 in the first 9 credit hours or will be dismissed. Programs may limit the number of credit hours student admitted with special conditions or on provisional probation may take.

Degree/Credential status – good standing: In order for a student to be recommended for admission without conditions to degree/credential status in good standing, all admission credentials must have been received and evaluated. The applicant must have earned a minimum grade-point average as specified by the enrollment unit. Each applicant should consult the specific graduate program descriptions in this catalog to determine any additional admissions criteria or any more restrictive requirements for admission to this status.

Degree/Credential status – provisional: This status is intended for students whose application materials are incomplete (usually missing required credentials or letters), but who have submitted the application form and application fee. Students in provisional status must also meet the general academic requirements of their program. Students may not enroll for a second consecutive term in provisional status. Not all graduate programs allow admission on a provisional basis. A student admitted on a provisional basis has one semester to furnish any credentials missing at the time of admission.

Degree/Credential status – special conditions: This status is intended for students whose applications are complete, but whose academic background is below the minimum for their program. Students admitted in this status will be expected to meet certain criteria within a specific time-frame outlined by the admitting graduate program.

Degree/Credential status – provisional/special conditions: An applicant who has both an incomplete application and academic criteria below the minimum may be admitted in this status, pending program approval. Students in this status will be expected to meet certain criteria within a specific time frame outlined by the admitting graduate program, as well as one semester to furnish any credentials missing at the time of admission.

Degree/Credential status – provisional probation: An applicant who does not meet graduate school and department/unit's minimum requirements may be admitted in provisional probation. Programs may limit the number of credit hours students admitted with special conditions or on provisional probation may take.

The unit/department must file for admission variance request to the graduate school. The admission variance request will be reviewed and approved and/or denied by the Vice Provost for Graduate Affairs. Students admitted in this status will be expected to meet certain criteria within a specific time frame outlined by the admitting graduate program.

Graduate Admissions Hold

Graduate students admitted Provisional Probation/Provisional/Special Condition status will have a Graduate Admissions Hold placed on their academic record. This hold will be placed approximately one week prior to the beginning of registration on all current students whose status has not been changed to good standing. The hold will be placed by the Graduate School.

Returning students who were admitted Provisional Probation, Provisionally, and/or with Special Conditions who wish to re-enroll will be evaluated to determine if their conditions were met. Upon submitting a request to re-enroll form to the Registrar's office, the Registrar's office will forward for review by the Graduate School. If the student is not eligible to be changed to good standing, a Graduate Admissions Hold will be placed on the student's academic record prior to the processing of the re-enrollment form.

Additional Considerations for Admission to Degree/Credential Status

A student admitted with an undergraduate grade point standing of less than the minimum of the enrollment unit may be subject to program limitations on the number of hours in which he/she may enroll for each semester. Students who do not meet any other departmental requirements outlined in the admission letter may be subject to academic dismissal from their program.

No applicant with a grade-point average of less than 2.50 will be admitted to a program of graduate study. Under unusual circumstances, programs that wish to admit students who do not meet this standard must submit a variance request to the Vice Provost for Graduate Affairs.

Non-degree status

Applicants who do not desire to seek an advanced degree but wish to take graduate course work may be permitted to enroll in non-degree status. Please note that not all programs will admit students to non-degree status. Application credentials must include a completed application for admission, application fee and an official transcript showing the award of a baccalaureate degree. No more than nine (9) credit hours of course work taken in a non-degree status may be applied to a graduate degree program with departmental approval, and no more than fifteen (15) credit hours may be accumulated while in non-degree status.

Visiting Students

A graduate student from another university or college may enroll for graduate course work as a visiting student at the University of Louisville with the approval of the graduate program director or department chair. The visiting student is responsible for having the home institution provide a letter certifying that the student is in good standing. A graduate application and fee are required and transcripts may also be required by some departments.

University of Louisville graduate students who attend another college or university as visiting students must have the permission of their department chair, program director or major advisor. The guidelines for the Transfer of Credit (p. 13) stated in the graduate catalog apply to

all credits earned as a visiting student. Visiting student status may be granted only to a student who is in good standing.

New Graduate Student Information Overview

The University of Louisville operates on a semester system that includes a Fall semester, Spring semester, and Summer semester with multiple terms. The university has a computerized admissions and registration system. Students are advised to include their full name and date of birth on all correspondence with the university to facilitate the identification of admission credentials and requests for information. Students who do not enroll for the semester for which they apply may contact their department and request their admission be changed to a future date. In some cases, applicants may be asked to reapply and resubmit credentials. The university holds credentials on applicants for a limited time.

Student Responsibility

It is the responsibility of the graduate student to become familiar with and observe all policies and requirements of the Graduate School and of his or her particular degree program and department. Policies, procedures, and requirements are subject to change, and it is the responsibility of the graduate student to keep her/himself apprised of current regulations. All students must respond to official notices issued by administrative offices and instructors, whether these notices be posted on official bulletin boards, are sent through postal, or email. A student's status is not dependent upon a written notification but is a consequence of circumstances in the admission process and the student's academic performance. Written notification is simply a verification of status.

Graduate Credit

Courses listed in this catalog are offered for graduate credit. To receive graduate credit, a student must register for the course through the Graduate School or through another graduate-level program, such as a masters or doctoral program. Students who take courses as post-baccalaureate non-degree students, may not receive graduate credit for them.

Prerequisites

Prerequisites for all courses include graduate status and the consent of the graduate advisor (for registration). Specific course prerequisites are indicated in the course listing (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>).

General Policies, Procedures and Requirements

The general policies, procedures and requirements for advanced degrees are stated below; however, each program has specific degree requirements. These specific requirements are detailed in the program descriptions that follow this section. These requirements must be consulted so that the graduate student can be fully apprised of the conditions he/she must meet in order to receive an advanced degree.

The policies and regulations described in this catalog cannot be superseded or invalidated by either oral or written agreement with faculty, staff, or administrators unless a variance is confirmed in writing by the Vice Provost for Graduate Affairs, in consultation with the Graduate Council.

Registration

Students may register for courses during the priority early registration period before the beginning of the semester. A student's first opportunity is based on classification and alphabetic rotation. The early registration period is then followed by regular and late registration. The registration calendar for any term is published online by the office of the registrar.

Initial registration and any later registration changes are usually completed by students through the registration link of the ULink online portal (<https://ulink.louisville.edu/>).

Initial registration must be completed by the date announced by the registrar, typically the fifth day of classes. Students may make adjustments to their course schedule until the end of the first week for regularly scheduled fall and spring courses. For summer courses and courses with atypical duration, the last date to adjust schedules is specified by the registrar in the official registration calendar. This last day to adjust schedules is referred to as the last day to drop/add.

Students may *add* courses to their schedules until the last day to drop/add. No signature or other authorization is required if the added course is open for enrollment, if students meet all course prerequisites, and if such additional courses do not raise the students' credit#hours for the term above the maximum allowed by the students' enrollment unit or academic standing. If the addition increases the tuition cost for the semester, the additional payment must be settled with the university bursar by the last day to drop/add.

Students can place their names on the *waitlist* for a course that is closed.

Students are automatically moved from the waitlist to registration in the course as spaces open until the end of the first week of classes.

Students may add their names to the waitlist until the third day of

classes for regularly scheduled fall and spring courses, and the first day of classes for summer courses.

Students may *drop* a course from their schedule until the last day of drop/add. Courses that are dropped during the regular registration period are not listed on the transcript. Students should consider how dropping a course will affect their progress toward their degree and their financial aid eligibility. Students who stop attending a class but fail to complete the drop process, regardless of the date when they stopped attending the course, will be given the grade of F for the course.

Students who wish to enroll in concurrent courses at another institution should consult their academic advisor before registration to ensure proper enrollment and recording of courses. Students in good standing who have earned a minimum of twelve hours may be able to cross-register at other universities in the Kentuckiana Metroversity consortium.

Cross registration is permitted on a space-available basis at the discretion of the member institutions. The combined program of work in all institutions may not exceed the maximum course load permitted for students at the University of Louisville. Failure to follow these guidelines may result in loss of credit or ineligibility to transfer the credits from the other schools toward the requirements for graduation.

The University of Louisville uses an online web registration system. The schedule of courses for each term may be reviewed at Schedule of Classes (<https://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>).

Students must first contact their graduate advisor or Director of Graduate Studies to discuss course selections. Students in good standing and admitted without conditions may proceed with the registration process. If, however, a student has been admitted with conditions, or is in probationary status, the student must contact the Director of Graduate Studies regarding the implications of the admission status.

Full-Time Study

Full-time study for graduate students is defined as enrollment in:

1. Nine (9) credit hours during the Fall semester, OR
2. Nine (9) credit hours during the Spring semester, OR
3. Six (6) credit hours during the Summer semester, OR
4. In degree candidacy status.

Full-Time Study for University Fellows and Graduate Assistants

All University Fellows and Graduate Assistants receiving financial support must be enrolled as full-time students during the period for which they are receiving support.

Workload Limitations for Graduate Assistants

Graduate assistants who are supported by an assistantship, either as a GRA (research), GTA (teaching) or GSA (service), are limited to 20 hours of work per week on service related to the graduate assistantship.

However, students may be eligible to work an additional 9 hours per week with the possibility to earn income for the work. Graduate students are first and foremost students, and the additional work must provide professional development for the student. The duration of the additional

work is typically within one semester, and waivers must be filed every semester the student seeks additional work.

International students who have an F1 VISA may be eligible for this waiver, but they must abide by UofL policies, which limit the amount of additional work for both domestic and international students to 9 hours per week over the course of the semester, as well as federal regulations governing Curricular Practical Training (CPT) for F1 VISA holders. CPT guidelines suggest the following:

- Typically, F1 VISA holders who are funded with an assistantship are not eligible for CPT during their first year of study (unless the program requires such a practicum in the first year);
- Additional work must be integral to the discipline and the work must be part of the program of study (preferably the student will receive academic credit for the work);
- CPT requires a signed cooperative agreement or letter from the employer attesting to the curricular nature of the work experience;
- A Designated School Official (DSO) must provide a new I-20 approving the student for employment. To approve a student for CPT, the DSO must have approval from both the Director of Graduate Studies in the student's program AND the Dean of the Graduate School, as evidenced by completion and approval of the GA Workload Waiver Form (<http://louisville.edu/graduate/forms/ga-waiver-request/>).

The Chair of the student's department or the Director of Graduate Studies must complete the GA Workload Waiver form (<http://louisville.edu/graduate/forms/ga-waiver-request/>), which will be forwarded automatically to the Graduate School. If a student is funded as a GA by an external source, submission of this waiver affirms that the request falls within the student's current funding source regulations on additional aid. The Dean of the Graduate School, or the Dean's designee, must approve requests for students to perform additional work.

Instructional Delivery Standard Course Delivery Modalities

The university offers the following course modalities:

In-Person Courses: Instruction whereby both students and faculty are expected to meet in person in an assigned room at assigned times as found in the schedule of classes; final exams are also regulated by the published schedule. In-person courses may be offered on campus or at a SACSCOC-approved off-campus instructional site. Field experience, practicum, internship, or co-op courses may require meeting at local placement sites.

Online Courses: Online courses are conducted via the internet and provide educational access by separating learners and instructors by distance and/or time. Online courses will have no required in-person, on-campus activities including no required in-person exam proctoring. Students who *request* in-person proctoring at a location convenient to the student may be approved by the instructor. A university-licensed and supported learning management system (LMS, e.g., Blackboard) is provided and required for the offering of the university's online courses. Participating faculty must ensure that instructional time is accounted for, meets the SACSCOC minimum contact hour requirements and complies with the U.S. federal regulation on regular and substantive interaction.

- **Online, Asynchronous:** 100% online instruction where no synchronous activities, including assessments, may be required. Instructors and students are expected to engage in learning activities via

the approved university system for delivering online education (Blackboard).

- **Online, Synchronous:** 100% online with *any* required synchronous class meetings, including assessment, in addition to any asynchronous expectations. All required synchronous meetings must be published in the schedule of classes before registration. Final exams are regulated by the published schedule.

Blended Learning Courses: Blended learning courses combine the affordances of instructional components from in-person classroom experiences and online experiences. The meeting pattern of required synchronous sessions (in-person and/or online) must be consistent across the semester and must be published in the schedule of classes. The in-person class meeting reduction is off-set by designed online learning experiences that support learning objectives and take approximately the same amount of time as the reduced class meetings. These online learning experiences may be:

- completely asynchronous (i.e., no “same time” class meetings),
- completely synchronous (i.e., requiring “same time” class meetings via the internet), or
- primarily asynchronous with some synchronous options or requirements.

Standard Program Delivery Modalities

University of Louisville strives to provide flexibility in course and program delivery wherever possible. In any given term, many programs offer some classes that are available in an in-person, online, or blended modality.

Students who are seeking a specific modality for courses in a program should review the schedule of classes carefully. Programs that can be completed entirely online will be identified on the Overview tab of the academic program's catalog page. However, unless the program's overview in the catalog indicates that it can be completed entirely online, UofL programs reserve the right to offer some courses in a single modality (i.e., only online, only blended, or only in-person). Unless specifically stated on the Overview tab of an academic program's catalog page that a program may be completed entirely through a single modality, students should expect their program to be completed through courses offered in various modalities.

Catalog Year

The university issues a catalog annually in conjunction with the start of the summer term, and the degree requirements stated in the annual issue apply to all students who matriculate during that year. These requirements constitute the “catalog year” for those students and set their degree requirements as long as they are enrolled without a break of more than two calendar years. In other cases, a student may elect to follow the requirements of a later catalog year. The student's advisor will assist in identifying the need and benefit of such an election. The advisor must record this election in the student's permanent record.

Students may petition for a variance from the stated degree requirements of their catalog year. A variance must be reviewed by the Director of Graduate Studies or Department Chair, and the unit dean or their designee. The final decision is made by the Vice Provost for Graduate Affairs.

Students readmitted after two or more calendar years must reapply for admission. If readmitted, they are subject to the catalog year requirements in force at the time of their readmission.

Continuous Enrollment

Continuous enrollment is defined as being registered in both Fall and Spring if registering for course work. If a student has been admitted to either masters or doctoral degree candidacy, continuous enrollment in candidacy status is required for the Fall, Spring and Summer terms (only one term of registration is required in summer terms). Students must be enrolled during the semester in which they wish to graduate.

Course Loads

Normally, the maximum number of credit hours that may be taken in a regular semester is twelve (12). The maximum number of credit hours that may be taken in the Summer session (both terms) is twelve (12), including research hours.

Overloads

A student who wishes to enroll in more than the maximum number of credit hours must petition the unit dean to obtain permission.

Auditing Courses

Auditing at the graduate-level is available only to students who are enrolled in a graduate program. A student who wishes to audit a course must obtain permission from the course instructor and the director of the program in which the student is enrolled using the proper form provided by the Office of the Registrar. Auditing a course will not satisfy a prerequisite for a graduate course or a degree requirement.

Transfer of Credit

UofL generally accepts transfer credits earned at postsecondary institutions that are institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://ope.ed.gov/dapip/#/home>).

The number of credit hours transferable, upon request, is six (6). Up to six (6) additional credit hours may be petitioned, provided that these additional hours are not credits earned by extension, thesis or practicum and provided also that the residency requirement of 24 semester hours is maintained by the addition of University of Louisville credits to the total program.

Course work taken more than three years prior to the student's application to a graduate program will not normally be considered for transfer; however, such requests will be reviewed by the Vice Provost for Graduate Affairs upon recommendation by the department chair and the unit dean.

The course work being considered for transfer must have been taken while the student was enrolled in an accredited graduate or professional school and must be evaluated for transfer by the Director of Graduate Studies in which the student is seeking additional graduate work. Six (6) credit hours may be transferred from a previously earned master's degree toward a doctoral degree or a second master's degree, subject to the approval of the degree program and the unit dean. Hours earned toward a culminating experience such as a thesis, practicum, or internship shall not be transferable to the second master's degree. Only courses in which the student earned grades of B or better will be considered for transfer. Hours and quality points earned at other institutions are not included in the calculation of a student's grade point average.

Courses in which grades of P were earned must have the approval of the unit dean in order to be transferred.

Transfers of graduate credit from constituent schools and colleges of the University of Louisville are not subject to the above limitations on transfers but require the recommendation of the department chair and the approval of the unit dean. Upon approval of the graduate program, students may apply the coursework from no more than one certificate program towards a graduate degree program.

Satisfactory Progress

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. Students who seek to return after such a period of time must contact the graduate program director. Based on the request of the graduate program, the unit dean will consider the student for readmission.

Satisfactory progress also requires maintaining the standards of academic and professional integrity expected in a particular discipline or program and, in some disciplines, may include demonstration of the ability to function as a professional practitioner. Failure to maintain these standards or demonstrate such abilities may result in the student's termination from the program.

Degree Candidacy

Students enter Degree Candidacy upon completion of all course work, qualifying exams, required research credit hours and other co-curricular requirements. Students who are enrolled in degree candidacy are considered full-time students. While in Degree Candidacy, it is the responsibility of both student and mentor to maintain contact to ensure continuous progress towards the completion of the degree. In some cases, a master's student may complete the requirements of a degree program without the need to enter Degree Candidacy.

Although students must complete all required courses before entering Degree Candidacy, in rare cases students may be approved to take an additional specialized course, e.g., a course offered by visiting or new faculty, while in Degree Candidacy (in those cases payment of both the candidacy fee and the course tuition will be required). A variance request submitted to the Graduate School must be approved in advance of the student enrolling in the additional course.

When all other degree requirements are met, students may enroll in Degree Candidacy in order to meet the requirement that all students must be enrolled during the semester in which they wish to graduate.

Degree Programs must inform the Vice Provost of Academic Affairs when students have met all requirements and are ready to enter Degree Candidacy. Once a student is admitted to candidacy, enrollment in Degree Candidacy status must be continuously maintained year round (i.e. Fall, Spring, and Summer) until the degree is awarded. The only exception to this policy of continuous enrollment is if the unit dean and the Vice Provost of Graduate Affairs have granted the student a formal leave of absence.

Once a student initially enrolls in Degree Candidacy, the Registrar will automatically enroll the student in Degree Candidacy until the student applies to graduate, with the exception of the following:

1. Failure to pay the candidacy fee will cancel a student's enrollment.
2. If a student has any type of hold on the account, the student will no longer be enrolled automatically in Degree Candidacy. To reestablish enrollment in Degree Candidacy, students will be required to pay the candidacy fee for each semester during which candidacy was voided and/or not maintained. To restore Degree Candidacy, the student must contact the Director of Graduate Studies in their degree program.

Time Limitations for Degree-Seekers

Master's students must complete the degree requirements within six years of beginning the program of study. Doctoral students have four years after passing the qualifying exams to finish all other degree requirements. While granting an extension of time is rare, requests for extension of time must be submitted in writing to the Director of Graduate Studies of the student's department. Once reviewed by the department, the request is forwarded to the unit dean, and then to the Vice Provost for Graduate Affairs with supporting documentation for review. Students must be considered in good standing for the request to be considered.

Academic Standing

Good Standing

A graduate student is in good standing as long as the graduate grade point average is 3.0 or higher on a 4-point scale. A student must be in good standing in order to receive a degree.

Academic Probation

Any student with a semester GPA below 3.0 will receive an academic warning from the Graduate School. A notification will be sent to the student as well the student's graduate program. Should a student's cumulative GPA fall below 3.0, the student will be placed on academic probation until the student regains a 3.0 average (which is required to graduate). Ordinarily students are not permitted to continue on academic probation for more than one semester, but upon request of the student's graduate program, the unit dean may submit a variance request to the Vice Provost for Graduate Affairs to approve continuation of academic probation beyond a single semester. Students on academic probation for more than one semester risk dismissal from the graduate program.

Graduate programs have the prerogative to establish more stringent criteria for which students may be placed on academic probation.

Academic Dishonesty

Plagiarism, cheating and other forms of academic dishonesty are serious violations of academic conduct and may result in permanent dismissal. Students are expected to be familiar with the various forms of academic dishonesty as explained in the Code of Student Rights and Responsibilities (<http://louisville.edu/dos/students/studentrightsandresponsibilities/>). A plea of ignorance is not a defense against the charge of academic dishonesty.

Degree and Certificate Requirements

Requirements for the Doctoral Degree Special Considerations for Doctoral Studies

In addition to the particular rules of the various graduate programs as stated in their sections of this catalog, the following general rules apply to all doctoral degree programs.

The award of a doctoral degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform independent scholarly research. Accordingly, no specific minimum number of credit hours has been established for doctoral degree programs. However, ordinarily the equivalent of three years of full-time graduate study is a minimum.

The doctoral degree is not awarded solely upon completion of a curriculum of courses, even though the student has done superior work in them; rather, it is awarded in recognition of creative scholarship as demonstrated by a substantial contribution in the candidate's chosen field. Only students who offer promise of meeting this high standard will be accepted by a graduate program to begin work toward this degree. Doctoral degree programs typically have more restrictive criteria for admission than those for admission to a master's degree program. The prospective student should consult in person with the graduate program in which he/she wishes to major.

Program of Study

Each applicant for the doctorate is expected to take such courses as may be required for both a strong foundation in the field and the development of a specialization. The student's program will consist of a major field and such minor fields as the major professor, the student, the program faculty, and department chair may agree upon. This program may be modified at any time upon the recommendation of the major professor and approval of the department chair and the dean of the unit.

All courses offered by the University, at any level and in any school, shall be accessible to the doctoral student, subject to approval by the instructors.

Residency for Doctoral Students

To ensure that doctoral students have the opportunity to participate fully in the intellectual life and research atmosphere of the University, at least two years of study must be spent at the University of Louisville and at least one must be spent in full-time residency (except as indicated below). The two-year requirement allows students to build mentoring relationships with faculty members and accrue classroom and research experience over time, while the full-time residency requirement is designed to provide students with at least one year of immersive, intensive study.

According to the Council of Graduate Schools, residency advantages students in the following ways: "... fluency in the language and vocabulary of the [field of] specialization is enhanced by frequent and close association with other students in the same field; competence in the field is enhanced by close familiarity with the university's libraries; valuable experience is gained by attending and participating in both formal and informal seminars, colloquia, discussions led by specialists visiting from other campuses, laboratories, or governmental research groups; and thesis or dissertation research is facilitated by frequent consultation with the advisor."

Full-time residency requires that a student be registered for a minimum of 18 credit hours within a twelve-month period. Registration for candidacy cannot be used to meet this requirement.

Alternative Residency Track

All doctoral students must meet the two-year enrollment requirement. Students enrolled in part-time doctoral work may substitute four terms of continuous enrollment (summer terms can be used to meet this requirement) for the full-time residency requirement.

Programs that allow part-time and/or off-site participation must provide a rationale to the Vice Provost for Graduate Affairs, indicating how they ensure that such students have access to an intensive and immersive educational experience. The rationale must be approved by the Vice Provost for Graduate Affairs and be on file in the Graduate School.

Foreign Language Requirement

Foreign language proficiency is no longer a general requirement for graduate degrees. However, certain graduate programs may have established such requirements, which will be specified in their sections of this catalog.

Qualifying Examination and Candidacy

The applicant for a Doctor of Philosophy or Doctor of Education degree must pass a qualifying examination, oral or written, or both. Its purpose is to verify that the student has sufficient understanding of and competence in his/her field to become a candidate for the degree. This examination may be referred to by some programs as the preliminary, comprehensive, or candidacy examination. To be eligible for this examination, the student must have satisfactorily completed the major portion of the prescribed course work and must have met the foreign language requirement of the program, if applicable. It is the student's responsibility to be aware of the program's policy on the consequences in the case of failure of all or part of the examination. A student who fails the examination may not be allowed to retake it more than once.

A doctoral degree student must have been admitted to candidacy not later than the end of the ninth month prior to the awarding of the degree, that is:

- August graduation: November 30 of preceding year
- December graduation: March 31 of same year
- May graduation: August 31 of preceding year

Although the prescribed course work may have been completed, the candidate must maintain an active registration status until the degree is awarded (see the catalog section on General Academics Policies and Requirements (p. 13)).

Time Limitation

The candidate must complete all other requirements for the doctoral degree within four calendar years after passing the qualifying examination. In exceptional cases, the Vice Provost for Graduate Affairs is empowered to grant limited extensions of this four-year period.

Dissertation

A dissertation is required of all candidates for the degree of Doctor of Philosophy or Doctor of Education. It is to be a scholarly achievement in research, and should demonstrate a thorough understanding of research techniques in the field of inquiry and the ability to conduct independent research.

The dissertation shall be read by a reading committee, chaired by the major professor, and appointed by the unit dean upon the recommendation of the chair of the major department. This committee shall consist of not fewer than four members, and must include one representative from outside the program. All members must be qualified to serve on the committee as specified by their Unit's Guidelines for Graduate Faculty. The dissertation must be approved by the committee and the chair of the major professor's department.

The final manuscript is submitted electronically to the Graduate School through ThinkIR (<https://ir.library.louisville.edu/>), directions on submission will be provided upon review of the dissertation by the Graduate School. The final copy is submitted as a PDF. Along with the PDF the student is required to submit a digital/electronic (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) copy of the signature page or hard copy of the signature page, which should be on white paper with original signatures. The digital/electronic or the original signature page must be submitted to the Graduate School.

Some programs may require students to submit a copy of the dissertation or signature page to the department; please check with your program director.

Standards for the Preparation of Thesis and Dissertations (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-guidelines-1/>) are available on the website of the Graduate School. Alternate standards must be approved by the Vice Provost for Graduate Affairs if in conflict with this standard.

Each student who is required to submit a dissertation to fulfill degree requirements must follow the guidelines for the Preparation of Thesis and Dissertations (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-guidelines-1/>). Prior to submission of the final copy of a dissertation, students must contact the Graduate School to schedule a review of the document.

Final Oral Examination

The final oral examination is to be a defense of the dissertation and a demonstration of the candidate's mastery of his/her field. The examination will be given by a committee of Graduate Faculty members appointed by the unit dean upon recommendation of the chair of the major department. The committee will be composed of a minimum of four qualified graduate faculty members, one of whom must come from outside the student's program. The major professor and the remaining Committee members must be qualified to serve as specified by the unit's guidelines for graduate faculty. The examination committee for doctoral students in Interdisciplinary Studies will be approved by the Dean of the Graduate School upon recommendation of the major professor.

The Dean of the Graduate School shall notify all members of the Graduate Faculty at least one week in advance that they are invited to participate in the examination, but only members of the committee may vote. At the discretion of the major department, a portion of the examination may be written.

The examination must be taken at least fourteen days before the end of the semester in which the degree is to be granted. To be passed in this examination, the student may not receive more than one abstention or dissenting vote.

Requirements for the Master's Degree

The departmental announcements in this catalog should be consulted in all instances; however, the following rules apply to all master's degree programs.

Course Credit

A minimum total of 30 credit hours of graduate credit is required for the master's degree. At least 15 credit hours must be in courses of the

major subject area, and the remaining hours in the program distributed as recommended and approved by the major department. At least one-half of the credits counted toward the degree (exclusive of thesis, practicum and internships) must be in courses open to graduate students only (600 level or above). A grade average of 3.0 or better must be maintained.

Residency for Master's Students

Master's students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree.

Time Limitation

There is a time limit imposed, stipulating that credit earned more than six years prior to the completion of the degree may not be counted toward meeting its requirements. This time period may be extended upon recommendation of the student's department chair, unit dean and the approval of the Vice Provost for Academic Affairs.

Maintaining Candidacy

Refer to previous section entitled, General Academic Policies and Requirements (p. 13), see subsection entitled Maintaining Candidacy.

Thesis

Students completing degree programs that include a thesis must submit the thesis to their major professor at least thirty days in advance of graduation (guidelines may be found on the Graduate School website (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>)).

Acceptance of the thesis shall be at the discretion of a special reading committee composed of the major professor and two other committee members. One member shall be from outside the program, and all three members must be qualified to serve on those capacities as specified by their unit's guidelines for Graduate Faculty. The committee shall be approved by the unit dean upon recommendation of the chair of the major department. The committee shall complete its review of the thesis at least one week prior to the final oral examination.

The final manuscript is submitted electronically to the Graduate School through ThinkIR (<https://ir.library.louisville.edu/>), directions on submission will be provided upon review of the thesis by the Graduate School. The final copy is submitted as a PDF. Along with the PDF the student is required to submit a digital/electronic (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) or hard copy of the signature page, which should be on white paper with original signatures. The digital/electronic or original signature page must be submitted to the Graduate School.

Standards for the Preparation of Thesis and Dissertations (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-guidelines-1/>) are available on the website of the Graduate School. Alternate standards must be approved by the Vice Provost for Graduate Affairs if in conflict with these standards.

The thesis normally carries three-six (3-6) credit hours of graduate credit, which is in addition to the 15 credit hour minimum taken within the major department. In certain departments, a professional paper or portfolio may be required in lieu of a thesis. For procedures in these instances, consult the Director of Graduate Studies or the chair of the department.

Each student who is required to submit a thesis to fulfill degree requirements must follow the guidelines for the Preparation of Thesis and Dissertations (<http://louisville.edu/graduate/current-students/>

thesis-dissertation-information/thesis-dissertation-guidelines-1/). Prior to submission of the final copy of a thesis, students must contact the Graduate School to schedule a review of the document.

Final Oral Examination

The final oral examination shall be conducted by a committee of Graduate Faculty members recommended by the chair of the major department and appointed by the unit dean.

The examination must cover the materials presented in the thesis and may include the content of courses taken or other matters pertinent to the candidate's admissibility to the master's degree. At the discretion of the graduate program, a portion of this examination may be written. The recommendation for the degree shall be determined by a simple majority of the committee members. The examination must be taken at least fourteen days before the end of the semester in which the degree is to be granted.

In the event of an unfavorable vote, the committee may refuse the candidate's admissibility to the master's degree, or it may recommend another examination with or without additional work.

Dual Degree Programs

A dual degree program is a formalized path of study that allows a student to pursue two different degrees at the same time, either at the same institution or at different institutions, and possibly complete them in less time than it would take to earn them separately. The two degrees may be in the same subject or in two different subjects; they may be at the same level (e.g., master's-master's) or at two different levels (e.g., doctoral-master's). Students must meet the admission requirements for both degree programs. Other limitations or requirements may apply, depending on the program.

Dual degree programs allow students to earn two master's degrees in cases where there is synergy between the two programs. Course work which is common to both degree programs, or courses which provide similar learning outcomes, may be proposed to count for both degrees with justification of the overlap in learning outcomes of the courses. A dual-degree program that pairs two 30-hour programs may apply nine (9) credit hours of overlapping course work toward each degree, for a total of 51 combined credit hours. A variance may be requested to apply additional coursework for dual-degree programs with higher total credit hours.

Requirements for Graduate Certificate Programs

The following rules apply to all graduate certificate programs.

Graduate certificates are coherent, distinct courses of study at the postbaccalaureate level or higher leading to mastery in a more narrowly defined set of program-learning outcomes than those obtained in a graduate degree program. Graduate certificates are official credentials issued by the UofL Board of Trustees in accordance with the UofL Redbook, and they include postbaccalaureate certificates, post-master's certificates, and post-professional certificates as defined by the Kentucky Council on Postsecondary Education (CPE).

Course Credit

Graduate certificate programs must require at least nine (9) credit hours of graduate coursework at the 500 level or above with at least three (3) credit hours being core requirements of the graduate certificate. Additionally, all graduate certificates must require a culminating experience (e.g., exit exam, thesis, capstone project, capstone course, etc.). Students must achieve a 3.0 or better cumulative grade point average and be in satisfactory standing to be awarded a certificate. Students may apply course credit earned from one or more graduate certificate programs towards a graduate degree, but they must submit an application to the degree program prior to beginning a second certificate that will count toward the degree. Use of credit from certificates is subject to admission to the degree-granting program and must be consistent with both curricular and residency requirements of the degree program. No more than 30% of credits may be shared between certificate programs. This requirement is rounded to the next highest whole credit hour. Consequently, most graduate certificate programs that require nine (9) credit hours may only share three (3) credit hours with another certificate program. Finally, the student must complete the culminating experience and at least 50% of the total credit hours required for the certificate program in residence at the University of Louisville.

Requirements for Accelerated Bachelor's-Master's Programs

Undergraduate students will follow the departmental process to apply for admission to the accelerated program before beginning their final 30 credits of **the bachelor's program**. Only exceptional students who meet all admissions requirements will be eligible for admission to accelerated programs; those who are admitted will be allowed to enroll in graduate coursework in their final 30 hours of the undergraduate program. Students who meet the program guidelines for successful completion of the graduate coursework as an undergraduate may then apply for admission to the master's program.

Students applying for admission to a 30 credit hour to 35 credit hour master's program may take a maximum of nine (9) credit hours as an undergraduate which will count toward both the bachelor's and the master's degree; those applying to a 36 credit hour or more master's program may take a maximum of twelve (12) credit hours that will count toward both the bachelor's and the master's degrees (the guiding principle is that no more than one-third of a student's coursework may be double-counted for two different degrees at different levels).

Graduate credits taken while in a bachelor's program must be transferred to the student's graduate record after the student has completed one semester as a graduate student.

See specific programs for further requirements for applying to an accelerated program.

Application for Degree

Degrees are awarded in August, December, and May. Candidates who expect to receive degrees on a particular award date must complete the application for degree on ULink (<http://ulink.louisville.edu/>) before the deadline specified on the Office of the Registrar website (<https://louisville.edu/registrar/commencement-information.html>).

The University holds two commencement ceremonies each year. For specific information regarding the ceremonies, apparel, dates, etc. please visit the Commencement website (<http://www.louisville.edu/commencement/>).

Grades and Grading Policies

University Grade Point Average (GPA)

The GPA appearing on the University transcript at the end of each semester of enrollment will be the official GPA for determining academic standing. The GPA will be based upon all courses taken while the student is enrolled as a graduate student, including undergraduate courses. Courses taken at the 500-level and above will be counted as graduate courses. While possibly including undergraduate coursework, this transcript will determine the overall Graduate GPA. The program faculty and unit dean will monitor this Graduate GPA to ensure students maintain at least a 3.0 to remain in good standing.

Grading System

Graduate programs at University of Louisville utilize a plus/minus grading system.

The following is the grading scale:

Grades	Quality Points
A+	4.0
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0.0

C Grades

The student's academic program may approve six (6) credit hours of coursework in which a grade of C+, C, or C-minus was received to count toward the completion of degree requirements.

Approval of the Vice Provost for Graduate Affairs must be secured in order to count additional hours with any grade of C in any course that is part of the degree program. In no case may more than nine (9) credit hours of C be used to fulfill graduate degree requirements. Units or programs may choose not to permit any courses in which a grade of C+, C, or C-minus has been earned to be used in fulfillment of degree requirements. Although grades below C-minus will be calculated in the graduate student's grade point average, courses in which these grades have been earned will not be counted towards the fulfillment of degree requirements.

Other Grades

W - means Withdrew and carries no quality points. No student may withdraw from any course after the published drop date. In exceptional cases, the unit dean may grant a student's request to withdraw from

courses because of illness or conditions beyond the student's control. Poor performance is not a valid reason to grant an exception.

I - means Work in Course Incomplete. If the work is not completed by the end of next term, regardless of whether the student is enrolled, the I automatically becomes an F.

X - means course work has not been finished because of the nature of the research or study involved, e.g., thesis or dissertation work. This grade is reserved for courses that by their nature extend beyond one semester. This grade may not be used for coursework that is confined to a semester but not completed by the student.

Graduate students enroll in courses on a term basis. Graduate courses may not be extended beyond the enrollment term, except as noted for open-ended courses eligible for the X or deferred grade. An I grade does not extend the course, but rather extends the time a student has for completion of work assigned in the course. The I must be removed within one semester and the new grade assigned for the term in which the student was originally enrolled or the I is changed to an F.

Pass/Fail Grading Option

Each program has the discretion of extending a Pass/Fail option to any or all of its graduate students and graduate courses.

When using the Pass/Fail option for graduate students enrolled in graduate courses, A+ through C-minus will be passing grades and D+ through F will be failing grades.

Changes of Grades

No changes of grades can be made without a request and explanation on the part of the faculty member giving the grade and the approval of the unit dean.

Missing Grades

All missing grades will be changed to failing grades one year after the completion of the semester in which the course was taken.

Repetition of Courses

A student who has received the grade of C (in a course that is a degree requirement), D, or F may repeat that course upon the approval of the graduate program advisor and the unit dean. When a student repeats a course, the grade point average will be calculated on the basis of the last grade earned, although all previous grades will remain on the transcript.

Graduate Student Academic Grievance Procedure

Introduction

This procedure is designed to provide fair means of dealing with student complaints regarding a specific action or decision made by the faculty or a faculty member.

Students who believe they have been treated unfairly, discriminated against, or have had their rights abridged may initiate a grievance.
(The Redbook (<http://louisville.edu/provost/redbook/>), Section 6.8.1)

Preliminary Steps

To pursue a grievance concerning academic matters within the academic unit, the following steps of the grievance procedure should be observed:

1. The student should first discuss the matter with the person involved and attempt to resolve the grievance through informal discussion.
2. If there is no resolution, the student should discuss the matter with that person's supervisor or the person to whom such person reports, who should attempt to mediate a resolution.
3. If the student has not been able to obtain a resolution, he or she may request the Student Grievance Officer (<https://louisville.edu/dos/students/studentpoliciesandprocedures/student-grievance/>) (S.G.O.) to attempt informal mediation of the problem.
4. If the matter has not been satisfactorily resolved through the informal process, the student shall submit a written statement of the grievance to the Unit Academic Grievance Committee through the Office of the Dean. The statement shall contain:
 - a. A brief narrative of the condition giving rise to the grievance;
 - b. Designation of the parties involved; and
 - c. Statement of the remedy requested.

Committee Action

Upon receipt of the written statement, the Unit Academic Grievance Committee, or its representatives, shall:

1. Contact the student and the Student Grievance Officer to obtain assurance that all steps of the above informal process were completed and that those issues in the statement were discussed at all levels.
2. Notify the parties named in the statement of the grievance naming them; and send a copy of the statement to the named parties and to all committee members.
3. Notify the grievant and the respondent of the right to challenge committee members for cause, and request early notification of challenge(s) to expedite the grievance procedure. Included in this notification will be a list of the names of all current, regular committee members.
4. Meet within twenty working days after receiving the written statement of any grievance and recommend to the dean of the unit whether sufficient grounds exist to accept a case for hearing. The committee shall hear the case when the dean concurs. The committee shall notify, in writing, all persons directly involved as to the reasons for its recommendation.
5. The action of the grievance committee as to whether to grant a hearing when accepted by the dean of the unit shall be final and binding on all parties except when subject to the condition of appeal.
6. If a hearing will be held, notify in writing all the parties involved, including any witnesses, of the date, time and place of the hearing at least ten days prior to the hearing date (which shall be within 30 working days of receipt of the written grievance).
7. Request in writing from all parties involved any pertinent material deemed necessary for review by the committee prior to the hearing. These materials, and any additional materials either party chooses to submit, must be submitted to the committee not later than four days prior to the hearing. Any person named in a grievance may submit a written statement to the committee outlining issues from that person's perspective.
8. Maintain confidentiality throughout the entire grievance process. All communications among the committee, the grievant(s), and the person(s) named in the statement of grievance will be confidential.

Hearing Process

All hearings conducted by the Unit Academic Grievance Committee shall be conducted confidentially in the following manner:

1. The grievant(s) and the respondent(s) must be present during the information-gathering portion of the hearing. Witnesses will be available and will be called when needed. The committee reserves the right to allow the presence of a secretary or a technical assistant.
2. All statements during the information-exchange phase of the hearing will be tape-recorded. This record will be preserved in the University Archives for a minimum of five years and shall be confidential.
3. Any committee member may question any of the participants at the hearing.
4. The grievant will present his or her statements and/or witnesses to the committee.
5. The respondent will have the opportunity to question the grievant(s) and the witnesses about their statements.
6. The respondent will present his or her statements and/or witnesses to the committee.
7. The grievant will have the opportunity to question the respondent(s) about their statements.
8. After all information is exchanged, all persons except the committee members and the recording secretary will leave the committee room. The grievant(s), the respondent(s), and the witnesses will continue to be available to the committee should further information be needed.
9. The committee will meet in closed session to decide upon its recommendation(s) to the dean.
10. The committee shall submit its report with recommendation(s) and reasons for the recommendation(s), to the grievant(s), the respondent(s), and the dean. If the grievance directly involves the dean, the report and recommendation(s) of the Unit Academic Grievance Committee shall be referred for decision to the appropriate academic vice president (now referred to as the University Provost).
11. The student's grievance will not be included as part of the student's record, unless it results in a change in student status or the student voluntarily inserts the information.
12. Until the grievance is resolved, the student may continue the natural academic progression through the academic unit, subject to the requirements of Article 6.6, "Academic Review, Advancement, Probation, and Dismissal of Students," and Article 6.7, "Nonacademic Disciplinary Procedures," of *The Redbook*.

Decision

The dean shall approve or reject the committee's recommendation(s) within twenty-eight days after receiving it (them). If the decision of the dean is not in accord with the committee's recommendation(s), the dean shall state the reasons for that decision, in writing, to all persons directly involved in the grievance and to the committee. The dean shall then take appropriate action to implement his or her decision after the time for appeal has elapsed.

Rehearing

A grievance committee, within twenty-one days after delivery of its report, may be petitioned to reconsider its decision upon the basis of evidence of misrepresentation of materials, facts, or upon the basis of newly discovered evidence clearly not available at the original hearing.

Appeal

Any party to the grievance may appeal to the University Student Grievance Committee within twenty-one days from the date of the final decision of the dean if the dean's decision does not concur with the recommendation of the grievance committee.

Leave of Absence

A student who has been accepted into a graduate program is expected to remain in continuous enrollment, either full-time or part-time, throughout his/her matriculation. Students who fail to enroll for a period of more than 12 months will be considered to have withdrawn from the program. Once a student enters candidacy, he/she must maintain continuous enrollment in degree candidacy (fall, spring, summer) and pay the appropriate candidacy fee.

However, if circumstances arise that may cause an interruption in graduate study a student may apply for a leave of absence by requesting such a leave from the unit dean. A requested leave cannot exceed one year; however, under extreme circumstances, a second, subsequent request may be granted by the Vice Provost for Graduate Affairs. Students must be considered in good standing for the request to be considered.

A student may not be enrolled in the university during a leave of absence. A student on a leave of absence is not required to pay tuition, fees, or candidacy fees, but is not entitled to any services from the university during the leave, including mentorship from faculty.

If a leave of absence is granted to a doctoral student in candidacy, the time limitation of completing all other requirements within four years after passing the qualifying examination shall be extended by the same time as the length of the leave. However, an appeal for an extension of this time limit, specifying the exact circumstances, can be included in the request for a leave or submitted as a variance request submitted to the department for their review and recommendation to the unit dean; the final decision rests with the Vice Provost for Graduate Affairs.

No degree will be granted to a student on an official leave of absence. The student must re-enroll in the next term following the conclusion of the leave and be enrolled in the term in which a degree is granted. A leave of absence does not relieve a student from adherence to policies regarding residency and candidacy (except that the time limit for candidacy may be extended, as indicated in the previous paragraph).

Policies Governing Graduate Courses

Graduate Courses

Courses with numbers from 500 to 599 may be open to both advanced undergraduate and graduate students and can be taken by graduate students for graduate credit. Those numbered 600 and above are primarily for graduate students.

Graduate Students Taking 500-Level Courses

Graduate students who wish to receive graduate credit for 500-level courses must complete additional requirements (such as additional written work or oral presentations) that are more stringent than those required of undergraduates. These additional requirements for graduate credit must be specified in the course syllabi. The student's completion of graduate requirements must be verified in writing by the instructor if graduate credit is requested after the course is completed.

Not all 500-level courses are available for graduate credit. The student is advised to consult his/her department for information on any particular 500-level course.

Undergraduates Taking Graduate Courses

Courses at the 500-level may be open to both advanced undergraduate and graduate students. Courses numbered at the 600-level and above are for graduate students only. Undergraduate students requesting to enroll in a 500-level course for graduate credit or in a 600-level course may do so **only with special permission of the instructor in the course and the dean of the student's enrollment unit, be registered for at least one undergraduate course, have earned at least 60 credit hours of coursework at the undergraduate level, and have a cumulative GPA of at least 3.0.** A maximum of nine (9) credit hours of graduate coursework may be applied to the undergraduate degree. Such graduate level courses will satisfy requirements toward the undergraduate degree and therefore cannot be used for subsequent graduate credit.

In rare cases, undergraduate students at the University of Louisville who are within six (6) semester hours of completing the baccalaureate requirements and who are enrolled in a graduate course may obtain graduate credit at the University of Louisville. This can only occur if the course has not been used to satisfy part of the baccalaureate requirements, and if the chair of the department involved and the unit dean approve.

Accelerated Bachelor's/Master's Option

Undergraduate students will follow the departmental process to apply for admission to the accelerated program before beginning their final 30 credits of **the bachelor's program**. Only exceptional students who meet all admissions requirements will be eligible for admission to accelerated programs; those who are admitted will be allowed to enroll in graduate coursework in their final 30 hours of the undergraduate program. Students who meet the program guidelines for successful completion of the graduate coursework as an undergraduate may then apply for admission to the master's program.

Students applying for admission to a 30-hour to 35-hour master's program may take a maximum of nine (9) credit hours as an undergraduate which will count toward both the bachelor's and the master's degree; those applying to a 36-hour or more master's program may take a maximum of twelve (12) credit hours that will count toward both the bachelor's and the master's degrees (the guiding principle is that no more than one-third of a student's coursework may be double-counted for two different degrees at different levels).

Graduate credits taken while in a bachelor's program must be transferred to the student's graduate record after the student has completed one semester as a graduate student.

See specific programs for further requirements for applying to an accelerated program.

Continuing Studies and Post-baccalaureate Students

Students enrolled through Continuing Studies are not eligible to enroll in graduate level courses.

Post-baccalaureate students who wish to take only graduate level courses should seek admission as a non-degree graduate student by applying through the Graduate School. Students who wish to transfer

coursework to a graduate degree must take the coursework as a non-degree graduate student or be admitted to a graduate degree program at the time of the request.

Graduate Student Awards and Honors

Student Awards

Programs may nominate graduate students for the following awards given at December and May Doctoral Hooding and Graduation ceremonies. Those individuals who received their degrees in August must be nominated for consideration during the December Doctoral Hooding and Graduation ceremony.

Graduate Dean's Citation

Graduate Dean's Citations are awarded at each commencement to both masters and doctoral students recommended by their departments in recognition of superior accomplishment (e.g., publications, teaching excellence, and professional service) in their graduate studies beyond the achievement of a high grade point average.

To be eligible for a Graduate Dean's Citation, a student must have significant accomplishments (e.g. publications, teaching excellence, and professional service) beyond the achievement of a high grade point average. The letter of nomination should include a description of the nominee's achievements in the areas of scholarship, teaching, and service, as applicable. Each graduate program may recommend at least one prospective graduate, or up to 10 percent of its graduating class, for the Graduate Dean's Citation. Nominations may be submitted to the Vice Provost for Graduate Affairs for the December and May commencements.

Alice Eaves Barns Award

This award is named in honor of Mrs. Alice Eaves Barns for her many years of outstanding service as a staff member of the Graduate School at the University of Louisville. This award recognizes a master's degree recipient who has displayed tenacity in the face of adversity, while attaining excellence in both the classroom and outside endeavors. The award nomination letter must reference the difficulties the student had to overcome while in graduate school and must specify the student's achievements.

All students nominated for the Alice Eaves Barns award are automatically considered for a Graduate Dean's Citation.

The Virginia "Jenny" Madden Award for Graduate Student Leadership and Service

This award is named in honor of Virginia "Jenny" Madden for her many years of service to the former Graduate School, the Staff Senate, and the University of Louisville community. This award recognizes a

master's degree recipient who exhibits leadership through service to the recipient's program, college, discipline, the University as a whole, and/or the community. The nomination letter must reference the student's contributions and the impact of those contributions on the communities served.

All students nominated for the Virginia "Jenny" Madden award are automatically considered for a Graduate Dean's Citation.

Guy Stevenson Award

The Guy Stevenson Award for Excellence in Graduate Studies honors a former Graduate Dean. The Stevenson Award recognizes an outstanding doctoral degree recipient who has demonstrated excellence in both scholarship and leadership within the discipline, and has made significant contributions to teaching and service, as applicable. The recipient of this award will carry the graduate school banner at the commencement ceremonies, and thus must be available for the ceremonies to be considered. This student will provide remarks of no more than five minutes during the Doctoral Hooding and Graduation ceremony and will also be a candidate for the student commencement speaker for the main commencement ceremony. The nomination letter must include program/discipline-specific standards of excellence to help the multi-disciplinary committee evaluate the nominee and a statement that the student will attend both commencement ceremonies.

All students nominated for this award are automatically considered for a Graduate Dean's Citation and for the John Richard Binford Memorial Award.

John Richard Binford Memorial Award

The John Richard Binford Memorial Award honors a former chairman of the Department of Psychology. The award is presented to a doctoral degree recipient who excels in scholarship and has contributed to other areas within the discipline such as leadership, teaching, or service, as applicable. The nomination letter must include program/discipline-specific standards of excellence to help the multi-disciplinary committee evaluate the nominee.

All students nominated for this award are automatically considered for a Graduate Dean's Citation.

John M. Houchens Prize

The John M. Houchens Prize honors a former Registrar of the University. The Houchens Prize is awarded to the doctoral student whose dissertation has potential for significant impact on a field. The nomination letter must provide a description in lay language, accessible to faculty from various disciplines, of the significance of the dissertation work, the impact within the discipline and the broader applications of the work. An electronic copy of the nominated dissertation must be submitted to the Graduate School.

All students nominated for the John M. Houchens prize are automatically considered for a Graduate Dean's Citation.

Nomination Procedures:

The department Chair or DGS must submit the nomination material via the Graduate School website (https://login.microsoftonline.com/organizations/oauth2/v2.0/authorize/?client_id=c9a559d2-7aab-4f13-a6ed-e7e9c52aec87&redirect_uri=https%3A%2F%2Fforms.office.com%2Flanding&state=eyJ2ZXJzaW9uLjoxLCJkYXRhIjpw7lklkZW50aXR5UHJvdmlkZXIiOiI%20id_token&scope=openid)

%20profile&response_mode=form_post&nonce=638766322378145726.MDgyYzFkZjE5MjUyZWVlbnRlLnB1dC5kaW50MDUzJg2Ny00MD
client-SKU=ID_NET9_0&x-client-ver=8.3.0.0).

Privacy of Student Records (FERPA)

Faculty Awards

Department chairs and directors of graduate programs and former graduate students and those graduating at the May ceremony may nominate a faculty member for the following awards given at the May ceremony:

Outstanding Mentor of a Doctoral Student
Outstanding Mentor of a Masters Student

Mentor awards honor faculty members who are deemed to excel in one-on-one mentoring of master or doctoral students to the completion of their degrees; in other words, these awards are given to faculty who successfully direct theses or dissertations, supervise students in labs, oversee students' internships or final professional papers.

Provost's Award for an Exemplary Director of Graduate Studies

This award honors those who have graduate or professional student advising and/or administrative duties (as DGS) designated on their annual workload assignments and who excel at the work of advising graduate students regarding program requirements, career prospects, funding possibilities, and so on.

University Policies and Procedures

Student Grievance Officer

Students who have complaints, grievances, or concerns regarding courses taken at the University of Louisville or other University policies or services should contact the Student Grievance Officer to have the issues resolved in an expeditious, fair, and amicable manner. Students should first seek to resolve their complaints through informal discussion and administrative channels. The same resources are provided to on-campus and off-campus students.

The Student Grievance Officer (<https://louisville.edu/dos/students/studentpoliciesandprocedures/student-grievance/>) is responsible for informing students of their rights and obligations under the University's Student Grievance Procedures (<http://louisville.edu/provost/redbook/contents.html/chap6.html#ART68>). The Student Grievance Officer will seek to resolve informally as many grievances as possible. For assistance, please contact Dr. Joy Hart at joy.hart@louisville.edu or call (502) 852-6293.

Privacy of Student Records (FERPA)

The University of Louisville hereby notifies students concerning the Family Educational Rights and Privacy Act of 1974 (FERPA). This Act, with which the institution intends to comply fully, was designed to protect the privacy of educational records, to establish the right of students to inspect and review their education records, and to provide guidelines for the correction of inaccurate or misleading information. Students also have the right to file complaints with the Family Educational Rights and Privacy Act Office, Department of Education, concerning alleged failures by the institution to comply with the Act.

The University has adopted a policy which explains in detail the procedures to be used by the University for compliance with the provisions of the Act and the regulations adopted pursuant thereto. Questions concerning the Family Educational Rights and Privacy Act may be referred to the office of University Counsel or visit the website at: louisville.edu/counsel/ferpa-1 (<https://louisville.edu/counsel/ferpa-1/>)

Drug-Free Schools and Campuses

Drug-Free Schools and Crime Awareness, Campus Security Information Report 1993, and Communities Act Amendments of 1989

Purpose and Goal

The University of Louisville is committed to protecting the safety, health and wellbeing of all students, faculty, and staff and other individuals in our workplace. As a recipient of federal grants and contracts, the university gives this notice to students, faculty, and staff that it is in compliance with the Drug-Free Workplace Act of 1988 (Pub. L. 100-690, Title V Subtitle D) and the Drug-Free Schools and Communities Act Amendment of 1989. Students, faculty and staff are herein notified of the standards of conduct that will be applicable while on university property, business, and/or at university-sponsored activities. This policy is incorporated and is a part of the official University of Louisville Policies and Procedures.

This policy recognizes that student, faculty, and staff involvement with alcohol and other drugs can be very disruptive, adversely affect the quality of work or academic performance of student, faculty, and staff, pose serious health risks to users and others, and have a negative impact on productivity and morale.

As a condition of employment or enrollment, the university requires that students, faculty, and staff adhere to a strict policy regarding the use and possession of drugs and alcohol. The university encourages students, faculty, and staff to voluntarily seek help with drug and alcohol problems.

Prohibited Behaviors

Under university regulations, federal law, state law, and, in some instances, local ordinance, students, faculty, and staff are prohibited from the unlawful possession, use, dispensation, distribution, or manufacture of illicit drugs on university property, on university business and/or at university-sponsored activities. Under this policy, students, faculty and staff are required to abide by state laws concerning alcoholic beverages.

Kentucky law (<https://apps.legislature.ky.gov/>) (KRS 244.085 (<https://apps.legislature.ky.gov/law/statutes/statute.aspx?id=50405>)) states that, if one is under the age of 21, it is unlawful to:

- Possess or consume alcoholic beverages,
- Misrepresent one's age for the purpose of purchasing alcoholic beverages, or
- Use a fake ID in an attempt to purchase alcoholic beverages.

It is unlawful for anyone of any age to:

- Procure any alcoholic beverages for anyone under 21 years of age,
- Drink or be intoxicated in a public place (Public Intoxication KRS 525.100 (<https://apps.legislature.ky.gov/law/statutes/statute.aspx?id=19929>))

University campuses and buildings are considered as public places for purposes of these laws, except for a facility licensed to serve alcoholic beverages, and a facility used as a private residence, unless university regulations state otherwise. Ordinances of the Greater Louisville area parallel the state laws.

The specifically defined standards of conduct, the disciplinary procedures, and the appropriate sanctions are detailed in the Code of Student Conduct (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/student-conduct/>), Personnel Policies and Procedures (PER-5.01), Staff Handbook (Disciplinary Action, page 8.2) and *The Redbook*.

In addition, it is a violation of state law to operate a motor vehicle while under the influence of any substance that may impair one's driving ability (drugs or alcoholic beverages).

Prescription and over-the-counter drugs are not prohibited when taken in standard dosage and/or according to a physician's prescription. Any student, faculty, and staff taking prescribed or over-the-counter medications will be responsible for consulting the prescribing physician and/or pharmacist to ascertain whether the medication may interfere with job or academic performance.

The illegal or unauthorized use of prescription drugs is prohibited. It is a violation of our drug-free workplace to intentionally misuse and/or abuse prescription medications. Appropriate disciplinary action will be taken if job or academic performance deterioration and/or other accidents occur.

Consequences for Violating This Policy

Under university regulation, students who violate this standard of conduct are subject to student conduct action from a warning to expulsion from the University. Students who reside in university housing are subject to further conduct action that may vary from a warning to termination of their housing contract.

Notice of Drug-Related Conviction

In compliance with the Federal Drug-Free Workplace Act of 1988, any employee shall notify the immediate supervisor if the employee is convicted of a criminal drug offense occurring in the workplace or while on university business within five days of the conviction. The university shall take appropriate sanction and remedies in accordance within its policies. The provisions of this section are applicable to students who are employees of the university. If the employee is under a federal contract or grant, the university shall notify the contracting or granting agency of the conviction and of its actions. This section of this policy is also applicable to students who receive a Pell grant (federal grant).

Health Risks

The scope and impact of health risks from alcohol and drug use are both alarming and well documented, ranging from mood-altering to

life-threatening, with consequences that extend beyond the individual to family, organizations and society at large. The university, therefore, conducts regular programs to educate its students, faculty, and staff that consumption and use of drugs may alter behavior, distort perception, impair thinking, impede judgment, and lead to physical or psychological dependence.

Alcohol and/or drug use may lead to the deterioration of physical health by causing or contributing to various health conditions including but not limited to fatigue, nausea, personal injury, insomnia, pathological organ damage, some forms of cancer, pancreatitis, heart attack, respiratory depression, birth defects, convulsions, coma, and even death. Alcohol and drug use may also result in deterioration of mental health by causing or contributing to various conditions such as increased aggression, hallucinations, depression, disorientation, and psychosis.

Alcohol consumption causes a number of marked changes in behavior. Even low doses significantly impair the judgment and coordination required to drive a car safely, increasing the likelihood that the driver will be involved in an accident. Low to moderate doses of alcohol also increases the incidence of a variety of aggressive acts, including spouse and child abuse.

Moderate to high doses of alcohol cause marked impairments in higher mental functions, severely altering a person's ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol will produce the effects just described. Repeated use of alcohol can lead to dependence. Sudden cessation of alcohol intake is likely to produce withdrawal symptoms, including severe anxiety, tremors, hallucinations, and convulsions. Alcohol withdrawal can be life-threatening. Long-term consumption of large quantities of alcohol, particularly when combined with poor nutrition, can also lead to permanent damage to vital organs such as the brain and the liver.

Mothers who drink alcohol during pregnancy may give birth to infants with fetal alcohol syndrome. These infants have irreversible physical abnormalities and intellectual disabilities. In addition, research indicates that children of alcoholic parents are at greater risk than other children of becoming alcoholics.

Training, Counseling, and Resources

The University of Louisville is committed to the overall health and well-being of students, faculty, and staff and encourages a compassionate university.

Required online sexual assault prevention training programs

Consistent with federal law, UofL requires, as a condition of course registration, that all incoming students complete online sexual assault prevention training. Emails are sent to each student's UofL email account (beginning about 5 weeks before their first semester begins) to provide specific directions for accessing the training program. There is no fee for this program.

The university also recommends an online alcohol awareness training that is available. There is no fee for this program.

Visit the Title IX (<https://louisville.edu/titleix/>) website for more information.

Kentucky Medical Amnesty Law

KRS 244.992 (<https://apps.legislature.ky.gov/law/statutes/statute.aspx?id=42516>) Medical amnesty for persons reporting an alcohol overdose:

- (1) A person shall be immune from prosecution for the criminal offenses identified in subsection (2) of this section if:
- (a) A law enforcement officer has contact with the person because the person:
1. Requests emergency medical assistance for himself or herself or another person;
 2. Acts in concert with another person who requests emergency medical assistance; or
 3. Appears to be in need of emergency medical assistance and is the individual for whom the request is made

See KRS 244.992 for full text.

Good Samaritan Consideration

The health and safety of our students is of the highest priority. At times, students may need immediate medical or other professional assistance. However, students may be reluctant to get help because of concerns that their own behavior may be a violation of the Code of Student Conduct (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/student-conduct/>). Although policy violations cannot be overlooked, the University will consider the positive impact of reporting an incident when determining the appropriate response for policy violations.

Continuous efforts are made to make students, faculty, and staff aware of programs that provide information and professional services on matters related to the abuse of alcohol and drugs.

The Building Resilience In Campus Community (BRICC) Coalition, Counseling Center, Health Promotion Office, The PEACC Center, and the University of Louisville Police Department provide a number of programs and workshops using a tiered approach: a) primary prevention in the form of awareness, skill-building, and risk-reduction for all students and b) targeted presentations for specific high-risk populations.

The University Counseling Center is committed to assisting students with their mental health, personal development, and academic development. Because substance use is often connected to other personal/psychological issues, students coming to the Counseling Center with alcohol and substance use concerns are provided with support, appropriate therapeutic interventions, and referrals when necessary.

- Health Promotion Office: (502) 852-5429; louisville.edu/healthpromotion/ (<http://louisville.edu/healthpromotion/>)
- The PEACC Center: (502) 852-2663; louisville.edu/peacc/ (<http://louisville.edu/peacc/>)
- University of Louisville Police Department: (502) 852-6111 (Belknap), (502) 852-2402 (HSC), (502) 852-1436 (Shelby Campus); louisville.edu/police/ (<http://louisville.edu/police/>)

Disability Resource Center

In recognition of disability as an important part of the diversity of our community, the Disability Resource Center fosters an inclusive campus climate through education, service, collaboration, and outreach to the University of Louisville community. We provide support for students with documented disabilities by promoting equal access to all programs and services. Accommodations and support services are individualized, depending on the needs of each student.

The Disability Resource Center also offers an academic coaching program for students with disabilities. Peer coaches work with participating students one-on-one each week to provide support in meeting the demands of college coursework and staying organized.

Students are strongly encouraged to make early contact with the Disability Resource Center to assure adequate time to implement support services. Please visit louisville.edu/disability (<http://louisville.edu/disability/>) for more information, and feel free to contact us with questions at askdrc@louisville.edu or (502) 852-6938.

Americans with Disabilities Act

The University of Louisville (UofL) is committed to providing equal opportunity for persons with disabilities. This commitment includes complying with the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973. UofL strives to maintain a barrier-free, welcoming environment for all qualified persons with disabilities.

The university's ADA Coordinator will monitor compliance and assists unit heads in meeting equal opportunity obligations. The ADA coordinator is located in Grawemeyer Hall:

ADA Coordinator

Grawemeyer 202

(502) 852-0769

<https://louisville.edu/ada> (<https://louisville.edu/ada/>)

The Disability Resource Center staff (502-852-6938) will assist the University community by serving as an information resource center and coordinating support services for students with disabilities. No otherwise qualified individual with a disability shall, solely by reason of such disability, be excluded from participation in, be denied benefits of, or be subjected to discrimination in university programs. The President, Board of Trustees, Student Government, Faculty and Staff Senates affirm UofL's long standing and continuing commitment to Equal Opportunity for persons with disabilities.

Formal Student ADA Complaint Procedure

The university has a continuing responsibility to monitor and maintain its compliance with the Americans with Disabilities Act of 1990 (ADA) and Section 504 of the Rehabilitation Act of 1973 (Section 504) and their implementing regulations. Internal student complaints alleging non-compliance with the ADA and/or Section 504 should follow the university's complaint procedure (<https://louisville.edu/disability/students/formal-complaint-procedure/>).

The university's formal complaint procedure provides for prompt and equitable resolution of complaints.

Complaints should be directed to the UofL ADA Coordinator at (502) 852-0769 or adacoord@louisville.edu.

Filing a Formal Complaint of Disability Discrimination

A complaint must be filed in writing with the Coordinator. The complaint should contain the name and address of the person filing it and a brief description of the alleged violation. Upon receipt of the written complaint, the Coordinator or his designee shall acknowledge receipt within five workdays.

A complaint should be filed within 180 days after the complainant becomes aware of the alleged violation; however, a complaint filed after that point may be investigated in accordance with this procedure as necessary, in the judgment of the ADA Coordinator, to ensure the university's compliance with the ADA and/or Section 504.

An investigation, as may be appropriate, shall follow a filing of complaint. The Coordinator's office shall conduct the investigation. This University complaint procedure involves an informal but thorough investigation, affording all interested persons and their representatives, if any, an opportunity to submit information relevant to a complaint.

Following completion of the investigation, a written determination as to the validity of the complaint and a description of the resolution, if any, shall be issued by the Coordinator's office and a copy forwarded to the complainant and any individually-named respondent within 60 days of the date the complaint was filed. Should extenuating circumstances (e.g., unavailability of key witnesses, family emergency of investigative staff, etc.) prevent completion of the investigation and determination process within 60 days, the complainant and any individually-named respondents will be timely notified in writing, and will be kept apprised of the status of the Coordinator's handling of the complaint through resolution. In all disputes arising under Section 504 or the ADA the proper standard of proof is preponderance of the information (i.e., more likely than not that the violation alleged in the complaint is true).

The Coordinator's Office shall maintain the files and records relating to the complaints filed.

Requesting Reconsideration of a Determination

The complainant (and any individually named respondent, as appropriate) may request a reconsideration if dissatisfied with the Coordinator's determination. The request for reconsideration should be made in written or electronic form within 15 workdays to the Coordinator's Office.

Requests for reconsideration must present information showing that:

- The original determination applied the incorrect standard or applied the applicable standard incorrectly to the facts of the case; or
- New information that might affect the outcome of the determination but was not available to the Coordinator at the time of the original determination is now available and should be considered.

The Coordinator shall, barring extenuating circumstances that preclude a more timely response (in which case the complainant shall be updated as to the status of the reconsideration request), rule upon the request for reconsideration within 15 workdays after receipt of the request.

An Internal ADA complaint does not preclude other remedies.

The right of a person to a prompt and equitable resolution of the complaint filed hereunder shall not be impaired by the person's pursuit of other remedies such as the filing of a discrimination complaint with the responsible federal department or agency. Use of this complaint

procedure is not a prerequisite to the pursuit of other remedies, nor does one's pursuit of outside remedies preclude one's filing a complaint pursuant to this procedure.

These rules shall be construed to protect interested persons, to meet appropriate due process standards, and to assure that the university complies with the ADA, Section 504, and their implementing regulations.

Title IX Director's Office

The University strives to provide a safe environment and is committed to keeping the health and well-being of the campus community in the forefront of our thinking. Title IX Director ensures that every person affected by the University's operation, including faculty, staff, and students, is aware of their legal rights under Title IX and that the school and all its employees, through its policies, procedures and practices, complies with its legal obligations. Specifically, the Title IX Director oversees the University's preventive education about, and response to, sexual misconduct including sexual harassment (includes quid pro quo and hostile environment); sexual assault; domestic violence; dating violence; and stalking.

The Title IX Director's contact information is:

Tim Beam, Title IX Director
Grawemeyer Hall, Suite 202
2301 S. Third Street
Louisville, KY 40208
(502) 852-1198

Email: titleix@louisville.edu

Webpage: <https://louisville.edu/titleix> (<https://louisville.edu/titleix/>) (policies)

Campus Health Services

Student Medical and Mental Health Services

The Campus Health Service provides medical and mental health services to undergraduate, graduate and professional students. Services include primary care, psychiatric, counseling services, travel medicine and nutritional consults as well as allergy injections, immunizations, sports physicals and diagnostic testing.

Although all students are encouraged to call for appointments, walk-in and same day appointments are generally available at both locations. Charges for medical services are applied to the student's insurance and/or health fees. Students are responsible for any balance not covered by insurance or fees. Psychiatric services are covered through student fees.

There are two Campus Health Center locations that serve health needs of our students. The centers are located at:

Belknap Campus
Cardinal Station
215 Central Ave. Suite 110
(502) 852-6479

Health Sciences Center
Health Care Outpatient Center (HCOC)
410 E. Chestnut St. Suite 110
(502) 852-6446

Health Insurance and Health Fees

All students enrolled for at least six hours are charged the Primary Care Health Fee (PCHF) which can be waived within thirty days of the first day of class with proof of health insurance. The fee entitles students to basic services at the health centers such as examinations and allergy injections. This fee is not health insurance and does not provide for specialty care, hospitalization, x-ray or laboratory services. The PCHF fee can be waived within 30 days of the first day of classes of each semester by submitting proof of health insurance or can be used as a supplement to the student's active insurance.

All students enrolled in a program of study that requires them to train in the University's affiliated teaching hospitals such as the MD, DMD, Dental Hygiene, Audiology, and Speech Pathology programs are required to carry major medical insurance and pay a non-waivable Health Professionals Health Fee (HPHF). Students in these programs are charged for the university-sponsored insurance plan but may waive it with proof of alternate coverage. Waiver information will be sent to the student's UofL e-mail account from Academic Health Plans (AHP) in mid-July for the Fall semester and mid-November for the Spring semester. You are not eligible to submit a waiver prior to receiving communication from AHP. An approved waiver must be on file for the current term prior to the supplied deadline for fee to be waived.

For additional information about Campus Health Fees, contact the Insurance Advocate via email at stuins@louisville.edu or visit the Campus Health website (<http://louisville.edu/campushealth/information/fees/primary-care-health-fee/>).

Campus Insurance Advocate

Cardinal Station
215 Central Ave. Suite 110
(502) 852-6519

Office of Health Promotion and Education

Health Promotion, a division of Campus Health Services, provides a variety of wellbeing programs, services, and resources including yoga, chair massage, stress resilience workshops, drop-in guided meditations, flash nap workshops, free & anonymous HIV testing, sexual health and consent workshops, safer sex supplies, healthy eating on campus, cooking workshops, and U-fit coaching.

Office of Health Promotion and Education

Campus Health Services

Student Activities Center

(502) 852-5429

Additional information can be found on the Campus Health Services Office of Health Promotion website (<http://www.louisville.edu/healthpromotion/>).

PEACC—Sexual Assault and Domestic Violence Center

Prevention, Education, and Advocacy on Campus and in the Community

The PEACC Center believes that every student has the right to live, learn, and love free of violence and fear. PEACC provides services and programs that address power based personal violence such as dating violence, stalking and sexual assault. Students who have been directly impacted by personal violence can access free and confidential

support, resources and referrals, and a survivor's network. Services are confidential to the limits provided by law.

In addition, the PEACC Center aims to prevent power-based personal violence by offering training, community discussions, art and activism projects, and awareness events.

The PEACC Center

Student Affairs
2100 South Floyd Street
Student Activities Center, Room 309-H

For more information about the PEACC Center's programs and events please call (502) 852-2663 or visit student.louisville.edu/peacc (<https://student.louisville.edu/peacc/>).

Counseling Center

The mission of the Counseling Center is to provide services and programs that support the psychological well-being, holistic development, and retention of University of Louisville students. The Counseling Center provides short-term individual, group/workshop, and couples counseling, outreach, urgent consultation, and psychological testing for currently enrolled students (psychiatric/medication services are provided by Campus Health).

Our clients seek services for a variety of areas of concern, including psychological, personal/social, academic, and career issues.

There is a sliding fee for psychological testing, but all other services are covered by your student fee. Services are confidential to the limits provided by law.

We are committed to diversity in the provision of services and in supporting the University community, while honoring the unique needs and concerns of all students.

UofL Counseling Center

Student Activity Center (SAC), Suite W204 (Second floor)
louisville.edu/counseling (<http://louisville.edu/counseling/>)
(502) 852-6585

The Counseling Center is accredited by the International Association of Counseling Services (<http://www.iacsinc.org/faqs.html>) (IACS).

The Center is open Monday–Friday from 8:30 am–5:00 pm, and we provide urgent consultations on a walk-in basis from 9:00 am–4:30 pm. We honor all University holidays, closings, and delayed starts.

For more information, including descriptions of our current groups and workshops, please call us or visit our website (<http://louisville.edu/counseling/>).

International Center

The International Center is comprised of Education Abroad, Faculty and Staff, International Travel, the International Student and Scholar Services (ISSS) office, the Passport Place @ UofL, and Global Initiatives.

The International Center develops and promotes global efforts that are inclusive of the campus and local community in conjunction with the internationalization goals of the University. The center focuses on increasing international students and scholars at UofL; providing programming that serves this vital population; expanding cultural competency through increasing the number of students participating in education abroad programs; facilitating student and faculty international

research and travel efforts; and providing quality services in support of these and other global initiatives.

If you are an international student or scholar, email isss@louisville.edu. If you are a student interested in studying abroad, email edabroad@louisville.edu. If you are interested in applying for a U.S. Passport, email passportoffice@louisville.edu. If you are interested in information about international travel, email fasisit@louisville.edu.

Code of Student Conduct

Code of Student Conduct

The University's Code of Student Conduct (<https://student.louisville.edu/code-student-conduct/>) ("The Code") is the University's policy regarding non-academic discipline of students and student organizations.

Academic dishonesty is not covered by this Code but rather falls within the authority of the individual academic units of the University. Students have the responsibility to follow all regulations outlined in this policy.

The primary purpose for the Code in the university setting is to respond to incidents of non-academic misconduct in a way that is developmentally sound and which creates an environment in which all members of the academic community can live, work, and learn together. The Code is designed to provide educational guidance to those choosing to develop into good citizens and, at the same time, to respond appropriately to behavior which may be inconsistent with university policies.

Criminal and civil codes are undesirable models for student conduct codes. Unlike society, the University of Louisville is a voluntary association of scholars who demand and deserve a positive and special learning environment, as well as an approach for enforcing the community's standards. The University of Louisville is a community dedicated to the principles of free expression in which diverse views are encouraged and embraced. Opinions that may be unpopular and/or contrary to the University's values and objectives, but do not otherwise violate policy, will not result in sanctions from the University.

The University's Code of Student Conduct is set forth in writing in order to give students general notice of non-academic prohibited conduct. The Code should be read broadly and is not designed to define non-academic misconduct in exhaustive terms. The Vice President for Student Affairs (VPSA) or designee is the final authority in defining and interpreting the Code of Student Conduct and conduct procedures. The University reserves the right to amend the Code of Student Conduct at any time.

The Code (<https://student.louisville.edu/code-student-conduct/>) can be found at the Dean of Students website (<https://student.louisville.edu/>)

dean-students/). Contact the Dean of Students Office in SAC W301 by email (dos@louisville.edu) or by phone at (502) 852-5787.

Code of Student Rights and Responsibilities

The Code of Student Rights and Responsibilities is set forth in writing to provide students with general notice of their rights and responsibilities at the University of Louisville. Further rights and responsibilities are set forth in other University rules and policies, including the Code of Student Conduct, Student Handbook, Residence Hall contracts, graduate and undergraduate catalogs, and academic unit websites. It is the students' responsibility to be aware of all University rules and policies; students should check with the Dean of Students Office and with their academic units if they have any questions about the purposes or intent of these policies.

The Code of Student Rights and Responsibilities (<https://student.louisville.edu/dean-students/policies/code-rights-and-responsibilities/>) is located on the Dean of Students website (<https://louisville.edu/dos/>).

Student Handbook

Other policies and information for students can be found in the online Student Handbook (<https://student.louisville.edu/dean-students/policies/student-handbook/>).

Student Advocacy and Support

The Student Advocate helps students navigate educational, personal, and other campus obstacles that impact successful completion of their academic goals. The Student Advocate links students with appropriate University and community resources and follows through to assist with student concerns while collaborating with faculty and staff in the best interest of the students.

At times, students may experience a variety of issues that impact their ability to be academically successful, such as illness, death of an immediate family member, accident, critical issues such as sexual assault, harassment, domestic violence, or other emergency situations. The Student Advocate works with students and their families to resolve issues by identifying options and strategies and offering information and guidance. During difficult times, students should be empowered with the resources to make informed decisions and take a proactive role in the problem resolution process.

While the academic and non-academic complaint processes (<https://student.louisville.edu/dean-students/complaints-grievances/>) differ, both types of complaints should be submitted through the Complaint Form (https://cm.maxient.com/reportingform.php?UnivofLouisville&layout_id=10) to initiate the appropriate process. Submitting this form is the first step for both academic and non-academic-related matters.

The Student Advocate is in the Dean of Students Office, SAC W301. For assistance, please email the Student Advocate (advocate@louisville.edu) or call (502) 852-5787 to schedule an appointment.

Student Grievance Officer

Students who have complaints, grievances, or concerns regarding courses taken at the University of Louisville or other University policies or services will be referred to the Student Grievance Officer to have the issues resolved in an expeditious, fair, and amicable manner. Students

should first seek to resolve their complaints through informal discussion and administrative channels. The same resources are provided to on-campus and off-campus students.

The Student Grievance Officer (<https://student.louisville.edu/dean-students/complaints-grievances/>) is responsible for informing students of their rights and obligations under the University's Student Grievance Procedures (<https://student.louisville.edu/dean-students/complaints-grievances/>). The Student Grievance Officer will seek to resolve informally as many grievances as possible. Students with academic complaints will be referred to the Student Grievance Officer as appropriate.

Scholarships and University Fellowships

University Fellowships

A limited number of University fellowships may be awarded to outstanding students in the doctoral programs. These carry a generous stipend, health insurance, and full tuition remission. University Fellows are not expected to provide services beyond those appropriate to the completion of their degree requirements. Students do not directly apply to the Graduate School for these awards; nominations are made in early spring to the Dean of the Graduate School by either the Chair or Director of Graduate Studies of departments granting the doctorates. Students who wish to be considered for fellowships should abide by the graduate program's deadline for submitting application materials.

Graduate Assistantships

Graduate teaching, research, and service assistantships are available to qualified students in most graduate programs. The purpose of a graduate assistantship is to provide experience and training that augment a student's academic program, and assistantships are awarded on an individual basis according to the needs of the department, professor or project. The department Chair or Graduate Program Director will attempt to place a student in an assistantship believed to best serve the career training objective of the student. Although a student is free to make known a preference for a particular placement, the final decision is the prerogative of the department in which the student is enrolled.

Students do not directly apply for these awards; the individual graduate program selects the student(s) for an assistantship offer. Applicants who are interested in being considered for assistantships should contact to the Chair or Graduate Program Director of the department to which they are applying for admission, stating their desire to be appointed as a graduate assistant. The award of an assistantship is competitive; students who hope to be considered should present credentials that

are well above the minimum required for admission. The distribution of assistantships across departments may differ from year to year.

Graduate assistantships must include a stipend (minimum \$1,300 per month for master's students; doctoral stipends vary by discipline), student health insurance and full tuition. The duration of funding and conditions to maintain the assistantship should be outlined in the student's letter of award. The duration of funding for which these appointments are renewable and depends on the department, although the university typically provides (or guarantees) four years of funding to doctoral students, two to master's, and three for master of fine arts students who continue to make progress toward the degree; the university-wide maximums for this type of university sponsored financial support are six years for doctoral students, three for master's students, and four for master of fine arts students.

Funded Student Non-Resident Tuition Exception

It is the policy of the University of Louisville that non-resident graduate students who are funded with a full stipend, health insurance and tuition are coded as "residents" for tuition purposes only. As long as a non-resident graduate student receives a full stipend whose funding source (for stipend, tuition, and health care) is through a university account (e.g., university funded assistantships and fellowships, but also grants, contracts, endowments), the student's tuition will be billed at the resident rate.

Funded non-resident students remain non-residents for all purposes other than tuition. If a student loses funding for whatever reason (including that their contract is not renewed), they will be switched to "non-resident" for the purposes of tuition as well; if they switch graduate programs or apply to a professional program where they are not funded, they will be considered "non-resident" for the purposes of tuition.

Accepting and Declining an Offer of Financial Support

As a member of the Council of Graduate Schools in the United States, the University of Louisville subscribes to the Resolution Regarding Scholars, Fellows, Trainees, and Graduate Assistants (<http://cgsnet.org/april-15-resolution/>):

Acceptance of an offer of financial support (such as a graduate scholarship, fellowship, traineeship, or assistantship) for the next academic year by a prospective or enrolled graduate student completes an agreement that both student and graduate school expect to honor. In that context, the conditions affecting such offers and their acceptance must be defined carefully and understood by all parties.*

Students are under no obligation to respond to offers of financial support prior to April 15; earlier deadlines for acceptance of such offers violate the intent of this Resolution. In those instances in which a student accepts an offer before April 15, and subsequently desires to withdraw that acceptance, the student may submit in writing a resignation of the appointment at any time through April 15. However, an acceptance given or left in force after April 15 commits the student to first inform the program that they are withdrawing or resigning from the offer of financial support that they previously had accepted. Starting in Fall 2020, applicants are no longer required to obtain a formal release from the program whose offer they accepted, either before or after the April 15 deadline. It is further agreed by the institutions and organizations subscribing to the above Resolution that a copy of this Resolution or a link to the URL should

accompany every scholarship, fellowship, traineeship, and assistantship offer.

Financial Aid and Financial Settlement

Office of Student Financial Aid

The Office of Student Financial Aid serves prospective students, current students, and their parents with financial aid questions and needs.

Website: louisville.edu/financialaid (<http://louisville.edu/financialaid/>)

Email: finaid@louisville.edu

Call center: (502) 852-5511

Campus location: 110 Houchens Building, Belknap Campus

Website

On the Student Financial Aid website (<http://www.louisville.edu/financialaid/>), visitors can access the following:

- Term-specific information on aid disbursement, residual funds, and financial aid advances;
- Financial aid news and upcoming important dates;
- Aid application and processing instructions;
- Award sources and types;
- UofL and outside scholarship postings;
- Consumer information.

Email Service Account

Send your email questions to finaid@louisville.edu. For specific account information, current students must email the office from their UofL account.

Call Center

Contact the call center at (502) 852-5511 from 9:00 a.m. to 4:00 p.m. Monday through Friday. On Thursdays, the call center opens at 11:00 a.m.

This service is intended to assist prospective students, current students, and parents with their general financial aid questions. We ensure students' privacy by not disclosing account-specific information. Current students should have their student ID number ready when calling.

Office Hours

The Student Financial Aid Office provides walk-in counseling to both current and prospective students Monday, Tuesday, Wednesday, and Friday from 9:00 a.m. to 4:30 p.m.

On Thursdays, the office and call center are open from 11:00 a.m. to 4:30 p.m.

Check the Student Financial Aid Office website (<http://louisville.edu/financialaid/>) for special hours during the August and January class registration periods.

Continuing Registration

Tuition and fees are due on, or before, the designated due date for the semester. Payment may be made by check, money order, charge card (MasterCard, Visa or Discover), or financial aid credit. Payments may be made by mail or at the Office of the Bursar located at 110 Houchens Building on Belknap Campus.

Failure to receive a Statement of Account will not relieve the student of the responsibility for making financial settlement by the designated due date. Continuing registrations which are not financially settled by the designated due date may have their course registration cancelled and/or be assessed financial penalties. The Continuing Registration designated due dates are listed in the current Schedule of Courses and on the Bursar's web site at: ulink.louisville.edu (Tuition-Fees-Payment Options, Payment Options). Students may view their account via ULink. Financial statements are no longer sent to students via mail. All account information may be found on the students ULink.

Regular Registration

Students who register after Continuing Registration should be prepared to fully settle financial obligations by the last day to drop/add for the semester. Failure to fully settle financial obligations may result in course cancellation and/or financial penalties.

Senior Citizen Tuition Remission

The University offers tuition remission to individuals who are classified as residents of Kentucky and are at least 65 years of age on, or before, the first day of classes for the semester. Special costs, such as course fees and parking, are not covered by this program and are the financial responsibility of the student. Proof of age may be shown by presenting a driver's license or other age verification document at the Office of the Bursar.

These individuals must secure permission of the Graduate School in order to enroll in graduate-level courses. Normal admission processes must be followed in order to gain admission to a degree program. Students enrolled as Continuing Studies students are not eligible to enroll in graduate level courses.

Financial Penalties

Students whose accounts are not paid by the established semester deadlines may be subject to financial penalties. Students with unpaid account balances will have a Bursar Registration Hold placed on their student account. Students that have a Bursar Registration Hold become ineligible for further registration and transcripts will not be released until the student account is paid in full. Effective Spring 2015 a late payment fee of \$100.00 may be assessed when student accounts are not paid by the last day to drop/add for the semester. A return payment fee of \$25.00 may be assessed when payment is not honored by the bank on which it was drawn. If restitution is not made within 10 days of notification, the student may be subject to financial penalties and/or legal action.

Debtors who do not make satisfactory payment arrangements on their past due accounts may have their accounts placed with a billing service. If not paid through the billing service, the unpaid account may be forwarded to a collection agency. It is the policy of the University that unpaid accounts will be assessed the costs and expenses of collection, including attorney fees. Any E-check or Paper Check payment that is remitted on a Past Due by a previously enrolled student will be subject to a 21-day delay in lifting the related Bursar Registration Hold.

Withdrawal Policy

The effective withdrawal date is the date on which the withdrawal is processed in the Student Records System. This date is used in calculating any applicable tuition reduction.

Financial Aid Recipients

Determinations regarding refunds of resulting credit balances will be based on regulations governing the financial aid awarded to the student.

Federal regulations mandate that students have the right to cancel all or a portion of an EFT loan disbursement and have the loan proceeds returned to the lender. To request cancellation of all or a portion of your loan, contact the Financial Aid Office in writing:

Financial Aid Office
University of Louisville
Louisville, KY 40292

For additional information contact Student Financial Aid Office or review our Consumer Information online at: louisville.edu/financialaid (<http://louisville.edu/financialaid/>)

Financial Settlement Options

Due dates, payment information, payment plan options, and payment plan forms for specific semesters is updated regularly on the Bursar's web site at: ulink.louisville.edu

Tuition-Fees-Payment Options: Any questions may be directed to the Bursar's Office 1) by phone at (502) 852-6503 or 2) by email at bursar@louisville.edu.

Special Facilities and Services

University Libraries

The University of Louisville Libraries (https://cardmail.louisville-my.sharepoint.com/personal/c0durb01_louisville_edu/Documents/library.louisville.edu) provide a dynamic, innovative environment designed to support student success at both the undergraduate and graduate levels by integrating state-of-the-art technology with expert faculty and staff. The University Libraries consist of:

- Ekstrom (Main) Library,
- Archives and Special Collections,
- The Margaret Bridwell Art Library,
- The Louis Brandeis Law Library,
- The Dwight Anderson Memorial Music Library, and
- The Kornhauser Health Sciences Library.

Each library offers versatile, modern spaces equipped with advanced technologies designed to support collaborative research, group projects, and individual study. Many study and meeting rooms are available for online reservations to accommodate diverse needs. Ekstrom Library, open 24/5 during the semester, is a central space for student life and houses a Starbucks. Other libraries publish up-to-date hours on the University Libraries' website.

The University Libraries provide a wide range of in-person and virtual services, including specialized assistance for researchers at all levels, book borrowing, and course reserves. Additionally, in-house resources like the Writing Center, Digital Media Suite, and the Resources for Academic Achievement (REACH) Center provide peer tutoring and academic coaching to support student learning. Equipped with professional-grade technology, these spaces empower students to create and produce high-quality digital and print content while also supporting their academic development.

The Libraries' digital and print collections are curated to meet the needs of the university's academic programs. In addition to traditional print books and journals, the collections feature extensive digital resources, including streaming media, e-books, e-journals, and specialized collections such as student publications and open educational resources. Interlibrary loan services facilitate users' access to materials available outside the University Libraries' holdings.

More information about library facilities, services, and materials can be found at the University Libraries' website (<https://library.louisville.edu/home/>).

University Archives and Records Center

The University Archives is a research repository of national significance. It contains primary sources relating to the university, Louisville, and the nation. It attracts students, faculty, and scholars from Louisville, from elsewhere in the United States, and from other countries. It collects, preserves, and makes available for research historical manuscripts, oral history interviews, and other primary research materials, and thus serves as a research laboratory for humanists, social scientists, and others. Its collections include nineteenth and twentieth-century records of area businesses, cultural organizations, social service agencies, and churches; personal papers of politicians, scholars, members of the Jewish and African-American communities, women, and other prominent and representative Louisvillians; and publications, papers, and photographs documenting the history of the university. Students with class projects, theses, or dissertations requiring primary sources are invited to consult this office.

Information Technology Services

Information Technology Services (ITS) offers numerous technology and computing solutions in support of University of Louisville's teaching, research and service missions. Serving students, faculty and staff, ITS maintains campus wired and wireless networks and delivers enterprise administrative and academic applications. More information concerning ITS can be found at louisville.edu/its (<http://louisville.edu/its/>).

UofL's ULink services is the university's most popular website: ulink.louisville.edu (<https://ulink.louisville.edu/>). ULink is a secure portal to all necessary campus information and services, including the administrative student environments where you can check your class schedule, tuition balance, grades and much more. Most changes to personal information, technology accounts and email addresses are done through ULink. Tutorial videos (<https://louisville.edu/its/ulink/ulink-upgrade/>) are available for assistance. To access ULink, everyone must use UL2FCTR (a Duo product), our second factor of authentication tool that is separate from your username and password. Students and employees must enroll in and use UL2FCTR (Duo) (<https://louisville.edu/its/ul2fctr/>) to access most UofL systems (Blackboard, email, student system and more).

Everyone in the UofL community has an Microsoft Outlook university email as part of an entire Windows Office365 system. Enrolled students have options for online and downloadable O365 (on up to 5 devices – phone, tablet, laptop or desktop) including applications such as Outlook, Word, PowerPoint, Excel, Teams and more plus 50GB of OneDrive storage. See outlook.office365.com (<https://outlook.office365.com/>) for details and login.microsoftonline.com (<https://login.microsoftonline.com/>)

for more about O365 accounts. To claim your email account or change your password to all UofL systems, you must do so through our Identity Management System at identity.louisville.edu (<https://identity.louisville.edu>). Find more info in our knowledge base article (<https://uofl.atlassian.net/l/cp/KrBB2Q1a/>).

The ITS HelpDesk assists the UofL community daily with regard to technology questions and issues. Need help changing your password, for example? The ITS HelpDesk can be reached at helpdesk.louisville.edu (<https://louisville.edu/its/get-help/its-helpdesk/>) for online assistance (chat, incident tickets, self-help) or call (502) 852-7997 to talk to someone. Additionally, ITS provides free, 1:1 walk-in technology help for students, faculty and staff. The iTech Connect team, located in the lower level of the Miller IT Center on Belknap campus can troubleshoot various technology problems like wireless connections, antivirus protection and digital device management. See helpdesk.louisville.edu (<https://louisville.edu/its/get-help/its-helpdesk/>) for hours and details.

ITS maintains the university's extensive networking, including a 200 gigabit campus backbone network and a high-speed intercampus fiber network. Wireless service is universally available for University of Louisville students, faculty and staff and guests across all campuses. Eduroam is our preferred wi-fi but we ask that you use our on-boarding application (uofl.edu/setupwireless (<https://uofl.edu/setupwireless/>)) to access best options for secure wireless.

ITS offers secure, unlimited data storage free for faculty, staff and students via CardBox. A CardBox account lets you synchronize and backup all of your personal files plus collaborate, securely share and edit easily with other UofL users. See louisville.edu/its/cardbox (<https://louisville.edu/its/cardbox/>) for information on how to sign-up for an account.

Another great resource ITS makes available for everyone at UofL is free access to the Adobe Creative Cloud suite of products. With this collection of 20+ desktop and mobile apps for photography, video, audio and web design, you can discover new ways to create and collaborate. The Adobe Creative Cloud (<https://louisville.edu/adobe/>) includes access to industry-leading software applications including Photoshop (<https://www.adobe.com/products/photoshop.html>), Illustrator (<https://www.adobe.com/products/illustrator.html>), InDesign (<https://www.adobe.com/products/indesign.html>), Acrobat Pro DC (<https://acrobat.adobe.com/us/en/acrobat/acrobat-pro-cc.html>), and Premiere Rush (<https://www.adobe.com/products/premiere-rush.html>) among others. Installation instructions, tutorials and support can be found on ITS Adobe Creative Cloud Support (<https://louisville.edu/its/adobe-support/>).

For discounted and free software, sign-in to louisville.onthehub.com (<http://louisville.onthehub.com/>) with your UofL userID and password. Also free to UofL students, faculty and researchers, MATLAB is transformative software for mathematicians, scientists and engineers. Users will find new ways to express computational mathematics, experiment with how to deploy algorithms, visualize complex data sets, and so much more. Check out the information on our portal [UofL.edu/matlab](https://uofl.edu/matlab) (<https://www.mathworks.com/academia/tah-portal/university-of-louisville-31448597.html>).

International Center

The International Center is comprised of Education Abroad, Faculty and Staff, International Travel, the International Student and Scholar Services (ISSS) office, the Passport Place @ UofL, and Global Initiatives.

The International Center develops and promotes global efforts that are inclusive of the campus and local community in conjunction with the internationalization goals of the University. The center focuses on increasing international students and scholars at UofL; providing programming that serves this vital population; expanding cultural competency through increasing the number of students participating in education abroad programs; facilitating student and faculty international research and travel efforts; and providing quality services in support of these and other global initiatives.

If you are an international student or scholar, email iss@louisville.edu. If you are a student interested in studying abroad, email edabroad@louisville.edu. If you are interested in applying for a U.S. Passport, email passportoffice@louisville.edu. If you are interested in information about international travel, email fasit@louisville.edu.

University Housing and the Resident Experience

Be at the center of the Cardinal experience as a resident of UofL University Housing and the Resident Experience.

More than a place to rest your head, UofL's housing program offers a community-like atmosphere that supports students as they successfully transition from high school to college. It's a place where everyone can belong and make life-long connections to their peers. University Housing promotes a safe, convenient, inclusive and healthy living-learning environment, providing opportunities that engage students, facilitate student and faculty connections and encourage student success.

Total facilities include 11 residence halls on Belknap Campus and three affiliated apartment properties bordering Belknap Campus (please see First-Year Live-on Policy (<https://louisville.edu/housing/info/policies/firstyear/>) and Second-Year Residential Requirement (<https://louisville.edu/housing/info/policies/Second-Year-Residential-Requirement/>) for more information).

The residence halls and apartment complexes are home to more than 6,000 students from Louisville, across the country and around the globe. Staffed by a team of professionals with expertise in student learning and development, we strive to make sure learning doesn't stop in the classroom. We emphasize healthy lifestyles and provide programs that facilitate student engagement and personal growth.

Housing is one of the largest employers of students on campus, with more than 175 part-time student employees assisting in resident experience, and other services and programs that support our campus communities and help them thrive. The dynamic combination of professional staff, student leaders, and residents helps make UofL a vibrant campus with something to offer every individual.

For information, please contact the University Housing office:

Website: louisville.edu/housing (<https://louisville.edu/housing/>)
Phone: (502) 852-6636

Email: housing@louisville.edu

Counseling Center

The mission of the Counseling Center is to provide services and programs that support the psychological well-being, holistic development, and retention of University of Louisville students. The Counseling Center provides short-term individual, group/workshop, and couples counseling, outreach, urgent consultation, and psychological testing for currently enrolled students (psychiatric/medication services are provided by Campus Health).

Our clients seek services for a variety of areas of concern, including psychological, personal/social, academic, and career issues.

There is a sliding fee for psychological testing, but all other services are covered by your student fee. Services are confidential to the limits provided by law.

We are committed to diversity in the provision of services and in supporting the University community, while honoring the unique needs and concerns of all students.

UofL Counseling Center

Student Activity Center (SAC), Suite W204 (Second floor)
louisville.edu/counseling (<http://louisville.edu/counseling/>)
(502) 852-6585

The Counseling Center is accredited by the International Association of Counseling Services (<http://www.iacsinc.org/faqs.html>) (IACS).

The Center is open Monday–Friday from 8:30 am–5:00 pm, and we provide urgent consultations on a walk-in basis from 9:00 am–4:30 pm. We honor all University holidays, closings, and delayed starts.

For more information, including descriptions of our current groups and workshops, please call us or visit our website (<http://louisville.edu/counseling/>).

Campus Health Services

Student Medical and Mental Health Services

The Campus Health Service provides medical and mental health services to undergraduate, graduate and professional students. Services include primary care, psychiatric, counseling services, travel medicine and nutritional consults as well as allergy injections, immunizations, sports physicals and diagnostic testing.

Although all students are encouraged to call for appointments, walk-in and same day appointments are generally available at both locations. Charges for medical services are applied to the student's insurance and/or health fees. Students are responsible for any balance not covered by insurance or fees. Psychiatric services are covered through student fees.

There are two Campus Health Center locations that serve health needs of our students. The centers are located at:

Belknap Campus

Cardinal Station
215 Central Ave. Suite 110

(502) 852-6479

Health Sciences Center

Health Care Outpatient Center (HCOC)
410 E. Chestnut St. Suite 110
(502) 852-6446

Health Insurance and Health Fees

All students enrolled for at least six hours are charged the Primary Care Health Fee (PCHF) which can be waived within thirty days of the first day of class with proof of health insurance. The fee entitles students to basic services at the health centers such as examinations and allergy injections. This fee is not health insurance and does not provide for specialty care, hospitalization, x-ray or laboratory services. The PCHF fee can be waived within 30 days of the first day of classes of each semester by submitting proof of health insurance or can be used as a supplement to the student's active insurance.

All students enrolled in a program of study that requires them to train in the University's affiliated teaching hospitals such as the MD, DMD, Dental Hygiene, Audiology, and Speech Pathology programs are required to carry major medical insurance and pay a non-waivable Health Professionals Health Fee (HPHF). Students in these programs are charged for the university-sponsored insurance plan but may waive it with proof of alternate coverage. Waiver information will be sent to the student's UofL e-mail account from Academic Health Plans (AHP) in mid-July for the Fall semester and mid-November for the Spring semester. You are not eligible to submit a waiver prior to receiving communication from AHP. An approved waiver must be on file for the current term prior to the supplied deadline for fee to be waived.

For additional information about Campus Health Fees, contact the Insurance Advocate via email at stuins@louisville.edu or visit the Campus Health website (<http://louisville.edu/campushealth/information/fees/primary-care-health-fee/>).

Campus Insurance Advocate

Cardinal Station
215 Central Ave. Suite 110
(502) 852-6519

Office of Health Promotion and Education

Health Promotion, a division of Campus Health Services, provides a variety of wellbeing programs, services, and resources including yoga, chair massage, stress resilience workshops, drop-in guided meditations, flash nap workshops, free & anonymous HIV testing, sexual health and consent workshops, safer sex supplies, healthy eating on campus, cooking workshops, and U-fit coaching.

Office of Health Promotion and Education

Campus Health Services

Student Activities Center
2100 South Floyd Street, room W309
(502) 852-5429

Additional information can be found on the Campus Health Services Office of Health Promotion website (<http://www.louisville.edu/healthpromotion/>).

Student Life

Housing and Residence Life, Intramural and Recreational Sports, Student Involvement, Fraternity and Sorority Life, Recognized Student Organizations, Student Government Association, Community Service, Swain Student Activities Center Administration, Student Disciplinary Services, Counseling Center, Career Development Center, and International Service Learning Program.

Disability Resource Center

In recognition of disability as an important part of the diversity of our community, the Disability Resource Center fosters an inclusive campus climate through education, service, collaboration, and outreach to the University of Louisville community. We provide support for students with documented disabilities by promoting equal access to all programs and services. Accommodations and support services are individualized, depending on the needs of each student.

The Disability Resource Center also offers an academic coaching program for students with disabilities. Peer coaches work with participating students one-on-one each week to provide support in meeting the demands of college coursework and staying organized.

Students are strongly encouraged to make early contact with the Disability Resource Center to assure adequate time to implement support services. Please visit louisville.edu/disability (<http://louisville.edu/disability/>) for more information, and feel free to contact us with questions at askdrc@louisville.edu or (502) 852-6938.

Residency Policy

In-State or Out-of-State Tuition

Initial Determination and Deadline to Appeal

The initial determination of residency status is made during the admission process. Once admitted, students will continue to be billed at the resident or nonresident rate each semester for the duration of their enrollment, unless an appeal has been approved by the Residency Appeals Office. A status may be appealed by filing an affidavit and documentation with the Registrar's office no later than 30 calendar days after the first day of classes of the term for which a determination of residency status is requested. Academic calendars are available on the university web site and with the Offices of Admission.

Pursuant to the residency regulation, 13 KAR 2:045 (https://apps.legislature.ky.gov/Law/KAR/013/002/045.pdf#xml=https://apps.legislaturekygov/LRCSiteSessionSearch/dtSearch/dtisapi6dll?cmd=getpdfhits&u=1a702ce5&DocId=5428&Index=E%3a%5cProduction%5cDTSearch%5cDTSearchIndex%5cKY_Administrative_Reg&HitCount=10&hits=c+d+e+f+10+11+12+13+14+15+&SearchForm=&.pdf), an institution may set other deadlines for submission of other information required by the institution in a determination of residency status. Information packets are available from the residency website (<http://www.louisville.edu/residency/>).

Special procedures may apply to students entering a University of Louisville professional program (DMD, JD, or MD). Please contact the office of admissions within your professional school for details on residency determination and appeal processing.

Statutory reference: Sections 13 and 14 of 13 KAR 2:045. Effective February 21, 2007.

Applications for Change in Residency Status and Appeals

Application for change in residency classification for purpose of tuition and fee assessment by a student enrolled in or an applicant to a program at the University of Louisville ("University") shall be made in writing to the residency appeals officer for initial consideration along with such information forms as the residency appeals officer may specify. The application for a change in residency classification must be filed no later than thirty (30) calendar days after the first day of classes of the academic term for which the change is requested. Appeals of residency determinations shall be based on administrative regulations promulgated by the Kentucky Council on Postsecondary Education. A written appeal of the decision of the residency appeals officer must be postmarked no later than fourteen calendar days from the date of receipt of notification of the residency appeals officer's written decision.

The Residency Review Committee is appointed by the executive vice president and provost (or designee) and shall be composed of four faculty and/or staff members and one student. The chairperson shall be elected by the committee. The faculty and/or staff members normally shall have staggered two-year appointments; the student member shall have a one-year appointment. The committee shall have authority to establish procedural rules and schedule meetings. A quorum shall consist of three members, and a quorum shall be necessary for committee action.

The Residency Review Committee shall consider appeals from applicants whose initial request for change in residency status has been denied by the residency appeals officer based upon the applicant's written appeal and the file in that matter to the extent provided by the Family Educational Rights and Privacy Act, 1974 (FERPA). The applicant shall be notified in writing as to the committee's decision.

If the decision of the committee is adverse to the applicant, the applicant may request a formal hearing by submitting a written request to the executive vice president and provost (or designee). This request must be postmarked no later than fourteen (14) calendar days from the date of receipt of notification of the committee's written decision.

The executive vice president and provost (or designee) shall appoint a hearing officer from outside the University to preside over formal residency hearings. Formal hearings shall be arranged based on a timely request from the applicant. The formal hearing shall provide for due process, including notice of hearing, examination of the information on which the University decision is based, and the right of an applicant to be represented by legal counsel and to present information and testimony in support of a claim of Kentucky residency. Hearing procedures will be consistent with 13 KAR 2:045 (https://apps.legislature.ky.gov/Law/KAR/013/002/045.pdf#xml=https://apps.legislaturekygov/LRCSiteSessionSearch/dtSearch/dtisapi6dll?cmd=getpdfhits&u=1a702ce5&DocId=5428&Index=E%3a%5cProduction%5cDTSearch%5cDTSearchIndex%5cKY_Administrative_Reg&HitCount=10&hits=c+d+e+f+10+11+12+13+14+15+&SearchForm=&.pdf).

The hearing officer shall make a report with findings of fact and a recommendation to the executive vice president and provost (or designee) with a copy to the applicant. The executive vice president and provost (or designee) will decide the appeal on the record on behalf of the University and the Board of Trustees and will notify the applicant

in writing within thirty days of receipt of the hearing officer's report. In the event the decision of the executive vice president and provost (or designee) is not in accord with the recommendation and findings of the hearing officer's report, a written explanation will be provided to the applicant.

Council on Postsecondary Education Administrative Regulation

Relates to: KRS Chapter 13B, 164.020, 164.030, 164A.330(6).

Necessity, Function, And Conformity

KRS 164.020(8) (<https://apps.legislature.ky.gov/law/statutes/statute.aspx?id=53677>) requires the Council on Postsecondary Education to determine tuition and approve the minimum qualifications for admission to a state-supported postsecondary education institution and authorizes the council to set different tuition amounts for residents of Kentucky and for nonresidents. This administrative regulation establishes the procedure and guidelines for determining the residency status of a student who is seeking admission to, or who is enrolled at, a state-supported post-secondary education institution.

Institutional Accreditation and Membership

Institutional Accreditation

The University of Louisville is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) (<https://www.sacscoc.org/>) to award associate, baccalaureate, masters, educational specialist, doctorate, and first-professional (D.M.D., J.D. MD) degrees. The University of Louisville also may offer credentials such as certificates and diplomas at approved degree levels.

Questions about the accreditation of the University of Louisville may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (sacscoc.org) (<http://sacscoc.org>)).

SACSCOC should be contacted only for accreditation-related reasons. The UofL accreditation liaison should be consulted before any inquiries are made to SACSCOC. Contact the Office of Academic Planning & Accountability with any questions at 502-852-6169.

Professional Accreditations

Accountancy (C, BS, MSAA): Association to Advance Collegiate Schools of Business (AACSB International) (<http://www.aacsb.edu/>)

Audiology (AuD): Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) (<http://caa.asha.org/>)

Bachelor of Fine Arts (BFA)-Council for Interior Design Accreditation (CIDA) Interior Design Track (<https://www.accredit-id.org/>)

Business (Undergraduate and Graduate): Association to Advance Collegiate Schools of Business (AACSB International) (<https://www.aacsb.edu/>)

Chemistry (BS): American Chemical Society (ACS) (<https://www.acs.org/>)

Clinical Psychology (PhD): American Psychological Association (APA) (<https://www.apa.org/>)

Communicative Disorders (MS) [Speech-Language-Pathology]: Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) (<https://caa.asha.org/>)

Computer Engineering and Computer Science (BS): Computing Accreditation Commission (CAC) of the Accreditation Board for Engineering and Technology (ABET), Inc. (<https://www.abet.org/>)

Counseling and Personnel Services (MEd) - Art Therapy/Expressive Therapies Concentration: Commission on Accreditation of Allied Health Education Programs (CAAHEP), Accreditation Council for Art Therapy Education (ACATE) (<https://www.caahep.org/>)

Counseling and Personnel Services (PhD) - Counseling Psychology Specialization: American Psychological Association (APA) (<https://www.apa.org/>)

Couple and Family Therapy (MS): Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE) (<https://www.coamfte.org/>)

Dental Hygiene (BS): Commission on Dental Accreditation of the American Dental Association (CODA) (<https://coda.ada.org/>)

Dentistry (C, MSD, DMD): Commission on Dental Accreditation of the American Dental Association (CODA) (<https://coda.ada.org/>)

Education (BS, MAT, MEd, EdD, EdS): Kentucky Education Professional Standards Board (<http://www.epsb.ky.gov/>) (EPSB); Council for the Accreditation of Educator Preparation (CAEP) (<https://caepnet.org/>)

Engineering (BS): Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology ABET, Inc. (<https://www.abet.org/>)

(Bioengineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Industrial Engineering, Mechanical Engineering, Computer Engineering and Computer Science programs)

Engineering (MEng): Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology ABET, Inc. (<https://www.abet.org/>)

(Bioengineering, Chemical Engineering, Civil Engineering, Electrical Engineering, Mechanical Engineering, Computer Science and Engineering programs)

Exercise Physiology (MS): Committee on Accreditation for the Exercise Sciences (CoAES) (<http://www.coaes.org/>) of the Commission on Accreditation of Allied Health Education Programs (CAAHEP) (<https://www.caahep.org/>)

Health Administration (MS): Commission on Accreditation of Healthcare Management Education (CAHME) (<https://www.cahme.org/>)

Health and Human Performance (BS) - Exercise Science Track: Committee on Accreditation for the Exercise Sciences (CoAES) (<https://www.caahep.org/committees-on-accreditation/exercise-science/>)

Law (JD): Section of Legal Education and Admissions to the Bar of the American Bar Association (ABA) (<https://www.americanbar.org/>); Association of American Law Schools (AALS) (<https://www.aals.org/>)

Master of Education (MEd): Council for Accreditation of Counseling and Related Educational Programs (CACREP) Clinical Mental Health Counseling Track (<https://www.cacrep.org/>)

Master of Education (MEd): Council for Accreditation of Counseling and Related Educational Programs (CACREP) School Counseling Concentration (<https://www.cacrep.org/>)

Medicine (MD): Liaison Committee on Medical Education, a Joint Committee of the American Medical Association and the Association of American Medical Colleges (LCME) (<https://lcme.org/>)

Music (BA, BM, BME, MM, MME): National Association of Schools of Music (NASM) (<http://nasm.arts-accredit.org/>)

Music Therapy (BM): National Association of Schools of Music (NASM) (<http://nasm.arts-accredit.org/>)

Nursing (C, BSN, MSN, DNP): Commission on Collegiate Nursing Education (CCNE) (<https://www.aacnnursing.org/ccne-accreditation/>); Nurse Anesthesia (DNP Specialization) Council on Accreditation of Nurse Anesthetics (COA) (<https://www.coacna.org/>)

Public Administration (MPA): National Association of Schools of Public Affairs and Administration (NASPAA) (<https://www.naspaa.org/>)

Public Health (BA, BS, MPH, PhD): Council on Education for Public Health (CEPH) (<https://ceph.org/>)

School Counseling (MEd): Council for Accreditation of Counseling and Related Educational Programs (CACREP) (<https://www.cacrep.org/>)

Social Work (BSW, MSSW): Commission on Accreditation of the Council on Social Work Education (CSWE) (<https://www.cswe.org/>)

Social Work (MSSW): Commission on Accreditation of the Council on Social Work Education (CSWE) (<https://www.cswe.org/>) and Council for the Accreditation of Educator Preparation (CAEP) (<https://caepnet.org/>)

Sport Administration (BS, MS): Commission on Sports Management Accreditation (COSMA) (<https://www.cosmaweb.org/>)

Theatre Arts (BS, MFA): National Association of Schools of Theatre (NAST) (<https://www.arts-accredit.org/>)

Urban Planning (MUP): Planning Accreditation Board (PAB) (<https://www.planningaccreditationboard.org/>)

Other Accreditations/Recognitions

Child Clinical and Pediatric Psychology Doctoral Internship Program: American Psychological Association (APA) (<https://www.apa.org/>)

Clinical Chemistry (post-doctoral): Commission on Accreditation in Clinical Chemistry (COMACC) (<https://comacc.org/>)

Cooperative Education (Speed School): Accreditation Council for Co-op and Internships (ACCI) (<https://co-opaccreditation.org/>)

Graduate Medicine (House Staff): Accreditation Council for Graduate Medical Education (ACGME) (<https://www.acgme.org/>)

Resources for Academic Achievement (REACH) Tutor Training: College Reading & Learning Association's (CRLA) International Tutor Training Program Certification (ITTPC) (<https://www.crla.net/index.php/certifications/ittpc-international-tutor-training-program/>)

Disclosures

State Authorization for Distance Education Activities

The University of Louisville participates in the State Authorization Reciprocity Agreements (SARA). SARA allows member states and participating institutions to offer distance education in other member states and some U.S. territories so long as the institution adheres to SARA's quality and consumer protection standards.

Except for California, all U.S. states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands are members of SARA. Although California is not a SARA member, UofL is not subject to the regulations of the California Bureau of Private Postsecondary Education due to our out-of-state public institution status. Therefore, the University of Louisville can offer programs to individuals located in California without seeking additional institutional authorization. More information on SARA can be found here (<https://nc-sara.org/>).

Although the University of Louisville is authorized to offer distance education in other SARA member states, program-specific considerations may affect program availability. These restrictions are typically due to state licensing board requirements or other state agency requirements and often impact the availability of field placements in these locations. Participation in SARA does not exempt the University from these requirements.

Prospective and current students should keep in mind that licensing and authorization requirements vary by state and that relocating during the course of a program to another state could impact whether that student can continue in the program and/or meet the eligibility requirements of that state. Please contact your program to check for authorization and licensure eligibility requirements before you relocate during the course of a program.

If you are considering a program that leads to licensure or certification, it is essential to understand that although a given program may be authorized to be offered in your state, this does not indicate or guarantee your eligibility for professional licensure or certification in that state. Please review the Professional Licensure section for further information.

For more information on online program availability in your state, please visit the State Authorization Regulations page (<https://louisville.edu/online/About-Us?tab=state-auth> (<https://louisville.edu/online/About-Us/?tab=state-auth>)) of the UofL online programs website.

Professional Licensure Information

Depending on your program, you may be interested in pursuing professional licensure or certification following graduation. Professional licensure refers to an official process, usually administered at the state level, that is required by law for an individual to practice a specific profession. Licensure may require formal postsecondary education, passage of a licensure examination, and/or completion of qualifying work experience.

All of the University of Louisville's programs designed to lead to professional licensure meet the educational requirements for licensure in the state of Kentucky. To determine whether our programs meet educational requirements for licensure in other U.S. states and territories, please review our publicly available professional licensure disclosures at <https://louisville.edu/oapa/licensure-information> (<https://louisville.edu/oapa/licensure-information/>) for on-campus programs and at <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>) for online programs.

The University of Louisville makes every effort to ensure information about educational requirements for programs is current; however, licensure requirements are always subject to change. Licensure information is reviewed and updated annually during the fall term. Changes in state requirements after the review period could impact the University of Louisville's determination of whether the program meets educational requirements in a particular state.

Students should always check with their state licensure board to confirm licensure requirements. Separate from educational requirements, state licensure boards may require applicants to complete professional examinations, background checks, years of professional experience, state-specific topical trainings, etc.

Prospective and current students should keep in mind that because licensing and authorization requirements vary by state, relocating during the course of a program to another state could impact whether a student meets eligibility requirements. Students should notify their program advisor and check authorization and licensure eligibility requirements before relocating to another state during the course of a program.

Complaint Procedures

Students enrolled in online programs who have complaints, grievances, or concerns regarding courses taken at the University of Louisville should contact the University's Student Advocate in the Dean of Students office (<https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstudent.louisville.edu%2Fdean-students%2Fcare-advocacy%2Fdean-students-student-advocate&data=05%7C02%7C%7C302a34a99231480f33a308dd868699f7%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C638814635175750626%7CUnknown%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIslIAiOjJXaW4zMilslkF0ljojTWFPbCislldUljoyfQ%3D%3D%7C0%7C%7C&sdata=YeqQk2sFGJeYxc5%2Buqa7P3yG587LGXhPrblvNqUy9cY%3D&reserved=0>) to have the issues resolved in an expeditious, fair, and amicable manner.

The University's Student Complaint Procedure is outlined in detail on the Dean of Students website (<https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fstudent.louisville.edu%2Fdean-students%2Fcomplaints-grievances&data=05%7C02%7C%7C302a34a99231480f33a308dd868699f7%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C638814635175764363%7CUnknown%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIslIAiOjJXaW4zMilslkF0ljojTWFPbCislldUljoyfQ%3D%3D%7C0%7C%7C&sdata=REED%2BPQtW7160kV9ySrRwdzLK8X%2Bmvzq2ub8YdMZjBI%3D&reserved=0>). Students should first seek to resolve their complaints through informal discussion and administrative channels. This is the same process for all students enrolled at University of Louisville.

In the unlikely event that the issue is not resolved internally at the University of Louisville, students enrolled in online programs may file complaints with other agencies. The process will depend upon where a student resides and can be found at the Online Student Resource Page. (<https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Flouisville.edu%2Fonline%2Fresources%2Fenrolled-students%2F%23complaint&data=05%7C02%7C%7C302a34a99231480f33a308dd868699f7%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C638814635175777708%7CUnknown%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIslIAiOjJXaW4zMilslkF0ljojTWFPbCislldUljoyfQ%3D%3D%7C0%7C%7C&sdata=p03h13YHbNxFSSKW%2FD4HyKHuVZ2965Lpowf5nQt8tpY%3D&reserved=0>)

Instructional Delivery

Standard Course Delivery Modalities

The university offers the following course modalities:

In-Person Courses: Instruction whereby both students and faculty are expected to meet in person in an assigned room at assigned times as found in the schedule of classes; final exams are also regulated by the published schedule. In-person courses may be offered on campus or at a SACSCOC-approved off-campus instructional site. Field experience, practicum, internship, or co-op courses may require meeting at local placement sites.

Online Courses: Online courses are conducted via the internet and provide educational access by separating learners and instructors by distance and/or time. Online courses will have no required in-person, on-campus activities including no required in-person exam proctoring. Students who *request* in-person proctoring at a location convenient to the student may be approved by the instructor. A university-licensed and supported learning management system (LMS, e.g., Blackboard) is provided and required for the offering of the university's online courses. Participating faculty must ensure that instructional time is accounted for, meets the SACSCOC minimum contact hour requirements and complies with the U.S. federal regulation on regular and substantive interaction.

- **Online, Asynchronous:** 100% online instruction where no synchronous activities, including assessments, may be required. Instructors and students are expected to engage in learning activities via the approved university system for delivering online education (Blackboard).
- **Online, Synchronous:** 100% online with *any* required synchronous class meetings, including assessment, in addition to any asynchronous expectations. All required synchronous meetings must be published in the schedule of classes before registration. Final exams are regulated by the published schedule.

Blended Learning Courses: Blended learning courses combine the affordances of instructional components from in-person classroom experiences and online experiences. The meeting pattern of required synchronous sessions (in-person and/or online) must be consistent across the semester and must be published in the schedule of classes. The in-person class meeting reduction is off-set by designed online learning experiences that support learning objectives and take approximately the same amount of time as the reduced class meetings. These online learning experiences may be:

- completely asynchronous (i.e., no "same time" class meetings),
- completely synchronous (i.e., requiring "same time" class meetings via the internet), or
- primarily asynchronous with some synchronous options or requirements.

Standard Program Delivery Modalities

University of Louisville strives to provide flexibility in course and program delivery wherever possible. In any given term, many programs offer some classes that are available in an in-person, online, or blended modality.

Students who are seeking a specific modality for courses in a program should review the schedule of classes carefully. Programs that can be completed entirely online will be identified on the Overview tab of the academic program's catalog page. However, unless the program's overview in the catalog indicates that it can be completed entirely online, UofL programs reserve the right to offer some courses in a single modality (i.e., only online, only blended, or only in-person). Unless specifically stated on the Overview tab of an academic program's catalog page that a program may be completed entirely through a single modality, students should expect their program to be completed through courses offered in various modalities.

Graduate Programs of Study

The programs listed below are offered at the graduate or professional level. Students interested in bachelor's degree programs should refer to the undergraduate catalog (<https://catalog.louisville.edu/undergraduate/programs-study/>).

Programs marked with an asterisk (*) are available for completion entirely online (<http://louisville.edu/online/programs/>) (may not include all concentrations or specialization areas).

¹ This program is not currently accepting applications for admission.

² Rank 1 programs are not degree programs. Rank 1 programs are recognized only in the state of Kentucky. They are planned graduate-level programs designed for Kentucky educators seeking rank change for salary purposes.

³ Master of Engineering (MEng) programs other than Engineering Management are only available for students who have matriculated through a bachelor degree program at Speed School. Master of Science (MS) programs are for individuals from other institutions or for students with a BS who are returning for a master's degree.

⁴ The EdS (Education Specialist) degree in Educational Administration is a 30 credit hour, post-master's degree program.

⁵ Interdisciplinary program concentration or specialization.

⁶ Concentration title was "Bioethics and Medical Humanities" prior to 2019-2020.

⁷ Professional degree program

⁸ Post-graduate certificate. Advanced Practice registered nurses or registered nurses that hold a terminal degree (i.e., PhD, EdD, DNP) are eligible to apply.

Doctor of Audiology – AuD (p. 82)

Doctor of Nursing Practice (p. 256)– (p. 256) DNP (p. 256)

Doctor of Nursing Practice, Specialization in Nurse Anesthesia - DNP (p. 259)

Doctor of Social Work – DSW (<https://catalog.louisville.edu/graduate/programs-study/doctor-social-work/>)

Doctor of Education – EdD

- Educational Leadership and Organizational Development

Specialist in Education – EdS

- Curriculum and Instruction
- Educational Administration - Instructional Leadership

Doctor of Philosophy – PhD

- Anatomical Science and Neurobiology
- Biochemistry and Molecular Genetics
- Biology
- Biostatistics
- Chemical Engineering
- Chemistry
- Civil Engineering
- Clinical Psychology
- Computer Science and Engineering
- Counseling and Personnel Services
- Criminal Justice
- Curriculum and Instruction
- Educational Leadership and Organizational Development
- Electrical Engineering
- English Rhetoric and Composition
- Entrepreneurship
- Experimental Psychology
- Humanities
- Industrial and Systems Engineering
- Interdisciplinary Studies
- Interdisciplinary Studies: Specialization in Bioinformatics
- Interdisciplinary Studies: Specialization in Translational Neuroscience (p. 213)
- Mathematics, Applied and Industrial (p. 219)
- Mechanical Engineering
- Microbiology and Immunology
- Nursing
- Pan-African Studies
- Pharmacology and Toxicology
- Physics
- Physiology
- Psychology - Clinical
- Psychology - Experimental
- Psychological Science
- Public Health Sciences: Specialization in Epidemiology (p. 294)
- Public Health Sciences: Specialization in Health Management and Policy (p. 297)
- Public Health Sciences: Specialization in Health Promotion and Behavioral Sciences (p. 303)
- Social Work (p. 322)
- Sociology, Applied (p. 325)
- Special Education emphasis, Curriculum and Instruction (<https://catalog.louisville.edu/graduate/programs-study/doctor-philosophy-curriculum-instruction/>)
- Translational Bioengineering (p. 349)
- Urban and Public Affairs

Master of Arts – MA

- Anthropology
- Applied Philosophy
- Art (Creative) and Art History

- Communication
- English
- Higher Education Administration
- History
- Humanities
- Interdisciplinary Studies
- Interdisciplinary Studies: Concentration in Sustainability (p. 208)
- Mathematics
- Pan-African Studies
- Political Science
- Sociology
- Women's, Gender and Sexuality Studies

Master of Arts in Teaching – MAT

- Early Childhood Education (Interdisciplinary)
- Early Childhood Education (Interdisciplinary - Teacher Residency)
- Elementary Education
- Elementary Education, Teacher Residency
- Health and Physical Education
- Middle School Education
- Middle School Education - Alternative Certification (5-9)
- Middle School Education, Teacher Residency
- Music Education
- Secondary Education
- Secondary Education - Alternative Certification (8-12)
- Secondary Education, Teacher Residency
- Special Education, Concentration in Learning Behavior Disorders (P-12)
- Special Education, Concentration in Learning Behavior Disorders (P-12) - Alternative Certification
- Special Education, Concentration in Learning Behavior Disorders P-12) - Teacher Residency
- Special Education, Concentration in Moderate/Severe Disabilities (P-12)
- Special Education, Concentration in Moderate/Severe Disabilities (P-12) - Alternative Certification
- Special Education, Concentration in Moderate/Severe Disabilities (P-12) - Teacher Residency (p. 339)

Master of Business Administration – MBA

Master of Education – MEd

- Counseling and Personnel Services
- Special Education
- Special Education (Non-Teaching)
- Special Education Concentration in Applied Behavior Analysis
- Teaching and Learning

Master of Engineering – MEng

- Bioengineering (p. 86)
- Civil Engineering (p. 118)
- Computer Science and Engineering (p. 128)
- Electrical Engineering (p. 159)
- Engineering Management (p. 170)
- Mechanical Engineering (p. 222)

Master of Fine Arts – MFA

- Studio Art and Design
- Performance

Master of Music – MM

- Music Composition
- Music History and Literature
- Music Performance
- Music Theory

Master of Music Education in Music Education – MME (p. 238)

Master of Public Administration – MPA

Master of Public Health – MPH

Master of Science – MS

- Accountancy and Analytics (p. 65)
- Anatomical Science and Neurobiology
- Artificial Intelligence in Medicine
- Biochemistry and Molecular Genetics
- Bioengineering (p. 89)
- Biology
- Biostatistics
- Business Analytics
- Chemical Engineering
- Chemistry
- Civil Engineering
- Computer Science (p. 127)
- Couple and Family Therapy
- Criminal Justice
- Electrical Engineering
- Epidemiology
- Exercise Physiology
- Geography, Applied (p. 179)
- Health Administration
- Health Professions Education
- Human Resources and Organization Development
- Industrial and Systems Engineering
- Interdisciplinary Studies
- Interdisciplinary Studies: Concentration in Sustainability (p. 208)
- Interdisciplinary Studies: Concentration in Nanomedicine (p. 210)
- Materials and Energy Science and Engineering (p. 216)
- Mechanical Engineering
- Microbiology and Immunology
- Oral Biology
- Pharmacology and Toxicology
- Psychological Science
- Physics

- Physiology
- Speech-Language Pathology
- Sport Administration

Master of Science in Clinical Investigation Sciences – MSc

Master of Science in Dentistry – MSD

Master of Science in Nursing – MSN

Master of Science in Social Work – MSSW

Master of Urban Planning – MUP (p. 354)

Graduate Certificates – CERT

- Analytics for Engineering Decision Making (p. 67)
- Artificial Intelligence in Medicine (p. 78)
- African-American Theatre (p. 66)
- Applied Behavior Analysis (p. 74)
- Asian Studies (p. 81)
- Biostatistics
- Business of Healthcare
- Classroom Reading (P-12)
- Cybersecurity (p. 145)
- Data Science (p. 146)
- Distilled Spirits Business (p. 148)
- Diversity Literacy (p. 149)
- Elementary Mathematics Specialist (P-5) (<https://catalog.louisville.edu/graduate/programs-study/graduate-certificate-elementary-math-specialist/>)
- Family Business Management and Advising (p. 178)
- Franchise Management (p.)

Dual Degree Programs

A dual degree program is a formalized path of study that allows a student to pursue two different degrees at the same time, either at the same institution or at different institutions, and possibly complete them in less time than it would take to earn them separately. The two degrees may be in the same subject or in two different subjects; they may be at the same level (e.g., master's-master's) or at two different levels (e.g., doctoral-master's). Students must meet the admission requirements for both degree programs. Other limitations or requirements may apply, depending on the program.

Dual degree programs allow students to earn two master's degrees in cases where there is synergy between the two programs. Course work which is common to both degree programs, or courses which provide similar learning outcomes, may be proposed to count for both degrees with justification of the overlap in learning outcomes of the courses. A dual-degree program that pairs two 30-hour programs may apply nine (9) credit hours of overlapping course work toward each degree, for a total of 51 combined credit hours. A variance may be requested to apply additional coursework for dual-degree programs with higher total credit hours.

Accountancy and Analytics (MS)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Science in Accountancy and Analytics

Unit: College of Business (<https://business.louisville.edu/>) (GB)
Department: Accountancy (<https://business.louisville.edu/academics-programs/undergraduate-programs/accountancy/>)
Academic Plan Code(s): ACANMS

Program Information

The mission of the College of Business is to prepare students for responsible and rewarding careers, as well as to enhance the economic vitality of the city, the region, and the broader business community. The Master of Science in Accountancy and Analytics (MSAA) program serves both missions by creating an opportunity for business professionals to have access to a continuing education program in the accounting and analytics area. The combination of accounting and analytics knowledge will satisfy regional labor requirements as businesses transition to a more data driven environment.

This program is designed to:

- Equip graduates with technical accounting knowledge of GAAP (Generally Accepted Accounting Principles)
- Prepare graduates to assume leadership positions in the professional practice of accounting as Certified Public Accountants
- Provide graduates with functional knowledge of data science from a managerial perspective
- Impart graduates with programmatic or professional understanding of the results of data effectively, especially in terms of data visualization and data storytelling.

The Master of Science in Accountancy and Analytics is a 37 credit hour cohort-based program. Graduates of the program may also receive the Graduate Certificate in Managerial Analytics. This graduate certificate is a twelve (12) credit hour certificate that provides business professionals with the skills to thrive in a data driven environment.

Admission Requirements

• Create application account

Apply at the College of Business graduate programs website (<https://business.louisville.edu/academics-programs/apply-to-cob/>).

• Two letters of recommendation

Within the application, submit name and email address of your recommender. He/she will receive an email invitation on your behalf. Your recommender should speak to your character, academic aptitude, etc.

• Professional resume

• Personal statement

Within the application, attach a one–two page Word document describing your interest in the University of Louisville MAC program, why you selected the University of Louisville, your short and long term goals and any additional information you feel is relevant.

• Submit and pay application fee

• Official college transcript(s)

Order an official college transcript from all colleges attended, including the degree granting institution.

• Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE)

Waivers available

International Applicants

We welcome international applicants. Please be aware there are documents required in addition to the above list. Visit the graduate admissions page of the College of Business website (<https://business.louisville.edu/academics-programs/apply-to-cob/>) and open the International Applicant Checklist.

The Master of Accountancy and Analytics program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine

your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

African American Theatre (CERT)

Graduate Certificate in African American Theatre

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) ([GA](#))

Department: Theatre Arts

Program Webpage

Academic Plan Code(s): AATHCAT, AATHCATO

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/certificate-programs/online-graduate-certificate-in-african-american-theatre/>).

The first and only graduate certificate program in African American Theatre in the United States.

The certificate requires 15 credit hours of graduate credit including:

- Nine (9) credit hours in African American Theatre
- Three (3) credit hours of theatre-related community service
- Three (3) credit hours of electives (approved by the AATP director)

The African American Theatre certificate can be completed as a stand-alone program or in conjunction with another graduate program in any area (e.g. Comparative Humanities, English, Music, Pan-African Studies).

The certificate program is specially designed for:

- Persons preparing for professional careers in the theatre arts
- Teachers, government and community agency professionals
- Individuals with a passion for theatre and performance from Africa and the African Diaspora
- Graduate students at the University of Louisville and other institutions

Admission Requirements

Application for Admission

- All candidates for admission to graduate programs must complete the online application form (<http://louisville.edu/graduate/apply/>).
- Consult with your intended program for specific application deadlines.
- A new application must be received any time a student is beginning a graduate program, transferring graduate programs, changing from non-degree to degree-seeking status, or adding a dual or certificate program to an existing degree program.
- **Note:** The University of Louisville reserves the right to change programs of study, academic requirements, fees, schedules of courses, the announced academic calendar and deadlines without prior notice.

Application Fee

- A non-refundable application fee (<http://louisville.edu/graduate/futurestudents/application-directions/>) is required with the application. Applications will not be forwarded to the department until this fee is paid.

Transcripts

- All applicants must submit **official transcripts showing** all degrees awarded and all undergraduate and graduate work (all courses) completed from each accredited college/university previously attended.
- All University of Louisville transcripts will automatically be submitted with the completion of an application. Transcripts must be sent directly from the school to the Graduate School, Graduate Admissions, in order to be considered official.

English Proficiency

- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test for verification of English proficiency. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or Duolingo overall score of 105.
- Information concerning the TOEFL exam can be obtained from www.ets.org/toefl (<http://www.ets.org/toefl/>) or 1-877-863-3546.
- Information concerning the IELTS exam can be obtained from www.ielts.org (<http://www.ielts.org/>).
- Information concerning the Duolingo exam can be obtained from englishtest.duolingo.com/applicants (<https://englishtest.duolingo.com/applicants/>)
- Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

Recommendations

- Two letters of recommendation from persons familiar with the applicant's academic work are required. There are programs that require more than two letters of recommendation. Please check with your department for additional requirements.

Additional Requirements

- All credentials and/or communications submitted to the Graduate School, Graduate Admissions should contain the student's full name,

University of Louisville issued student ID, and date of birth. Lack of this information may cause processing to be delayed.

Program Requirements

Code	Title	Hours
MFA graduate students (contact AATP Director for alternative options)		
TA 566	Advanced History of African-American Theatre (or TA Elective)	3
TA 664	Approaching African-American Theatre ^{1, 3}	3
TA 654	Independent Study in Community Service ^{1, 3}	3
	TA Elective in African American Theatre (including TA 557 Advanced Hip Hop Theatre, TA 562 Advanced Black Dramatic Literature, TA 563 Advanced African American Women in Theatre, and TA 565 Advanced Theatre of the African World) ¹	3
One or more of the following:		3
TA 625	MFA Performance Project I (in an approved play) ^{1, 2}	
	or TA 655 Independent Study	
TA 626	Thesis Performance (in an approved play) ¹	
TA 655	Independent Study (or approved courses in PAS, Humanities, and English)	
Minimum Total Hours		15
<i>African American Theatre Program courses that can be taken for graduate credit and are offered online:</i>		
TA 562	Advanced Black Dramatic Literature	
TA 557	Advanced Hip-Hop Theatre	
TA 555	Special Topics in Theatre (Adv Cultural Diversity in Performance)	

Note: Students enrolled in the MFA in Theatre Arts may not count more than six (6) required MFA credit hours towards the Certificate.

¹ Required for the MFA.

² Two (2) credit hours required for MFA thesis performance.

³ The Director of the AATP can approve the substitution of graduate credits earned in other universities' graduate programs, particularly for students pursuing the certificate as a stand-alone program.

Analytics for Engineering Decision Making (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Analytics for Engineering Decision Making

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)
Department: Industrial (<https://engineering.louisville.edu/academics/departments/industrial/>)

Academic Plan Code(s): AEDMCGR, AEDMCGRO

Program Information

This program can be completed in a traditional classroom format or entirely online.

The graduate certificate in Analytics for Engineering Decision Making offers students training to address the growing need for analytics and data-driven decision making, at the regional and national level. The overall goal is to develop talent that is equipped with operational decision analytics skills, including both predictive and prescriptive skills. Students will be prepared to work for a wide range of organizations (businesses, non-profits, NGOs, etc.) in the U.S. Upon completion of the certificate, students will acquire core knowledge on data analytics in decision making and combines three sub-areas of Industrial Engineering (Data Analytics, Operations Research, and Decision Making).

The certificate will require students to complete 9 credit hours of graduate course work. Students in the Master of Science in Industrial Engineering (MSIE) and Master of Engineering Management (MEEMO) will be able to complete the certificate within their academic plan. Non-degree seeking students completing the certificate, will be able to apply the 9 credit hours towards their future MSIE and/or MEEMO degree.

Students will be required to maintain a 3.0 GPA in order to graduate.

Admission Requirements

The admission standards for the Graduate Certificate program in Analytics for Engineering Decision Making are as follows:

- All admission applications for the Graduate Certificate program shall include the following:
 - Completed graduate application (<https://graduate.louisville.edu/admission/>) for the Graduate School,
 - Application fee,
 - Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution or current enrollment in a graduate Speed School program.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale). Applicants with a GPA between 2.5 and 2.75 may be considered for admission and will be required to submit additional application materials.
- International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79 or higher, an overall IELTS score of 6.5 or higher, or Duolingo score of 105 or higher.

Students enrolling in this graduate certificate program are required to be proficient in Calculus I.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the certificate program. Students who seek to return after such a period of time must contact the graduate program director.

Program Requirements

Code	Title	Hours
ISE 662	Predictive Analytics for Decision Making I	3
Choose 6 hours from the courses below (each course is 3 hours):		6
ISE 561	Decision Support Systems	
ISE 663	Predictive Analytics for Decision Making II	
ISE 646	Operations Research Methods	
ISE 645	Systems Simulation	
Minimum Total Hours		9

The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Anatomical Sciences and Neurobiology (MS)

Master of Science in Anatomical Science and Neurobiology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)

Department: Anatomical Science and Neurobiology (<https://louisville.edu/medicine/departments/anatomy/>)

Program Webpage (<https://louisville.edu/medicine/departments/anatomy/graduateprograms/>)

Academic Plan Code(s): ASNBMS

Program Information

The Department of Anatomical Sciences and Neurobiology (ASNB) Master of Science (MS) program is available to qualified individuals possessing a bachelor's degree from an accredited college or university. No specific undergraduate major is required, although some science background is required. Anatomical Sciences and Neurobiology has two program options available for students interested in earning the MS Degree:

The MS degree is offered to students interested in conducting original research and planning to continue their training and education in Anatomy and Neurobiology. This program option is available to all students accepted into the MS Program.

The MS degree program requires full-time study and it is expected that while participating in these programs, students will devote full-time effort toward completion of the degree requirements.

Admission Requirements

All students wishing to apply must submit an application to the Graduate School, Graduate Admissions with the following required documents:

1. A formal application (<https://graduate.louisville.edu/admission/apply/>) submitted to the Graduate School.

2. Application fee.
3. A minimum of two letters of recommendation.
4. Official transcripts of all college work.
5. A brief statement of purpose describing your interests and career goals.
6. All international applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL/IELTS/ Duolingo) scores. Students holding a bachelor's or advanced degree from an accredited institution in the United States are exempt from this requirement.

Optional document:

- Official scores on the Graduate record Examination (GRE) Test
- Official scores on the Medical College Admission Test (MCAT)

Review of applications begins in December and continues until all positions are filled. Admission into the program is competitive and applicants are encouraged to submit the applications early.

Program candidates are only admitted in the Fall semester. graduate program orientation begins August 1 (Although note that some Fall semester classes begin as early as mid-July).

Program Requirements

Coursework Requirements for the MS Degree

Students should familiarize themselves with the general requirements for the master's degree as stated in the current University of Louisville Graduate Catalog. Briefly, a minimum of 30 credit hours is required for the master's degree, of which 15 credit hours must be in courses of the major subject area, the program is typically completed within a two year period. The statute of limitation for obtaining a Master's degree is six years from admission to the program.

At least one-half of the credits counted toward the degree must be 600-level courses or above. This does not include nine (9) credit hours of research. The department has the following additional requirements:

Code	Title	Hours
Coursework		Hours
Students will successfully complete at least two of the following courses within the department:		
ASNB 601	Gross Anatomy	6.5
ASNB 602	Fundamentals of Neuroscience	4
ASNB 605	Human Embryology	3
ASNB 617	Seminar on Developmental Neurobiology ¹	3
ASNB 614	Molecular Neuroscience ¹	4
ASNB 666	Synaptic Organization of the Central Nervous System ¹	3
ASNB 630	Origin of Mammalian Sensory Systems and Comparative Neurobiology	4
ASNB 671	General and Oral Histology	5
ASNB 606	Anatomy Seminar (taken each semester prior to candidacy)	1/ semester
Electives (see notes below)		varies
Minimum Total Credit Hours		30

¹ Offered on a rotational basis

Seminar

Anatomy Seminar (ASNB 606, one (1) credit hour) must be taken for credit each semester prior to candidacy.

Electives

Additional courses (electives) within Anatomical Sciences and Neurobiology program or graduate level courses in other departments may be taken to achieve the minimum requirement of 30 credit hours. The student should consult with his/her advisor on the selection of the appropriate electives.

Additional Information for the MS Degree Research Hours

Research credit hours may be taken as Laboratory Rotation (ASNB 618), which is graded on a pass/fail basis, prior to choosing a mentor. Once a mentor is chosen, research hours are taken as Original Investigation (ASNB 619), in which students earn a letter grade.

Original Research

Students will conduct this required research under the direction of a member or joint/associate member of the departmental faculty (hereafter known as the thesis advisor). Faculty reserve the right to decline accepting a student.

During the first year of enrollment, students are required to visit the laboratories of potential advisors to become acquainted with the faculty and the research opportunities available. Selection of an advisor and the initiation of a research project should be concluded prior to the end of the first year, at which time a written agreement, signed by both the student and thesis advisor, will be filed with the Graduate Program Director.

Candidacy

After completion of all requirements (as outlined above), students enter Master's Candidacy and must register for and maintain candidacy (MAST 600) until the successful defense of his/her thesis. This registration must be maintained year round (Fall, Spring and Summer semesters) until the degree is awarded. Once a student registers for MAST 600, he/she may not register for additional courses.

Thesis

By its nature, original research does not always achieve results within a specific period of time. Therefore, no specific time can be given for the successful completion of this degree. However, most MS students complete their degree in two years and must complete the degree requirements for the degree within six years of their admission to the MS program. Note that students are advised to complete the majority of their course work in the first year so that adequate time is allotted in the second year to complete their research and thesis. Specifically, students will be required to engage full-time in research for the equivalent of two academic semesters and maintain steady and satisfactory progress. Faculty advisors submit Graduate Student Progress Reports biannually to the Anatomical Sciences and Neurobiology graduate Program Committee for review.

Reading Committee

The composition requirements of, and specific deadlines related to, the Reading Committee appear in the Graduate Catalog. Briefly, the Reading Committee is composed of the student's advisor and two other faculty,

one of which is from a different department. All three must be members of the graduate faculty. This committee should be established shortly after the student and her/his advisor agree on a specific research project. To avoid unnecessary delays the student should regularly consult with her/his thesis advisor and committee members concerning the direction and progress of the research project. Once in Master's candidacy, the student should meet with their committee at least once per semester.

Thesis Defense

The MS candidate will focus exclusively on completing their research projects and writing a thesis describing the results of their experiments. It is expected that the thesis should contain data sufficient for approximately one publishable manuscript. Upon completion of the thesis, the student will distribute a copy to each committee member. The committee will have two weeks to read the thesis and give approval to schedule a defense date or recommend changes that must be completed prior to scheduling a defense date. Once the thesis is approved by the committee, the student will schedule a thesis defense. The Graduate School requires that an announcement of the defense be posted at least two weeks prior to the scheduled date. The defense will consist of an oral presentation (approximately 30 minutes in length) of the research completed during the student's graduate training. Non-committee members in the audience will then ask questions. The general audience will then be dismissed and the student will defend his/her thesis before the committee. Completion of the MS degree will be determined by majority vote of the committee.

Anatomical Sciences and Neurobiology (PhD)

Doctor of Philosophy in Anatomical Science and Neurobiology

Unit: School of Medicine (<http://louisville.edu/medicine/>)(GM)

Department: Anatomical Science and Neurobiology (<http://louisville.edu/medicine/departments/anatomy/>)

Program Webpage (<http://louisville.edu/medicine/departments/anatomy/graduateprograms/>)

Academic Plan Code(s): ASNBPHD

Program Information

Our philosophy is to encourage academic excellence in the neurosciences within a framework of structure-function relationships at the molecular, cellular, and systemic levels. We strive to prepare students with sufficient background depth to excel in high tech cutting-edge translational (applied) research environments and the more traditional multi-disciplinary academic setting. We provide students with innovative approaches to important issues in neuroscience research including development, organization, and plasticity. Our research interests range from sensory and motor systems to therapeutic strategies for spinal cord injuries. In all approaches, we strive to integrate the latest teaching modalities while maintaining the time-honored advantages of hands-on, laboratory-based instruction.

The degree program is available to qualified individuals possessing a bachelor's degree from an accredited college or university. No specific undergraduate major is required, although some science background is required.

The PhD degree is offered to students who plan to pursue a career in research and/or teaching, in an academic institution or within the industry.

All degree programs require full-time study, and it is expected that while participating in these programs students will devote full-time effort toward completion of the degree requirements.

Students accepted into the PhD program will be considered for an IPIBS graduate student fellowship. The fellowship pays an annual stipend of \$33,000-\$35,000 in addition to payment of student tuition and health insurance.

Admission Requirements

All students wishing to apply must submit an application to the Graduate School, Graduate Admissions, with the following required documents:

- A formal application submitted to the Graduate School, Graduate Admissions (see website: louisville.edu/graduate/apply (<https://graduate.louisville.edu/admission/apply/>) for forms and directions)
- Application fee
- A minimum of two letters of recommendation
- Official transcripts of all college work
- A brief statement of purpose describing your interests and career goals.
- All international applicants whose native language is not English must submit Test of English as a Foreign Language (TOEFL/IELTS/ Duolingo) scores. Students holding a bachelor's or advanced degree from an accredited institution in the United States are exempt from this requirement.

Optional Documents

- Official scores on the Graduate record Exam (GRE) General Test
- Official scores on the Medical College Admission Test (MCAT)

Review of applications begins December 15th and continues until all positions are filled. Admission into the program is competitive, and applicants are encouraged to submit their applications early. All materials must be received by January 15th. All applications received on time are automatically considered for a fellowship, which provides a stipend, covers tuition and health insurance.

Program candidates are only admitted in the fall semester. Graduate program orientation begins August 1st (although note that some fall semester classes begin as early as mid-July).

Program Requirements

All students must complete the Anatomical Sciences and Neurobiology (ASNB) required courses, and students funded via the Integrated Programs in Biomedical Sciences (IPIBS) must complete the IPIBS required courses (listed below). All students must also complete at least sixteen (16) credit hours of ASNB core courses (listed below, at least one statistics course should be included). Additional elective coursework may be taken to enhance the student's individual program of study. Each student must complete a minimum of 30 total credit hours, of which sixteen (16) credit hours must be non-research courses in the major subject area.

At least one-half of the credits counted toward the degree must be 600-level courses or above (excluding research credit hours). Courses with course numbers, 500 to 599, open to both advanced undergraduate and graduate students, can be taken by graduate students for graduate credit (additional course requirements must be completed). Up to six (6) credit hours of earned graduate credit hours can be transferred upon request from other accredited institutions, as long as the coursework was taken

within three years prior to the student's admission to the program (see transfer credit information within the graduate catalog) and a grade of B or better was earned.

After completing the required master's-level coursework, students enroll in either MAST 600 Master's Degree Candidacy or DOCT 600 Doctoral Candidacy while completing additional program requirements.

Coursework

<i>Candidacy</i>		
MAST 600	Master's Degree Candidacy	0
DOCT 600	Doctoral Candidacy	0

¹ Offered on a rotational basis

² Additional courses (electives) within ASNB or graduate level courses in other departments may be taken. The student should consult with

his/her advisor on the selection of the appropriate electives. A course in statistics is highly recommended.

Laboratory Rotations and Research Hours

Lab Rotations

Each student will complete two rotations in different laboratories prior to the start of their third semester. Exceptions or the addition of a third rotation require approval from the ASNB Graduate Committee. The objectives of rotations in two labs are to expose the student to different approaches and areas of research and to assist the student in choosing a laboratory for dissertation research. For each rotation, the student will register for the three (3) credit hour course Laboratory Rotation (ASNB 618) which is graded on a pass/fail basis. Once a student has completed a semester rotation in a given laboratory, an ASNB Rotation Report must be completed and submitted to the Graduate Program Director.

Research Hours

Once a mentor is chosen, research hours are taken as Original Investigation (ASNB 619), in which students earn a letter grade.

Advisory Committee

The purpose of the advisory committee is to act as the primary guiding and assessment body for the student in a course of study and training through which they will acquire the knowledge and skills required to earn the Doctor of Philosophy degree. The course of study and training will have components that are common for all students but may have others that are tailored to the particular needs and/or desires of individual students.

The committee must have a minimum of five members. The mentor (principal advisor) serves as chair. The majority of committee members must have a primary, joint or associate appointment in ASNB. At least one member must have a primary appointment in a department outside ASNB (this outside committee member must not have a joint appointment in ASNB) and can include a Graduate Faculty from another University. The student, in conjunction with the advisor, should form a committee prior to the start of the second year. Once the committee is formed, the student will meet with the committee at least once per year. A Graduate Student Progress Report, completed by the student and advisor, must be reviewed annually by the student's committee. Student progress is then reported to the ASNB Graduate Program Director.

Qualifying Exam

The purpose of the qualifying exam is to assure that the student has sufficient knowledge and skills to begin a research project. The exam will be taken *within two terms* (Summer term included) after the successful completion of required coursework but no later than the Spring semester of Year Three.

Each member of the student's Advisory Committee will prepare one question designed to assess the student's ability to integrate course material, demonstrate critical thinking, and evaluate the literature related to the student's area of interest. The student's mentor will submit all the questions (minimum of five) to the ASNB Graduate Committee.

The ASNB Graduate Committee will review the questions and select three for distribution to the student. The student will have two weeks to complete two of the three questions (of their own choosing) and submit the answers electronically (PDF format) to the ASNB Graduate Committee. The exam is "open-book" and must be written in the student's

own words. The answers represent the student's unaided efforts and should NOT be edited or critiqued in any form by anyone other than the student, including the mentor, the student's committee, or other trainees in the program. The answer to each question should be no less than 10 pages and no more than 20 pages in length, double-spaced, not including references. The use of books and review articles is acceptable; however, a significant portion of the paper must be based on recent, primary sources in scientific journals.

The submitted answers will be evaluated by one member of the ASNB Graduate Committee plus one representative from the student's advisory committee, excluding the mentor. Each answer will be evaluated on a scale from 1 (poor) to 10 (outstanding) on mastery of basic background and conceptual material, familiarity with the literature in the field of study, and critical thinking about the cited works and scientific questions.

In order to pass the qualifying exam and continue in the PhD program, the student must:

1. Receive a minimum total score of at least 12 out of 20, **and**
2. Receive at least a score of 5 on each question.

A student who does not meet these passing requirements will have one chance for remediation. The remedial examination must be completed no later than six months after the student completed the original examination. The exam will again be comprised of answering two questions in the same format; the third question that had been submitted to the student by the ASNB Graduate Committee that was not answered plus a new question. Failure after remediation will result in dismissal from the PhD program. Students that pass the qualifying exam with a score between 12 and 16 will be asked to revise their answers according to reviewer concerns.

Upon successful completion of the exam, an evaluation form stating the outcome of the exam will be completed and will become a permanent part of the student's record. A passing grade indicates that the student has completed the requirements for an MS degree. At this point, the student becomes a doctoral candidate and must register for and maintain candidacy (DOCT 600) until the successful completion of his/her dissertation. This registration must be maintained year-round (Fall, Spring, and Summer). The statute of limitation for obtaining a PhD degree at the University of Louisville is four years after passing the qualifying exam. University-wide official maximums for Fellowships and Graduate Assistantships are typically six years.

Research Proposal

The Research Proposal should be defended in the semester following successful completion of the Qualifying Exam but not later than the Fall semester of Year Four. Prior to writing the Research Proposal, the student will develop an outline of the proposed experiments in coordination with their Mentor and then present this outline to their committee. It is at this point, prior to writing the Research Proposal that the committee should recommend any changes in the research plan; for example, the number of experiments, reducing the difficulty of experiments or introducing experiments that may be more appropriate for addressing the research question. Once the committee is satisfied with the proposed experiments, the student will write a Research Proposal in the format of the Research Strategy Section of a National Institutes of Health Predoctoral National Research Service Award (F31) application.

Upon successful completion of the research proposal, the student will distribute a copy to each committee member, who will have two weeks to read the proposal. Students must consider this two-week reading

period when preparing the document and scheduling the exam. The proposal defense will be chaired by the student's advisor; the exam will begin with an oral presentation, open to the public, in which the student will present an overview (approximately 40 minutes) of the research plan. The presentation will be followed by an oral defense to assess the student's readiness to conduct the proposed research and their knowledge of background information relevant to the proposed research. Non-committee members in the audience will have an opportunity to ask questions first. The general audience will then be dismissed and the student will defend his/her proposal before the committee. Success or failure will be determined by majority vote of the committee. A student who fails to successfully defend their research proposal will have two months to remediate. Failure on the second attempt will result in dismissal from the program.

Upon successful completion of the proposal defense, a Proposal Defense Evaluation Form, stating the outcome of the exam, will be completed and signed by each committee member and will become a permanent part of the student's record.

All eligible students are encouraged to subsequently submit (in coordination with their advice) full applications for funding to the appropriate agency.

* All eligible students are encouraged to submit (in coordination with their advisor) an application for a National Institutes of Health Predoctoral National Research Service Award (F31) or a National Science Foundation Predoctoral Award. Therefore, the Research Proposal may be submitted in the format of a relevant application with the exception that the background and significance section should be expanded to include a more extensive literature review than permitted by the NIH or NSF page limitations.

Annual presentation of research progress

PhD students who have completed their coursework (MS and PhD candidates) must present their research accomplishments annually. This presentation should be 15-50 minutes in length, and time and location of the presentation should be formally announced to the department faculty, staff, and students at least two weeks prior to the planned presentation. This requirement can be met by presenting during the Department's annual "Research Roundup" (15 minutes in length), the students proposal defense, during the Department's annual Neuroscience Seminar Series (30-50 minutes in length), or during the Kentucky Spinal Cord Injury Research Center's Seminar Series (30-50 minutes in length) or similar approved venue. Presentations at journal clubs are encouraged, but cannot be used as a substitute for the annual presentation requirement. During the student's graduate career, they should present at least once during Department's annual Neuroscience Seminar Series (30-50 minutes in length), or during the Kentucky Spinal Cord Injury Research Center's Seminar Series (30-50 minutes in length).

Dissertation Defense

With the exception of their training in teaching, the PhD candidate who successfully defends their research proposal will focus exclusively on completing their research projects and writing a dissertation describing the results of their experiments. The candidate must complete all requirements for the degree of Doctor of Philosophy within four calendar years after passing the qualifying examination. It is expected that the dissertation should contain data sufficient for approximately three publishable manuscripts. Upon completion of a near final draft of their dissertation and prior to scheduling of their defense, the student must distribute a copy to each Dissertation Committee member.

The committee will have two weeks to read a preliminary draft of the dissertation and give the approval to schedule a defense date or recommend major changes that need to be completed prior to scheduling a defense date.

Once the dissertation is approved to move forward by the committee, the student will schedule a Dissertation Defense and distribute an edited copy to each committee member. The Graduate School requires that an announcement of the defense be made at least two weeks prior to the scheduled date. The defense will consist of a public oral presentation (approximately 45 minutes in length) of the research completed during the student's graduate training. Non-committee members in the audience will be allowed to ask questions. The general audience will then be dismissed, and the student will defend his/her dissertation before the committee. Upon completion, a written report stating the outcome of the defense will be completed by each committee member and will become a permanent part of the student's record.

Approval by the majority of Dissertation Committee members will signify successful completion of the PhD degree.

Anthropology (MA)

Master of Arts in Anthropology

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Department: Anthropology (<http://louisville.edu/anthropology/>)

Program Website (<http://louisville.edu/anthropology/graduate/>)

Academic Plan Code(s): ANTHMA, ANTHMA_ACC

Program Information

The Master of Arts in Anthropology is designed to enhance student knowledge of and skills in dealing with contemporary social issues facing globalizing communities world-over and to enable students to locate these in the long progression of human history and within the body of social science theory. We expect our graduates to enter professions as skilled administrators, researchers, practitioners, advocates, and leaders. Although students may focus on biological anthropology, archaeology, or cultural anthropology, this is a general, comprehensive masters program.

Anthropology is among the most transdisciplinary of fields, and we see our students taking courses from and pursuing collaborations with colleagues in Humanities, Sociology, History, Women and Gender Studies, Pan-African Studies, Political Science, Art History, Biology, and the Kent School of Social Work. Students with little or no academic background in anthropology will be required to take some preparatory courses determined in consultation with the Anthropology Director of Graduate Studies.

Degree Summary

Code	Title	Hours
Seminars		9
Electives		15
Thesis/Internship		6
Minimum Total Hours		30

Soaring Scholar Accelerated BA-BS/MA in Anthropology

Undergraduate students interested in the program's accelerated options should visit the catalog pages for the BA in Anthropology (<https://>

catalog.louisville.edu/undergraduate/majors/anthropology-ba/) or the BS in Anthropology (https://catalog.louisville.edu/undergraduate/majors/anthropology-bs/) for more information.

Admission Requirements

Applicants must complete/submit:

- Online graduate application (https://graduate.louisville.edu/admission/apply/) for admission.
- A statement of interests covering relevant experience and aspirations. This letter is absolutely critical to your successful application, as it helps us assess where you might find common interests among Department faculty.
- Official transcripts, as stipulated by the Graduate School. The minimum GPA for acceptance into the program is 3.0.
- Three letters of recommendation addressing the candidate's readiness for graduate studies, academic abilities, and potential for success. One letter may be from an employer.
- Applicants may choose to submit a writing sample.

The Graduate Committee uses a holistic approach when evaluating graduate applications.

Program Requirements

The **Master of Arts in Anthropology** requires 30 credit hours at the graduate level. It comprises 24 credit hours of course work, plus six (6) credit hours of thesis or internship. All students enrolled in the MA program are required to complete one of the following options:

In addition to the nine (9) credit hours of the 600-level core seminars, students take another 15 credit hours of course work (electives) at the 500 or 600 level, and six (6) credit hours of thesis or internship/practicum hours.

Students may enroll in up to nine (9) credit hours in another department. Students may enroll in 500-level graduate courses in another department with the permission of the Anthropology Director of Graduate Studies.

Students who are in the Soaring Scholar program may apply up to nine (9) credit hours taken at the graduate level as an undergraduate toward the MA in Anthropology, on the condition that the student earned a grade of B (not B-minus) or higher in the course and the course was taught at the graduate level. Approval from the Director of Graduate Studies is required. Master's-degree students outside of the accelerated master's-degree program may not use coursework earned as undergraduate and used to meet the requirements for the undergraduate degree for graduate credit.

Applied Behavior Analysis (CERT)**Graduate Certificate in Applied Behavior Analysis**

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood, and Prevention Science (<http://louisville.edu/education/departments/sped/>)

Program Webpage (<http://louisville.edu/education/degrees/bcba-certificate/>)

Academic Plan Code(s): AABACAA, AABACAAO

Program Information

This program is completed 100% online.

The University of Louisville's Graduate Certificate in Applied Behavior Analysis provides practitioners with advanced knowledge in behavior analytic research and approaches to skill development and the treatment of challenging behavior.

Students receive rigorous academic work within the program's carefully designed course sequence that is taught by faculty with practical and research experience in special education and applied behavior analysis.

Students in the graduate certificate in Applied Behavior Analysis complete a course sequence that meets the Behavior Analyst Certification Board (BACB) coursework requirements for the BCBA Certification Exam. However, the certificate does not require or include practicum hours for field experience.

To be eligible for the BCBA exam, students must complete 2,000 hours of supervised field experience in addition to the required coursework. These hours must be arranged and completed independently, outside of the program, after earning the certificate. Candidates are strongly encouraged to review and follow the BCBA Fieldwork Standards.

Prospective students should understand that they will not be eligible to sit for the BCBA exam until all requirements are met, including the 2,000 supervised fieldwork hours. Because the program does not provide or require these hours, the graduate certificate in Applied Behavior Analysis at University of Louisville is not designed to prepare students for licensure immediately upon program completion in any US state or other jurisdiction.

Admission Requirements

Admission to the program requires a graduate application to the Graduate School (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Applicants must also have the following:

- A master's degree in any field from an accredited institution
- Official transcripts
- Two letters of recommendation related to the applicant's work with individuals with autism
- Professional Goals Statement
- Current Resume
- Test of English as a Foreign Language (TOEFL/IELTS/Duolingo) is required of all students who completed their degrees from outside the United States in which English is not the native language.

Program Requirements

Program Coursework

Code	Title	Hours
EDSP 644	Applied Behavior Analysis	3
EDSP 650	Behavior Assessment	3
EDSP 654	Radical Behaviorism	3
EDSP 669	Single Case Research Methods and Designs	3
<i>Midpoint Assessment</i>		
EDSP 546	Behavior Analytic Approach to Communication	3
EDSP 651	Professional and Ethical Practice of Applied Behavior Analysis	3
EDSP 671	Behavior Intervention	3
<i>Exit Requirements</i>		
Minimum Total Hours		21

Midpoint Assessment: Completion of EDSP 650 Hallmark assessment task with a rating of Satisfactory. Grades of "B-" or better in all certificate courses prior to Midpoint: EDSP 644, EDSP 654, EDSP 669 and EDSP 650.

Exit Requirement: Completion of intervention project and presentation with a rating of Satisfactory and grades of B- or higher in all certificate courses.

Applied Philosophy (MA)

Master of Arts in Applied Philosophy

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Philosophy (<https://louisville.edu/philosophy/>)

Academic Plan Code(s): APHIMA, APHIMA HCE, APHIMA PAP

Program Information

The Master of Arts (MA) in Applied Philosophy offers two options for graduate training in Applied Philosophy.

1. The Concentration in Health Care Ethics is designed for diverse graduate, pre-professional, and professional students to develop their skills as highly engaged citizens, leaders, and scholars. Building on six core bioethics (BETH) courses, the Health Care Ethics track offers students a significant degree of flexibility through electives in other departments and schools to deepen their personal areas of interest and

broaden their expertise beyond their core knowledge base. The degree prepares graduates to bring a more educated, nuanced and thoughtful approach to their work in clinical or hospital settings, health law or policy development or academic research and teaching as well as many other overlapping possibilities.

Graduates of this concentration will possess a mastery of 1) ethical theory, 2) the application of theory to practice, and 3) the clinical case studies that guide research, policy, and legal deliberation with respect to our medical and health care practices. Graduates will be trained for positions in ethical leadership and will be "reflexively ethical" in order to establish standards that ramify throughout the organizations into which they are hired.

2. The Concentration in Practical & Applied Philosophy trains graduate, pre-professional, and professional students who have some preparation in Philosophy in the advanced use of philosophical and interdisciplinary methods to enhance their research and their career. Building on a Proseminar and four Applied Philosophy courses, students then pursue electives in their area(s) of greatest interest. Students also complete fieldwork or an internship to complement their studies and put them into practice, as well as an applied research project designed based on their interests.

Graduates of this concentration will have a deep understanding of the issues and methods of applied philosophy, and advanced skills in using critical thinking to improve systems and processes in whatever field they pursue. The degree will prepare them for continued graduate or professional training, and/or for leadership roles in their workplace.

Soaring Scholar Accelerated BA-MA Philosophy Program

Undergraduate students interested in the program's accelerated option should visit the catalog page for the BA Philosophy (<https://catalog.louisville.edu/undergraduate/majors/philosophy-ba/>) for more information.

Degree Summary

Code	Title	Hours
Core Courses		15
Electives		15
Internship		3
Minimum Total Hours		33

Admission Requirements

All applicants must submit to the Graduate Admissions Office:

- A graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) with application fee
- TOEFL, IELTS or Duolingo scores, if an international student
- Two recent letters of recommendation from those familiar with the applicant's academic work or lifelong learning, which speak to applicant's ability to complete graduate level education. Discursive letters from previous professors preferred.
- Curriculum vitae or resume
- Personal statement, which should address why you have decided to pursue a MA in Applied Philosophy. The personal statement should be between 2-4 double spaced pages (500-1000 words).
- Writing sample. The writing sample should be a substantial, polished, persuasive paper that demonstrates the applicant's ability to do

high-level undergraduate research. Writing sample requirements are waived for applicants who have already been accepted into a medical fellowship or PhD program.

Art (Creative) and Art History (MA)

Master of Arts in Art (Creative) and Art History

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Art and Design (<https://louisville.edu/art/>)

Program Webpage (<https://louisville.edu/art/graduate/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information

The Department of Art and Design, endowed as the Hite Institute of Art and Design, offers a Master of Arts (MA) in Art with concentrations in Art History and Critical & Curatorial Studies. The program requires 31 credit hours of graduate study, divided between the Core Curriculum and coursework in either the Art History or Critical & Curatorial Studies concentration.

Art History Concentration

The MA in Art with a concentration in Art History provides advanced expertise in the history of art. This course of study equips students with the coursework, language skills, and research experience necessary for further graduate study or for careers in museums or educational settings. Students in this concentration may choose from in-depth courses in topics such as Renaissance and Baroque Art in Italy, Spain, and Northern Europe; Mexican Art; 19th- and 20th-century Architecture; American Art; Film; Modern and Contemporary Western Art and Theory; and Asian and Non-Western Art and Architecture.

Critical & Curatorial Studies Concentration

The MA in Art with a concentration in Critical & Curatorial Studies integrates critical theory, contemporary art history, exhibition history, and practical exhibition experience. This concentration prepares students for careers in the rapidly expanding fields of contemporary exhibition development and art writing.

Program Resources

Students in the MA program benefit from the Hite Institute of Art and Design's extensive resources, including multiple galleries on campus and in downtown Louisville, partnerships with local museums and galleries, and an active speaker and colloquia schedule featuring internationally renowned curators, gallery directors, and artists.

Degree Summary

Code	Title	Hours
	Program Core and Electives	16
	Concentration Coursework	15
	Minimum Total Hours	31

Soaring Scholar Accelerated BA/MA in Art History and Critical and Curatorial Studies

Undergraduate students interested in the program's accelerated options should visit the catalog page for the BA in Art (<https://catalog.louisville.edu/undergraduate/majors/art-ba/>) for more information.

Admission Requirements

Applicants to the MA program must submit the following credentials to the Graduate School (<https://graduate.louisville.edu/admission/apply/>):

- A formal Application for Graduate Admission, including a nonrefundable application processing fee.
- Official transcripts of all college work.
- Two letters of recommendation specific to the program, addressing the applicant's academic and/or artistic achievements and potential.

- A statement of purpose (approximately 500 words) outlining the applicant's educational and professional goals in their chosen field (Art History or Curatorial Studies).
- A writing sample, typically an advanced-level Art History paper.

Program Requirements

Code	Title	Hours
Core Coursework		16
ARTH 600	Graduate Seminar (or CCS 600 - first semester)	
ARTH 642	Theories & Methods in the Visual Arts (to be taken in first semester)	
Art History Elective (500 or 600 level)		
Elective - Outside the Department of Art & Design (500 or 600 level) (with approval of advisor)		
Elective - Outside the concentration (500 or 600 level) ¹		
ARTH 645	Thesis Guidance (or CCS 645)	
Concentration		15
<i>Students complete one of the following (see Concentration Requirements tab for specific coursework):</i>		
Concentration in Art History		
Concentration in Critical & Curatorial Studies		
Minimum Total Hours		31

¹ 'Outside the concentration' means outside the area of focus, e.g.: students in the Art History concentration must take a course in Studio Art or Curatorial Studies; students in the Curatorial Studies concentration must take a course in Studio Art or Art History.

Concentration Requirements

All students must complete one of the following 15 credit hour concentrations, in addition to the 16 credit hour program core (see Degree Requirements tab).

Concentration in Art History

Academic Plan Code(s): ARTCMA_HIS

Upon admission to the program, students in the Art History concentration are expected to demonstrate competence in the history of art, equivalent to an undergraduate major.

Reading knowledge of one foreign language is required for the completion of the Art History concentration. This requirement should be fulfilled during the first year in the program, but must be met before enrolling for Thesis Guidance (ARTH 645/ARTH 646). Proficiency can be demonstrated in one of two ways:

1. Taking an examination administered by the department, scheduled in the fall and spring semesters; or
2. Completing the intermediate level of the language at the University of Louisville with a grade of B or better.

Code	Title	Hours
ARTH Pre 1750 - 3 credit hours, select one course from the following:		3
ARTH 542	Special Topics - WR (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
ARTH 651	Topics in Ancient Art	
ARTH 552	Ancient Painting	

ARTH 553	Ancient Cities	
ARTH 561/661	Studies in Medieval Art	
ARTH 571/671	Special Topics in Renaissance Art	
ARTH 581/681	Studies in Baroque Art	
ARTH After 1750 - 3 credit hours, select one course from the following:		3
ARTH 521	Special Topics in Modern Art	
ARTH 525/625	Representations of Trauma in the Visual Arts	
ARTH 526/626	Special Topics in Contemporary Art	
ARTH 542	Special Topics - WR (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
ARTH 593/693	Special Topics in Modern Architecture	
ARTH 595	Special Topics in American Art	
& ARTH 695	Special Topics in American Art	
ARTH 597	Special Topics in Photographic History	
ARTH 621	Special Topics in Modern Art	
ARTH 623	History of Performance Art	
ARTH 699	Topics in Urban History	
ARTH NonWestern - 3 credit hours, select one course from the following:		3
ARTH 531/631	Special Topics in Asian Art	
ARTH 542	Special Topics - WR (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
ARTH 544	Pan-African Art: Form and Content	
ARTH 549	Contemporary Trends in African-American Art	
ARTH Elective		3
ARTH Elective		3
ARTH 643/644	Independent Study (one optional independent optional study course is permitted)	
Language (fulfillment of the language requirement is required during the first year in the program)		
Thesis		
Minimum Total Hours		15

A minimum of 15 credit hours in the concentration, exclusive of Thesis Guidance, must be at the 600-level, of which at least nine (9) credit hours must be in Art History.

The concentration in Art History will conclude with a written thesis.

The thesis is a research paper that demonstrates critical knowledge of relevant sources, skill in analysis and interpretation, and the ability to present findings in a well-organized, coherent manner. The thesis must be defended in an oral examination.

Concentration in Critical & Curatorial Studies

Academic Plan Code(s): ARTMA_CCS

Upon admission to the program, students in the Critical & Curatorial Studies concentration are expected to demonstrate competence in art history, studio art, or arts management, equivalent to an undergraduate major, as well as an interest in museum theory and practice.

Code	Title	Hours
CCS 647	Introduction to Critical and Curatorial Studies I	3
CCS 648	Critical and Curatorial Studies II	3

CCS 649	Curatorial Internship	3
ARTH (500 or 600 level)		3
Select one of the following 600-level Public Administration courses:		3
URBS 651	Foundations of Public Administration	
URBS 652	Program Evaluation	
URBS 666	Nonprofit Management	
URBS 668	Grantsmanship and Fundraising	
Written Thesis with Exhibition or Curatorial Project		
Minimum Total Hours		15

A minimum of 15 credit hours in the concentration, exclusive of Thesis Guidance, must be at the 600-level

The concentration in Critical & Curatorial Studies culminates in a thesis exhibition or curatorial project. This project may be produced in collaboration with the university's galleries, the Speed Art Museum, or other appropriate institutions authorized by the department. The exhibition or project should take place in the final year of study.

To fulfill this requirement, the candidate must:

1. Submit a project proposal, approved by their graduate advisor;
2. Produce or implement the proposed thesis practicum; and
3. Document the exhibition or project.

The documentation should include materials such as press releases, announcements, wall texts, brochures, catalogs, and digital or photographic records of the exhibition or project, along with other relevant documentary materials.

In addition to the practicum and documentation, the thesis will include a written component that connects the project to critical theory and current curatorial practice. This written portion will detail the planning, implementation, and documentation of the project and must comply with the regulations governing the format and presentation of the written master's thesis.

Artificial Intelligence in Medicine (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Artificial Intelligence in Medicine

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Bioengineering (<https://engineering.louisville.edu/academics/departments/bioengineering/>)
Academic Plan Code(s): AIM_CGR, AIM_CGRO

Program Information

This program can be completed 100% online (<https://engineering.louisville.edu/academics/graduate-programs/cert-ai-med/>).

The graduate certificate in Artificial Intelligence in Medicine offers students training in the application of computational methods and machine learning techniques to the analysis of medical problems. The focus of the program is an emphasis on the mastery of skills required to

analyze medical data related to patients, which include big data, medical imaging, physiological and disease progression modeling, experimental (clinical and laboratory), and healthcare information. This program will benefit healthcare through the use of modern computational techniques to manage and investigate the ever-increasing volume of patient data and the wide variety of diseases. Students will acquire skills and knowledge in computation, modeling and simulation, machine learning, medical data management, and advanced statistical analysis, with an emphasis on interdisciplinary collaboration.

The courses available for this program may include assignments and projects in collaboration with researchers at the School of Medicine. In particular, Bioengineering faculty have established collaborations with the Cardiovascular Innovation Institute, the Kentucky Spinal Cord Injury Research Center, the Brown Cancer Center, the Center for Predictive Medicine, and the Departments of Oncology and Radiology.

Certificate Summary

Code	Title	Hours
	Bioengineering Coursework	9
	Approved Electives	3
Minimum Total Hours		12

The admission standards for the Graduate Certificate program in Artificial Intelligence in Medicine are as follows:

- All admission applications for the Graduate Certificate program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - Application fee
 - Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution, or current enrollment in a graduate Speed School program, and completion of an introductory computer programming course or previous exposure to programming. Students without this course are encouraged to apply but may be asked to take a pre-requisite course in computer programming.
- The successful applicant will typically have an undergraduate grade point average of 3.0 or above (on a 4.0 scale).
- International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score, or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79 or higher, an overall IELTS score of 6.5 or higher or Duolingo score of 105.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than

12 months will be considered to have withdrawn from the certificate program. Students who seek to return after such a period of time must contact the graduate program director.

The following certificate requirements are mandatory of all Graduate Certificate candidates:

- The Certificate Program of Study must be completed with a 3.0 GPA or better for all graduate courses used to satisfy certificate requirements.
- Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted towards a graduate certificate.

The Bioengineering Department has established the following grade policy for the Artificial Intelligence in Medicine Graduate Certificate program:

- A student cannot receive a C+ or lower grade in courses counting towards the certificate.

Additionally, all program requirements for this certificate must be completed within three years from admission into the program.

Program Requirements

Code	Title	Hours
Choose 12 credit hours from the list below (9 credit hours must be from BE courses):		12
BE 524	LabVIEW for Bioengineers	
BE 530	Machine Learning in Python	
BE 540	Machine Learning in Medicine	
BE 542	Medical Image Computing	
BE 543	Computer Tools for Medical Image Analysis	
BE 544	Artificial Intelligence Techniques in Digital Pathology	
BE 604	Introduction to Artificial Intelligence in Bioengineering	
BE 640	Computational Methods for Medical Image Analysis	
BE 645	Artificial Intelligence and Radiomics	
BE 685	Modeling of Biological Phenomena	
CSE 532	Python and Data Analytics	
CSE 545	Artificial Intelligence	
CSE 546	Introduction to Machine Learning	
CSE 547	Deep Learning Algorithms and Methods	
CSE 590	Special Topics in Computer Science and Engineering (Big Data Analytics Tools & Tech)	
CSE 632	Data Mining	
<i>NOTE: Only one of either CSE 632 or PHMS 641 can count towards certificate</i>		
CSE 641	Medical Imaging Systems	
CSE 660	Introduction to Bioinformatics	
CSE 694	Special Topics in Computer Science and Engineering ¹	
PHST 620	Introduction to Statistical Computing	
PHST 655	Basic Statistical Methods for Bioinformatics	
PHST 681	Biostatistical Methods II	
PHST 710	Advanced Statistical Computing I	

PHMS 641	Data Mining I	
PHMS 642	Data Mining II	
Minimum Total Hours		12

¹ CSE 694 Special Topics options:

1. Current topics in Bioinformatics
2. Topics in Advanced Machine Learning Theory & Methods

Artificial Intelligence in Medicine (MS)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Science in Artificial Intelligence in Medicine

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS);

Department: Bioengineering (<https://engineering.louisville.edu/academics/departments/bioengineering/>)
Academic Plan Code(s): AIM_MIS_O

This program is completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-science-in-artificial-intelligence-in-medicine/>).

The Master of Science in Artificial Intelligence in Medicine emphasizes the mastery of skills required to analyze medical data related to patients and public health, which include big data, medical imaging, biostatistics, experimental data (clinical and laboratory), and healthcare information. The academic goals of the master's program are mastery of methods for efficient and precise analysis of medical data and biostatistics.

The Master of Science in Artificial Intelligence in Medicine degree program is intended for persons having an accredited baccalaureate degree. Applicants without prior statistics or computer programming courses should expect to take some undergraduate background coursework. Students interested in the MS degree program should consult the Director of Graduate Studies.

Upon completion of the program a student will:

1. Demonstrate advanced knowledge of Artificial Intelligence applied to the field of Medicine or Public Health through the application of graduate level principles of programming and math, and effectively communicate this knowledge.
2. Students will gain hands-on and practical experience in Artificial Intelligence research topics through use of modern computing techniques/ tools to conduct appropriate experimentation, analysis, and interpretation of data, and to use scientific judgment to draw conclusions.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing and satisfaction of degree requirements is 3.00 for all academic work completed while in graduate studies.
2. Any student who does not satisfy the published performance criteria shall be placed in probationary status. Please review the Academic Standing Section (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/>) within this catalog in regard to Academic Probation.
3. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs. All degree requirements must be completed within six years from admission into the program.
4. All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. Students who seek to return after such a period of time must contact the graduate program director.

Degree Requirements

The following degree requirements are mandatory of all Master of Science candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. All program requirements must be completed within six years from admission into the program.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/degree-requirements/>) section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Artificial Intelligence in Medicine are as follows:

1. All admission applications for the program shall include:
 - a. A completed application for admission (<https://graduate.louisville.edu/admission/apply/>) for the Graduate School,
 - b. An application fee,
 - c. At least two letters of recommendation,
 - d. Written statement describing previous experience related to Artificial Intelligence in Medicine and how the Master of Science in Artificial Intelligence in Medicine will allow the applicant to fulfill their career goals, and
 - e. Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).

4. International students whose primary language is not English must show English language proficiency by a TOEFL score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher.

Asian Studies (CERT)

Graduate Certificate in Asian Studies (ASSTCAS)

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Department: Political Science (<http://louisville.edu/politicalscience/>)

Program Website (<http://louisville.edu/asianstudies/>)

Academic Plan Code(s): ASSTCAS

Program Information

The Graduate Certificate in Asian Studies is a graduate-level interdisciplinary program housed in the College of Arts and Sciences. It allows students to learn more about the people of China, India, and Japan from the perspectives of art history, geography, history, religious studies, political science, sociology, and theatre arts. The 15 credit hour program may be completed as a stand-alone program, or in conjunction with other graduate programs—for example, the MA in History or Political Science, or the PhD in Art History or Humanities.

Students take 15 credit hours in graduate courses with an Asian emphasis. At least three of the five required courses must be at the 600 level, and the five courses must be drawn from at least three of the following disciplines: Anthropology, Art History, Classical and Modern Languages, Geography, History, Humanities, Political Science, Sociology,

Theatre Arts, or Women's, Gender and Sexuality Studies. A minimum of three (3) credit hours must be in the Division of Humanities (exclusive of language courses), and at least three (3) credit hours must be in the Division of Social Sciences.

To complete the Graduate Certificate, students also must demonstrate reading knowledge in one of the following: Chinese, Japanese, or another language designated as an Asian language by the Program Director.

With the approval of the Program Director, an internship in a community or local business may be substituted for three (3) credit hours of classwork. To be eligible for this substitution, the internship must involve work that is primarily connected with Asia or Asian-Americans in some way.

Admission Requirements

Interested students must have earned a baccalaureate or other undergraduate degree from an accredited college or university, and meet the criteria for admission to the Graduate School at the University of Louisville and submit a graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Individuals wishing to pursue the graduate certificate in conjunction with a graduate degree program in another University of Louisville department should be admitted to that degree program before applying for admission to the Graduate Certificate Program in Asian Studies.

AST 598	Nationalism and Modernity in East Asia	
Minimum Total Hours		15

- ¹ May be repeated when topics vary. Sample special topics that have been offered in previous semesters under one of these course numbers include, but are not limited to, the following list; please note that these are examples and may not be scheduled in the current academic year.
- East Asian Landscape
 - Modern Cities and Archeology in Asia
 - Clash of Civilizations
 - Nationalism and Modernity in East Asia
 - Culture of India
 - Women in East Asia
 - International Criminal Justice in Asia
 - Space of Asian Cities and Archeology
 - US China Relations
 - East Asian Women's History
 - Japanese Media and Japan

Audiology (AuD)

Doctor of Audiology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)
 Department: Audiology (<http://louisville.edu/medicine/degrees/audiology/>)
 Program Website (<https://louisville.edu/medschool/audiology/>)
 Academic Plan Code(s): AUDIDAU

Program Information

The Doctor of Audiology degree is a four-year, post-baccalaureate degree program leading to a professional degree conferred by the Graduate School. The program is physically located within the Louisville Health Sciences Campus and administratively located in the Department of Otolaryngology-Head and Neck Surgery and Communicative Disorders in the University of Louisville School of Medicine. The faculty are committed to the clinical focus of the Doctor of Audiology degree and endeavor to bring real-world experiences to bear on the teaching environment. The faculty actively participate in the provision of clinical services in both hospital and private practice arenas.

Students benefit by working side by side with the Audiology faculty and staff in an active and dynamic medical environment. Students will interact with faculty, residents and students from other disciplines such as Otolaryngology, speech pathology, and pediatrics, not only in the provision of clinical services but also in teaching and research endeavors.

Admission Requirements

Admission to the program will be for Fall term only. Deadline for application materials is January 1st of the application year.

Students must apply through CSDCAS (<https://www.csdcas.org/>).

Applicants should:

1. Complete an application for the University of Louisville via CSDCAS.
2. Pay an application processing fee to UofL Graduate School (student will be notified of payment via email once their application is received from CSDCAS).
3. Have a minimum GPA of 3.0 (verified in CSDCAS).
4. Three letters of recommendation (uploaded in CSDCAS).
5. A structured personal statement in CSDCAS: Please respond to all three questions in up to two pages (total):
 - Part 1: Describe and explain the experience(s) you have had that have convinced you that audiology is the career for you. (This may include: coursework, shadowing, job experience, personal experience.)
 - Part 2: What relevant life experiences (e.g., leadership roles, service to the community, personal accomplishments, etc.) and personal qualities do you have that will help you to succeed in graduate school.
 - Part 3: Describe how you have solved a problem and how the skills and techniques that you employed might help you in graduate school and as a clinical audiologist. (The problem could be one related to your undergraduate experience, to a job that you have held, or a personal challenge that you have faced.)

Applications must be completed and received by January 1st of each year.

The criteria listed above are program minimums. Students meeting these criteria are not guaranteed admission. The program in Audiology adheres to the Essential Functions Policy (<https://louisville.edu/medicine/degrees/audiology/EssentialFunctions2019.docx>) for all students. Interviews are usually held in January or February, and campus tours and information sessions are held in the Spring and Fall. Admissions decisions will be made after all applicants have been interviewed (usually mid-late February). Applications should be completed online.

The University of Louisville requires that applicants whose first language is not English, and who earned their degree(s) from an institution in another country, provide evidence of English proficiency as a part of the application process. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. **During their interview, applicants will be asked to demonstrate a knowledge of the field.**

We welcome all applicants. Please call us at 502-852-5274 or contact us online for more information.

Suggested Coursework

Students who apply to our program and do not have an undergraduate degree in Communicative Disorders (or Speech and Hearing Sciences) are encouraged to apply. Undergraduate coursework in the following areas is useful for success in our program:

- Life Sciences - may include: Human Anatomy and Physiology, Neuroanatomy, Neurophysiology, Genetics
- Physical Sciences - may include: Physics, Inorganic and Organic Chemistry
- Behavioral Sciences - may include: Psychology, Sociology, Anthropology
- Mathematics - may include courses beyond College Algebra, Statistics

Program Requirements

The Doctor of Audiology degree program has been designed to meet the content and experience guidelines developed over the past decade by numerous professional organizations and associations.

The curriculum begins with the student spending a significant amount of time in the classroom with a minimum amount of time in the clinical environment. Over the course of the four years, the ratio of classroom to clinic time reverses. During the fourth year, students will be given options for practical experiences through an externship, in a variety of sites around the country.

Typical 4-Year Curriculum

(subject to change)

Year 1		
Fall		
AUDI 600	Anatomy and Physiology of Hearing	3
AUDI 604	Essential Techniques in Audiometry for Pediatrics and Adults	3
AUDI 606	Acoustics and Speech Acoustics	3
AUDI 614	Clinical Techniques in Audiology I	1

AUDI 610	Clinical Clerkship I	1
Hours		11
Spring		
AUDI 626	Assessment and Management of Vestibular Disorders	3
AUDI 624	Amplification Technology	3
AUDI 622	Electrophysiologic Techniques in Audiology	3
AUDI 615	Clinical Techniques in Audiology II	2
AUDI 610	Clinical Clerkship I	1
Hours		12
Summer		
AUDI 630	Amplification Selection and Fitting	3
AUDI 610	Clinical Clerkship I	1
AUDI 636	Pediatric Audiology	3
AUDI 648	Hearing Science I	3
Hours		10
Year 2		
Fall		
AUDI 620	Clinical Clerkship II	2
AUDI 621 or AUDI 680	Audiologic Rehabilitation ² or Special Topics in Audiology	3
AUDI 650	Research Methods	3
AUDI 629	Cochlear Implants and other Implantable Hearing Devices	4
Hours		12
Spring		
AUDI 620	Clinical Clerkship II	2
AUDI 646 or AUDI 612	Advanced Topics in Medical Audiology ² or Pathology of the Auditory-Vestibular System	4
AUDI 660	Investigation in Audiologic Practice	1
AUDI 627	Tinnitus	3
Hours		10
Summer		
AUDI 632	Professional Issues in Audiology	2
AUDI 635	Audiology Internship	4
AUDI 652	Prevention of Hearing Loss	2
AUDI 660	Investigation in Audiologic Practice	1
Hours		9
Year 3		
Fall		
AUDI 635	Audiology Internship	4
AUDI 660	Investigation in Audiologic Practice	1
AUDI 656	Practice Management in Audiology	4
AUDI 680 or AUDI 621	Special Topics in Audiology ² or Audiologic Rehabilitation	2
Hours		11
Spring		
AUDI 612 or AUDI 646	Pathology of the Auditory-Vestibular System ² or Advanced Topics in Medical Audiology	3
AUDI 635	Audiology Internship	4
AUDI 638	Educational Audiology	3
AUDI 660	Investigation in Audiologic Practice	1
Hours		11
Summer		
DOCT 600	Doctoral Candidacy ¹	0
Hours		0
Year 4		
Fall		
DOCT 600	Doctoral Candidacy ¹	0
Hours		0

Spring		
DOCT 600	Doctoral Candidacy ¹	0
Hours		0
Minimum Total Hours		86

¹ Full-time status

² Offered every other year in a class of combined 2nd and 3rd year students

The Doctor of Audiology program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Biochemistry and Molecular Genetics (MS)

Master of Science in Biochemistry and Molecular Genetics

Unit: School of Medicine (<https://louisville.edu/medicine/>) (GM)

Department: Biochemistry and Molecular Genetics (<http://louisville.edu/medicine/departments/biochemistry/>)

Program Webpage (<https://louisville.edu/medicine/departments/biochemistry/programs/graduateprograms/>)

Academic Plan Code(s): BIOCMS

Program Information

The Master of Science in Biochemistry and Molecular Genetics program is two-to-three-year course of study designed for students interested in:

- A master's of science degree leading to job opportunities in science that do not require extensive research experience or credentials, e.g., pharmaceutical representatives, medical insurance providers, scientific writing.
- Preparation for professional school, e.g., medical, dental, or legal.
- Combined programs to form hybrid or dual science/business or science/public health degrees, such as an MS/MBA or MS/MPH programs.

- Gaining practical training in laboratory technique and data analysis as the basis for a career in biotechnology or academic research.

As teachers and scientists, the faculty of the Department of Biochemistry and Molecular Genetics subscribe to the following missions:

- Provide up-to-date and high-quality classroom and laboratory instruction in the disciplines of biochemistry, genetics, and molecular biology to students at the university.
- Conduct and publish research or other scholarship in areas that advance knowledge within a discipline, contribute to improving the human condition, and contribute to teaching.
- Train pre- and post-doctoral individuals in biomedical research.

Admission Requirements

All applications must be submitted online (<https://graduate.louisville.edu/admission/apply/>) to the Graduate School.

Only complete applications will be reviewed. A complete application must have all the following:

- Transcripts of all course work
- At least two letters of recommendation, preferably from faculty in a scientific discipline, such as biology or chemistry
- A personal statement of interest

Selection Process

Applications will be reviewed by the Director of Graduate Studies and the Graduate Executive Committee of the department. We use a holistic review process and use the GPA and relevant experience to select applicants likely to be successful in our program.

Final decisions for admissions will be made in April-May of each year.

Program Requirements

Code	Title	Hours
Program Core		8
BIOC 606	Biochemistry Seminar	1
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics	1
BIOC 645	Advanced Biochemistry I	4
BIOC 646	Nucleic acids and information metabolism	1
BIOC 649	Protein Function: from interactions to enzyme control	1
Elective Courses		12-16
BIOC 647	Advanced Biochemistry II (May be taken in place of BIOC 646 & BIOC 649)	4
BIOC 648	Journal Club in Biochemistry and Molecular Genetics	1
BIOC 661	Molecular Mechanisms of Toxicology	3
BIOC 663	High-Throughput Sequencing Data Analysis	3
BIOC 667	Cell Biology	3
BIOC 668	Molecular Biology (May be taken in place of BIOC 646 & BIOC 649)	3-4
BIOC 670	Biomedical Genetics and Genomics	3-5
BIOC 675	Cancer Biology	4
ENGL 677	Graduate Writing in the Disciplines	3

Students complete one of the following options:

MS Thesis		
Ten (10) credit hours from the following:		
BIOC 613	Biochemistry Laboratory	2-4
BIOC 619	Research	6-8
MS Non-Thesis: Laboratory-Based		
BIOC 613	Biochemistry Laboratory	2-4
MS Non-Thesis: Course-Based		
Additional Course Electives (inside or outside BIOC) ¹		
Minimum Total Hours		30

¹ Laboratory work (BIOC 613) may be considered an elective to count towards a non-thesis, course-based degree option.

Thesis/Final Paper

Thesis

A MS research thesis is required for the thesis option. Students, with the consent of their committee, may choose between a traditional research thesis format or a thesis in which the methods and results sections are replaced by manuscripts ready for submission for publication in a refereed journal.

In either case, the thesis must conform to the Graduate School Standards for Preparation of Theses and Dissertations (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/>).

Paper

A paper based on literature research or laboratory research (rotation research) is required for the non-thesis, lab option. The topic will be approved by the Director of Graduate Studies and the paper evaluated by two faculty.

A paper based on literature research is required for the non-thesis, coursework option. The topic will be approved by the Director of Graduate Studies and the paper evaluated by two faculty.

Schedule of Course Offerings

Year 1		
Fall		Hours
BIOC 613	Biochemistry Laboratory (Required for lab-based option)	2-4
BIOC 619	Research (Required for thesis-based option)	1-9
BIOC 645	Advanced Biochemistry I (Required)	4
Hours		4
Spring		
BIOC 613	Biochemistry Laboratory (Required for lab-based option)	2-4
BIOC 619	Research (Required for thesis-based option)	1-9
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics (Required)	1
BIOC 647	Advanced Biochemistry II (Required)	4
BIOC 667	Cell Biology (Elective)	3
BIOC 675	Cancer Biology (Elective)	4
Hours		12
Year 2		
Fall		
BIOC 613	Biochemistry Laboratory	2-4
BIOC 619	Research	1-15
BIOC 646	Nucleic acids and information metabolism	1

BIOC 649	Protein Function: from interactions to enzyme control	1
BIOC 648	Journal Club in Biochemistry and Molecular Genetics	1
BIOC 663	High-Throughput Sequencing Data Analysis	3
BIOC 670	Biomedical Genetics and Genomics	3-5
Hours		12-30
Spring		
BIOC 606	Biochemistry Seminar	1
BIOC 613	Biochemistry Laboratory	2-4
BIOC 619	Research	1-15
BIOC 648	Journal Club in Biochemistry and Molecular Genetics	1
BIOC 668	Molecular Biology	3-4
Hours		8-25
Minimum Total Hours		36-71

Biochemistry and Molecular Genetics (PhD)

Doctor of Philosophy in Biochemistry and Molecular Genetics

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)

Department: Biochemistry and Molecular Genetics (<http://louisville.edu/medschool/biochemistry/>)

Program Website (<https://louisville.edu/medicine/departments/biochemistry/programs/graduateprograms/>)

Academic Plan Code(s): BIOCPHD

Program Information

As educators and scientists, the faculty of the Department of Biochemistry and Molecular Genetics subscribe to the following missions:

- Provide up-to-date and high-quality classroom and laboratory instruction in the disciplines of biochemistry, molecular biology, and genetics to students at the university.
- Conduct and publish research or other scholarship in areas that advance knowledge of a discipline, and contribute to improving the human condition.
- Train pre- and post-doctoral individuals in biomedical research.

Admission Requirements

All applications must be submitted using the online graduate application (<https://graduate.louisville.edu/admission/apply/>).

Doctoral students are admitted for Fall term only. Be sure to select Fall term for start date and Biochemistry and Molecular Genetics for the program. Rolling admission is used for the PhD program. Review of applications begins in December of each year. Applications are reviewed continuously through March.

Criteria and Mechanism for Selection

Criteria

The Biochemistry and Molecular Genetics department uses a holistic approach for reviewing applications and selecting candidates for interview. The applicant's academic record, research experience, and letters of recommendation are closely evaluated. Competitive candidates have a strong background in biochemistry, chemistry, or biology with evidence of rigorous coursework. In addition, a one-to-two-page personal statement describing past educational, laboratory and relevant life experiences, as well as a brief description of professional goals after the degree program, is required.

Competitive applicants have:

- A minimum undergraduate (and graduate) overall grade point average of 3.0 (4.0 system) with an average of 3.0 in science courses.
- Previous research experience
- Strong letters of recommendation

Selection

The Biochemistry and Molecular Genetics Department's Graduate Executive Committee (GEC) reviews and considers applications from December through March. Top candidates will be interviewed online or in person. Select candidates will be invited to a recruitment weekend in February to visit the department and meet faculty and students.

Select candidates are nominated for Integrated Programs in Biomedical Sciences (IPIBS). Fellowship awards for qualified applicants (louisville.edu/medicine/ipibs/about (<http://louisville.edu/medicine/ipibs/about/>)). The department will notify applicants by email of their decision. All applicants who are accepted into the program must respond with their decision no later than April 15. In the absence of a response, after April 15 the position in the program and financial support is no longer guaranteed and may be offered to another applicant. The Biochemistry and Molecular Genetics Department accepts four to six students per year into the PhD program.

Requirements for the PhD Degree in Biochemistry and Molecular Genetics

During PhD training students receive considerable guidance from their mentor, committee, and faculty members of the department. However, students need to recognize that individuals who pursue a biomedical graduate degree are expected to take full responsibility for their own scientific and professional development and to seek out and utilize all available resources for that goal.

Annual progress reports to document that a student is in good standing within the Biochemistry and Molecular Genetics department graduate program are required. The criteria for good standing in the graduate program are based on successful completion of milestones that indicate progression towards a degree. These milestones are the successful completion of:

1. All coursework with a minimum GPA of 3.0.
2. A minimum of two laboratory rotations.
3. Two seminar presentations.
4. Annual progress reports that indicate satisfactory progress.
5. PhD qualifying exam (QE).
6. Approved dissertation research proposal and committee meeting.
7. Annual research conferences with committee meetings in years three and beyond.

To fulfill all requirements for the PhD degree a student must

1. Complete a body of novel research (dissertation).
2. Publish, at minimum, one first author manuscript.
3. Write and defend a doctoral dissertation that is acceptable by the dissertation committee and Graduate School.

Student Support

An IPIBS Fellowship will provide stipend support for the first 23 months. Support after the first 23 months is the responsibility of the individual

student's dissertation advisor. Students are also encouraged to seek extramural support.

Guidance for the Student

The Director of the Biochemistry and Molecular Genetics Graduate Program will serve as the first year advisor to all incoming graduate students until a dissertation advisor (mentor) is selected. During the first year, all students will meet with all available faculty to discuss potential research projects and complete a minimum of two laboratory rotations to help select a lab and mentor. After completion of lab rotations and before beginning a second year, the student will select a mentor, subject to the approval of the Graduate Executive Committee and the department chair.

PhD Qualifying Exam

The PhD academic program must be completed by the end of year two.

Upon successful completion of all coursework, a student becomes eligible to take the PhD Qualifying Exam (QE). The purpose of the QE is to evaluate the student's ability to interpret literature, develop a research plan, integrate material from the graduate curriculum, display core knowledge of biochemical principles, and orally defend his/her ideas.

The format of the QE requires the student to write and orally defend a NIH-style fellowship proposal, followed by an oral exam covering general biochemical/genetic principles covered in the curriculum. Upon successful completion of the QE, a student becomes a doctoral candidate and may also be eligible to earn an MS degree. An initial committee meeting should be held during the second year to provide guidance on the student's research. A full research proposal must be completed and approved by the committee before the end of the Spring term of the student's year three.

Curriculum

Year 1		Hours
Fall		
Required Courses

Bioengineering (MEng)

Master of Engineering in Bioengineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu/>) (SP)

Program Website (<https://engineering.louisville.edu/bioengineering/>)

Academic Plan Code(s): BE_ _MEN

Program Information

General Information

The Master of Engineering in Bioengineering degree program is accredited by the Engineering Accreditation Commission (EAC) of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the Commission's General Criteria and the Program Criteria for Bioengineering and Biomedical and Similarly Named Engineering Programs.

Since the Bioengineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Bioengineering bachelor degree program at J. B. Speed School of Engineering. Students who earn an undergraduate degree at a school or university other than the University of Louisville pursue the MS degree instead of the MEng degree.

Master of Engineering Program Educational Objectives

Embodying the University, J. B. Speed School of Engineering and Department of Bioengineering missions of providing an excellent education through research, innovation and a rigorous curriculum, the

Department of Bioengineering Master of Engineering degree program will produce graduates who:

1. Demonstrate advanced level academic expertise and practical engineering experience necessary to function as bioengineering professionals in a modern, ever-changing world. (Advanced Knowledge and Life-long Learning)
2. Display competence by being selected for employment by industrial, academic or government entities or further professional/graduate studies. (Career Opportunities)
3. Understand the broad, social, ethical and professional issues of contemporary engineering practice. (Awareness and Responsibility)

Master of Engineering Student Outcomes

In order to achieve these objectives, the Master of Engineering has the following outcomes set for its graduates.

Graduates will demonstrate:

1. An ability to identify, formulate, and solve complex engineering problems by applying advanced principles of engineering, science and mathematics.
2. An ability to apply engineering design to produce advanced solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental and economic factors.
3. An ability to develop and conduct appropriate experimentation using scientific methods to collect, analyze and interpret data, and to use engineering judgment to draw conclusions.
4. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Residency

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. A candidate for the Master of Engineering degree who does not register for credit hours must maintain active registration by paying a fee each semester for MEng residency until the degree is awarded (i.e., the candidate must maintain continuous registration, including summer terms, in Graduate Studies). Failure to pay the MEng residency fee will be cause to cancel a student's residency. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. In order to be restored to residency, the student must submit a new application, have the recommendation of the department chair, receive the approval of the Associate Dean and pay the fee for each of the semesters during which the residency was void.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing is 3.00 for all academic work completed while in graduate studies.
2. Any student with a cumulative graduate GPA below 3.00 will be placed on academic warning. Students on academic warning are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms.

Students who do not bring their cumulative graduate GPA back at or above a 3.00 in the semester immediately following Academic Warning, will be placed on Academic Probation for the next semester of enrollment. Students on probation are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms. Any student who remains on academic probation for more than a single semester may be considered for dismissal from the program.

3. Students receiving graduate assistantships (teaching, research or service) shall be provided adequate training and shall be required to understand and adhere to University policies related to these areas. The performance of teaching, research and service duties by such students shall be periodically evaluated. Students with teaching assistantships shall be evaluated annually.
4. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs.
5. A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

Degree Requirements

The following degree requirements are mandatory of all master of engineering candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's degree students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. Students following the thesis option must follow the Procedures and Standards for Master of Engineering Theses.
4. The total requirements must be completed within six years after admission into graduate studies. The time limit imposed by the rule may be extended in individual cases upon recommendation of the department chair and approval of the associate dean for academic and student affairs.
5. The MEng degree cannot be conferred prior to the BS degree.

Admission Standards

Since the Bioengineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Bioengineering bachelor's degree program at J. B. Speed School of Engineering.

The application form is available online (<https://engineering.louisville.edu/meng-graduate-application-form/>).

The requirements for admission or readmission to a master of engineering program are:

1. Submission of a completed MEng application for the field of specialization in which the student is earning a bachelor degree from the J.B. Speed School of Engineering. Students can apply to

the MEng program with fewer than thirteen (13) credit hours of BS degree requirements remaining and no later than two years post-conferral of their baccalaureate degree. A student's admission into the MEng program is contingent upon successful completion of their undergraduate degree;

2. Recommendation by the faculty and chair of the student's department for admission or readmission to graduate studies;
3. Cumulative baccalaureate grade point average of 2.75. However, those students with cumulative baccalaureate grade-point averages from 2.50 to 2.75 may be admitted upon petition and approval of the chair and faculty of the department.

A student becomes a candidate for the master of engineering degree upon admission to graduate studies and initial registration as a graduate student.

Program Requirements

The Master of Engineering (MEng) in Bioengineering degree requires the following over and above the Bachelor of Science in Bioengineering Degree

Required Coursework

Code	Title	Hours
BE 621	Bioinstrumentation	4
BE 654	Advanced Physiology for Engineers	3
IE 664	Experimental Design in Engineering	3
BE Electives ^{1,2}		9
Technical Electives ^{1,3}		6
Select one of the following:		6
<i>Thesis Option</i>		
BE 697	Master of Engineering Thesis in Bioengineering ⁴	
<i>Non-Thesis Option</i>		
BE 691	Bioengineering Non-thesis Design/Research Project	
Technical Elective ^{1,3}		
Minimum Total Hours		31

The Master of Engineering degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the Master of Engineering degree must be completed with a 3.00 GPA or better for all academic work attempted in Graduate Studies.

A maximum of eight (8) credit hours of graduate-level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

- ¹ Electives must be chosen so that at least one-half of the total credit hours counted toward the degree, exclusive of thesis, are 600-level
- ² BE Electives must be chosen from the following approved list (see below). All prerequisites must be satisfied. A minimum of nine (9) credit hours and maximum of fifteen (15) credit hours of electives must be selected.
- ³ Technical Electives must be chosen from the following approved list. All prerequisites must be satisfied. Please note that all BE Electives can be counted toward Technical Electives, however, only three (3) credit hours from EM and three (3) credit hours from BIOC, BIOL, CHEM, BE 695, or MATH may be used towards degree requirements.

- ⁴ For the thesis option, a student is required to select both an approved MEng thesis topic and the director and members of the thesis committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in BE 697.

BE Electives

Code	Title	Hours
BE 500	Special Topics in Bioengineering	3
BE 522	Biomedical Acoustics	3
BE 524	LabVIEW for Bioengineers	3
BE 530	Machine Learning in Python	3
BE 540	Machine Learning in Medicine	3
BE 542	Medical Image Computing	3

Bioengineering (MS)

Master of Science in Bioengineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu/>)

Department: Bioengineering (<https://engineering.louisville.edu/bioengineering/>)

Program Website (<https://engineering.louisville.edu/graduatedegrees/>)

Academic Plan Code: BE_ _MS

Program Information

General Information

The Master of Science in Bioengineering program offers advanced-level training that provides students with in-depth knowledge of bioengineering in areas such as biocomputational modeling, bioimaging, bioinstrumentation, biomaterials, biomechanics, biomedical devices, bioMEMS, bionanotechnology, biosensors, biosignal processing, biosystems control, molecular bioengineering, and tissue engineering. Student educational experiences are enhanced by research opportunities in laboratories conducting basic and translational research on oncology, cardiovascular disease, nanotherapeutics, orthopedics, drug delivery, tissue regeneration and image-based diagnostics.

The Master of Science (MS) degree program is intended for persons having an accredited baccalaureate degree in bioengineering, but is also available to those with other backgrounds. Applicants with other backgrounds should expect to take some undergraduate background coursework. Students interested in the MS degree program should consult the Director of Graduate Studies in the Department of Bioengineering.

The Master of Science in Bioengineering program objectives are to:

1. Train highly motivated graduate students who demonstrate advanced level bioengineering expertise and practical engineering experience necessary to function as bioengineering professionals.
2. Develop students with the bioengineering expertise and practical experience necessary for employment in industry, academia or government, or further professional/graduate studies.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing and satisfaction of degree requirements is 3.00 for all academic work completed while in graduate studies.
2. Any student who does not satisfy the published performance criteria shall be placed in probationary status. Please review the Academic Standing Section (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/>) within this catalog in regard to Academic Probation.
3. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs. All degree requirements must be completed within six years from admission into the program.

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. Students who seek to return after such a period of time must contact the graduate program director.

The Bioengineering department has established the following grading policy for the Master of Science in Bioengineering program:

1. A student cannot receive a C+ or lower grade in courses counting towards the Bioengineering Master's of Science Program. The program Director must be made aware of any coursework in which a grade of C+ or lower was received.

Degree Requirements

The following degree requirements are mandatory of all Master of Science candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. Students following the Thesis Option must follow the Guidelines for the Preparation of a Thesis or Dissertation (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-guidelines-1/>).
4. Student has six years after their admission to the MS program to complete their degree.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (<https://catalog.louisville.edu/>

graduate/general-policies-procedures-requirements/degree-requirements/) section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Bioengineering are as follows:

1. All admission applications for the program shall include:
 - a. A completed application for admission (<https://graduate.louisville.edu/admission/apply/>) for the Graduate School,
 - b. An application fee,
 - c. At least two letters of recommendation,
 - d. Written statement describing previous experience related to Bioengineering and how the Master of Science in Bioengineering will allow the applicant to fulfill their career goals, and
 - e. Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
4. International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Degree Requirements

Code	Title	Hours
Program Core		
BE 601	Bioengineering Seminar (two)	2
BE 621	Bioinstrumentation	4
BE 654	Advanced Physiology for Engineers	3
BE 695	Bioengineering Research Design & Methods	3
CHE 686	Chemical Engineering Analysis	3
Technical Electives ¹		9-12
See below for areas of emphasis and approved courses ¹		
Thesis or Project ²		3-6
BE 698	Master of Science Thesis in Bioengineering	
or BE 691	Bioengineering Non-thesis Design/Research Project	
Minimum Total Hours		30

The Master of Science degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements and all academic work attempted in graduate studies.

¹ Thesis option students complete nine (9) credit hours of emphasis-area coursework; non-thesis option students complete twelve (12) credit hours of emphasis-area coursework.

² Thesis option students complete six (6) credit hours of BE 698 Master of Science Thesis in Bioengineering; non-thesis option students complete three (3) credit hours of BE 691 Bioengineering Non-thesis Design/Research Project.

³ Students in the MS in BE program interested in continuing their graduate studies in the Bioengineering PhD program must reach out to the MS in BE program Director during their first semester.

Technical Electives

Thesis option students complete nine (9) credit hours of technical electives in the emphasis areas listed below. Non-thesis/project option students complete twelve (12) credit hours of technical electives. Students may take technical electives from more than one area of emphasis with prior approval from the student's advisor and the Department Chair.

Technical electives must include at least nine (9) credit hours of Bioengineering (BE-prefix courses), unless a student's advisor and the Department Chair approve a deviation from this requirement.

Fulfillment of technical elective requirements with courses outside of the emphasis-area electives require permission from the student's advisor and Department Chair.

Biology (MS)

Master of Science in Biology

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Department: Biology (<http://louisville.edu/biology/>)

Program Website (<http://louisville.edu/biology/graduate/>)

Academic Plan Code(s): BIOLMS_THE, BIOLMS_NTH, BIOLMS_NAC

Program Information

The degree program is available to qualified individuals possessing a bachelor's degree from an accredited college or university. A biology undergraduate major is preferred. However, other majors containing sufficient biology, chemistry and math may be acceptable.

The Department of Biology offers master's degrees with programs of study tailored to the needs and interests of a diverse student population. Students may enroll on a full or part-time basis. The Department of Biology offers both thesis and non-thesis options. The thesis option is generally chosen by students with career goals which include a research emphasis. Students choosing this option take coursework and carry out an intensive independent research project under the supervision of a member of the Graduate Faculty, culminating in a written thesis based upon the research project. The non-thesis option is usually chosen by those who wish to advance their knowledge of biology but are not sure of a specific career goal or do not anticipate a research emphasis in their future.

Accelerated BA-BS/MS in Biology

Undergraduate students interested in the program's accelerated options should visit the catalog pages for the BA in Biology (<https://catalog.louisville.edu/undergraduate/majors/biology-ba/>) or the BS in Biology (<https://catalog.louisville.edu/undergraduate/majors/biology-bs/>) for more information.

Admission Requirements

Program admission requirements and application requirements can be viewed on the Department of Biology website (<http://louisville.edu/biology/>).

The following requirements/standards apply to applicants to the MS program in the Department of Biology:

1. The applicant must have a baccalaureate degree with a major in Biology or an acceptable sub-discipline, with an undergraduate GPA of 3.0 or higher.
2. While there is no minimum requirement for GRE scores, competitive students usually have scores around the 50th percentile or better on the general GRE test (verbal + quantitative). MCAT or DAT test scores at similar percentiles are also acceptable. **NOTE: SUBMISSION OF GRE SCORES IS OPTIONAL. WE SUGGEST ONLY SUBMITTING SCORES IF THEY WILL HELP PROVIDE A MORE HOLISTIC PERSPECTIVE TO YOUR APPLICATION. GRE SCORES ARE NOT USED FOR FUNDING DECISIONS.**
3. For foreign students, a TOEFL score of 83 on the internet-based exam, at least 6.5 on the IELTS exam is required or Duolingo score of 105 (students holding a baccalaureate or advanced degree from an accredited institution in the United States or other English-speaking country are exempt from this requirement).

Deadline for Completed Applications

- July 1 for Fall admission
- November 1 for Spring admission.

Application Materials

Applications will be complete when the following materials have been received (final action on applications will not be taken until complete):

- A completed graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) form and fee
- Official transcripts of all previous undergraduate and graduate coursework. All academic credentials not in English must be accompanied with a notarized verbatim English translation in addition to official transcripts. If you studied outside of the United States, you are required to submit your academic records to a NACES (National Association of Credential Evaluation Services) verified credential evaluation service for a course-by-course evaluation to determine that your degree is equivalent to a US bachelor's degree.
- Official GRE, MCAT or DAT exam scores (optional)
- Two or more letters of recommendation from persons familiar with your academic performance and capabilities
- Official TOEFL, IELTS or Duolingo scores if required.

Send to:

Official documentation should be sent to the Graduate School.

Program Requirements

MS in Biology and Accelerated BA-BS/MS in Biology

Thesis option students are required to complete a minimum of 30 credit hours; non-thesis option students must complete a minimum of 33 credit hours.

A minimum of 12 (thesis option) or 17 (non-thesis option) credit hours, exclusive of thesis credit, must be in courses at the 600 level. Students intending to seek a PhD degree later are advised to take as many of their courses as possible at the 600 level or above.

Thesis Option

Code	Title	Hours
General Background Courses		
One course from two of the following categories: ¹		6-8
	Cellular/Physiology	
	Subcellular/Genetics	
	Evolution or Systematics	
	Population, Community, or Ecosystem Ecology	
Other Coursework		
BIOL 650	Advanced Biostatistics	4
Electives		12-14
Thesis Research (600 level)		6
Minimum Total Hours		30

Non-Thesis Option

Code	Title	Hours
General Background Courses		
One course from three of the following categories:		9-12
	Cellular/Physiology	
	Subcellular/Genetics	
	Evolution or Systematics	
	Population, Community, or Ecosystem Ecology	
Other Coursework		
BIOL 650	Advanced Biostatistics	4
BIOL 691	Independent Research	3-4
Electives		13-17
Minimum Total Hours		33

¹ Courses to be selected by student's committee: one course from each of two (thesis option) or three (non-thesis option) Background Coursework categories.

Biology (PhD)

Doctor of Philosophy in Biology

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Biology (<http://louisville.edu/biology/graduate/>)

Program Website (<http://louisville.edu/biology/graduate/>)

Academic Plan Code(s): BIOLPHDEEB, BIOLPHDMCD

Program Information

A broad range of courses are taught in most biological disciplines, although the department is focused in two major directions. Faculty in the Divisions of Molecular, Cellular, and Developmental Biology (MCD) and Evolution, Ecology and Behavioral Biology (EEB) have research interests in environmental microbiology, population and microbial genetics, developmental biology, plant and animal physiology, metabolism, plant and animal ecology, behavioral ecology, invertebrate zoology, and community and ecosystem ecology.

Students seeking the PhD Degree in Biology traditionally have a master's degree or its equivalent; however, students may enter the program with only the baccalaureate degree. Generally, the first year or two is spent

in coursework, research is begun by the second year, and the thesis/dissertation completed in the final year.

Graduate Assistantships and Other Financial Support

Graduate Teaching Assistantships (GTA) are awarded by the Graduate Committee of the Department of Biology to meet the instructional needs of the Department and enhance and broaden the educational experience of doctoral students. All newly admitted students are automatically considered for this type of annual support, which includes a monthly stipend, tuition remission, and health insurance.

Financial support may also be available from individual faculty members who have research funding that supports graduate students as Graduate Research Assistants (GRA). The faculty members holding this support select students to fill these positions.

A small number of the most highly qualified accepted applicants will be nominated by the Department for University Fellowship awards, which carry a monthly stipend, tuition remission, and health insurance benefits. These students must meet qualifications set by the Graduate School.

Admission Requirements

The following requirements must be met in order to be admitted to the PhD program in the Department of Biology:

1. The applicant must have a baccalaureate degree with a major in biology or an acceptable sub-discipline of biology.
2. The applicant must meet the following admissions standards:
 - Undergraduate GPA of 3.0 or higher
 - While there is no minimum requirement for GRE scores, competitive students usually have scores around the 50th percentile or better on the general GRE test (verbal + quantitative). **NOTE: SUBMISSION OF GRE SCORES IS OPTIONAL. WE SUGGEST ONLY SUBMITTING SCORES IF THEY WILL HELP PROVIDE A MORE HOLISTIC PERSPECTIVE TO YOUR APPLICATION. GRE SCORES ARE NOT USED FOR FUNDING DECISIONS.**
 - For foreign students, a TOEFL score of 79 on the internet-based exam; at least 6.5 on the IELTS exam or Duolingo score of 105 (students holding a baccalaureate or advanced degree from an accredited institution in the United States are exempt from this requirement).
3. All applicants must review the research specialties of the departmental faculty to ensure that an area compatible with the student's interest is available. Applicants for the PhD program must communicate with a member of the biology faculty prior to admission and receive agreement that the faculty member will serve as the major professor. No formal admission to the program can occur without the preliminary acceptance of a mentor. Faculty contact information is available at louisville.edu/biology (<http://louisville.edu/biology/>).

Your application will be complete when we have all of the following (final action on an application cannot be taken until all items have been received):

Official documentation must be sent to the Graduate School. Send the following:

- Completed graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) and application fee;

- One official transcript of all previous undergraduate and graduate coursework. All academic credentials not in English must be accompanied with a notarized verbatim English translation in addition to official transcripts. If you studied outside of the United States, you are required to submit your academic records to a NACES (National Association of Credential Evaluation Services) verified credential evaluation service for a course-by-course evaluation to determine that your degree is equivalent to a US bachelor's degree.
- Official GRE scores (optional)
- Two or more letters of recommendation from persons familiar with your academic performance; and
- Official TOEFL, IELTS or Duolingo scores (international students).

Deadline for completed applications:

- July 1* for Fall admission
- November 1 for Spring admission.

*For full consideration for financial support, Ph.D. applications should be completed by January 15 for Fall admission.

Degree Requirements for the PhD in Biology

Code	Title	Hours
Foundations in Biology		
BIOL 600	Graduate Seminar I	1
BIOL 601	Graduate Seminar II	1
One course to be selected by the student's committee from each category:		
	Biostatistics	4
	Evolutionary Biology ¹	4
Focus Area		
Select two courses from within an Area of Focus:		8
Ecology, Evolution and Behavioral (EEB) Biology Focus Area:		
	Population and Community Ecology	
	Ecosystem Ecology or Behavioral Ecology	
Molecular, Cellular and Developmental (MCD) Biology Focus Area:		
	Genetics/Cellular ²	
	Physiology ³	
	Advanced Biology Electives	16
BIOL 700	Dissertation Research	7
Minimum Total Hours		41

¹ Courses that cover the evolutionary history and/or phylogenetic relationships of molecules or organisms

² Courses that discuss the biochemistry and molecular genetics of life or describe the cell as the structural and functional unit of life

³ Courses that discuss life processes at the level of the organism

Biostatistics (CERT)

Graduate Certificate in Biostatistics

Unit: School of Public Health and Information Science (<http://louisville.edu/sphis/>) (GH)

Department: Bioinformatics and Biostatistics (<http://louisville.edu/sphis/departments/bioinformatics-biostatistics/>)

Program Website (<https://louisville.edu/sphis/departments/bioinformatics-biostatistics/academics/certificate-in-biostatistics/>)
Academic Plan Code(s): BDSCCBSO

Program Information

This program is completed 100% online (<http://louisville.edu/online/programs/certificate-programs/certificate-in-biostatistics/>).

The Department of Biostatistics offers this certificate program to deliver core biostatistics instruction to a wide spectrum of the industrial workforce. Students are required to complete at least 15 credit hours of core and elective coursework. The program provides an ideal path for students and professionals seeking to enhance their data analytic and decision-making skills. In addition, individuals who are interested in the possibility of entering the MS program in Biostatistics can use this program as a stepping stone to the master's degree.

Competencies

The core competencies of the Certificate in Biostatistics program include knowledge of basic Biostatistical methods, basic knowledge of data management and statistical computing and a preliminary exposure to research design.

- Analyze moderately complex research data using statistical methods involving common linear statistical models. [C4]*
- Manage data and conduct elementary statistical computing using SAS software. [C3]*
- Critique/design basic methods for moderately complex research problems [C6]*

Demonstration of the competencies is accomplished by successful completion of all certificate curriculum activities.

* Bracketed codes represent cognitive domain levels from Bloom's Taxonomy

Faculty Advisor

On matriculation, each student is assigned a faculty advisor and is requested to meet at least once a semester (face-to-face or using a video conferencing tool) with his or her advisor. The faculty advisor works with the student to develop a program of study and serves as an academic mentor and counselor on career and employment opportunities, professional development, and opportunities beyond the certificate.

Admission Requirements

- Graduate application (<https://graduate.louisville.edu/admission/apply/>) submitted to the Graduate School
- Bachelor's degree or its equivalent in basic sciences, economics, psychology, or in a closely related discipline from an accredited institution. The curriculum must contain a statistics or biostatistics course at the sophomore level or higher and at least two courses in basic sciences.
- Preferred minimum GPA is 2.75 on a 4.0 scale.
- Curriculum vitae (CV)
- At least two letters of recommendation written within past twelve months, submitted as part of the application.
- Non-refundable application fee.
- Postsecondary transcripts. Transcripts from institutions outside of the United States will require a foreign credential evaluation.

- Proficiency in English language is a requirement and a key to the success in the program. English language proficiency is established by one of the following:
 - TOEFL examination score at or above 213 (computer based test) and 79 (internet based test)
 - IELTS test score of 6.5 or higher
 - Duolingo test score of 105 or higher
 - Demonstration of a degree awarded from an institution with instruction primarily in English, as formally documented by an appropriate institutional official.

Application Deadline

Fall semester – June 30 (all applicants).

Spring semester – Applications are not accepted.

Summer semester – April 1 (all applicants).

- Only students interested in eventually pursuing the MS in Biostatistics should seek Summer admission. No Certificate courses are offered in the Summer term, only our Math Tools remedial calculus courses.*

Information contact:

Department of Biostatistics and Bioinformatics Coordinator:
Email: sphisbb@louisville.edu
Phone: (502) 852-1827

Curriculum

The curriculum calls for completing 15-16 credit hours using courses listed below.

Academic Standing

To maintain good academic standing in the Certificate in Biostatistics program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any Certificate in Biostatistics student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Certificate Requirements

Code	Title	Hours
Biostatistics Coursework		
PHST 680	Biostatistical Methods I	3
PHST 681	Biostatistical Methods II	3
PHST 620	Introduction to Statistical Computing	3
PHST 684	Categorical Data Analysis ¹	3
Choose one of the following:		3-4
PHST 640	Statistical Methods for Research Design in Health Sciences	
or		
PHST 624 & PHST 625	Clinical Trials I: Planning and Design Clinical Trials II	

Minimum Total Hours

15-16

If a student chooses to pursue the Master of Science (MS) in Biostatistics degree after enrolling in or completing the Biostatistics

Certificate program, then all relevant coursework completed within the preceding five years with a grade of B or better may be applied towards the coursework for the MS in Biostatistics degree.

¹ Course requires the completion of PHST 680 as a prerequisite.

Biostatistics (MS)

Master of Science in Biostatistics (BDSCMS)

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>) (GH)

Department: Bioinformatics and Biostatistics (<http://louisville.edu/sphis/departments/bioinformatics-biostatistics/>)

Program Webpage (<http://louisville.edu/sphis/departments/bioinformatics-biostatistics/academics/ms/>)

Academic Plan Codes: BDSCMS, BDSCMS_O, BDSCMS_INF

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-science-in-biostatistics/>).

Biostatistics involves the development and application of statistical techniques to scientific research in health-related fields including medicine, nursing, and public health. Students in the Master of Science in Biostatistics program receive state-of-the-art training in the latest statistical methodologies with focus on the design of research studies, modern statistical data analysis in health sciences research, and research in Biostatistical methodology. In addition, students are provided with tools with which to develop evidence-based clinical and healthcare policies and guidelines.

Competency

Evaluate the biostatistics content of scientific and biomedical literature. ^{C6}

Analyze moderately complex research data using statistical methods involving common linear statistical models. ^{C4}

Manage data using spreadsheet and database software. ^{C3}

Demonstrate use of standard statistical and graphics computer packages such as SAS, R, Microsoft Excel, and SPSS. ^{C3}

Evaluate statistical methods presented in the literature. ^{C6}

Investigate theoretic underpinnings and apply principles and theorems of biostatistics. ^{C4}

Design research studies using appropriate statistical methods. ^{C3}

Superscript codes represent cognitive domain levels from Bloom's Taxonomy

Demonstration of the competencies is accomplished by successful completion of all MS curriculum activities.

Faculty Advisor

Upon admission to the MS program, the program director serves as the student's faculty advisor until a mentor for the student's independent study, practicum or thesis (as applicable) is identified. At this milestone, the mentor becomes the student's faculty advisor.

Program of Study

Upon admission to the MS program, the program director, working with the student as faculty advisor, develops a program of study for the student, which requires agreement by the student and the academic dean. Changes to a student's program of study, including coursework,

milestones, and their anticipated timings, are made by the student's faculty advisor, working with the student, and formally signed by the student, the faculty advisor, the program director, and, for selected changes, the academic dean. This flexibility allows adapting programs of study to differing student capabilities and interests.

Admission Requirements

The MS program is available to students who have completed an undergraduate degree in biostatistics, statistics, mathematics, or a related discipline and possess competency in college-level calculus, up to and including multivariable calculus (partial differentiation and multiple integration) and statistics as evidenced by transcripts from postsecondary institutions attended.

The following are required for admission:

- Graduate application (<https://graduate.louisville.edu/admission/apply/>) submitted to the Graduate School.
- Non-refundable application fee.
- At least two letters of recommendation written within past twelve months, submitted as part of the graduate application
- All post-secondary transcripts. Transcripts from institutions outside of the United States require a foreign credential evaluation.
 - The minimum undergraduate grade point average that will be considered for unconditional acceptance and admission is 3.0 on a 4.0 scale.
 - Students lacking the necessary background in calculus (up to and including multivariable calculus with coverage of partial differentiation and multiple integration) may be conditionally admitted to the MS program under Provisional Probation status and required to successfully complete remedial coursework in calculus, offered by the Department in the University of Louisville's summer term. Students have one opportunity to satisfactorily complete all remedial courses assigned to them and all remedial courses must be completed prior to the student's first Fall semester in the program. Students admitted under Provisional Probation status will be withdrawn from the MS program if they fail to achieve this required calculus competency. The details of these and all conditional admissions are specified in the admission letter students receive from the Department.
- A statement of purpose submitted to the department office, which must include desired degree program.
- International students for whom English is not their primary language must show English language proficiency by one of the following:
 - TOEFL examination score at or above 550 (paper based test and a 5.0 on the TWE test), 213 (computer based test), 79 (internet based test)
 - IELTS test score of 6.5 or higher
 - Duolingo test score of 105 or higher
 - Demonstration of a degree awarded from an institution with instruction primarily in English, as formally documented by an appropriate institutional official

Application Deadline

- Fall semester – June 30 (all applicants).
- Spring semester – Applications are not accepted.
- Summer semester – April 1 (all applicants).

- Summer admission is only for student seeking provisional admission to the MS with the requirement to complete our Math Tools sequence in remedial calculus.

Program Requirements

The MS program in biostatistics can be completed by one of three options. The descriptions below are for students who have completed all prerequisite courses for required and elective courses included in each degree program. Additional credit hours may be needed for remediation of missing or lacking student capabilities encountered following matriculation or for capabilities outside the standard coursework required for an identified project or thesis.

- **The Standard Program** is a 30 credit hour, non-thesis curriculum that emphasizes a broad understanding of biostatistics and can be completed in three semesters by full-time students. The standard program can be completed in a traditional classroom format or entirely online (<http://louisville.edu/online/programs/certificate-programs/certificate-in-biostatistics/>).
- **The Thesis Option** involves continuing beyond the required coursework for the standard program to pursue the preparation and defense of a master's thesis in an additional semester, during which the student enrolls for a thesis research course for no fewer than six (6) credit hours. The thesis option is recommended for students intending to pursue a PhD degree or wanting to pursue a research project that interests them. However, a master's thesis is a requirement for the thesis option only. A student who elects to pursue the thesis option and subsequently does not successfully complete the thesis remains eligible for the award of degree under the standard program.
- **The Bioinformatics Concentration** is a 30 credit hour, non-thesis curriculum that is based on coursework in bioinformatics and biostatistics and can also be completed in three semesters by full-time students. The Bioinformatics concentration is currently available in a traditional classroom format only.

Academic Standing

To maintain good academic standing in the MS in Biostatistics program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any MS in Biostatistics student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Coursework Requirements

Code	Title	Hours
Core Coursework ¹		12
Concentration Coursework		18
Thesis (optional)		[6]
Minimum Total Hours		30

For a detailed description of the degree requirements and course listing for each option, click on the "Concentration Requirements" tab.

Students will declare their intended degree option upon entrance to the program. Students may choose to move onto a different program path upon discussion with the Program Director. However, switching

between the standard program and the Bioinformatics concentration will typically lead to a delay in degree fulfillment due to the differences in the required coursework. Students intending to graduate with the thesis option will begin with the standard program. At the completion of the spring semester of the first year for full-time students (the completion of at least 19 credit hours for part time students), students that have not yet declared for the thesis option may make this declaration, if desired.

Award of degree from an accredited school of public health requires successful completion of the equivalent of three (3) credit hours of instruction that provides students a broad introduction to public health. Students with a prior degree and/or coursework from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs.

Program Core

The following courses are required for all three tracks:

Year 1		
Fall		Hours
PHST 661	Probability	3
PHST 680	Biostatistical Methods I	3
PHPH 523	Public Health in the United States ¹	(3)
Hours		6
Spring		
PHST 662	Mathematical Statistics	3
PHST 681	Biostatistical Methods II	3
Hours		6
Minimum Total Hours		12

¹ PHPH 523 fulfills the accreditation requirement that all graduates from the School of Public Health and Information Science receive foundational instruction in public health. The three (3) credit hours for PHPH 523 do not accrue toward the 30 credit hours required for MS degree completion. Students with a prior degree and/or coursework from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs.

Concentration Coursework

The course tables below list all required courses for each track, including the Program Core courses listed under the Degree Requirements tab.

Standard Program Curriculum

Year 1		
Fall		Hours
PHST 661	Probability	3
PHST 680	Biostatistical Methods I	3
PHST 624	Clinical Trials I: Planning and Design	2
PHPH 523	Public Health in the United States ¹	(3)
Hours		8
Spring		
PHST 662	Mathematical Statistics	3
PHST 681	Biostatistical Methods II	3
PHST 684	Categorical Data Analysis	3
PHST 625	Clinical Trials II	2
Hours		11
Year 2		
Fall		
PHST 683	Survival Analysis	3
PHST 620	Introduction to Statistical Computing	3

Various Electives ²	5
Hours	11
Minimum Total Hours	30

¹ PHPH 523 fulfills the accreditation requirement that all graduates from the School of Public Health and Information Science receive foundational instruction in public health. The three (3) credit hours for PHPH 523 do not accrue toward the 30 credit hours required for MS degree completion. Students with a prior degree and/or coursework from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs.

² Electives are chosen with the approval of a faculty advisor. Students are typically encouraged to select electives from among the following courses offered by the Department of Bioinformatics and Biostatistics:

Standard Program Electives

Code	Title	Hours
PHST 603	Biostatistics Public Health Practicum I	1-2
PHST 640	Statistical Methods for Research Design in Health Sciences	3
PHMS 641	Data Mining I	3
PHST 675	Independent Study in Biostatistics	1-3
PHST 682	Multivariate Statistical Analysis	3

Subject to the approval of a faculty advisor, students are also welcome to choose elective courses outside of the department in fields related to biostatistics, such as Mathematics, Epidemiology, and Computer Science.

Students seeking to pursue elective coursework outside the department are responsible for ensuring they have met the prerequisites for these courses.

Bioinformatics Concentration Curriculum

Since the curriculum for the Bioinformatics concentration differs from the standard program at the beginning of the first semester of study, students electing the Bioinformatics concentration must declare this choice at or before enrollment.

Year 1		
Fall		Hours
PHST 661	Probability	3
PHST 680	Biostatistical Methods I	3
BIOC 545	Biochemistry I	3
PHPH 523	Public Health in the United States ¹	(3)
Hours		9
Spring		
PHST 662	Mathematical Statistics	3
PHST 681	Biostatistical Methods II	3
Various electives ²		3
Hours		9
Year 2		
Fall		Hours
PHST 710	Advanced Statistical Computing I	3
PHST 655	Basic Statistical Methods for Bioinformatics	3
PHMS 641	Data Mining I	3

Various electives ²	3
Hours	12
Minimum Total Hours	30

¹ PHPH 523 fulfills the accreditation requirement that all graduates from the School of Public Health and Information Science receive foundational instruction in public health. The three (3) credit hours for PHPH 523 do not accrue toward the 30 credit hours required for MS degree completion. Students with a prior degree and/or coursework from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs.

² Students must accumulate a minimum of six (6) credit hours of electives. These may be distributed among semesters as the student chooses. Electives are chosen with the approval of a faculty advisor. Students are encouraged to select electives from among the following courses:

Bioinformatics Concentration Electives

Code	Title	Hours
PHST 603	Biostatistics Public Health Practicum I	1-2
PHST 620	Introduction to Statistical Computing	3
PHST 675	Independent Study in Biostatistics	1-3
PHST 682	Multivariate Statistical Analysis	3
PHST 684	Categorical Data Analysis	3
BIOC 547	Advanced Biochemistry II	3
BIOC 603	Special Topics in Biochemistry	1-4

Thesis Option (Standard Curriculum)

The curriculum for the thesis option of the MS degree consists of additional thesis hours beyond the completion of the curriculum for the standard program. Students must request to enroll in the thesis option at the completion of the spring semester of the first year for full-time students (the completion of at least 19 credit hours for part time students). Only after completion of the required 30 credit hours of coursework in the standard program curriculum, students electing the thesis option enroll for a minimum of six (6) credit hours of thesis research (PHST 666) in the spring semester of the second year, and typically write and defend a thesis by the end of that semester.

Year 2		
Spring		Hours
PHST 666	Master's Thesis Research ¹	6
Hours		6
Minimum Total Hours		6

¹ Students wishing to maintain full-time status may register for more than six (6) credit hours of thesis or additional coursework.

Thesis

Students with cumulative GPA of 3.5 or higher in courses that are part of the MS in Biostatistics Standard Program Curriculum are eligible to complete an optional thesis. An eligible student may apply to pursue preparation and defense of a master's thesis following completion of the required standard program coursework. Pursuing an optional thesis requires permission of the program director. The thesis topic is

approved by the major professor and thesis committee, chaired by the major professor. The student identifies a desired mentor to become his or her major professor, who is recommended by the program director and appointed by the academic dean. The major professor (or at least one when there are co-major professors) must be from the Department of Bioinformatics and Biostatistics. Following appointment, the major professor becomes the student's faculty advisor. Procedures for the thesis are given below.

Thesis Committee

Working with the major professor, the student identifies at least two or more additional desired committee members. Including the major professor, at least two members of the committee must be faculty in the Department of Bioinformatics and Biostatistics and at least one member must be from outside the department. The committee members are then recommended by the program director and appointed by the academic dean.

Thesis Preparation

The thesis is prepared in format according to the guidelines (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) established by the Graduate School. It is the responsibility of each student to ensure that the readability and quality of writing in his/her thesis meets professional standards. Students are strongly encouraged to take advantage of the services offered by the University Writing Center (<http://louisville.edu/writingcenter/>) when writing their theses. The services offered by the Writing Center are free to the student.

Thesis Approval

Final approval of the thesis is voted upon by the thesis committee after an oral defense of the thesis by the student. Students submit their theses to members of their committee two or more weeks prior to the date of the oral defense. Approval of the thesis is by majority vote of the committee after the oral defense.

Students are required by the Graduate School to provide two weeks' notice when scheduling oral defenses (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>). This requirement permits those wanting to attend the oral defense adequate time to make arrangements for attending. Students must follow the below procedure for scheduling oral defenses:

1. Identify a date and time for the oral defense in consultation with the thesis advisor and members of the committee.
2. Request a room reservation for the oral defense through the Department's Administrative Assistant.
3. Notify the Department's Administrative Assistant of the date, time, and location of the oral defense as well as the title of the thesis. The Department's Administrative Assistant will circulate an announcement of the defense as well as notify the SPHIS Office of Student Services of the defense, who in turn notify Graduate School.
4. Distribute technically and grammatically error-free copies of the thesis to all committee members at least two weeks prior to the defense date.

There are no exceptions to these requirements and students will not be permitted by the Department to schedule defenses with less than two weeks' notice. Students are expected to be aware of university deadlines for theses (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) and to ensure that the two weeks' notice requirement is fulfilled within these university deadlines. Students are

strongly encouraged to allow for even greater than two weeks' notice to ensure that all deadlines and requirements are fulfilled.

Thesis Submission

The following steps must be taken to submit the final copy of the thesis electronically after oral defense and approval of the committee:

1. Final document must be converted to a PDF (following the guidelines as noted above) and sent to the Graduate School and the department's administrative assistant.
2. Submit as advised by the Graduate School through the ThinkIR repository. The directions on submission will be provided upon review of the thesis by the Graduate School.
3. The signature page within the electronic version must have the names of the committee members typed under the signature line; the signatures cannot be scanned into the document.
4. Submit a signed signature page (digital/electronic signature page (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/ElectronicDissertationSignaturePage.pdf>) or a hard copy on white paper, with original signatures) to the Graduate School.

An electronic copy of the thesis must be provided to the Department's Administrative Assistant.

Biostatistics (PhD)

Doctor of Philosophy in Biostatistics

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>) (GH)

Department: Bioinformatics and Biostatistics (<http://louisville.edu/sphis/departments/bioinformatics-biostatistics/>)

Program Webpage (<http://louisville.edu/sphis/departments/bioinformatics-biostatistics/academics/phd/>)

Academic Plan Code(s): BDSCPHD, BDSCPHDBAC

Program Information

Introduction

Biostatistics involves the development and application of statistical techniques to scientific research in health-related fields, including medicine, epidemiology, and public health. Students in the PhD program receive state-of-the-art training in the latest statistical methodology in order to tackle the challenges associated with the study design and data analysis of modern research conducted in the health sciences. The PhD program provides advanced training in biostatistical theory and methods, with the goal of enabling the student to carry out original research. In addition, students may elect to train with an emphasis in bioinformatics.

Bioinformatics requires the development and application of statistical methods for many of the areas covered by the field, including genomics, proteomics, statistical genetics, and metabolomics. Current biomedical research technologies generate high volumes of data that require extension of existing statistical methodologies and development of new methodologies in order to extract important information regarding biological processes. The emphasis on bioinformatics is designed to fulfill the expanding need for biostatisticians with advanced training in this area. Students in the bioinformatics emphasis gain a basic understanding of molecular and cellular biology, genetics, and bioinformatics and an in-depth knowledge of statistical theory and methods. Graduates are able to carry out original statistical research in

genomics, proteomics, metabolomics, and evolving areas of systems biology.

Students who complete the MS program in biostatistics with the Department of Bioinformatics and Biostatistics or who already possess the equivalent of an MS in statistics, biostatistics, or a related discipline may apply for admission to the PhD program.

Competencies

To graduate, a student must demonstrate mastery of the following core competencies*:

Competency	CE	SCP	Dsrt	CW
Thoroughly understand the broad discipline of biostatistics, including its theoretical underpinnings, its history of development, current applications, and areas of active inquiry	X		X	X
Thoroughly review and critique statistical methods literature.			X	
Conduct statistical analyses and data management using standard statistical software such as SAS, R, and SPSS.	X	X	X	X
Analyze research data using linear models and other appropriate statistical methods	X	X		X
Read, interpret, and review biomedical literature where biostatistical techniques are used.			X	

Advance the field of biostatistics through original and independent research	X

Students are also expected to develop the following additional emphasis-specific proficiencies. These proficiencies may vary dependent upon a student's individualized course of study:

Biostatistics Emphasis:

Competency	CE	SCP	Dsrt	CW
Analyze dichotomous, count, and time-to-event data using appropriate statistical methods, including logistic regression, log-linear models, Kaplan-Meier curves, and Cox proportional hazards models				X
Assist researchers in planning research studies, proposing and evaluating statistical methods and computing power analyses		X		X

Bioinformatics Emphasis:

Competency	CE	SCP	Dsrt	CW
Analyze high-throughput, biological data, such as those obtained from microarrays and next generation sequencing technologies, with statistical models specifically geared to the data issues associated with these platforms.			X	X
Retrieve and leverage various types of biological information from online repositories			X	X
Apply models that use the knowledge and basic principles of molecular biology, especially the structure and functions of DNA, RNA, proteins and their inter-relationships to address important biological questions based on genomic and proteomic data				X

*Key for demonstration (method):

CE = Comprehensive examinations

SCP = Statistical consulting practicum

Dsrt = Dissertation

CW = Coursework

Curriculum

The curriculum consists of a minimum of 56 (34 if Master's Track) credit hours of coursework, a comprehensive examination, and a doctoral dissertation. The student is eligible to sit for comprehensive

examinations upon completion of required coursework. Upon passing the comprehensive examination and completing required and elective coursework, the student enters candidacy to work on the dissertation. After the dissertation is submitted and approved, including an oral defense, the student is eligible to receive the PhD degree in Biostatistics.

Award of degree from an accredited school of public health requires successful completion of the equivalent of three (3) credit hours of instruction that provides students a broad introduction to public health.

The course PHPH 523 Public Health in the United States fulfills this requirement. The three (3) credit hours for PHPH 523 do not accrue toward the 34 credit hours required for PhD degree completion. Students with a prior degree from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs.

Faculty Advisor

Upon admission to the PhD program, each student is assigned to the graduate coordinator of the PhD program for course advising. The graduate coordinator assumes the role of faculty advisor until the student chooses a dissertation advisor at which point this responsibility shifts to the dissertation advisor. If it becomes clear that a PhD student will be working with a given faculty member prior to forming a dissertation committee, the student may request a change in course advisor by completing the form *Request to Change Academic Advisor*.

Program of Study

Upon admission to the PhD program, a program of study is developed for each student by the faculty advisor and approved by the program director and department chair. Students who did not complete the MS program in Biostatistics with the Department of Bioinformatics and Biostatistics may be required to complete additional coursework normally offered in the MS program. Decisions regarding additional coursework are made by the student's assigned faculty advisor and such courses become part of the program of study. This approach gives maximum flexibility for addressing differing student qualifications and interests.

Application Requirements

The PhD program is available to students entering with either a bachelor's degree (referred to as the Bachelor's Entry Track) or a master's degree (referred to as the Master's Entry Track) in mathematics, biostatistics, statistics, engineering, computer science, or a related discipline.

Applicants with only a bachelor's degree must have completed the following coursework:

1. Calculus I-III or equivalent
2. Linear Algebra
3. Statistics/biostatistics course at least at a sophomore level.
4. Two additional mathematics/statistics courses at least at junior level.
5. A computing course at least at a sophomore level

The following are additionally required for admission:

- Graduate application (<https://graduate.louisville.edu/admission/apply/>)
- Non-refundable application fee
- All postsecondary transcripts, including those from any institution attended. Transcripts from institutions outside of the U.S.A. require a

foreign credential evaluation. The minimum grade point average that will be considered for acceptance is 3.25 on a 4.0 scale.

- At least two letters of recommendation written within past twelve months.
- GRE Scores are required and are considered in the context of other required components of the application. Students who have been successful in our programs in the past typically have a median [Q1, Q3] GRE Quantitative score at the 87th percentile.
 - GRE requirement may be waived for any applicant whose mathematical background is deemed to be sufficient for doctoral study in Biostatistics.
- Statement of goals, including the desired emphasis, if any.
- International students for whom English is not their primary language must show English language proficiency by one of the following:
 - TOEFL examination score at or above 550 (paper based test and a 5.0 on the TWE test), 213 (computer based test), 79 (internet based test)
 - IELTS test score of 6.5 or higher
 - Duolingo (English) test score of 105 or higher
 - Demonstration of a degree awarded from an institution with instruction primarily in English, as formally documented by an appropriate institutional official

Application Deadline

Fall semester – Applications are accepted on a rolling basis.

Domestic student are encouraged to apply no later than 30 days prior to the start of the fall semester.

International students are encouraged to apply no later than 90 days prior to the start of the fall semester.

Spring semester – Applications are not accepted.

Summer semester – Applications are not accepted.

Program Requirements

Completion of the required coursework is the prelude to sitting for the comprehensive examination. Successful completion of the comprehensive examination allows the student to enter doctoral candidacy. A doctoral candidate must then develop and successfully defend a dissertation proposal that describes an original and independent research project. Upon successful defense of the proposal, a student may then proceed to continue dissertation research. Upon successful completion of the research, defense of the dissertation, and demonstration of the required competencies, a student is awarded the PhD degree.

Academic Standing

To maintain good academic standing in the PhD in Biostatistics program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any PhD in Biostatistics student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Coursework

Bachelors Entry Track

56 total credit hours

34 credit hours of required core coursework

22 credit hours of elective courses (vary based on area of emphasis)

Code	Title	Hours

¹ Students must be enrolled in six (6) credit hours if they are to receive summer funding. A Bachelors Track student may choose not to receive summer funding. Students that choose not receive summer funding do not need to enroll in the summer session.

² Required for all funded students. Optional for any non-funded students.

Comprehensive Examination

One students have passed PHST 691, PHST 710, PHST 762, and PHST 781 they must take a written comprehensive examination at the first available offering of the examination. The objective of this examination is for the student to demonstrate a comprehensive knowledge of statistical theory and methods as learned in the courses taken during the first few semesters in the program and for students to show their ability to apply this knowledge to solve new and/or complex problems. This examination is given over two consecutive days shortly before the start of the fall semester. Students will be notified of the dates and location at least one month in advance.

The examination will consist of four sections, each corresponding to one of the required courses (PHST 710, PHST 762, PHST 781, PHST 691) and each given individually. Each section is designed to test the student's competency in a core area of the discipline and to assess his/her ability to apply this knowledge to solve new and/or complex problems.

- The Statistical Inference (PHST 762) section will be a two-hour written examination given in the morning of the first day.
- The Computing section (PHST 710) will be a three-hour computing examination given in the afternoon of the first day.
- The Linear Models (PHST 781) section will be a two-hour written examination given in the morning of the second day.
- The Bayesian Inference section (PHST 691) will be a 90-minute written examination and a two-hour computing exam, both given in the afternoon of the second day.

Material from courses corresponding to each section of the comprehensive exam will help students prepare for those sections. However, questions from any sources may appear that cover the same topics as listed in the syllabi of PHST 691, PHST 710, PHST 762, and PHST 781. Further, problems on the Computing section of the exam may draw on topics covered in PHST 691, PHST 762, and PHST 781.

Each student receives a grade of either "pass" or "fail" for the entire comprehensive examination and each student must pass all four sections of the comprehensive examination to receive a "pass". Students that pass the exam will be eligible to enter doctoral candidacy upon completion of the remaining, second-year coursework. A failing grade indicates a deficiency in one or more areas, and a student with a grade of "fail" will have one opportunity to retake the full Comprehensive Examination (all four sections), typically in the following January. The results from a student's first attempt at the comprehensive exam will not be considered in the grading of the second attempt and will not factor into the determination of a pass or fail score for the second attempt at the exam. Students that fail to pass the examination on their second attempt will be dismissed from the program without any further consideration.

Neither scores nor graded copies of completed examinations will be shared with students. Students may review ungraded copies of their own completed comprehensive exams with the exam graders. The ungraded, completed copies will be held in the department office. Students will not be permitted to keep ungraded copies of the completed comprehensive exams.

Special Notes on the Comprehensive Exam

- For all the exams, the students will not have access to any course books, notes or any other materials (paper or electronic copies)

- Students will write programs and run code in the Bayesian and non-Bayesian computing examinations. These examinations will be given either in a computer lab in the SPHIS building or the students will be required to bring their own laptop to run the programs.
- The only materials which can be consulted for the computing portions of the examinations are R help menus locally available on the specific computer. Students will be asked ahead of time to upload all R packages needed to appear for the exam. Students will not be allowed to avail the internet by any means.
- Any suspected cheating on the Comprehensive Examination will be addressed according to university policies provided in Section 5 of Dean of Students document, Students Rights and Responsibilities (<https://louisville.edu/dos/students/studentrightsandresponsibilities/>). Additionally, students found guilty of academic dishonesty on the Comprehensive Examination will be expelled from the PhD program immediately.
- More than one faculty members will grade all the examinations.

Dissertation

In order to complete the degree, a candidate must submit and successfully defend a dissertation on a topic approved by his or her major professor and the dissertation committee. Dissertation work may be started following successful completion of doctoral comprehensive examinations.

Dissertation Committee

The dissertation committee is formed by the candidate's proposing a major professor (or principal advisor) and at least four other committee members. The major professor (or all of them when there are co-major professors) must be from the Department of Bioinformatics and Biostatistics. One member of the dissertation committee must be external to the Department of Bioinformatics and Biostatistics and the majority of the committee must be from the Department of Bioinformatics and Biostatistics. The committee is appointed by the dean of the school upon the recommendation of the program director and chair of the department.

Dissertation Proposal (Pre-Dissertation Essay)

A dissertation proposal or pre-dissertation essay must be submitted to the major professor and the dissertation committee within two semesters of the student entering candidacy. Students must make an oral presentation of the proposal to the dissertation committee, after which the members of the committee vote upon approval of the proposal. The proposal must be approved by a majority vote of the dissertation committee before the candidate undertakes further work on the dissertation. In rare situations adjustments to this schedule can be made with the approval of the dissertation committee and the department chair.

The dissertation proposal document will include a general overview of the selected research project/projects, and discuss the relevant literature. It will also contain a detailed description of the project(s), describing both the research that the students have already accomplished and that which remains. In most cases, this will take the form of one or more chapters corresponding to preliminary or submitted academic manuscripts. There are no formal formatting requirements for the dissertation proposal, although students are encouraged to use the formatting specifications required of the dissertation.

Data Application

All dissertations must include analysis of at least one real data set. This may be in the context of demonstrating new statistical methodology in a real application. Students are expected to explore the relevant scientific literature to provide the appropriate context for the results of the data analysis.

Dissertation Preparation

The dissertation is to be prepared in format according to the guidelines established by the Graduate School (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>). It is the responsibility of each student to ensure that the readability and quality of writing in his/her thesis meets professional standards. Students are strongly encouraged to take advantage of the services offered by the University Writing Center (<http://louisville.edu/writingcenter/>) when writing their dissertation. The services offered by the Writing Center are free to the student.

Dissertation Approval

Final approval of the dissertation is voted upon by the dissertation committee after an oral defense of the dissertation by the student. Students submit their dissertations to members of their committee two or more weeks prior to the date of the oral defense. Approval of the dissertation is by a majority vote of the committee after the oral defense.

Students are required by the Graduate School to provide two weeks' notice when scheduling oral defenses (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>). This requirement permits those wanting to attend the oral defense adequate time to make arrangements for attending. Students must follow the below procedure for scheduling oral defenses:

1. Identify a date and time for the oral defense in consultation with the dissertation advisor and members of the committee.
2. Request a room reservation for the oral defense through the Department's Administrative Assistant.
3. Notify the Department's Administrative Assistant of the date, time, and location of the oral defense as well as the title of the dissertation. The Department's Administrative Assistant will circulate an announcement of the defense as well as notify the SPHIS Office of Student Services of the defense, who in turn will notify the Graduate School.
4. Distribute technically and grammatically error-free copies of the dissertation to all committee members at least two weeks prior to the defense date.

There are no exceptions to these requirements and students will not be permitted by the Department to schedule defenses with less than 2 weeks' notice. Students are expected to be aware of university deadlines for dissertations (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) and to ensure that the two weeks' notice requirement is fulfilled within these university deadlines. Students are strongly encouraged to allow for even greater than two weeks' notice to ensure that all deadlines and requirements are fulfilled.

Dissertation Submission

The following steps must be taken to submit the final copy of the dissertation electronically after oral defense and approval of the committee:

1. Final document must be converted to a PDF (following the guidelines as noted above) and sent to the Graduate School and the department's administrative assistant.
2. Submit as advised by the Graduate School through the ThinkIR repository. The directions on submission will be provided upon review of the dissertation by the Graduate School.
3. The signature page within the electronic version must have the names of your committee members typed under the signature line; the signatures cannot be scanned into the document.
4. Submit a signed signature page (digital/electronic signature page (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/ElectronicDissertationSignaturePage.pdf>) or a hard copy on white paper, with original signatures) to the Graduate School.

An electronic copy of the dissertation must be provided to the Department's Administrative Assistant.

Applying for a Degree

Students are responsible for completing an "Application for Degree" form at the beginning of the semester in which they will defend their thesis or dissertation. Students may apply for their degree via ULink. The steps are as follows:

1. Log on to your ULink account.
2. Go to Student Services Page.
3. Scroll down and on the right of the screen you will find a column labeled "Registration".
4. Under Registration click on the Degree Application link.
5. Follow the Prompts to complete your application for degree. Once completed, you will receive an e-mail confirmation of submission in your University e-mail.

Future deadline dates can be found on the Graduate Academic calendar (<http://louisville.edu/calendars/academic/undergrad-grad/>).

For any questions or concerns students might have during the semester in which they plan to graduate, students' best resource is the Graduate School. The Department of Bioinformatics and Biostatistics faculty and staff are also here to advise and assist you with any questions you might have.

Business Administration (MBA)

Master of Business Administration

Unit: College of Business (<http://business.louisville.edu/>) (GB)
Department: Business (<http://business.louisville.edu/uoflmba/>)
Program Website (<https://business.louisville.edu/learnmore/uoflmba/>)

Academic Plan Code(s): BA_MBA

Program Information

This program can be completed 100% online (<http://louisville.edu/online/programs/masters/master-of-business-administration/>) (Online MBA). (<http://louisville.edu/online/programs/masters/master-of-business-administration/>)

The College of Business Master of Business Administration at the University of Louisville is offered in multiple formats:

- Full-time MBA
- Professional (Part-time) MBA

- Innovation (Entrepreneurship) MBA
- Executive MBA - *The Executive MBA program is not currently accepting applications for admission.*
- Global MBA
- Online MBA

Admission to MBA programs is highly competitive. All Master of Business Administration programs require completion of an undergraduate degree. GMATs are required; however, GMAT waivers are available. Letters of reference requirements vary by program.

All programs are cohort-based, vary in duration between 13 and 20 months, and vary in credit hour requirements between 45 and 48.

Admission Requirements

Below is a checklist intended to help with the admissions process. It is recommended that your application be submitted within 30 days of creating your account.

Contact the University of Louisville MBA Office with any questions via telephone (502) 852-7257 or email mba@louisville.edu.

Application Checklist

• Create application account

Visit [UofLMBA.com](http://business.louisville.edu/uoflmba/) (<http://business.louisville.edu/uoflmba/>) and click "APPLY NOW."

• Two letters of recommendation

Within the application, submit names and email addresses of your recommenders. They will receive an email invitation on your behalf. Your recommenders should speak to your character, academic aptitude, etc.

• Professional resume

Within the application, upload your resume.

• Personal statement

Within the application, attach a 1-2 page Word document describing your interest in the UofL MBA program, why you selected the University of Louisville, your short and long term goals and any additional information you feel is relevant.

• Submit and pay application fee

• Official college transcript(s)

Order an official college transcript from all colleges attended, including the degree granting institution.

Mail transcripts to:

College of Business, MBA Office

University of Louisville

Louisville, KY 40292

E-Transcripts will be accepted from the institution only. Have these sent to mba@louisville.edu.

• Graduate Management Admission Test (GMAT)

The GMAT is optional. However, the admissions application includes a field in which you may provide your GMAT test date and/or scores. We will also accept GRE scores, although they are also optional.

International Applicants

We welcome all international applicants. Please be aware that there are documents required from international applicants that are in addition to the above list.

Visit business.louisville.edu/academics-programs/graduate-programs/apply/ (<https://business.louisville.edu/academics-programs/graduate-programs/apply/>) and open the International Applicant Checklist

Full-time Master of Business Administration

The Full-time MBA is a 13-month cohort based program with two tracks: an internship track and a non-internship track (both are 45 credit hours in duration).

Application requirements include: an undergraduate degree (with official university transcripts); a GMAT or GRE test result (waivers are available), two letters of reference, and an application fee. Please contact the College of Business if you are seeking a dual degree with another University of Louisville college including the School Law, Dentistry, or Medicine. Refer to the web link for information about Graduate Tuition/Program Fee and Costs (<https://business.louisville.edu/academics-programs/graduate-programs/apply/tuition-and-costs/>).

¹ IMBA students are required to complete 6 of the 8 distinct Professional Development Modules (PDMs) offered by the end of their program; each module is 0.5 credit hours and more than one module may be taken in a given term. Course selections that count toward completion of this requirement include MBA 641, MBA 642, MBA 644, MBA 649, MBA 680, MBA 695, and MBA 696.

² Students should complete a total of 6 credits in MBA Special Topics (MBA 680), MBA Internship (MBA 699), or MBA elective courses. Consult with your program advisor for a list of electives that count toward this requirement.

Sequence of courses are subject to change.

Executive Master of Business Administration

The Executive MBA program is not currently accepting applications for admission.

Global Master of Business Administration

The Global MBA is a 14-month, cohort-based, 45 credit hour program. The first semester consists of a one-month residency at the University of Louisville during the summer. Students study during the fall and spring semesters with our partner Adolf Würth at the Akademie Würth Business School and at Heilbronn University of Applied Science in Germany. Students return to the University of Louisville the following summer for a final one-month residency.

While in Germany, non-Euro residency students are required to enroll in the Master of Science in Business Management degree at Heilbronn University of Applied Science and complete an additional nine (9) credit hours during the fall and spring semesters. Optional paid internships are available. For American and non-Euro residency students, see the University of Louisville program charge (<https://business.louisville.edu/academics-programs/graduate-programs/apply/tuition-and-costs/>). Students are also required to pay 3,949 EUR in tuition and fees to Heilbronn University of Applied Science. Students will be awarded both a University of Louisville MBA and a University of Heilbronn Master of Science in management degree. Admission requirements for the University of Louisville degree include an undergraduate degree, German language skills at the B1 level, transcripts, and two letters of reference.

For German and residents, the program charge is 22,000 EUR. Internships in Germany are not available for German residents and these students are not required to enroll at Heilbronn University of Applied Science. Application requirements for residents of Germany include a completed undergraduate degree, a TOEFL test score (a minimum is applied), two letters of reference, and health insurance covering instructional periods in the United States.

Business Analytics (MS)

Master of Science in Business Analytics

Unit: College of Business (<http://business.louisville.edu/>) (GB)

Program Website (<https://business.louisville.edu/msba/degree-details/>)

Academic Plan Code(s): BUANMS, BUANMS_O, BUANMS_AI, BUANMS_AIO, BUANMS_PTO

Program Information

The full-time Master of Science in Business Analytics (MSBA) is an accelerated, cohort-based 13-month, three-semester program. Students work both in teams and independently in completing the coursework.

The part-time Master of Science in Business Analytics (MSBA) is a 20-month, five-semester program. Students work both in teams and independently in completing the coursework.

The MSBA curriculum combines information systems technologies, data modeling, and analytics with business acumen and impactful communications to develop the skills necessary to become a successful data scientist with excellent potential for professional growth. The program is also designed and delivered in close collaboration with local businesses providing a strong business orientation, increasing your skill relevance in the marketplace upon graduation.

Admission Requirements

1. Completion of a graduate application (<https://graduate.louisville.edu/admission/apply/>) along with application fee
2. Provision of two letters of reference, a resume, and a personal statement

3. Completion of an undergraduate degree along with official transcripts
4. GMAT or GRE score: May be waived for applicants with significant work experience in the field of analytics or for applicants with significant academic exposure (e.g., major or minor) in a STEM or technical field

Program Requirements

The Master of Science in Business Analytics (MSBA) program requires a minimum of 30 credit hours for program completion. Currently, 22.5 credit hours are core and 7.5 credit hours are in electives.

Students also may enroll in up to three (3) additional credit hours in Analytics Internship courses spread across the program's three semesters.

Full-Time Program: Core Courses and Special Topics

Year 1		
Fall		Hours
MSBA 630	Modern Data Management	3.0
MSBA 605	Python for Analytics	3.0
MSBA 610	Data Visualization with Power BI	1.5
MSBA 615	R for Analytics	1.5
MSBA 620	Statistical Foundations of Business Analytics	3.0
Hours		12
Spring		
MSBA 635	Predictive Analytics	3.0
MSBA 645	Applied Machine Learning	3.0

Hours		4.5
Spring		
MSBA 650	Advanced Analytical Tools	3
MSBA 645	Applied Machine Learning	3
Hours		6
Minimum Total Hours		30

Sequence of courses is subject to change.

¹ Students in the Artificial Intelligence concentration will take their directed electives in this semester including MSBA 691, MSBA 692, MSBA 693, MSBA 694, and MSBA 695. This concentration is open to both on-campus and online MSBA students. However, four out of five courses are available in a on-campus format only.

Concentration in Artificial Intelligence

The Master of Science in Business Analytics (MSBA) program students can earn a concentration in Artificial Intelligence by taking five directed electives. These five directed electives will replace the five required electives for the MSBA program. These directed electives are:

MSBA 691 Deep Learning

MSBA 692 Pipelines to Insights

MSBA 693 Advanced Analytics using PySpark

MSBA 694 Natural Language Processing

MSBA 695 Cloud Computing

This concentration is open to both Seated and Online MSBA students. However, four out of five directed courses required for the Artificial Intelligence concentration may only be available in a seated format.

Business of Healthcare (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Academic Plan Code(s): BUHCCGRO

Program Information

This program is completed 100% online (<https://business.louisville.edu/learnmore/business-healthcare/>).

The graduate certificate in the Business of Healthcare is a nine (9) credit hour certificate that will train professional care providers with the knowledge and skills necessary to take on management roles in health systems or practices and will prepare MBA students to enter the health care industry. This certificate will cover topics such as health economics, health strategy, accounting and finance, population health, conflict management, building service lines, and health operations. Certificate courses will be offered in an online, asynchronous, five-week format. Initially, the courses will be offered during the spring semester of each year. This allows for those in the MBA program to earn a certificate in the business of healthcare as part of their MBA electives. This certificate can also be completed independent of an MBA.

Admissions

Students will be admitted to the certificate program in one of two ways.

1. Those who apply to earn the certificate independent of other degrees must apply to the graduate programs office in the College of Business, have a bachelor's degree from an accredited university, and submit an official transcript certifying a GPA of a least 2.50 in that undergraduate degree.
2. MBA students may also earn the certificate using the elective courses of their MBA degree as long as they are in good standing in their program.

To graduate, students must complete the courses of the certificate program with no less than a B in all classes.

Certificate Requirements

Code	Title	Hours
Note: All BOHC students are required to complete nine (9) credit hours from the list below to earn the certificate.		
BOHC 610	Healthcare Strategy	
BOHC 620	Healthcare Systems and Population Health ¹	
	or BOHC 621 Healthcare Budgeting and Finance	
BOHC 630	Healthcare Economics	
BOHC 640	Healthcare Operations	
BOHC 650	Business Planning for Healthcare Initiatives	
BOHC 660	Conflict Management and Negotiations in Healthcare	
BOHC 670	Compassion Leadership in Medicine	

Minimum Total Hours

9

¹ Students who are not enrolled in an MBA program or do not have a Finance background are required to take BOHC 621 (Healthcare Budgeting and Finance) instead of BOHC 620.

Certified School Counselor (RANK1)

Rank 1 Program for Certified School Counselor

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Counseling and Human Development (<http://louisville.edu/education/departments/ecpy/>)

Program Website (<http://louisville.edu/education/degrees/rank/>)
Academic Plan Code(s): CPS_RK1CSC

Program Information

Rank 1 programs are not academic degree programs.

Rank 1 programs are planned graduate-level programs designed for Kentucky educators seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank 1 status is 60 credit hours of approved graduate credit, including a master's degree.

Admission Requirements

Graduates of the University of Louisville MEd in Counseling and Personnel Services program, with a concentration School Guidance Counseling, are eligible to pursue this Rank 1 program.

Candidates who have completed a master's degree in School Guidance Counseling from other institutions must provide documentation, before applying for admission, that they have completed the requirements leading to the provisional and standard certificates in Kentucky.

Students may apply to the program by first going to the Graduate School (<https://graduate.louisville.edu/admission/apply/>) website. Admission requirements include the following credentials:

- Official transcripts with a GPA of 2.75 in the bachelor's degree and a GPA of 3.0 in the master's degree
- Kentucky certification as a School Counselor
- For international students, TOEFL/IELTS/Duolingo (students holding a baccalaureate or advanced degree from an accredited institution in the U.S. are exempt from this requirement.)

Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services) (<http://wes.org/>) or ECE (Educational Credential Evaluators) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.

Please have transcripts sent to the **Graduate School** (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

If transcripts are sent electronically, please have them sent to the following email: gradadm@louisville.edu

Please contact the College of Education and Human Development Graduate Student Services for more information at (502) 852-2628.

Rank 1 Program in Certified School Counseling (P-12)

Code	Title	Hours
Inquiry		
Select one of the following:		
LEAD 600	Introduction to Research Methods and Statistics	3
or EDAP 639	Education Research in P-12 Setting	
or EDSP 639	Education Research in P-12 Setting	
Advocacy (Professional Leader)		
Leadership		
Select one of the following:		
ECPY 605	Human Development	3

ECPY 611	Learning Systems: Theory and Practice
ECPY 640	Assessment Methods for Counselors
EDAP 677	Developing Collaborative Groups: Facilitating, Coaching and Mentoring
ECPY 650	Group Process and Practice
ECPY 730	Social, Legal & Ethical Issues in Counseling

Diversity

Select one of the following: 3

EDAP 637	Using Assessment to Improve Student Achievement
EDAP 638	Instructional Strategies for Diverse Learners
EDAP 642	Literacy Learning and Cultural Differences
EDSP 581	Introduction to Gifted Education
ECPY 663	Multicultural and Diversity Issues

Area of Emphasis

Select at least 12 credit hours; may be chosen from courses above that are NOT taken to meet the Advocacy requirement 12

ElectivesSelect 9 credit hours from the following: ¹ 9

EDAP 585	Introduction to Educational Technology: Integrating Technology into Instruction
ECPY 601	Introduction to Clinical Mental Health Counseling
ECPY 621	Differential Diagnosis and Treatment in Counseling
ECPY 639	Prevention & Treatment of Substance Use Disorders
ECPY 694	Graduate Seminar in Educational and Counseling Psychology
ECPY 721	Advanced Counseling Seminar
EDSP 540	Introduction to Exceptional Children
EDSP 644	Applied Behavior Analysis
ECPY 697	Topical Seminar in College Student Personnel Services (Topic must be approved by advisor)
MSSW 633	Social Work and Human Sexuality
MSSW 636	Advanced Death & Grief
MSSW 659	Introduction to Family Therapy Practice
MSSW 660	Motivation and Change: The Process of Change and Strategies to Elicit Intrinsic Motivation.
MSSW 661	Special Issues in Alcohol and Drug Counseling
MSSW 662	Substance Use and Substance Use Disorders

Prior Master's degree in School Counseling ² 30**Minimum Total Hours** 60**Exit Requirement**

A portfolio is required for successful completion of this program.

Notes

1. The candidate for Rank 1 should hold a School Counseling certificate and a master's degree in School Counseling which includes the requirements leading to both provisional and standard licensure.
2. The Rank 1 classification shall require the completion of 60 credit hours of approved graduate level credit including a master's degree².
3. Candidates will plan the Rank 1 program in consultation with a faculty advisor in the ECPY Department prior to enrolling in Rank 1 courses.

4. Of the total number of credit hours on the Rank 1 program, at least 15 credit hours beyond the master's degree must be taken at the University of Louisville. The remaining credit hours may be taken at the University of Louisville, or upon approval of the faculty advisor, at other institutions. There is no stipulation as to recency of completion of Rank 1 credit.
5. All coursework for Rank 1 must carry graduate credit, and no less than half must be earned in courses open only to graduate students.
6. An academic average of 3.0 is required on the course hours submitted for Rank 1, and no credit will be accepted for courses carrying a grade lower than C.
7. The resulting School Counseling certification will include grades P-12.
8. A portfolio is required for successful completion of this program.

¹ Independent Study or Directed Readings may be included as approved by faculty advisor; also courses in the Advocacy section may be used here as long as they have NOT been taken in the Advocacy or Area of Emphasis sections

² If the master's degree is more than 30 credit hours, the number of credit hours a student needs to complete Rank 1 may be fewer than 30 additional credit hours.

Chemical Engineering (MS)

Master of Science in Chemical EngineeringUnit: Speed School of Engineering (<https://engineering.louisville.edu>) (GS)Department: Chemical Engineering (<https://engineering.louisville.edu/academics/departments/chemical/>)Program Website (<https://engineering.louisville.edu/academics/departments/chemical/>)

Academic Plan Code(s): CHE_MS

Program Information

General Information

The Master of Science (MS) in Chemical Engineering program is intended for persons having an accredited baccalaureate degree in chemical engineering, but also is available to those with other backgrounds. Applicants with other backgrounds should plan on taking additional undergraduate background coursework.

Students interested in the MS degree program should consult the Director of Graduate Studies in the Department of Chemical Engineering.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (p. 16) section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Chemical Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - At least two letters of recommendation, and
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 3.0 or above (on a 4.00 scale).
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

The minimum curricular requirements for the Master of Science degree program are shown in the table below. For those applicants who, in the opinion of the faculty, do not have a sufficient background, remedial work may be specified.

Code	Title	Hours
CHE 610	Advanced Thermodynamics	3
CHE 620	Transport Phenomena I	3
CHE 641	Advanced Reactor Design	3
CHE 686	Chemical Engineering Analysis	3
CHE 695	Chemical Engineering Seminar	1
Technical Electives ^{1,2,3}		12
Select one of the following:		6
Thesis Option		
CHE 690	Master of Science Thesis in Chemical Engineering ⁴	
Non-Thesis Option		
Technical Electives ^{1,2,3}		
Minimum Total Hours		31

¹ Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis, are 600 level. At least fifteen (15) credit hours of coursework must be in Chemical Engineering/CHE.

² Technical electives can be CHE or non-CHE. Technical Electives must be approved by the department.

³ At least three (3) credit hours of Technical Electives must be from non-CHE courses, and the student's research advisor or academic advisor must approve non-CHE courses.

⁴ For the thesis option, a student is required to select both an approved MS thesis topic and the director and members of the thesis committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in CHE 690.

The Master of Science degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements.

Additionally, the master of science degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

Chemical Engineering (PhD)

Doctor of Philosophy in Chemical Engineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu>) (GS)

Department: Chemical Engineering (<https://engineering.louisville.edu/academics/departments/chemical/>)

Academic Plan Code(s): CHE_PHD

Program Information

General Information

The PhD degree program is intended for persons having an accredited masters and/or baccalaureate degree in chemical engineering, but is also available to those with other backgrounds. Applicants with other backgrounds should plan on taking some undergraduate background coursework. Students interested in the PhD degree program should consult the Director of Graduate Studies in the Department of Chemical Engineering.

Degree Requirements

The award of a Doctor of Philosophy degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform independent scholarly research. Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework attempted in Graduate Studies.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Admission Standards

The admission standards for the PhD program in Chemical Engineering are as follows:

- All admission applications for the program shall include:
 - Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - Application fee
 - Results from the Graduate Record Examination (GRE)
 - At least two letters of recommendation
 - Official transcript(s) for all previous post-secondary coursework. Note: All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
- The successful applicant will typically have a GRE combined Verbal and Quantitative Reasoning score of 302 or above.
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

The PhD program in Chemical Engineering is comprised of 54 credit hours beyond the baccalaureate degree in Chemical Engineering. A student entering the PhD program who already has a master's degree in Chemical Engineering may have some of the credit hours for that degree counted towards the 54 credit hours. Remedial work may be specified for applicants who, in the opinion of the faculty, do not have sufficient background.

The normal minimum curricular requirements for the doctoral program are listed below. However, some exceptions are possible at the discretion of the faculty and the Graduate Advisor in unusual situations.

Code	Title	Hours
Courses - Post Baccalaureate		
CHE 610	Advanced Thermodynamics	3
CHE 620	Transport Phenomena I	3
CHE 641	Advanced Reactor Design	3
CHE 686	Chemical Engineering Analysis	3
CHE 695	Chemical Engineering Seminar (Enrollment for three semesters for one (1) credit hour.)	3
Technical Electives ¹		18
CHE 693	Advanced Research in Chemical Engineering (Requires 21 credit hours.) ²	1-15
Minimum Total Hours		54

Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework attempted in Graduate Studies.

¹ At least three (3) credit hours of Technical Electives must be from non-CHE courses, and the student's research advisor or academic advisor must approve non-CHE courses

² CHE 693 requires a total of 21 credit hours.

Chemistry (MS)

Master of Science in Chemistry

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Chemistry (<http://louisville.edu/chemistry/>)

Program Website (<http://louisville.edu/chemistry/academics/graduate-studies/>)

Academic Plan Code(s): CHEMMS

Program Information

The Department of Chemistry, in the College of Arts and Sciences, offers graduate programs leading to the Master of Science (thesis and non-thesis options) and Doctor of Philosophy degrees in chemistry with options in analytical chemistry, biochemistry, biomolecular structure and engineering, inorganic chemistry, organic chemistry, physical chemistry, and chemical physics.

The general requirements for admission to the Graduate School, (p. 10) for admission to candidacy, and for the master's degree can be found in specific sections of this catalog. The additional provisions listed below apply to the program leading to the Master of Science in Chemistry.

Program Requirements

The requirements for the Master of Science in Chemistry are as follows:

1. The general requirements as stated in the General Information section of this catalog.
2. Completion of course curriculum as described in the section on program requirements for the PhD degree.
3. Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL, IELTS, Duolingo or Michigan test).
4. Registration in seminar course CHEM 695 for the first three semesters of graduate study and an acceptable presentation of a one-hour literature seminar on a topic of current chemical interest or related to the student's area of research. This seminar must be presented no later than the third semester of graduate studies.
5. Completion of a written MS thesis and an oral defense for the thesis option or completion of an original research proposal (ORP) for the non-thesis option.

Admission Requirements

Students seeking a graduate degree in chemistry should meet the following requirements:

1. Completion of the graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) for admission from the Graduate School and application fee.
2. A BA or BS degree in chemistry or in a related field such as physics, engineering, or mathematics. It is expected that students will have obtained a background in chemistry equivalent to 36 credit hours of undergraduate coursework. Students planning to pursue graduate study in chemical physics may substitute some of the chemistry hours with advanced courses in physics or mathematics beyond those required for a BA or BS in chemistry. Students with inadequate preparation will be required to register for specific courses in the area of deficiency. Some of these courses, subject to approval by the department, may be accepted for graduate credit. Admission to graduate study in chemical physics is made on the recommendation of the entrance committee for that option.
3. A minimum quality point standing of 3.0 on a 4.0 scale.
4. Submission of Graduate Record Examination (GRE) scores. GRE may be used to provide additional evidence of ability but is not required.

- Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B or better in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL, IELTS, Duolingo). A B-minus grade in ENGL 101 is unacceptable.

In individual cases, the conditional admission of a student who does not satisfactorily meet the above requirements may be recommended by the department to the Graduate School.

If admission is granted, that student will be subject to those conditions specified by the department or Graduate School as being necessary to remedy the conditional admission.

Application Deadlines

Fall: December 1 (priority), January 15 (regular)

Spring: August 15

Program Requirements

Master of Science (Thesis) in Chemistry

A minimum of 30 credit hours of graduate credit is required. At least 15 credit hours must be in chemistry courses. An overall GPA of 3.0 must be maintained.

Code	Title	Hours
Chemistry MS - Thesis Option		
CHEM 691	Research	1-9
CHEM 692	Research	1-9
CHEM 695	Seminar ¹	1-3
Research Areas (6 courses from at least 3 of 6 divisions) ²		18-20
Thesis Option		0
Minimum Total Hours		30

¹ Enrollment in the chemistry research course for the first three semesters of graduate study is required.

² Research areas are: Analytical Chemistry, Biochemistry, Chemistry Education, Inorganic Chemistry, Organic Chemistry, and Physical Chemistry.

Chemistry Requirements

- Courses:** Students must pass a minimum of six graduate courses from at least three of six divisions (or research areas) with a minimum grade of C in any one course (a C-minus grade is considered unacceptable). The areas are: Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry, Physical Chemistry, and Physics. An overall GPA of 3.0 or greater is required by the Graduate School. In addition, a GPA of 3.0 or greater is required in lecture courses by the department.
- Mentor:** The research mentor must be selected during the first semester. Students are required to interview a minimum of three chemistry faculty (more are recommended) and have them sign the Mentor Selection Form. The student may choose a mentor after obtaining three signatures. If the mentor agrees to accept the student, the mentor will initial the Mentor Selection Form and the student should submit it for final approval by the department Director of Graduate Studies.

- Research:** Research credit will be taken through courses CHEM 691 and CHEM 692 with the graduate mentor listed as the instructor.
- Seminar:** Enrollment in the chemistry research course CHEM 695 for the first three semesters of graduate study is required. The student must present a literature seminar related to their research or on a topic of current chemical interest in the second or third semester of his/her program (excluding summer).
- Thesis Committee:** The student will select his/her Thesis Committee in consultation with the research mentor during the first three semesters of study. The committee consists of the research mentor, a chemistry faculty in the same division, a chemistry faculty in a different division and a faculty member from a different department. Students must have each committee member sign the Thesis Committee Form and submit it the chemistry office.
- Publication:** Scientific publication is an important element of graduate education and research. Therefore, it is normally expected that a manuscript based on the student's research would have been submitted to a peer-reviewed journal by the time of his/her thesis defense. The student's contribution must be significant to both the scientific content and the manuscript drafting.
- Thesis:** A written thesis describing the research program is submitted a minimum of seven days before the defense. The defense consists of a seminar open to the public on the thesis project followed by an oral examination with the Thesis Committee.

Master of Science (Non-Thesis) in Chemistry

A minimum total 30 credit hours of graduate credit is required. At least 15 credit hours must be in chemistry courses. An overall GPA of 3.0 must be maintained.

Code	Title	Hours
Chemistry MS - Non-Thesis Option		
CHEM 691	Research	1-9
CHEM 692	Research	1-9
CHEM 695	Seminar	1-3
Research Areas (6 courses from at least 3 of 6 divisions)		18-20
Non-Thesis Option		0
Minimum Total Hours		30

¹ Enrollment in the chemistry research course for the first three semesters of graduate study is required.

² Research areas are: Analytical Chemistry, Biochemistry, Chemistry Education, Inorganic Chemistry, Organic Chemistry, and Physical Chemistry.

Note: Students in the PhD program will be awarded an MS degree (non-thesis) after successful completion of the Original Research Proposal and other previous requirements.

Chemistry Requirements

- Courses:** Students must pass a minimum of six graduate courses from at least three of six divisions (or research areas) with a minimum grade of C in any one course (a C-minus grade is considered unacceptable). The areas are: Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry, Physical Chemistry, and Physics. An overall GPA of 3.0 or greater is required by

the Graduate School. In addition, a GPA of 3.0 or greater is required in lecture courses by the department.

2. **Language:** Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL or "Michigan test"). A B-minus in ENGL 101 is considered unacceptable.
3. **Mentor:** The research mentor must be selected during the first semester. Students are required to interview a minimum of three chemistry faculty (more are recommended) and have them sign the Mentor Selection Form. The student may choose a mentor after obtaining three signatures. If the mentor agrees to accept the student, the mentor will initial the Mentor Selection Form and the student should submit it for final approval by the department Director of Graduate Studies.
4. **Research:** Research credit will be taken through courses CHEM 691 and CHEM 692 with the graduate mentor listed as the instructor.
5. **Research Proposal:** The research proposal serves as the capstone project for the non-thesis MS degree. Students must develop, explain, and defend a research proposal. The proposal can be based on recent literature or the student's research project (if applicable). The student's mentor from the chemistry graduate faculty should oversee the proposal committee. The committee consists of the mentor plus two additional chemistry faculty selected by the student in consultation with the mentor.

Chemistry Courses

Code	Title	Hours
Analytical Division		
CHEM 620	Optical Spectrochemical Methods of Analysis	3
CHEM 621	Electroanalytical Chemistry	3
CHEM 622	Analytical Separations	3
CHEM 625	Advanced Analytical Chemistry	3
CHEM 626	Special Topics in Analytical Chemistry	1-3
CHEM 628	Special Topics in Synthesis and Analysis	1
CHEM 630	Advanced Topics in Chemical Analysis	1
Biochemistry Division		
CHEM 645	Advanced Biochemistry I	4
CHEM 647	Advanced Biochemistry II	4
CHEM 648	Systems Biochemistry: Principles and Practices	3
CHEM 681	Modern Biochemistry I	3
CHEM 682	Modern Biochemistry II	3
CHEM 684	Biophysical Chemistry	3
CHEM 685	Special Topics in Biochemistry	1-3
Chemistry Education		
CHEM 632	Chemical Education	3
Inorganic Division		
CHEM 550	Group Theory and its Chemical Applications	3
CHEM 653	Main Group Chemistry	3
CHEM 654	Advanced Coordination Chemistry	3
CHEM 655	Special Topics in Inorganic Chemistry	1-3
CHEM 656	Special Topics in Inorganic Chemistry	1-3
CHEM 659	Materials Chemistry and Methods	3
Organic Division		
CHEM 557	Bio-Organic Phenomena	3

CHEM 670	Chemistry of Heterocyclic Compounds and Alkaloids	3
CHEM 671	Advanced Polymer Chemistry	3
CHEM 675	Special Topics in Organic Chemistry	1-3
CHEM 677	Mechanisms and Theory in Organic Chemistry	3
CHEM 678	Advanced Organic Chemistry: General Survey	3
CHEM 679	Advanced Organic Synthesis	3
Physical Chemistry Division		
CHEM 555	Theory and Application of Computational Chemistry	3
CHEM 660	Advanced Physical Chemistry	3
CHEM 661	Chemical Thermodynamics	3
CHEM 665	Special Topics in Physical Chemistry	1-3
CHEM 666	Special Topics in Physical Chemistry	1-3
CHEM 667	Reaction Kinetics	3
CHEM 672	Quantum Chemistry	3
CHEM 684	Biophysical Chemistry	3
CHEM 687	Molecular Spectroscopy	3

The following courses are not offered by a specific division or are common to all divisions. CHEM 651 and CHEM 652 can count towards the course requirements with approval of the Chemistry Department Director of Graduate Studies.

Code	Title	Hours
CHEM 503	Special Topics in Chemistry	1-3
CHEM 591	Chemistry for Teachers I	3
CHEM 632	Chemical Education	3
CHEM 651	Independent Study	1-3
CHEM 652	Independent Study	1-3
CHEM 688	X-Ray Crystallography and Its Application to Molecular Structure	3
CHEM 691	Research	1-9
CHEM 692	Research	1-9
CHEM 695	Seminar	1-3

Chemistry (PhD)

Doctor of Philosophy in Chemistry

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Chemistry (<http://louisville.edu/chemistry/>)

Program Website (<http://louisville.edu/chemistry/academics/graduate-studies/phd/>)

Academic Plan Code(s): CHEMPHD

Program Information

The Department of Chemistry offers graduate programs leading to the MS and PhD degrees in chemistry with options in analytical chemistry, biochemistry, biomolecular structure and engineering, chemistry education, inorganic chemistry, organic chemistry, physical chemistry, and chemical physics.

The general requirements for admission to the Graduate School, for admission to candidacy, and for the doctoral degree are stated in the appropriate sections of this catalog.

Admission Requirements

Students seeking a graduate degree in chemistry should meet the following requirements:

1. [Completion of the graduate application for admission from the Graduate School and application fee.](#)
2. A BA or BS degree in chemistry or in a related field such as physics, engineering, or mathematics. It is expected that students will have obtained a background in chemistry equivalent to 36 credit hours of undergraduate coursework. Students planning to pursue graduate study in chemical physics may substitute some of the chemistry hours with advanced courses in physics or mathematics beyond those required for a BA or BS in chemistry. Students with inadequate preparation will be required to register for specific courses in the area of deficiency. Some of these courses, subject to approval by the department, may be accepted for graduate credit. Admission to graduate study in chemical physics is made on the recommendation of the entrance committee for that option.
3. A minimum quality point standing of 3.0/4.0.
4. Submission of Graduate Record Examination (GRE) scores. GRE may be used to provide additional evidence of ability but is not required.
5. Students with a native language other than English must show a proficiency in English. This requirement may be met with a grade of B or better in ENGL 101 (or equivalent) or an acceptable score on a standardized test (such as the TOEFL, IELTS, Duolingo). A B-minus grade in ENGL 101 is unacceptable.

In individual cases, the conditional admission of a student who does not satisfactorily meet the above requirements may be recommended by the department to the Graduate School. If admission is granted, that student will be subject to those conditions specified by the department or Graduate School as being necessary to remedy the conditional admission.

Application Deadlines

Fall: December 1 (priority), January 15 (regular)

Spring: August 15

Program Requirements

A minimum of 30 credit hours of graduate credit is required. At least 15 credit hours must be in chemistry courses. An overall GPA of 3.0 must

be maintained. Other master's degree details are included in the Degree Requirements section (p. 16) of this catalog.

Coursework

Code	Title	Hours
Chemistry PhD		
CHEM 691	Research	1-9
CHEM 692	Research	1-9
CHEM 695	Seminar ¹	1-3
Research Areas (6 courses from at least 3 of 6 divisions) ²		12-20
Minimum Total Hours		30

¹ Enrollment in the chemistry research course for the first three semesters of graduate study is required.

² Research areas are: Analytical Chemistry, Biochemistry, Chemistry Education, Inorganic Chemistry, Organic Chemistry and Physical Chemistry.

Courses

Students must pass a minimum of six graduate courses from at least three of six divisions (or research areas) with a minimum grade of C in any one course. A C-minus grade is considered unacceptable. The areas are: Analytical Chemistry, Biochemistry, Inorganic Chemistry, Organic Chemistry, Physical Chemistry, and Physics. For every A-minus grade or better that is received, students with an MS degree may waive one lecture course, up to a maximum of 2 courses.

An overall GPA of 3.0 or greater is required by the Graduate School. In addition, a GPA of 3.0 or greater is required in lecture courses by the department.

Mentor

The research mentor must be selected during the first semester. Students are required to interview a minimum of three chemistry faculty (more are recommended) and have them sign the Mentor Selection Form. The student may choose a mentor after obtaining three signatures. If the mentor agrees to accept the student, the mentor will initial the Mentor Selection Form and the student should submit it for final approval by the department Director of Graduate Studies.

Seminar

Enrollment in the chemistry research course (CHEM 695) for the first three semesters of graduate study is required. The student must present a literature seminar related to their research or on a topic of current chemical interest in the second or third semester of his/her program (excluding summer).

Cumulative Exams

Students must complete a series of written cumulative examinations within their division designed to show broad knowledge in their chosen area. Cumulative exams begin in the second semester and are given the third week of January, February, March, September, October, and November. Each division will write a unique exam each month covering topics from undergraduate course content within that division, graduate-level content from the current and prior semester, and content from the current literature and/or departmental seminars. Exams are scored on a scale of 0–3 points in half-point increments. Students must score 2.0 or higher on at least four exams and accumulate 11 points within their research division by the end of the ninth consecutive exam to qualify

for the PhD program. An absence from an exam, unless excused by the Director of Graduate Studies, is scored as 0 and constitutes an attempt.

Research

Research credit will be taken through courses CHEM 691 and CHEM 692 with the graduate mentor listed as the instructor.

Dissertation Committee

The student will select his/her Dissertation Committee in consultation with the research mentor during the first four semesters of study. The committee consists of the research mentor, a chemistry faculty in the same division, a chemistry faculty in a different division, and a faculty member from a different department. Students may add an additional chemistry faculty to the committee if they choose to. Students must have each committee member sign the Dissertation Committee Form and submit it the chemistry office.

Research Proposal (RP)

The research proposal (RP) must be completed by the end of the fifth semester (excluding summers) without exception. If it is not completed within the fifth semester, the student will not be in good standing and may be dismissed from the program. Evaluation of the RP is made by the student's graduate advisory committee (dissertation committee), which is chaired by the research mentor. The RP is intended to demonstrate the student's ability to develop, explain, and defend a research idea that the student plans to conduct in the laboratory or on a completely original idea if desired. The proposal should present preliminary results from the student's research and/or from the literature and develop one original hypothesis fully with an explanation of experimental details and expected results. The student should show how the hypothesis will be tested experimentally and provide plans for different outcomes. The student should also communicate the importance of the work and how it will provide new fundamental knowledge to the field, a solution to an important problem, or a potential application. Students are expected to demonstrate their originality, innovation and understanding of the scientific process. This requirement includes a written research proposal and an oral presentation/examination. The requirements of each are described below.

Written Research Proposal

The written RP is strictly limited to six pages (single-spaced, 1-inch margins) including figures, but not including references. Treat the written proposal as if you were actually submitting it as part of a job application or for funding. It should clearly and concisely present your proposed research and why it should be funded. This should include a brief summary and introduction to outline the problem, why it is important, and what progress others in the field have made. It should state a hypothesis that your planned work will test and specific aims of the research. The proposal may provide preliminary data from research or literature and should describe what will be done, why this system was selected, how it will be done, what are the expected results, how success will be determined, and what is the impact if successful. The new proposed work should take up the bulk of the written RP (three–four pages). The proposal should be well referenced in the style of a major journal in your field. Carefully proofread your proposal and have a trusted friend proofread it as well. Typos, poor grammar, low-quality graphics, and "simple mistakes" detract from your scientific argument and make the work appear sloppy, disorganized, and of low quality. The written RP is to be revised at least once by the research advisor before being submitted to the committee at least one week prior to the oral presentation/examination. The committee may return unsatisfactory

written proposals to the student and delay the oral examination until at least one week after an acceptable rewrite is received.

Oral Presentation/Examination

Treat the oral presentation/examination as if the written RP was submitted with a job application and you were called for an interview to present it. Do not assume that everyone knows the proposal as well as you, they don't. It is your responsibility to present the proposed work in a clear and fluid manner to an audience that is not intimately familiar with your proposal. The presentation should be professional. Expect frequent interruptions during your presentation and be prepared to answer questions on your proposal, techniques related to it, and contributions of others in the field. The oral presentation can be given on PowerPoint, but with no more than 20 slides total (including any supplemental slides). A student failing the oral examination may repeat it only one time, at the discretion of the student's graduate advisory committee.

The MS degree (non-thesis) will be awarded upon successful completion of the research proposal.

Research

Progress in research will be evaluated by the research mentor in consultation with the Dissertation Committee.

Research Seminar

A one (1) credit-hour seminar on the student's dissertation research project is to be given before the end of the eighth semester (excluding summers). This seminar does not require the student to enroll in CHEM 695, but the student should contact the CHEM 695 instructor to schedule a time and date and for evaluation criteria. The seminar will be judged as pass/fail.

Publications

It is normally expected that prior to the Research Seminar, at least one manuscript based on the student's research would have been submitted to a peer-reviewed journal. The student's contribution must be substantial to both the scientific content and the drafting of the manuscript. At least one research article based on the student's dissertation research must either be published or accepted for publication in a peer-reviewed journal before scheduling the PhD dissertation defense. It is highly recommended that the student distribute the published manuscript(s) and any submitted manuscripts to the members of her/his Dissertation Committee.

Dissertation

A written dissertation describing the research program is submitted a minimum of 14 days before the defense. The defense consists of a one-credit hour seminar followed by an oral examination with the Dissertation Committee.

Chemistry Courses

Code	Title	Hours
Analytical Division		
CHEM 620	Optical Spectrochemical Methods of Analysis	3
CHEM 621	Electroanalytical Chemistry	3
CHEM 622	Analytical Separations	3
CHEM 625	Advanced Analytical Chemistry	3
CHEM 626	Special Topics in Analytical Chemistry	1-3
CHEM 628	Special Topics in Synthesis and Analysis	1
CHEM 630	Advanced Topics in Chemical Analysis	1

Biochemistry Division

CHEM 645	Advanced Biochemistry I	4
CHEM 647	Advanced Biochemistry II	4
CHEM 648	Systems Biochemistry: Principles and Practices	3
CHEM 681	Modern Biochemistry I	3
CHEM 682	Modern Biochemistry II	3
CHEM 684	Biophysical Chemistry	3
CHEM 685	Special Topics in Biochemistry	1-3

Chemistry Education

CHEM 632	Chemical Education	3

Inorganic Division

CHEM 550	Group Theory and its Chemical Applications	3
CHEM 653	Main Group Chemistry	3
CHEM 654	Advanced Coordination Chemistry	3
CHEM 655	Special Topics in Inorganic Chemistry	1-3
CHEM 656	Special Topics in Inorganic Chemistry	1-3
CHEM 659	Materials Chemistry and Methods	3

Organic Division

CHEM 557	Bio-Organic Phenomena	3
CHEM 670	Chemistry of Heterocyclic Compounds and Alkaloids	3
CHEM 671	Advanced Polymer Chemistry	3
CHEM 675	Special Topics in Organic Chemistry	1-3
CHEM 677	Mechanisms and Theory in Organic Chemistry	3
CHEM 678	Advanced Organic Chemistry: General Survey	3
CHEM 679	Advanced Organic Synthesis	3

Physical Chemistry Division

CHEM 555	Theory and Application of Computational Chemistry	3
CHEM 660	Advanced Physical Chemistry	3
CHEM 661	Chemical Thermodynamics	3
CHEM 665	Special Topics in Physical Chemistry	1-3
CHEM 666	Special Topics in Physical Chemistry	1-3
CHEM 667	Reaction Kinetics	3
CHEM 668	Electrochemistry	3
CHEM 672	Quantum Chemistry	3
CHEM 684	Biophysical Chemistry	3
CHEM 687	Molecular Spectroscopy	3

The following courses are not offered by a specific division or are common to all divisions. CHEM 651 and CHEM 652 can count towards the course requirements with approval of the Chemistry Department Director of Graduate Studies.

Code	Title	Hours
CHEM 503	Special Topics in Chemistry	1-3
CHEM 591	Chemistry for Teachers I	3
CHEM 632	Chemical Education	3
CHEM 651	Independent Study	1-3
CHEM 652	Independent Study	1-3
CHEM 688	X-Ray Crystallography and Its Application to Molecular Structure	3
CHEM 691	Research	1-9

CHEM 692	Research	1-9
CHEM 695	Seminar	1-3

Civil Engineering (MEng)

**Master of Engineering in Civil Engineering**

Unit: Speed School of Engineering (<https://engineering.louisville.edu>) (SP)

Department: Civil and Environmental Engineering (<https://engineering.louisville.edu/academics/departments/civil/>)

Academic Plan Code(s): CE_MEN

Program Information

General Information

The Bachelor of Science in Civil Engineering degree will provide a student with the basis to be able to complete the Master of Engineering (MEng) in Civil Engineering degree.

The Master of Engineering in Civil Engineering degree program is accredited by the Engineering Accreditation Commission (EAC) of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the Commission's General Criteria and the Program Criteria for Civil and Similarly Named Engineering Programs.

Since the Civil Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Civil Engineering bachelor degree program at J. B. Speed School of Engineering. Therefore, students who earn an undergraduate degree at a school or university other than the University of Louisville pursue the MS degree instead of the MEng degree.

Master of Engineering Program Educational Objectives

The purpose of the five-year Master of Engineering Program is to bring together the faculty, staff, and capital resources to meet the following program educational objectives:

1. In accordance with our mission statement, provide instruction and associated activities necessary for our graduates to grow from technical competency to professional proficiency
2. Foster an appreciation in our graduates for professional development and life-long learning
3. Provide an educational experience that inspires our graduates to exhibit leadership and team-building skills
4. Promote service by our graduates to the profession, and to society

Master of Engineering Student Outcomes

In order to achieve these objectives, the Master of Engineering has the following outcomes set for its graduates:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factor
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

In addition to the above listed outcomes that are integrated to BS CE and MEng CE programs, additional student outcomes for MEng CE program are:

1. Demonstrate a mastery of one of the four areas (structural engineering, geotechnical engineering, transportation engineering, water resources) of professional practice in civil engineering.
2. Innovative in the integrated design of civil engineering projects.
3. Adept at using modern engineering tools and software to support engineering design.

Residency

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. A candidate for the Master of Engineering degree who does not register for credit hours must maintain active registration by paying a fee each semester for MEng residency until the degree is awarded (i.e., the candidate must maintain continuous registration, including summer terms, in Graduate Studies). Failure to pay the MEng residency fee will be cause to cancel a student's residency. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. In order to be restored to residency, the student must submit a new application, have the recommendation of the department chair, receive the approval of the Associate Dean and pay the fee for each of the semesters during which the residency was void.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing is 3.00 for all academic work completed while in graduate studies.
2. Any student with a cumulative graduate GPA below 3.00 will be placed on academic warning. Students on academic warning are

limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms.

Students who do not bring their cumulative graduate GPA back at or above a 3.00 in the semester immediately following Academic Warning, will be placed on Academic Probation for the next semester of enrollment. Students on probation are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms. Any student who remains in academic probation for more than a single semester may be considered for dismissal from the program.

3. Students receiving graduate assistantships (teaching, research or service) shall be provided adequate training and shall be required to understand and adhere to University policies related to these areas. The performance of teaching, research and service duties by such students shall be periodically evaluated. Students with teaching assistantships shall be evaluated annually.
4. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs.
5. A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

Degree Requirements

The following degree requirements are mandatory of all master of engineering candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's degree students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. Students following the thesis option must follow the Procedures and Standards for Master of Engineering Theses.
4. The total requirements must be completed within six years after admission into graduate studies. The time limit imposed by the rule may be extended in individual cases upon recommendation of the department chair and approval of the associate dean for academic and student affairs.
5. The MEng degree cannot be conferred prior to the BS degree.

Admission Standards

Since the Civil Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Civil Engineering bachelor degree program at J. B. Speed School of Engineering.

The application form is available online (<https://engineering.louisville.edu/meng-graduate-application-form/>).

The requirements for admission or readmission to a master of engineering program are:

1. Submission of a completed MEng application for the field of specialization in which the student is earning a bachelor degree from the J.B. Speed School of Engineering. Students can apply to the MEng program with fewer than thirteen (13) credit hours of BS degree requirements remaining and no later than two years post conferral of their baccalaureate degree. A student's admission into the MEng program is contingent upon successful completion of their undergraduate degree;

2. Recommendation by the faculty and chair of the student's department for admission or readmission to graduate studies;

3. Cumulative baccalaureate grade point average of 2.75. However, those students with cumulative baccalaureate grade-point averages from 2.50 to 2.75 may be admitted upon petition and approval of the chair and faculty of the department.

A student becomes a candidate for the master of engineering degree upon admission to graduate studies and initial registration as a graduate student.

Program Requirements

The Master of Engineering in Civil Engineering degree requires the following over and above the Bachelor of Science in Civil Engineering Degree:

MEng Required Coursework

Code	Title	Hours
CEE 680	Civil Engineering Capstone Design	3
CEE Electives ^{1,2}		15
Technical Electives ^{1,3}		6
Select one of the following:		6
<i>Thesis Option</i>		
CEE 697	Master of Engineering Thesis in Civil Engineering ⁴	
<i>Non-Thesis Option</i>		
CEE Elective ^{1,2}		
CEE Elective ^{1,2}		
Minimum Total Hours		30

The Master of Engineering (MEng) degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the Master of Engineering degree must be completed with a 3.00 GPA or better for all academic work attempted in Graduate Studies.

A maximum of eight (8) credit hours of graduate-level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

¹ Electives must be chosen so that at least one-half of the total credits counted toward the degree, exclusive of thesis, are 600-level. All courses must be at the 500 level or higher.

² CEE Electives must be approved by the department.

³ Technical Electives can be CEE or non-CEE courses. Technical Electives must be approved by the department.

⁴ For the thesis option, a student is required to select both an approved MEng thesis topic and the director and members of the thesis

committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in CEE 697.

Civil Engineering (MS)

Master of Science in Civil Engineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu>) (GS)

Department: Civil and Environmental Engineering (<https://engineering.louisville.edu/academics/departments/civil/>)

Academic Plan Code(s): CE_ _MS, CE_ _MS_O

Program Information

This program can be completed 100% online. (<http://louisville.edu/online/programs/masters/master-of-science-in-civil-engineering/>)

The Master of Science (MS) degree program is intended for persons having an accredited baccalaureate degree in civil engineering. Students interested in the MS degree program should consult the Director of Graduate Studies in the Department of Civil Engineering.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (p. 16) section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Civil Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - At least two letters of recommendation, and
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Graduate Work

Remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background. The MS program has

four different focus areas available: Structural Engineering, Geotechnical Engineering, Transportation Engineering, and Water Resources.

The minimum curricular requirements for the master's degree program are:

Code	Title	Hours
<i>Core Courses</i>		
CEE 681	Green Engineering & Sustainable Design	3
Three courses from a selected focus area ¹		9
Technical Electives ^{2,3}		12
Select one of the following:		6
<i>Thesis Option</i>		
CEE 690	Master of Science Thesis in Civil Engineering ⁴	
<i>Non-Thesis Option</i>		
Technical Electives ^{2,3}		
Minimum Total Hours		30

The Master of Science degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the MS degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

¹ See Focus Area options below with the courses included in each area.

² Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis, are 600-level; at least fifteen (15) credit hours of coursework must be in CEE.

³ Technical Electives can be CEE or non-CEE courses. Technical Electives must be approved by the department. Non-CEE Technical Electives cannot be more than six (6) credit hours.

⁴ For the thesis option, a student is required to select both an approved MS thesis topic and the director and members of the thesis committee during the first term of graduate study. The thesis director must give approval for enrollment in CEE 690.

Focus Areas

Structural Engineering

Code	Title	Hours
CEE 522	Fundamentals of Prestressed Concrete	3
CEE 523	Timber Design	3
CEE 620	Advanced Mechanics of Solids	3
CEE 621	Finite Element Analysis for Structural Engineers	3
CEE 626	Masonry Design	3

Geotechnical Engineering

Code	Title	Hours
CEE 553	Advanced Foundation Design	3
CEE 650	Measurement of Soil Properties	3
CEE 652	Advanced Earth Pressure and Retaining Structures	3
CEE 656	Geotechnical Earthquake Engineering	3

Transportation Engineering

Code	Title	Hours
CEE 560	Traffic Engineering	3
CEE 562	Geometric Design of Highways	3
CEE 660	Transportation Planning and Urban Development	3
CEE 664	Fundamentals of Intelligent Transportation Systems	3

Water Resources

Code	Title	Hours
CEE 573	Groundwater Hydrology	3
CEE 673	Advanced Hydrology	3
CEE 676	Sediment Transport and River Mechanics	3
CEE 694	Special Topics in Civil Engineering (Wetland Design)	1-6

Civil Engineering (PhD)

Doctor of Philosophy in Civil Engineering (CE PHD)

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Civil and Environmental Engineering (<https://engineering.louisville.edu/academics/departments/civil/>)

Academic Plan Code(s): CE_PHD

Program Information

General Information

The PhD degree program is intended for persons having an accredited masters and/or baccalaureate degree in civil engineering, but is available to those with other backgrounds. Applicants with other backgrounds should plan on taking some undergraduate background coursework. Students interested in the PhD degree program should consult the Director of Graduate Studies in the Department of Civil Engineering.

Degree Requirements

The award of a Doctor of Philosophy degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform independent scholarly research. Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework attempted in Graduate Studies.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Admission Standards

The admission standards for the PhD program in Civil Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - Results from the Graduate Record Examination (GRE),
 - Statement of Purpose (include intended area of study and/or research interests)
 - Resume
 - At least two letters of recommendation, and

- g. Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
4. The successful applicant will typically have a GRE combined Verbal and Quantitative Reasoning score of 295 or above.
5. International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Normally, it is expected that the student will complete a master's degree before being admitted to the PhD Program. However, qualified applicants may be admitted directly to the doctoral program after receiving a baccalaureate degree. These students will be required to complete an additional 30 credit hours of coursework at the 500 and 600 level under an individual plan developed in conjunction with the department's Director of Graduate Studies. Also, remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background.

The PhD program has four different focus areas available: Structural Engineering, Geotechnical Engineering, Transportation Engineering, and Water Resources.

The minimum curricular requirements for the doctoral program are:

Code	Title	Hours
Courses - Post Bac		
Approved Master's Level Course Work		30
CEE 698	Civil Engineering PhD Seminar	3
Core Courses (Select two courses from a focus area below)		6
Technical Electives ¹		9
CEE 699	Civil Engineering PhD Research	12
Minimum Total Hours		60

Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic work attempted in Graduate Studies.

¹ Technical electives can be CEE or non-CEE courses. Technical Electives must be approved by the department.

Focus Areas

Structural Engineering

Code	Title	Hours
CEE 522	Fundamentals of Prestressed Concrete	3
CEE 523	Timber Design	3
CEE 620	Advanced Mechanics of Solids	3

Classroom Reading (P-12) (CERT)

Graduate Certificate in Classroom Reading (P-12)

Unit: College of Education and Human Development (<https://louisville.edu/education/>)
 Program Webpage (<https://louisville.edu/online/programs/certificate-programs/certificate-in-teaching-english-as-an-international-language/>)
 Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)
 Academic Plan Code(s): CRE CGRO

Program Information

This program is completed 100% online.

The Classroom Reading P-12 graduate certificate is a 5-course program designed to increase the literacy teaching expertise of elementary teachers and prepare leaders in literacy education. It is the same coursework as the current CRE non-degree Kentucky endorsement. The graduate certificate adheres to the ILA Standards for Literacy Professionals (2017) and provides multiple experiences for candidates to learn in collaboration with classroom teachers, administrators, P-12 students, and local and professional communities.

The graduate certificate program is not designed to lead to initial licensure in any state and is intended to prepare certified Kentucky teachers to earn an endorsement to their license. Although some or all of the program's coursework may count toward stand-alone licenses or endorsements in other states, this program is not an approved endorsement program in states other than Kentucky. Out of state students who intend to pursue licensure or an endorsement should check with their state licensing board before making a decision about whether

this program will meet their needs. For Kentucky certified teachers, completion of the certificate leads to a teaching endorsement.

The Teaching Classroom Reading P-12 program can be completed as stand-alone certificate, embedded as a specialty area within the Masters (MEd) in Teaching and Learning, Education Specialist (EdS) in Curriculum and Instruction, or Rank 1 programs. The state-level endorsement Program requires the PRAXIS exam *Teaching Reading (5204)*.

The learning outcomes for the Graduate Certificate in Classroom Reading program are as follows:

1. Increase teachers' foundational knowledge of evidence-based literacy instruction in literacy development that is inclusive and responsive to the needs of their preK-12 learners.
2. Collaborate with school partners to design, implement, and evaluate comprehensive literacy programs and school-wide literacy initiatives.

Admission Requirements

- Admission to the graduate school (<https://graduate.louisville.edu/admission/apply/>) or current enrollment in a graduate program at the University of Louisville.
- Bachelor's Degree with undergraduate GPA of 2.75 (minimum 3.0 for graduate work)
- Transcripts of all undergraduate and graduate work.
- Valid Teaching Certificate (Certified teachers outside Kentucky should be advised that we cannot guarantee the program will meet licensure, salary, advancement or other requirements in their state. As part of the admission process, we require a written statement confirming interest in the program for personal development and understanding that the program is designed to meet Kentucky certification requirements only.)
- Content prerequisites, as applicable
- Signed KY Code of Ethics and Signed Acceptable Use of Technology Agreement
- International applicants with transcripts that are not in English, in addition to submitting official copies of native language records, must also submit a notarized, verbatim translation in English prepared by an appropriate university or government official. The records must show both the degree granted and all coursework taken during the course of study. Applicants who are submitting transcripts from outside the United States must verify their records by submitting them to one of the following organizations: World Education Services (WES), Educational Credential Evaluators (ECE), and other NACES approved evaluators found here <https://www.naces.org/members> (<https://www.naces.org/members/>).
- Students for whom English is not their primary language must show English language proficiency by successfully completing one of the following:
 - International English Language Testing System (IELTS) examination (<https://www.ielts.org/>) – minimum score: 6.5
 - Test of English as a Foreign Language (TOEFL) examination (<https://www.ets.org/toefl.html>) – minimum scores: 550 on the paper-based TOEFL, 213 on the computer-based TOEFL or 80 or higher on the internet-based TOEFL
 - Duolingo English Test with Subscores (https://englishtest.duolingo.com/applicants/?utm_source=google&utm_medium=search&utm_campaign=EnglishTier1Campaign&utm_content=&utm_term=brand-broad&gclid=CjwKCAiAyPyQBhB6EiwAFUuakrtGPRRW-6-LWFstq8XBfUXEPQde1_PQmLRqJH7n01zpwXQcxv7MxoCR0QAvD_BwE) examination

– minimum score of 105 and exam must have been taken after January 1, 2020

- *Note: International students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.*

Program Requirements

Clinical Investigation Sciences (MSc)

The Master of Science in Clinical Investigation Sciences is closed to new admissions beginning Spring 2026.

Master of Science in Clinical Investigation Sciences

Unit: Public Health and Information Sciences (<http://louisville.edu/sphis/>) (GH)

Department: Clinical Investigation Sciences (<http://louisville.edu/sphis/academics/clinical-investigation-sciences/>)

Program Webpage (<http://louisville.edu/sphis/academics/clinical-investigation-sciences/>)

Academic Plan Code(s): CISCMS

Program Information

The MSc in Clinical Investigation Sciences degree program provides physicians, dentists, nurses and other health professionals an opportunity to acquire the clinical research skills necessary for a career in an academic health center.

The MSc in Clinical Investigation Sciences curriculum integrates biostatistical and epidemiologic methods in a problem-based learning format with additional instruction in several other biomedical and public health topics. Students pursuing the master's degree take didactic courses while they engage in mentored and independent research that culminates in the preparation of a professional paper.

Competencies

The successful student is able to:

- Access and critique scientific literature.
- Address and discuss methods and issues of clinical epidemiology.

- Identify important clinical research questions and state as testable hypotheses.
- Develop collaborative clinical research studies in accordance with appropriate epidemiologic and biostatistical methodologies.
- Disseminate study results to professional and lay audiences through oral and written communication.
- Analyze ethical and legal issues in performing and disseminating clinical research.

It is expected that prior to graduation, students in the program have demonstrated these competencies by completing the curriculum, participating in a collaborative research project, and successfully writing and defending the professional paper.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited institution with a minimum GPA of 3.0 on a 4.0 scale.

Applicants that have had research experience (e.g., research coordinator) or have completed a professional doctoral degree (e.g., DMD, DO, MD) are preferred.

Application requirements are submitted to the Graduate School and include:

- Formal graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Curriculum vitae
- Personal statement, a one-page essay that discusses the student's background and his or her long-term goals in clinical research
- Application fee
- A minimum of two letters of recommendation
- Official transcripts of all post-secondary coursework
 - International students' foreign transcripts must be submitted for foreign credential evaluation. This requirement may be waived for foreign students with ECFMG certification.
- Official scores on the Graduate Record Examination (GRE) General Test. This requirement may be waived for applicants who have any of the following:
 - A graduate degree from a U.S. institution
 - ECFMG certification
 - Passed steps 1 and 2 of the USMLE (United States Medical Licensing Examination)
 - Four or more years of clinical research related experience in the U.S. or Canada.
- International students for whom English is not their primary language must show English language proficiency by one of the following:
 - TOEFL examination with a minimum score of 79 (after conversion for test type)
 - IELTS test score of 6.5 or higher
 - Duolingo test score of 105 or higher
 - Demonstration of a degree awarded from an institution with instruction primarily in English, as formally documented by an appropriate institutional official

For specific information about the degree program or the application process, students should contact Dr. Paul McKinney (mckinney@louisville.edu), Program Director, (502)852-3019, or Bryan Mathis (bryan.mathis@louisville.edu), Program Coordinator Senior, (502)852-6263.

Application Deadline

Fall semester - Completed applications and all required application materials are due by August 1. International students are encouraged to apply no later than 120 days prior to the start of the fall semester.

Spring semester – Accepted with Program Director approval.

Summer semester – Applications are not accepted.

Curriculum

The typical progression through the MSc curriculum is:

- Develop program of study
- Take coursework
- Select research project and begin work
- Complete research project and prepare professional paper
- Present and defend research project

Faculty Advisor

The program director serves as faculty advisor for each student until the student begins his or her research for the professional paper, at which time the student selects a Principle Advisor for his or her research with the approval of the program director. The Principle Advisor may be any member of the School's faculty, or (with approval of the program director) a mentor in the student's laboratory or employment affiliation that is willing to assume the function of faculty advisor.

Program of Study

Upon matriculation in the program, each student meets with the program coordinator and develops a program of study based on the student's time availability (e.g., typical two-year program or extended three-year program). The program of study may be modified as the student's needs change or course availability is altered.

Awarding a degree from an accredited school of public health requires successful completion of coursework that provides instruction in foundational public health knowledge. This instruction is delivered through PHPH 523 Public Health in the United States.

Students with a prior degree from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs. In the absence of a variance, PHPH 523 satisfies the requirement.

Academic Standing

To maintain good academic standing in the MSc in Clinical Investigation Sciences program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any MSc in Clinical Investigation Sciences student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Program Requirements

31 total credit hours of required coursework

- 22 credit hours of required coursework
- six (6) credit hours of elective coursework
- three (3) credit hours of mentored research

The following includes all required courses organized by the semester in which they are offered. Some courses are offered in alternating years (see below).

Course Offerings by Semester

Fall		Hours
Required Coursework		
PHPH 523	Public Health in the United States ¹	3
PHST 500	Introduction to Biostatistics for Health Sciences I	3
PHST 624	Clinical Trials I: Planning and Design	2
PHPH 632	Ethical Conduct of Health Care Research	2
PHPH 631	Clinical Research Management ³	2
Elective		3
Hours		15
Spring		
PHST 501	Introduction to Biostatistics for Health Sciences II	3
PHST 625	Clinical Trials II	2
PHEP 614	Introduction to Clinical Epidemiology ⁵	2
PHPH 601	Evaluating Health Care Literature ⁵	1
PHPH 610	New Drug & Device Development	2
PHPH 699	Mentored Research	3
Elective		3
Hours		16
Minimum Total Hours		31

¹ PHPH 523 is required of students who do not have a public health degree from a CEPH accredited School of Public Health.

² PHPH 610 is offered every other spring semester on even numbered years (2022, 2024, 2026, etc.)

³ PHPH 631 is offered every other fall semester on odd numbered years (2021, 2023, 2025, etc.)

⁴ PHPH 632 is offered every other fall semester on even numbered years (2022, 2024, 2026, etc.).

⁵ PHEP 614 and PHPH 601 are offered every other spring semester on odd numbered years (2021, 2023, 2025, etc.).

Elective Coursework

Code	Title	Hours
Approved Electives		
Six (6) credit hours of electives from the following (other courses on approval of program advisor)		
Advanced Coursework in Biostatistics (PHST-XXX) ⁴		2-3
Advanced Coursework in Epidemiology (PHEP-XXX) ⁴		2-3
PHPB 501	Introduction to Public Health Behavior ⁵	3
LEAD 676	Instructional Strategies in Health Professions Education	3
LEAD 685	Evidence Based Practice in Health Professions Education	3
PHMS 684	Project Management for Population Health ⁶	3
PHMS 645	Health Services Research Methods I ⁶	3
ENGL 677	Graduate Writing in the Disciplines ⁶	3
SOC 618	Qualitative Research Methods ⁶	3

⁴ Specific courses vary.

⁵ Offered fall semesters

⁶ Offered spring semesters

Professional Paper

A professional paper, based on original research conducted by the student, is required of a candidate for the degree of Master of Science in Clinical Investigation Sciences. It is to be an original work of professional quality and a scholarly achievement that demonstrates the student's thorough understanding of research techniques in clinical research and the ability to conduct independent research.

Professional Paper Committee

The professional paper is read by a reading committee, chaired by the student's faculty advisor, and appointed by the dean of the school upon the recommendation of the program director. This committee consists of three members and must include one representative of the School of Public Health and Information Sciences. The professional paper must be approved by the committee and the program director.

Professional Paper Proposal

The proposal for the professional paper is to be developed in written form and presented to the committee for approval.

Professional Paper Approval

The professional paper is to be submitted in completed form to the Principal Advisor of the committee at least fourteen days before the end of the term in which the candidate expects to be graduated, and the candidate is not eligible for the final oral examination until the professional paper has been accepted by the committee.

The committee schedules an oral examination of the candidate during which the student presents his or her professional paper and is asked to defend it and the supporting research. The professional paper is approved by a majority vote of the committee and by the program director.

Communication (MA)

Master of Arts in Communication

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Communication (<http://commcourses.com/www/>)

Academic Plan Code(s): COMMMA

Program Information

The Master of Arts in Communication is a 30 credit hour program. It includes 15 credit hours of foundation and core courses, twelve (12) credit hours of electives, and three (3) credit hours of thesis or non-thesis option. The non-thesis option includes a three (3) credit hour practicum and an additional three (3) credit hour elective course.

Degree Summary

Code	Title	Hours
Core Coursework		15
Electives		12
Thesis/Non-thesis Option		3
Minimum Total Hours		30

At least 15 of the 30 credit hours must be in courses at the 600 level.

Upon admission to the program, the student will work with the Director of Graduate Studies to establish a plan of study. After the second semester, students choosing the thesis option will select a mentor who will provide guidance for the thesis and selecting two additional faculty to serve on the thesis committee, one of whom must be outside the Department of Communication. Students choosing the non-thesis option will select a mentor who will provide guidance concerning the practicum and course selection. Students choosing the non-thesis option will take a written comprehensive exam administered by the Communication Department faculty.

Admission Requirements

Students seeking general admission to the program (accelerated or otherwise) will be evaluated based on the following criteria:

1. Demonstrated competency in quantitative and qualitative-based courses.
 - Applicants who have completed, or are in the process of completing, a BA or BS in Communication at the University of Louisville must have taken Communication Research Methods or Communication Statistics and earned a grade of B or better.
 - Applicants applying for admission from outside of the department and/or UofL must have earned a B or better in a course related to quantitative and/or qualitative research methods.
2. Demonstrated competency in quantitative and qualitative reasoning via an interview with the graduate committee.
3. Two positive letters of recommendation, preferably from relevant faculty who can comment on the applicant's research potential, especially the applicant's qualitative and quantitative reasoning.
 - Applicants who have completed, or are in the process of completing, a BA or BS in Communication at the University of Louisville must include a letter of recommendation from a professor who has taught Communication Research Methods or Communication Statistics. This letter should focus on the applicant's quantitative and/or qualitative abilities.
 - Applicants applying for admission from outside of our department must include a letter of recommendation from a professor who taught the applicant in a course commensurate to Communication Research Methods that emphasizes quantitative and/or qualitative research methods.
4. A cumulative GPA of 3.0 or higher.
 - Students applying to the accelerated master's degree program must have a minimum cumulative GPA of 3.0 after earning 45 credit hours.
5. At least two writing samples that demonstrate competency in the formulation and execution of communication-related research using quantitative, qualitative, and/or rhetorical reasoning. Writing samples should show English language proficiency, meaningful research question (process), theoretical and methodological awareness, thoroughness in research (evidence, data collection), and craft.

Students seeking a teaching or research assistantship will be required to submit official GRE scores. GRE scores will be used exclusively as a metric for determining whether applicants should receive departmental funding and will not necessarily be use as an admission condition.

Applicants need an undergraduate degree in Communication or a related discipline. Conditional admission is possible for students with lower undergraduate GPA.

Application materials include:

- Official transcripts showing all degrees awarded and all undergraduate and graduate work (all courses) completed from each accredited college/university previously attended.
- Two required writing samples
- Two letters of recommendation
- A graduate admissions application (<https://graduate.louisville.edu/admission/apply/>)
- Application fee

Program Requirements

Code	Title	Hours
Foundations		15
COMM 506	Ethical Problems in Communication - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/), WR (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	3

COMM 510	Special Topics in Communication Studies	3
COMM 520	Computer-Mediated Communication - WR (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	3
COMM 530	Science Communication	3
COMM 532	Intercultural Communication	3
COMM 538	Intimate Communication - WR (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	3
COMM 540	Public Communication Campaigns	3
COMM 555	Persuasive Movements	3
COMM 565	Special Topics in Communication Service Learning - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	3
COMM 580	Interpersonal Communication	3
COMM 590	Health Communication	3
COMM 603	Communication Pedagogy	3
COMM 610	Problems of Public Discourse	3
COMM 620	Organizational Communication	3
COMM 625	Personality and Communication	3
COMM 640	Communication in Social Service	3
COMM 650	Corporate Communication	3
COMM 651	Conflict Management	3

COMM 652	Health Communication: Theory and Practice	3
COMM 653	Integrated Marketing Communication Campaigns	3
COMM 654	Strategic Communication and Crisis Management	3
COMM 660	Selected Topics in Mass Media	3
COMM 670	Directed Readings in Communication	3
COMM 675	Risk Communication	3
COMM 690	Special Topics	3
COMM 698	Thesis	3
Thesis or Non-Thesis Option		3
Select thesis or non-thesis option		
<i>Thesis</i>		
COMM 698	Thesis	3
<i>Non-Thesis Option</i>		
COMM 600	Practicum	3

Pending approval of the department program coordinator, and approval by the Graduate School, a student may transfer up to six (6) credit hours of graduate credit from another institution.

Non-thesis option: Students electing a non-thesis option will complete the 30 credit hours specified above, with two differences. Students who select the non-thesis option will substitute one 600-level practicum and one elective for the six (6) credit hours of thesis. The non-thesis option also will include a Comprehensive Examination administered by Department Faculty.

Thesis option: Students electing a thesis option will complete the 30 credit hours specified above, with one difference. Students who select the thesis option will complete a total six (6) credit hours of COMM 698 Thesis course in two semesters (three (3) credit hours of COMM 698 in each semester). The thesis option also will include an oral defense administered by thesis committee and Department Faculty in attendance.

Experiential Component

The Master of Arts does not require an experiential component. However, students may choose to do a practicum in a private business, community organization, or government agency that deals with communication. Students may complete the practicum in two ways. A student may turn current work or volunteer experience into a research project, or a student not previously affiliated with the practicum site may develop a project useful to the organization. In both cases, the student will work with a Communication Department faculty member to shape the project and will write a formal paper dealing with the project. Students who choose the practicum will be applying knowledge acquired in Communication coursework directly to area needs, thus serving the community and helping to build stronger university/community ties.

Computer Science (MS)

Master of Science in Computer Science (MS)

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Computer Science and Engineering (<https://engineering.louisville.edu/academics/departments/computer/>)

Academic Plan Code(s): CS_ _MS, CS_ _MS_O

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-science-in-computer-science/>).

The MS degree program is intended for persons having an accredited baccalaureate degree in computer science or computer engineering, but is available to those with other backgrounds. Applicants with other backgrounds should plan on taking some undergraduate background coursework. Students interested in the MS degree program should consult the Director of Graduate Studies in the Department of Computer Science and Engineering.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (p. 16) section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Computer Science are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - At least two letters of recommendation,
 - Personal statement or resume,
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background.

The minimum curricular requirements for the master's program are:

Code	Title	Hours
MS in Computer Science Coursework		
	Foundations Course (see list below) ¹	3
	Software Courses (see list below) ²	6
	Analytic Courses (see list below) ³	6
	CSE Electives ⁴	9
	Select one of the following:	6
<i>Thesis Option</i>		
CSE 690	Master of Science Thesis in Computer Science ⁵	
<i>Non-Thesis Option</i>		

CSE 696	CSE Project
CSE Elective ⁴	
<i>Course Option</i>	
CSE 6XX (Project Oriented Course)	
CSE Elective ⁴	
Minimum Total Hours	30

The Master of Science degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the master of science degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

¹ One Foundations Course from the list below is required

² Two Software Courses from the list below are required

³ Two Analytic Courses from the list below are required

⁴ Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis, are 600-level; at least fifteen (15) credit hours of coursework must be in CSE.

⁵ For the thesis option, a student is required to select both an approved MS thesis topic and the director and members of the thesis committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in CSE 690 Master of Science Thesis in Computer Science.

Approved Courses

Computer Science and Engineering (MEng)

Master of Engineering in Computer Science and Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (SP)

Department: Computer Science and Engineering (<https://engineering.louisville.edu/academics/departments/computer/>)
Academic Plan Code(s): CECSMEN

Program Information

General Information

The Master of Engineering in Computer Science and Engineering degree program is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org> (<https://www.abet.org/>), under the Commission's General Criteria and the Program Criteria for Electrical, Computer, Communications, Telecommunication(s) and Similarly Named Engineering Programs.

Since the Computer Science and Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Computer Science and Engineering bachelor degree program at Speed School. Therefore, students who earn an undergraduate degree at a school or university other than the University of Louisville pursue the MS degree instead of the MEng degree.

Master of Engineering Program Educational Objectives

The purpose of the five-year Master of Engineering Program is to bring together the faculty, staff, and capital resources to meet the following program educational objectives:

1. Succeed at advanced levels as Computer Science and Engineering professionals in industrial, academic, or government entities, or are successful in pursuing further professional/graduate studies.
2. Engage in life-long learning necessary for their professional development.
3. Lead their communities in addressing social, ethical, and professional issues in contemporary computer science and engineering practice.

Master of Engineering Student Outcomes

In order to achieve these objectives, the Master of Engineering has the following outcomes set for its graduates. Graduates will have the ability to:

1. identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. communicate effectively with a range of audiences.
4. recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. acquire and apply new knowledge as needed, using appropriate learning strategies.
8. perform advanced level of analysis, knowledge of current topics and competence in performing independent research.

Residency

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. A candidate for the Master of Engineering degree who does not register for credit hours must maintain active registration by paying a fee each semester for MEng residency until the degree is awarded (i.e., the candidate must maintain continuous registration, including summer terms, in Graduate Studies). Failure to pay the MEng residency fee will be cause to cancel a student's residency. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. In order to be restored to residency, the student must submit a new application, have the recommendation of the department chair, receive the approval of the Associate Dean and pay the fee for each of the semesters during which the residency was void.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing is 3.00 for all academic work completed while in graduate studies.
2. Any student with a cumulative graduate GPA below 3.00 will be placed on academic warning. Students on academic warning are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms.

Students who do not bring their cumulative graduate GPA back at or above a 3.00 in the semester immediately following Academic Warning, will be placed on Academic Probation for the next semester of enrollment. Students on probation are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms. Any student who remains in academic probation for more than a single semester may be considered for dismissal from the program.

3. Students receiving graduate assistantships (teaching, research or service) shall be provided adequate training and shall be required to understand and adhere to University policies related to these areas. The performance of teaching, research and service duties by such students shall be periodically evaluated. Students with teaching assistantships shall be evaluated annually.
4. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs.
5. A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

Degree Requirements

The following degree requirements are mandatory of all Master of Engineering candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's degree students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. Students following the thesis option must follow the Procedures and Standards for Master of Engineering Theses.
4. The total requirements must be completed within six years after admission into graduate studies. The time limit imposed by the rule may be extended in individual cases upon recommendation of the department chair and approval of the associate dean for academic and student affairs.
5. The MEng degree cannot be conferred prior to the BS degree.

Admission Standards

Since the Computer Science and Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Computer Science and Engineering bachelor degree program at Speed School.

The application form is available online (<https://engineering.louisville.edu/meng-graduate-application-form/>).

The requirements for admission or readmission to a master of engineering program are:

1. Submission of a completed MEng application for the field of specialization in which the student is earning a bachelor degree from the J.B. Speed School of Engineering. Students can apply to the MEng program with fewer than thirteen (13) credit hours of BS degree requirements remaining and no later than two years post conferral of their baccalaureate degree. A student's admission into the MEng program is contingent upon successful completion of their undergraduate degree;
2. Recommendation by the faculty and chair of the student's department for admission or readmission to graduate studies;
3. Cumulative baccalaureate grade point average of 2.75. However, those students with cumulative baccalaureate grade-point averages from 2.50 to 2.75 may be admitted upon petition and approval of the chair and faculty of the department.

A student becomes a candidate for the Master of Engineering degree upon admission to graduate studies and initial registration as a graduate student.

Program Requirements

The Master of Engineering in Computer Science and Engineering degree requires the following over and above the Bachelor of Science in Computer Science and Engineering degree:

Code	Title	Hours
Master of Engineering Coursework		
<i>Choose one of the following:</i>		
CSE 611	Computer Architecture	
OR		

CSE/ECE 510	Computer Design	
ECE 511	Computer Design Laboratory	
<i>Choose one of the following:</i>		
CSE 563/ISE 664	Experimental Design in Engineering	3
OR		
CSE 620	Combinatorial Optimization and Modern Heuristics	3
<i>Core Requirements:</i>		
CSE 622	Simulation and Modeling of Discrete Systems	3
CSE 625	Parallel Programming	3
CSE Electives ^{1,2}		9
Technical Elective ^{1,3}		3
Select one of the following:		6
<i>Thesis Option:</i>		
CSE 697	Master of Engineering Thesis in Computer Engineering and Computer Science ⁴	
<i>Non-Thesis Option:</i>		
CSE 696	CSE Project	
CSE Elective ^{1,2}		
Minimum Total Hours		30

The Master of Engineering degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the Master of Engineering degree must be completed with a 3.00 GPA or better for all academic work attempted in Graduate Studies.

A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

¹ Electives must be chosen so that at least one-half of the total credits counted toward the degree, exclusive of thesis, are 600-level.

² CSE Electives must be approved by the department.

³ Technical Electives can be CSE or non-CSE courses. Technical Electives must be approved by the department.

⁴ For the thesis option, a student is required to select both an approved MEng thesis topic and the director and members of the thesis committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in CSE 697.

Computer Science and Engineering (PhD)

Doctor of Philosophy in Computer Science and Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Computer Science and Engineering (<https://engineering.louisville.edu/academics/departments/computer/>)
Academic Plan Code(s): CSE_PHD

Program Information

General Information

The PhD degree program is intended for persons having an accredited master's and/or baccalaureate degree in computer science, computer engineering, or electrical engineering, but is available to those with other

backgrounds. Applicants with other backgrounds should plan on taking some undergraduate background coursework.

Students interested in the PhD degree program should consult the Director of Graduate Studies in the Department of Computer Science and Engineering.

Degree Requirements

The award of a Doctor of Philosophy degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform independent scholarly research. Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework attempted in Graduate Studies.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Admission Standards

The admission standards for the PhD program in Computer Science and Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - Results from the Graduate Record Examination (GRE),
 - At least two letters of recommendation,
 - A brief personal statement describing the decision to continue to a PhD program, and
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
- The successful applicant will typically have a GRE combined Verbal and Quantitative Reasoning score of 295 or above.
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Normally, it is expected that the student will complete a master's degree before being admitted to the PhD Program. However, qualified applicants may be admitted directly to the doctoral program after receiving a baccalaureate degree. These students will be required to complete an additional 30 credit hours of coursework at the 500 and 600 level under an individual plan developed in conjunction with the department's Director of Graduate Studies.

Also, remedial work may be specified for any applicant who, in the opinion of the faculty, do not have a sufficient background.

The minimum curricular requirements for the doctoral program are:

Code	Title	Hours
Post-Baccalaureate Courses		
Approved Master's Level Course Work		30
CSE Electives ¹		18
CSE 799	Dissertation Research	9
CSE 795	CSE Seminar	2
Minimum Total Hours		59

Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic work attempted in Graduate Studies.

¹ Master's Level Course Work and/or CSE Electives must be chosen so that 18 credit hours of courses are taken in the core areas. Two courses are required in each of two core areas and one course in each of the remaining two core areas. The approved courses for the four core areas are listed below.

Computer Software Engineering Core Courses ¹

Code	Title	Hours
CSE 504	Automata Theory	3
CSE 516	Fundamentals of Computer Communications and Networks	3
CSE 530	Design of Compilers	3
CSE 545	Artificial Intelligence	3
CSE 550	Software Engineering	3
CSE 619	Design and Analysis of Computer Algorithms	3
CSE 629	Distributed System Design	3
CSE 630	Advanced Databases	3

Computer Hardware Engineering Core Courses ¹

Code	Title	Hours
CSE/ECE 510	Computer Design	3
CSE 525/ECE 516	Microcomputer Design	4
CSE 611	Computer Architecture	3
ECE 515	Introduction to VLSI Systems	3

Computationally Intensive Applications Core Courses ¹

Code	Title	Hours
CSE 522	Performance Evaluation of Computer Systems	3
CSE 564	Introduction to Cryptography	3
CSE 609	Multimedia Processing	3
CSE 621	Web Mining for E-Commerce and Information Retrieval	3
CSE 622	Simulation and Modeling of Discrete Systems	3
CSE 627	Digital Image Processing	3
CSE 628	Computer Graphics	3
CSE 660	Introduction to Bioinformatics	3
ECE 520	Digital Signal Processing	3

ECE 550	Communication and Modulation	3
ECE 560	Control Systems Principles	3
ECE 614	Deep Learning	3
ECE 619/CSE 633	Computer Vision	3
ECE 620	Pattern Recognition and Machine Intelligence	3

Advanced Mathematics Core Courses ¹

Code	Title	Hours
ISE 664 or CSE 563	Experimental Design in Engineering	
CSE 620	Combinatorial Optimization and Modern Heuristics	3
CSE 632	Data Mining	3
MATH 501	Introduction to Analysis I - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	3
MATH 667	Statistical Inference	3
MATH 681	Combinatorics and Graph Theory I	3

¹ Master's Level Course Work and/or CSE Electives must be chosen so that 18 credit hours of courses are taken in the core areas. Two courses are required in each of two core areas and one course in each of the remaining two core areas.

Counseling and Personnel Services (MEd)

Master of Education in Counseling and Personnel Services

Unit: College of Education and Human Development (<http://louisville.edu/education/>)

Department: Counseling and Human Development (<http://louisville.edu/education/departments/ecpy/>)

Program Website (<http://louisville.edu/education/degrees/med-cps-csp/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information

The School Counseling concentration is completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-education-in-counseling-and-personnel-services/>).

The MEd in Counseling and Personnel Services is designed to prepare prospective professionals in a variety of counseling areas:

- Art Therapy
- Clinical Mental Health Counseling
- Counseling Psychology
- School Counseling

Theory and practice are critically important components of the program. Students are required to pursue a logical sequence of study that permits a well-balanced preparation in theory, research, and field experience.

Mission

The mission of the MEd in Counseling and Personnel Services is to prepare scholar practitioners for counseling roles in which they contribute to society in a variety of professional positions. Our graduates support principles of social justice, fairness, and equity in their work; proactively promote the welfare of those they serve; and engage in a lifelong process of educational and professional renewal.

Admission Requirements

Prospective students must submit an online application for admission (<https://graduate.louisville.edu/admission/apply/>) to the Graduate School.

For unconditional admission, a minimum undergraduate Grade Point Average (GPA) of 2.75 is required. The GRE test is no longer required for admission to the MEd in Counseling and Personnel Service degree program.

Requirements for Admission in Good Standing:

1. GPA of 2.75.
2. Two letters of recommendation from faculty or supervisors familiar with their work.
3. Professional Goal Statement: The Admissions Committee evaluates applications based on how an applicant's goals, professional experiences, and commitment to education are an appropriate fit with this program.
4. Resume.

Applicants are encouraged to visit the website of the specialization area of interest below for further information about suggested GPA requirements, application deadlines, and other specific information related to that specialization area.

- Art Therapy (<http://louisville.edu/education/degrees/med-cps-at/>)
- Clinical Mental Health Counseling (<http://louisville.edu/education/degrees/med-cps-mhc/>)
- Counseling Psychology (<http://louisville.edu/education/degrees/med-cps-cp/>)
- School Counseling (<http://louisville.edu/education/degrees/med-cps-sc/>)

Degree Requirements

Code	Title	Hours
ECPY 624	Foundations of School Counseling	3
ECPY 626	Consultation	3
ECPY 640	Assessment Methods for Counselors	3
Elective (approved by faculty advisor)		3
Minimum Total Hours		12

Notes: ECPY 674 Practicum in School Counseling must be applied for by March 1 for Fall term and October 1 for Spring term.

1. Students must earn at least a "B" or better in ECPY 630 to be eligible to enroll in ECPY 674 School Counseling Practicum.
2. For school counseling certification, a grade of "B" or better is required in ECPY 674.
3. Transfer of credit is dependent upon receipt of transcript, satisfying all Graduate School transfer course requirements, and advisor's approval.
4. Upon admission, students have six years to complete their program.
5. All students must have liability insurance prior to taking practicum.
6. At any point after admission, the faculty reserve the right to review a student's fitness on the basis of personal characteristics, for continuing in the counseling or student personnel program. Such a review shall be initiated upon written recommendation of two faculty members and shall consist of a review of the student's academic result in a recommendation to the Dean for (1) continuation of the student in the program, (2) continuation for a specified provisional period with specific conditions for continuation thereafter, or (3) dismissal from the program.
7. The program requires the acceptable completion of a program portfolio.
8. The program is not official unless signed by both advisor and student.

9. This program must be completed and degree awarded to apply for a rank change with the state of Kentucky.

Exit Requirements: To complete the program, students must have a minimum 3.0 GPA. No credit shall be accepted for carrying a grade lower than C (no C-minus).

Counseling Psychology

Academic Plan Code(s): CPS_MEDCPL

Code	Title	Hours
ECPY 540	Evaluation and Measurement in Education	3
ECPY 611	Learning Systems: Theory and Practice	3
ECPY 619	Empirical and Theoretical Foundations of Counseling and Psychotherapy	3

***ACATE – CAAHEP Educational Standards**

1. History and Theory of art therapy
2. Professional Orientation, Ethical, and Legal Issues
3. Materials and Techniques of Art Therapy Practice
4. Creativity, Symbolism, and Metaphor
5. Group Work
6. Art Therapy Assessments
7. Thesis or Culminating Project
8. Human Growth and Development
9. Helping Relationships and Applications
10. Psychopathology and Diagnosis
11. Psychological and Counseling Theories
12. Appraisal and Evaluation
13. Research
14. Cultural and Social Issues
15. Studio Art
16. Specializations
17. Career Development (recommended but not required)

*The Commission on Accreditation of Allied Health Education Programs (CAAHEP) and the Accreditation Council for Art Therapy Education (ACATE) cooperate with the **American Art Therapy Association (AATA)** to establish, maintain and promote appropriate standards of quality for educational programs that meet or exceed the minimum standards.

¹ At least 700 hours of field placement must be completed during field studies and two practicums. 10 hours per week are required during field studies. No less than 20 hours per week are required during the two practicums.

The Master of Education in Counseling and Personnel Services program prepares students to meet the requirements for certification and/or licensure in the following concentrations:

- Counseling Psychology
- School Counseling P-12
- Clinical Mental Health Counseling
- Art Therapy

If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see

how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> ([https://louisville.edu/online/About-Us/?tab=disclosures](https://louisville.edu/online/About-Us?tab=disclosures)).

Counseling and Personnel Services (PhD)

Doctor of Philosophy in Counseling and Personnel Services (CPSPHD)

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Counseling and Human Development (<http://louisville.edu/education/departments/ecpy/>)

Program Website (<http://louisville.edu/education/degrees/phd-cps/>)

Academic Plan Code(s): See Specialization Requirements tab.

Program Information

This program offers a combination of coursework, with mostly in person courses. In person courses are offered on campus or in local schools.

The Doctor of Philosophy in Counseling and Personnel Services encompasses three specialization areas:

- Counseling Psychology
- Counselor Education and Supervision
- Educational Psychology, Measurement, and Evaluation

The doctoral degree is granted in recognition of scholarly proficiency and distinctive achievement in a specific field/discipline. All candidates for a doctoral degree in the College of Education and Human Development must successfully complete qualifying exams and a dissertation/professional portfolio that clearly indicates the candidate has mastered and can exhibit/articulate the content knowledge, skills, and dispositions specific to their discipline, and can utilize appropriate research methodologies to contribute to the body of knowledge in their field.

Distinctive Characteristics of Doctoral Programs in the College of Education and Human Development

• Social Justice and Equity

Doctoral students in our program build experience and expertise in the issues of social justice and equity which aligns with our metropolitan mission and focus on student achievement.

• Leadership

Our doctoral students gain expertise in supervising and leading others to achieve organizational goals and missions, managing complex systems, addressing administrative issues and procedures, conducting research to enhance leadership and teaching others about the art of organizational leadership.

• Practical Experience

The doctoral program contains practicums, internships, or embedded field experience that aligns with program and career goals. These mentored experiences may include teaching, research, administration or other appropriate areas.

• Scholarship/Research

An emphasis on scholarship includes experience and mentorship in ethics, publications, presentation, grantsmanship, and other forms of creative activity. The research component is characterized by the development of vertical research teams: senior faculty, junior faculty, doctoral students, master's students, and in some programs, undergraduate students, working together on research projects and research areas. These may be bolstered by partnerships with local school districts, businesses, or community agencies.

Admission Requirements

Prospective students must submit an online application for admission (<https://graduate.louisville.edu/admission/apply/>) to the Graduate School. Additional requirements are listed below:

- A master's degree, or its equivalent in a related field, is typically required. However, highly motivated applicants with a strong undergraduate record and a Bachelors degree may also be considered for admission. Applicants are required to submit official transcripts from all higher education institutions attended.
- Three letters of recommendation from individuals who can speak to the applicant's academic and/or professional capabilities and potential.
- The Test of English as a Foreign Language (TOEFL/IELTS/Duolingo) is required of all students who completed a degree outside the United States from countries in which English is not the native language. Students holding a baccalaureate or advanced degree from an accredited institution in the United States are exempt from this requirement.
- A statement of professional goals appropriate to pursuing a PhD in the specific area of specialization is required. Applicants should submit a personal statement of approximately 1,500 words outlining their professional goals and how their research and professional interests might align with those of faculty in the department.
- An updated curriculum vitae (CV) or resume

Each application will be evaluated to determine the strength of all components (GRE, undergraduate and graduate GPAs, letters of recommendation, professional goal statement, and work experience) as predictors of successful completion of the program. Applicants are encouraged to visit the website of the specialization area (<http://louisville.edu/education/degrees/phd-cps/>) of interest for further information about suggested GPA and GRE score requirements, application deadlines, and other specific information related to that specialization area

Program Requirements

The Doctor of Philosophy in Counseling and Personnel Services encompasses four specialization areas. For specific coursework, see **Specialization Requirements section**.

- Counseling Psychology
- Counselor Education and Supervision
- Educational Psychology, Measurement, and Evaluation

All ECPY doctoral programs require courses in the following areas:

Specialty – Specialty courses are designed to prepare the student for work within their selected professional field.

Research Methodology – The research component prepares students to examine research within the professional area as well as contribute to the existing research.

Electives – Elective courses are selected in concert with advisor and program committee with consideration to the student's background, interests, and professional goals.

Each doctoral program will have additional requirements related to their program of study.

All candidates for a doctoral degree must successfully complete qualifying exams and a dissertation/professional portfolio that clearly indicates the candidate has mastered and can exhibit/articulate the content knowledge, skills and dispositions specific to their discipline, and can utilize appropriate research methodologies to contribute to the body of knowledge in their field.

Specialization Requirements

Specialization in Counselor Education and Supervision

Academic Plan Code(s): CPS_PHDCES

Master's Degree prerequisite + 60 credit hours minimum: The Student and Committee must develop courses, programs and experiences that clearly identify and address the specific themes of Leadership, Scholarship, Social Justice and Equity. These areas of emphasis must have descriptive competencies that the student should attain and the Committee can assess.

Specialization in Educational Psychology, Measurement, and Evaluation

Academic Plan Code(s): CPS_PHDPME

The Educational Psychology, Measurement, and Evaluation specialization requires a minimum of 90 graduate credit hours distributed in the following areas of study: specialty components, research methodology, and electives. Equivalent courses taken in a master's program may be substituted for required courses with advisor and program committee approval.

At least 45 of the 90 credit hours must be earned at UofL. These 45 credit hours include 18 credit hours fulfilling residency and twelve (12) credit hours required for dissertation research.

The Student and Committee must develop courses, programs and experiences that clearly identify and address the specific themes of Leadership, Scholarship, Social Justice and Equity. These areas of emphasis must have descriptive competencies that the student should attain and the Committee can assess.

Minimum Total Hours 90

- ¹ May be taken up to three times for a maximum of nine (9) credit hours.
² May be taken for a maximum of three (3) credit hours.

The Doctorate in Counseling and Personnel Services - Specialization in Counseling Psychology program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification, you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/oapa/licensure-information> (<https://louisville.edu/oapa/licensure-information/>) (you may search by school or by the name of the program then click on 'View Details' to display the information).

For programs with an online option, more information about certification or licensure is available here: <http://louisville.edu/online/About-Us> (<http://louisville.edu/online/About-Us/>) (please scroll down near the bottom of the page and click on the licensing disclosures tab).

Couple and Family Therapy (MS)

Master of Science in Couple and Family Therapy

Unit: Kent School of Social Work and Family Science (<http://louisville.edu/kent/>) (GK)

Department: Social Work (<https://louisville.edu/kent/academics/couple-and-family-therapy/>)

Program Website (<https://louisville.edu/kent/academics/couple-and-family-therapy/>)

Academic Plan Code(s): CFT_MS; CFT_MS_ADC

Program Information

The purpose of the Master of Science in Couple and Family Therapy (MSCFT) program within the Kent School of Social Work and Family Science (Kent School) is to develop professionals in couple/marriage and family therapy to work with couples, families, and other systems within their community contexts and through the lens of social justice.

Marriage/couple and family therapy is a distinct discipline from social work with its own state licensure board, national professional organization, and national accrediting body. The MSCFT degree program is the first COAMFTE#accredited master's degree program in the nation housed in a school of social work.

The MSCFT program offers a rigorous educational program that takes a social justice approach to working with individuals, couples, families, and other systems. Students take 60 credit hours and meet coursework requirements for Kentucky state licensure as a Licensed Marriage and Family Therapist and clinical membership in the American Association for Marriage and Family Therapy (AAMFT). MSCFT coursework focuses on family systems theoretical foundations, systemic assessment, social justice and diversity, family systems interventions, research#informed practice, and ethics.

Students also have the option of completing a concentration in Alcohol & Drug Counseling.

The CFT Program has established the following six Program Goals, in accordance with our purpose of training a social#justice minded workforce of couple and family therapy professionals and our accreditation standards:

- Educate students with regard to the major models of marriage and family therapy
- Train students to effectively assess and conceptualize individual and family problems
- Train students to effectively implement marital and family therapy techniques and interventions
- Prepare students to practice professionally as ethical marriage/couple and family therapists
- Prepare students to become social#justice oriented marriage/couple and family therapists
- Train students to become research#informed clinicians

Degree Requirements

Code	Title	Hours
	MS CFT Core Coursework	60
	Alcohol and Drug Counseling concentration (optional)	9
Minimum Total Hours		60-69

MSCFT-MSSW Dual Degree

Students may also choose to complete a dual master's degree program in CFT (MS) and Social Work (MSSW), allowing completion of a master's degree in two distinct professions in 2-3 years. The dual-degree program exposes students to philosophical and legal distinctions of both degrees, creating a unique opportunity for MSSW students to deepen their clinical training with couples and families and introduce CFT students to a broader range of social work and social welfare course offerings and clinical diagnoses. Students in the dual-degree program take 84 credit hours.

For additional information, please contact kentcft@louisville.edu or go to the CFT webpage here (<http://uofl.edu/CFT/>).

Admission Requirements

Applications to the Master of Science in CFT program must include the following:

- Completed Graduate School application (<https://graduate.louisville.edu/admission/apply/>) and application fee
- Earned bachelor's degree from an accredited institution
- Two recommendations from former instructors or supervisors
- Official transcripts from all colleges and universities attended
- Family of Origin paper (a description of formative experiences in one's family)
- Professional Statement (a description of career goals and reasons for seeking this degree)
- Overall GPA of 3.0 recommended; applicants with incoming GPAs under 3.0 must submit an addendum discussing gaps or deficiencies

in applicant's academic record. Include planned strategies for maintaining the required 3.0 in Graduate School.

For additional information, please contact kentcft@louisville.edu or go to the CFT webpage here (<http://uofl.edu/CFT/>).

Program Requirements

Standards set by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE).

To graduate with the MS in CFT, students must complete all required coursework and meet the following standards:

- Complete the program within 4 years of beginning coursework
- Minimum GPA of 3.0 at program completion
- Minimum of 300 client contact hours
- Minimum of 100 relational hours
- Minimum 50 raw (audio, video, or live) supervision hours
- No more than two (six credit hours) C grades in the MSCFT program

Typically, credit from a maximum of four courses may be transferred in from other master's degree programs upon approval by Director.

Program Coursework

Code	Title	Hours
MSSW 601	Human Behavior in the Social Environment I	3
MSSW 603	Diversity, Oppression, and Social Justice Practice	3
MCFT 707	Human and Family Development Across the Lifespan	3
MSSW 626	Research Methodology and Design	3
MSSW 633	Social Work and Human Sexuality	3
MSSW 642	Psychopathology	3
MCFT 700	Foundations of Couple and Family Therapy: Theory and Practice	3
MCFT 701	Family Therapy Assessment and Treatment in Diverse Populations	3
MCFT 702	Couple Therapy: Theory and Practice	3
MCFT 703	Contemporary Issues, Community Intersections & Collaborations in CFT	3
MCFT 704	Integrating Family Therapy: Theory and Practice	3
MCFT 705	Professional Issues & Ethics in Couple & Family Therapy	3

MCFT 722	Family Therapy Supervision II	3
MCFT 723	Family Therapy Supervision III	3
MCFT 724	Family Therapy Supervision IV	3
MCFT 725	Family Therapy Supervision V	3
Minimum Total Hours		60

For additional information, please contact kentcft@louisville.edu or go to the CFT webpage here (<http://uofl.edu/CFT/>).

Concentration Coursework

Students interested in pursuing an optional concentration in Alcohol and Drug Counseling complete nine (9) credit hours of coursework in addition to the 60 credit hours of core program coursework.

Alcohol and Drug Counseling Concentration Coursework

Code	Title	Hours
MSSW 660	Motivation and Change: The Process of Change and Strategies to Elicit Intrinsic Motivation.	3
MSSW 661	Special Issues in Alcohol and Drug Counseling	3
MSSW 662	Substance Use and Substance Use Disorders	3
Minimum Total Hours		9

MSCFT students completing a concentration in Alcohol and Drug Counseling will complete their advanced-year CFT practicum in a specialized setting working with populations affected by substance abuse.

For additional information, please contact kentcft@louisville.edu or go to the CFT webpage here (<http://uofl.edu/CFT/>).

The Master of Science in Couple and Family Therapy program and the concentration in Alcohol and Drug Counseling prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Criminal Justice (MS)

Master of Science in Criminal Justice

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)
Department: Criminal Justice (<https://louisville.edu/justice/>)
Program Webpage (<https://louisville.edu/justice/graduate-degree-programs/master-of-science-in-criminal-justice/>)
Academic Plan Code(s): JA_ _MS, JA_ _MS_O, JA_ _MS_ACC, JA_ _MS_ACO

Program Information

The goals of the Department of Criminal Justice are for students to achieve a specialized understanding of the criminal justice system, criminal behavior, legal processes and the relationship of these phenomena to society. Graduate studies in the Department of Criminal Justice provide students with advanced social and behavioral science skills as well as a detailed and thorough understanding of crime, criminal justice and related processes. Graduates of this program are prepared to continue advanced studies in criminal justice or other social sciences and to assume mid and upper-level leadership positions within criminal justice programs and agencies.

The interdisciplinary nature of the program maintains the dynamic posture that allowed this crime-related discipline to emerge and to mature quickly and successfully. Graduate students are given latitude in choosing elective courses in the Master of Science in Criminal Justice. Elective courses related to the student's program of study are selected from the resources of the entire University. Courses in social work, public administration, law, business, and the various departments of the College of Arts and Sciences are possible electives that the student may consider. Electives outside the department must have the approval of the Director of Graduate Studies. With proper selection, the electives can complement the core criminal justice courses and produce a balanced, interdisciplinary program which is tailored to meet specific professional and career goals.

The combination of the degree programs and the Southern Police Institute makes the program in Criminal Justice a unique blend of theory and practice. The Southern Police Institute is one of the oldest, most respected police management and administration educational programs in the United States.

Our programs are offered in two formats:

- Evening courses on campus, and
- Online.

General Requirements

The general requirements for the Master of Science degree in Criminal Justice are the completion of at least 36 graduate credit hours. The completion of these credit hours may include either thesis or non-thesis option. The thesis option requires the completion of 30 credit hours of graduate level courses and a thesis for a total of 36 credit hours. The non-thesis, professional paper option, requires the completion of 33 credit hours of graduate courses plus a professional paper for a total of 36 credit hours. A cumulative 3.0 grade point average must be maintained for all graduate coursework, grades of D must be repeated.

Students are advised to complete the Criminal Justice core courses prior to electives. Core or specific courses required for graduation total 15 credit hours with the remaining courses being electives. The composition of the list of elective courses will vary from student to student depending on the student's undergraduate major, aspirations and background.

Electives outside of our department must have approval from the Director of Graduate Studies.

The degree is offered in two formats, our traditional on-campus classes and also online. Students interested in either format should see the department website (<http://louisville.edu/justice/>) for more information. Students may choose either format or a combination of both methods of delivery.

Soaring Scholar Accelerated BS/MS in Criminal Justice

Undergraduate students interested in the program's accelerated option should visit the catalog pages for the BS in Criminal Justice (<https://catalog.louisville.edu/undergraduate/majors/criminal-justice-bs/>) for more information.

Admission Requirements

Anyone seeking admission to the Master of Science in Criminal Justice degree program must submit an application to the Graduate School that includes the following:

- Transcripts of all undergraduate and graduate work completed. The minimum requirement for admission is the Baccalaureate degree or its equivalent.
- Two letters of recommendation from individuals who can speak to the applicant's academic or professional capabilities.
- An original essay identifying the applicant's background, professional interests and goals. The essay should be 300-500 words and should allow the faculty to better understand the applicant's motivation and the potential for graduate work.
- Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) to the Graduate School.

In addition to other admissions materials, international students whose native language is not English must submit proof of language proficiency. The University of Louisville currently accepts TOEFL, IELTS and DET.

Score reports are valid for two years and scores will be considered expired if the test was taken more than two years prior to the application deadline. The minimum score accepted for each test is below.

TOEFL (<https://www.ets.org/toefl.html>): 79 iBT, 213 CBT, 550 PBT
IELTS (<https://ielts.org/>): 6.5 (no sub-score lower than 5)
Duolingo English Test (DET) (<https://englishtest.duolingo.com/applicants/>): 105

For more information, visit English Language Proficiency Requirements (https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fmx.technolutions.net%2Fss%2Fc%2Fu001.Jg_sqpPJslICjHcCRsBB8U-oX9JOjpOkO-hefeFqOkDqly4ZJSw7sSBjWV5r-uMqiZyzzREWNqdnA8buoju_RVRnk6a12lwHZ8_MKdBYSk%2F4d7%2FAEcguuC8SJiAngsdanS8gQ%2Fh0%2Fh001.ASSB3EhMqCoHXAHHkiebhr38C0rZBIXGYIB9A_Rm6MN4&data=05%40louisville.edu%7Cf3a1dfb2d19f4662fa7408dd37438faf%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C638727485489800439%7CTWfPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIslIAiOiJXa%3D%3D%7C0%7C%7C%7C&sdata=1EGX82d%2FfndrCSy480P9gQ5p2PHrt7bfr%2BWbQB09334%3D&reserved=0).

The Department of Criminal Justice is committed to providing an opportunity to a diverse range of students. The Department of Criminal

Justice has adopted the Council of Graduate Schools recommendation for a holistic approach to our admission criteria. Successful applicants will typically have a strong undergraduate record, and excellent letters of recommendation that speak to the nominee's scholarly ability and potential to succeed in a master's program. However, candidates may have other documented strengths that speak to the potential for success as evidenced by: prior research experience; exceptional community engagement or service; leadership experience; evidence of creativity or resilience; standardized test scores (GRE); or unique experiences or background that will contribute to our program.

The holistic review of applications allows our faculty to select the best students who fit the research areas offered within the department. Application information that highly influences the decision to offer admission includes the previous institution attended, research interests, grade point average, letters of recommendation, personal statements and resumes, and the experience, background or qualities that make the applicant eligible for admission.

Degree Requirements

A cumulative 3.0 grade point average must be maintained for all graduate coursework. Students may have no more than six (6) credit hours of grades of C and any grade of D must be repeated.

Students are advised to complete the Criminal Justice core courses prior to electives. Core or specific courses required for graduation total 15 credit hours with the remaining courses being electives or research.

Criminal Justice (PhD)

Doctor of Philosophy in Criminal Justice

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Department: Criminal Justice (<http://louisville.edu/justice/>)

Program Webpage (<http://louisville.edu/justice/graduate-degree-programs/doctor-of-philosophy-in-criminal-justice-program/>)

Academic Plan Code(s): JA_ _PHD

Program Information

The Department of Criminal Justice offers a Doctor of Philosophy in Criminal Justice. The PhD in Criminal Justice prepares graduates for academic careers (e.g., teaching and research) as well as public sector (e.g., research, policy analysis and development, planning, program development and evaluation) organizations.

The program consists of a core curriculum and electives that students may use to develop their particular areas of specialization. The core provides a broad orientation and the electives enable students to develop expertise in a particular field. The curriculum requires 54 credit hours: 18 credit hours of core courses, 18 credit hours of specialization courses, six (6) credit hours of qualifying project, and twelve (12) credit hours of dissertation research. Students qualify for official candidacy to the PhD by satisfactorily completing all course work and the qualifying project.

Admission Requirements

- Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Official transcripts showing all degrees awarded and all undergraduate and graduate work (all courses) completed from each accredited college/university previously attended
- Minimum 3.0 Grade Point Average
- Three letters of recommendation
- Personal statement
- Writing sample
- Curriculum vitae (CV) or resume

Additionally, applicants must show evidence, on their transcript, of the completion of both graduate-level statistics and research methods courses. The Department of Criminal Justice has adopted the Council of Graduate Schools recommendation for a holistic approach to our admission criteria. Successful applicants will typically have strong scores on the standardized test, a strong undergraduate and master's degree record, and excellent letters of recommendation that speak to the nominee's scholarly ability and potential to succeed in a doctoral program. However, candidates may have other documented strengths that speak to the potential for success as evidenced by: prior research experience; exceptional community engagement or service; leadership experience; evidence of creativity or resilience; unique experiences or background that will contribute to our program. The holistic review of applications allows our faculty to select the students who best fit the research areas offered within the department.

Deadlines: Apply by January 5 to be considered for funding. Applications submitted after this date will be reviewed on a rolling basis until all Graduate

Assistantship positions are filled. Applicants not seeking funding may apply until April 15.

In addition to other admissions materials, international students whose native language is not English must submit proof of language proficiency. The University of Louisville currently accepts TOEFL, IELTS and DET.

Score reports are valid for two years and scores will be considered expired if the test was taken more than two years prior to the application deadline. The minimum score accepted for each test is below.

TOEFL (<https://www.ets.org/toefl.html>): 79 iBT, 213 cBT, 550 pBT

IELTS (<https://ielts.org/>): 6.5 (no sub-score lower than 5)

Duolingo English Test (DET) (<https://englishtest.duolingo.com/applicants/>): 105

Curriculum and Instruction (EdS)

Specialist in Education in Curriculum and Instruction

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Elementary, Middle & Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)

Program website (<https://louisville.edu/education/degrees/es-ci/>)

Academic Plan Code(s): C&I_EDS

Program Information

The EdS (Education Specialist) degree in Curriculum and Instruction is a 30 credit hour, post-master's degree program. The program prepares classroom teachers to become curriculum and instruction specialists so that they are well-prepared to lead within their schools, districts, or region, specific to a particular area of teaching.

Potential candidates for this degree are teachers who have completed a master's degree in education or a Master of Arts in Teaching, or related field, and are interested in continuing their educational pursuits but are not interested in pursuing a PhD in Curriculum and Instruction.

The program will provide graduates with expertise needed for strong instructional leadership in schools, including extensive knowledge of:

- Curriculum
- Leadership and coaching
- Data analysis and research methods to support data-driven decision making
- One or more areas of expertise within teaching (e.g., science teaching, elementary mathematics specialist, reading specialist, special education)

Admission Requirements

- Submit Graduate Application (<https://graduate.louisville.edu/admission/apply/>)
- Master's degree in Education (or related area) with a minimum 3.3 GPA
- Official undergraduate and graduate transcripts
- A written rationale for pursuing the degree, including philosophy of education (limit of one page)
- A current resume or vita
- Three years of full-time K-12 teaching experience
- Two written letters of recommendation attesting to the candidate's skills and understanding of (a) ability to improve student achievement, (b) leadership, (c) advanced knowledge of curriculum, instruction, and assessment. One must be from the current site supervisor.
- Completion of six (6) credit hours of advanced teaching coursework (beyond initial teacher preparation program)

Degree Requirements

The student will meet with their advisor to develop an area of focus/emphasis*.

¹ Or equivalent course approved by faculty advisor.

² Successful completion of 15 credit hours; scored exemplary or target on advanced program rubrics (by instructor); acceptable dispositions rubric (scored by advisor). Minimum 3.0 GPA.

³ Successful completion of all required coursework and research project. Minimum 3.3 GPA with no grade lower than "C".

Areas of specialization include but are not limited to the list below*:

1. Elementary Math Specialist**
2. English as a Second Language**
3. Classroom Reading**
4. Instructional Technology**
5. Diversity Literacy
6. Special Education
7. Social Justice Education
8. Content Area Teaching (courses required vary based upon the content area)
9. Other

*Please meet with advisor to develop a plan that meets your goals.

**These specializations lead to Kentucky teaching endorsement for Kentucky certified teachers.

and investigate teaching and learning across the lifespan (both in and out of school settings) from critical and sociocultural perspective.

The L2C2 emphasis provides a wide variety of courses and experiences focused on theory, research, and practice related to a humanistic perspective on education. This includes the study of reading and writing processes, culturally sustaining pedagogies, digital and multimodal literacies, and discourse analysis, among many.

- **The Science, Technology, Engineering, and Mathematics (STEM) program emphasis** offers a wide variety of courses and experiences focused on theory, research, and practice in STEM education.

By studying and engaging in research and teaching with nationally-recognized leaders in mathematics or science education, students develop expertise in 1) how P-20 students think and learn, 2) how educators facilitate that learning, and 3) how to conduct scholarly investigations to answer important STEM education questions.

- **The Special Education emphasis** adheres to the principle of evidence-based practice. Faculty believe that all students can learn, regardless of ability or disability, and practice must be grounded in the best available scientific evidence.

Curriculum and Instruction (PhD)

Doctor of Philosophy in Curriculum and Instruction

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Elementary, Middle and Secondary Teacher Education (<http://louisville.edu/education/departments/mise/>) and Special Education, Early Childhood and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Program Webpage (<http://louisville.edu/education/degrees/phd-ci/>)
Academic Plan Code: C&I_PHD

Program Information

The doctoral degree is granted in recognition of scholarly proficiency and distinctive achievement in a specific field/discipline. All candidates for a doctoral degree in the College of Education and Human Development must successfully complete qualifying exams and a dissertation/professional portfolio that clearly indicates the candidate has mastered and can exhibit/articulate the content knowledge, skills, and dispositions specific to their discipline and can utilize appropriate research methodologies to contribute to the body of knowledge in their field.

Areas of Emphasis Within the Doctoral Program in Curriculum and Instruction

A master's degree in a related field is a required prerequisite to the Doctoral Program in Curriculum and Instruction. All students must meet competencies in research, teaching and teacher education, and stewardship of the profession. Students also choose one of the following areas of emphasis and develop knowledge specific to their discipline.

- **The Languages, Literacies, Cultures, and Communities (L2C2) emphasis** operates on the belief that languages, literacies, cultures, and communities are powerful, transformative, and multimodal. Faculty are committed to creating opportunities to think

Students in the Special Education emphasis will develop skills in generating new knowledge through conducting research so that they can add to the evidence base. They will also enhance their ability to synthesize existing evidence and translate research into practice by teaching preservice teachers, providing professional development in schools, and authoring practitioner-focused publications.

Distinctive Characteristics of Doctoral Programs in the College of Education and Human Development

Humanism and Community Engagement

Doctoral students in our program build experience and expertise in issues related to humanistic and inclusive approaches to education that focus on meeting the needs of each and every learner; community engagement, and socially just practices that align with our metropolitan mission and focus on student achievement.

Leadership

Our doctoral students gain expertise in supervising and leading others to achieve organizational goals and missions, managing complex systems, addressing administrative issues and procedures, conducting research to enhance leadership, and teaching others about the art of organizational leadership.

Practical Experience

The doctoral program include internships that aligns with program and career goals. These mentored experiences may include teaching, research, administration or other appropriate areas.

Scholarship/Research

An emphasis on scholarship includes experience and mentorship in ethics, publications, presentation, grantsmanship, and other forms of creative activity. The research component is characterized by the development of vertical research teams: senior faculty, junior faculty, doctoral students, master's degree students, and in some programs, undergraduate students, working together on research projects and

research areas. These may be bolstered by partnerships with local school districts, businesses, or community agencies.

Admission Requirements

Application Deadlines

There are three annual admission deadlines. Depending on specific individual goals and situations, different deadlines may be more relevant for you.

Fall semester start, full-time status with Graduate Assistantship funding possibilities:

- **November 1**

Graduate Assistantships (<https://louisville.edu/graduate/current-students/funding-opportunities/>) (GA) and University Fellowships (<http://louisville.edu/graduate/current-students/funding-opportunities/university-fellowships/>) are competitive and awarded to full-time students for the fall semester well in advance—as early as mid-January for Fellowships—and typically by late March or April for Graduate Assistantships. Applications for both should be submitted by the November 1 deadline.

Specify the subsequent fall semester as your intended start date on the application. Indicate interest in assistantships on your *Statement of Purpose*.

Part-time doctoral student work or otherwise not interested in Graduate Assistantship funding:

- **November 1 - Spring** semester start (or later semester as indicated on application)
- **February 15 - Summer** semester start (or later semester as indicated on application)
- **May 1 - Fall and Late Summer semester** start (or later semester as indicated on application)

Members of the Curriculum and Instruction PhD admissions committee evaluate all applications after the appropriate admission deadline. Admission decisions are made by the professional judgment of the admissions committee according to established criteria. Admission to the program is competitive and preference is given to applicants who have strong academic records, experiences, and abilities that show demonstrated excellence in professional performance and research potential. All applicants will be notified in writing regarding their admission; typically this notification occurs approximately three weeks after the admissions deadline.

To be considered for admission, all materials must be submitted prior to the admission committee's review. If materials are incomplete, applicants will be notified and may submit again during the next review.

See the Application Process Overview [PDF] (<https://louisville.edu/education/degrees/files/phd-ci-apo.pdf>) document for details.

Admission Materials

- Graduate Application (<https://graduate.louisville.edu/admission/apply/>)
- Three Letters of Recommendation (see Directions for Applying (<https://louisville.edu/graduate/futurestudents/application-directions/>) for more information). If you have recommendation letters on file from a previous University of Louisville program application, you will need three new letters of recommendation for

this application that speak to your potential in a doctoral program. In addition to the standard University form linked above, please have these individuals submit letters with supporting details for the recommendation. At least one of the three recommendation letters you choose should come from someone familiar with the rigor and requirements of a doctoral program.

- TOEFL/IELTS/Duolingo scores for non-native speakers of English (if needed - see Directions for Applying for more information)
- Transcripts from each college you have attended other than the University of Louisville. Have all official non-University of Louisville transcripts sent to the Graduate School.
- Statement of Purpose. The Statement of Purpose should address the applicant's interest in doctoral study, intentions with regard to full-time or part-time study, and identification of at least one faculty member who may be a good fit to serve as the Ph.D. advisor. Additional details about the exact content of each part can be found on the program website (<https://louisville.edu/education/degrees/phd-ci/>).
- Writing Sample. The writing sample should be an academic essay (no more than 4 pages, double-spaced, not including references) that provides a clear statement about initial research interest(s) and goals and information about an educational problem or issue that drives the pursuit for a Ph.D. degree. Additional details about the content of the essay can be found on the program website (<https://louisville.edu/education/degrees/phd-ci/>).
- Resume or Curriculum Vitae [PDF] (<http://louisville.edu/education/degrees/files/phd-ci-resume-or-curriculum-vita.pdf>)

Degree Requirements

Master's Degree Prerequisite + 60 Credit Hours PhD Coursework Minimum

The student and program committee must develop courses, programs, and experiences that clearly identify and address the following areas: research, teaching and teacher education, stewardship of the profession and knowledge of discipline. These areas of emphasis must have descriptive competencies that the student should attain and the committee can assess.

Code	Title	Hours
Specialty Components		
EDAP 711	Doctoral Professional Seminar: First Year	3
or EDSP 711	Doctoral Professional Seminar: First Year	
Area of Emphasis		
30 credit hours selected with Program Committee approval		30
Research Methodology		
LEAD 601	Applied Statistics (see note) ¹	3
LEAD 704	Qualitative Field Research Methods	3
Research Electives		
Field survey research, additional qualitative and/or quantitative methodologies, etc. ^{2,3}		6
Doctoral/Dissertation Research		
EDAP 795	Doctoral Research	15
or EDSP 795	Doctoral Research	
Minimum Total Hours		60

¹ Students with relevant statistical background should take LEAD 701.

² Selected with Program Committee approval and within program guidelines/framework

³ LEAD 600 may not be used for these courses

Cybersecurity (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Cybersecurity

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Computer Science and Engineering (<https://engineering.louisville.edu/academics/departments/computer/>)
Academic Plan Code(s): NIS_CNSGS, NIS_CNSGSO

Program Information

This program can be completed 100% online (<https://engineering.louisville.edu/academics/graduate-programs/cert-cybersecurity/>).

The graduate certificate in Cybersecurity is designed for advanced computer professionals who wish to strengthen their knowledge and skills in the fast-changing field of cybersecurity, as well as students majoring in disciplines other than Computer Science and Engineering who want to gain knowledge and skills in cybersecurity.

The Cybersecurity graduate certificate program consists of twelve (12) credit hours with two required courses from the Computer Science and Engineering department and two elective courses selected from a list of relevant elective courses in the Computer Science and Engineering department.

As networking technology continues to rapidly advance, so do new and sophisticated threats and attacks to the nation's information infrastructure. The Graduate Certificate in Cybersecurity from the University of Louisville will prepare you to respond to these challenges, training you to monitor and identify cybercriminals.

Admission Requirements

The admission standards for the Graduate Certificate program in Cybersecurity are as follows:

- All admission applications for the Graduate Certificate program shall include the following:
 - Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - Application fee,
 - Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution or current enrollment in a graduate Speed School program.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).

- International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79, higher or an overall IELTS score of 6.5 or higher or Duolingo score of 105.

Students enrolling in this graduate certificate program will need to have sufficient background to be successful. Therefore, students must have completed the required course prerequisites, or have equivalent knowledge from courses taken at other universities, or from work experience. Prerequisites include courses (or equivalent) such as CSE 130, CSE 310, and CSE 503.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the certificate program. Students who seek to return after such a period of time must contact the graduate program director.

Program Requirements

A total of twelve (12) credit hours are required with two required courses and two elective courses.

Code	Title	Hours
Required Courses		
CSE 564 or CSE 568	Introduction to Cryptography Computer Forensics	3
CSE 566	Information Security	3
Select two of the following:		6
CSE 546	Introduction to Machine Learning	
CSE 565	Software Security	
CSE 590	Special Topics in Computer Science and Engineering (Computer and Cyber Security)	
CSE 613	Network Security	
CSE 617	Mobile Computing	
CSE 631	Database Security	
CSE 632	Data Mining	
CSE 694	Special Topics in Computer Science and Engineering	
CSE 694	Special Topics in Computer Science and Engineering (Advanced Cryptography)	
Minimum Total Hours		12

The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Data Science (CERT)

Graduate Certificate in Data Science

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Computer Science and Engineering (<https://engineering.louisville.edu/academics/departments/computer/>)

Academic Plan Code(s): DTMGCDDM, DTMGCDMO

Program Information

This program can be completed 100% online. (<https://engineering.louisville.edu/academics/graduate-programs/cert-data-science/>)

To address the need for trained professionals in the interdisciplinary field of data mining, the Department of Computer Science and Engineering and the Department of Mathematics faculty have developed a joint certificate program in data mining. The certificate will consist of 18 credit hours, with three required courses from Computer Science and Engineering and three elective courses selected from a list of relevant elective courses in Computer Science and Engineering and Mathematics.

Certificate Summary

Code	Title	Hours
Core Coursework		9
CSE/Approved Mathematics Electives		9
Minimum Total Hours		18

Admission Requirements

The admission standards for the Graduate Certificate program in Data Science are as follows:

- All admission applications for the Graduate Certificate program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - Application fee
 - Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution or current enrollment in a graduate Speed School program.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).
- International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score, or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79 or higher, an overall IELTS score of 6.5 or Duolingo score of 105.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program.

Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the certificate program. Students who seek to return after such a period of time must contact the graduate program director.

Certificate Requirements

The following certificate requirements are mandatory of all Graduate Certificate candidates:

- The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.
- Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Program Requirements

Code	Title	Hours
CSE 535	Database Systems	3
or CSE 536	Data Management and Analysis	
CSE 632	Data Mining	3
CSE 635	Data Mining with Linear Models	3
Select three of the following:		9
CSE 522	Performance Evaluation of Computer Systems	
CSE 532	Python and Data Analytics	
CSE 538	Graph Database and Graph Analytics	
CSE 545	Artificial Intelligence	
CSE 546	Introduction to Machine Learning	
CSE 547	Deep Learning Algorithms and Methods

CSE 619	Design and Analysis of Computer Algorithms	
CSE 621	Web Mining for E-Commerce and Information Retrieval	
CSE 622	Simulation and Modeling of Discrete Systems	
CSE 627	Digital Image Processing	
CSE 630	Advanced Databases	
CSE 660	Introduction to Bioinformatics	
CSE 694	Special Topics in Computer Science and Engineering (Legal Issues in Data Mining)	
CSE 694	Special Topics in Computer Science and Engineering (BIG DATA: Document-oriented DB)	
CSE 694	Special Topics in Computer Science and Engineering (Related Data Mining)	
MATH 561	Probability	
MATH 562	Mathematical Statistics	
MATH 667	Statistical Inference	
Minimum Total Hours		18

The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Dentistry (MSD)

Master of Science in Dentistry (MSD)

Unit: School of Dentistry (<https://louisville.edu/dentistry/>)

Program Website (<https://louisville.edu/dentistry/residency/>)

Academic Plan Code(s): ENDOMSDCEN, ORTHMSDCOR, PEDDMSDCPD, PERIMSDCPE, PROSMDCPO

Program Information

The School of Dentistry offers a program of study leading to the Master of Science Degree in Dentistry for postgraduate students/residents enrolled in Advanced Specialty Certificate Programs in Endodontics, Orthodontics, Pediatric Dentistry, Periodontics, and Prosthodontics.

The courses for the Master of Science in Dentistry will total 31 credit hours. The curriculum is at least 19 credit hours (11 core and 8 selective courses), plus credit for research and thesis/publication (minimum twelve (12) credit hours). In addition, depending on the specific accreditation requirements of the specialty, either two or three years of clinical training are required.

The credit hours needed to complete the MSD and the certificate are listed below.

M.S.D./Specialty Programs	Credit Hours	Time to Completion
Endodontics	69	2 years
Orthodontics	72	2 years
Pediatric Dentistry	70	2 years
Periodontics	103.5	3 years
Prosthodontics	94	3 years

The School of Dentistry post-professional Master of Science in Dentistry with Specialty Certificate programs offer didactic and clinical training leading to certification in the specific dental specialty area. Completion of an accredited certificate program allows the student to be recognized by state boards of dentistry and by the respective specialty boards as eligible for specialty board examination and specialty dental licensure.

These programs help to develop skillful clinicians and researchers for careers in academic dentistry or private practice in the specialty areas of Endodontics, Orthodontics, Pediatric Dentistry, Periodontics and Prosthodontics. Excellent training in clinical dentistry, teaching skills, and the process and interpretation of biomedical research is essential to equip tomorrow's specialists with the proper scientific background to deal with the changes and challenges inherent in a profession undergoing rapid scientific advancement. These postgraduate students are exposed to a wide variety of clinical techniques by a group of highly qualified faculty with diverse training and varied backgrounds. The philosophy of the programs is that clinical excellence is based on technical proficiency, expert diagnostic skills and broad-based knowledge of the specific specialty literature.

The didactic portion of the curriculum explores the concepts, designs, regulation, interpretation, and presentation of modern biomedical

research upon which the practice of modern Endodontics, Orthodontics, Pediatric Dentistry, Periodontics, or Prosthodontics is based.

The Master of Science in Dentistry trains students in research concepts allowing them to design and complete a clinical or basic science research project. As a part of this program, the student is guided to design a research project and write a research proposal including any informed consent and data collection forms. The student will then conduct the research project to completion. Federal regulations and University of Louisville policy require that all research involving human subjects or analysis of data gathered from human subjects, regardless of funding status, be reviewed and approved by the IRB prior to the implementation of any research activity. After completion of the research project, the student will present the research project in both oral and written form. The oral presentation (defense) includes a review of the literature relevant to the research project, analysis of all data using appropriate statistical tests, and comparison of the results of the project to similar research in the dental literature. The student will also write a thesis or a paper that is suitable for submission and publication in an appropriate peer-reviewed journal.

Students who are enrolled in Endodontics, Orthodontics, Pediatric Dentistry, Periodontics, or Prosthodontics will complete the requirements for the Master of Science in Dentistry in conjunction with the awarding of the specialty certificate.

Program Descriptions

MSD/Endodontics

Endodontics is the branch of dentistry which is concerned with the morphology, physiology, and pathology of the human dental pulp and tissues around the tooth root. Its study and practice encompass the basic and clinical sciences, including biology of the normal pulp, the etiology, diagnosis, prevention and treatment of diseases and injuries of the pulp and associated conditions occurring around the tooth root.

MSD/Orthodontics

Orthodontics is the dental specialty that includes the diagnosis, prevention, interception, and correction of malocclusion of the teeth, as well as neuromuscular and skeletal abnormalities of the developing or mature orofacial structures.

MSD/Pediatric Dentistry

Pediatric Dentistry is an age-defined specialty that provides both primary and comprehensive preventive and therapeutic oral health care for infants and children through adolescence, including those with special health care needs.

MSD/Periodontics

Periodontics is that specialty of dentistry which encompasses the prevention, diagnosis, and treatment of diseases of the supporting and surrounding tissues of the teeth or their substitutes and the maintenance of the health, function and aesthetics of these structures and tissues.

MSD/Prosthodontics

Prosthodontics is the dental specialty pertaining to the diagnosis, treatment planning, rehabilitation and maintenance of the oral function, comfort, appearance and health of patients with clinical conditions associated with missing or deficient teeth and/or oral and maxillofacial tissues using biocompatible substitutes.

Admission Requirements

After acceptance into an Advanced Specialty Certificate Program in Endodontics, Orthodontics, Pediatric Dentistry, Periodontics or Prosthodontics.

Applications are not processed until the application fee is received and all required application materials have been received by the Graduate School, Graduate Admissions.

Admission Credentials

- Graduate Application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) submitted to the Graduate School
- Application fee
- Official transcripts of all college coursework, including evidence of a baccalaureate degree. The minimum grade point average that will be considered for unconditional acceptance and admission is GPA 3.0 (on a 4-point scale). Applicants with DMD degrees from dental schools that do not provide grades are still eligible to apply.
- Two letters of recommendation
- TOEFL, Duolingo or IELTS scores are required if English is not the applicant's native language. The minimum acceptable proficiency scores are as follows: TOEFL (80), Duolingo (105) and IELTS (6.5).
- For international applicants, Official Course-by-Course Evaluation Report from ECE (Educational Credential Evaluators, Inc.), www.ece.org (<http://www.ece.org>).
- Any provisional or special conditions acceptances shall be made on an individual basis and shall require a statement of the rationale for the exception, plans for monitoring progress and performance and stated success criteria. Such justification must be made in writing and must be accepted by the Vice Provost for Graduate Affairs. This will allow consideration of special circumstances in which the potential for high quality graduate performance has been clearly demonstrated by other means.

Program Requirements

All of the specialty programs will require eleven (11) credit hours in the following courses:

MSD Core Coursework

Code	Title	Hours
OIID 501	Biomedical Data Analysis: Experimental Design and Statistics	3
OIID 601	Introduction to Oral Biology Research	2
OIID 606	Oral Biology Communication	2
OBIO 617	Advanced Oral Pathology	1
OBIO 622	Multiple-Disciplinary Seminars	1
ASNB 675	Advanced Head and Neck Anatomy	2

MSD Electives

All of the specialty programs are also required to take at least eight (8) credits hours from the following list of electives:

Code	Title	Hours
Oral Immunology and Infectious Diseases Electives		
OIID 600	Concepts in Oral Immunology	2
OIID 604	Oral Infections	3
OIID 605	Oral Health Seminars	0.5

OIID 610	Advanced Topics in Oral Biology ¹	1-4

Oral Biology Electives

OBIO 611	Craniofacial Osteology	1-3
OBIO 612	Craniomaxillofacial Diagnostic Imaging	2-4
OBIO 613	The Diagnosis & Treatment of Temporomandibular Disorders	1
OBIO 614	Advanced Oral Diagnosis and Oral Medicine	1
OBIO 615	Advanced Clinical Pharmacology	1
OBIO 616	Overview of Medical Genetics in Oro-Facial Disease	1.5
OBIO 623	Advanced Implantology	1

Research/Thesis

In addition to these 19 credit hours, each postgraduate student/resident will complete a research project that will be supervised by the specialty program director or a designated faculty member.

Code	Title	Hours
OIID 619	Graduate Research	1-8
OIID 620	Thesis	1-8

Code	Title	Hours
Total Minimum Hours		31

In addition to the completion of the core curriculum and the postgraduate research project, there are didactic and clinical courses required for the completion of the necessary hours needed for each certificate (see Overview tab).

¹ Prerequisite: OIID 600 or consent of instructor. Selected areas will be investigated in depth, using one or more of a variety of formats, including lectures, seminars, tutorials, and research projects.

Distilled Spirits Business (CERT)

Graduate Certificate in Distilled Spirits Business

Unit: College of Business (<https://business.louisville.edu/>) (GB)
Program Website (<http://louisville.edu/online/programs/certificate-programs/distilled-spirits-business-certificate/>)
Academic Plan Code(s): SPIRCDSO

Program Information

This program is completed 100% online. (<https://business.louisville.edu/learnmore/online-spirits/>)

The Distilled Spirits Business Certificate is a program that consists of nine (9) credit hours. It aims to provide a comprehensive understanding of managing business operations in the distilled spirits industry. The curriculum, by design, covers various aspects of business functions such as marketing, finance, and operations, among others. The program emphasizes the interdependence of different business functions and how they operate.

The College of Business collaborated with industry experts to design a curriculum comprising six highly focused, 1.5 credit hour courses. These courses equip prospective and new employees with the necessary background to work in the industry's business operations.

Students can take the Distilled Spirits Business certificate in conjunction with the MBA program (<https://catalog.louisville.edu/graduate/programs-study/master-business-administration/>). For students accepted into the MBA program, it will count towards fulfilling elective requirements in the MBA curriculum.

Admission

Applicants must possess a bachelor's degree from a postsecondary institution with institutional accreditation by a U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies/#RegionalInstitutional>)—recognized accrediting agency and must have earned a minimum undergraduate GPA of 2.0.

GMAT/GRE scores are not required for admission to the certificate program.

A graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) is required.

Note: Students who desire to complete an MBA in conjunction with the Distilled Spirits Business certificate must be separately admitted to the MBA program (p. 105).

Program Requirements

Code	Title	Hours
SPIR 610	Distilled Spirits Industry Overview & Regulatory Issues	1.5
SPIR 620	Distilled Spirits Finance Fundamentals	1.5
SPIR 630	Distilled Spirits Operations & Supply Chain	1.5
SPIR 640	Sustainability in the Distilled Spirits Industry	1.5
SPIR 650	Spirit Brand Marketing	1.5
SPIR 660	Three-Tier System of Alcohol Distribution	1.5
Minimum Total Hours		9

To complete the program, students must have a minimum of a 3.0 cumulative grade point average.

Diversity Literacy (CERT)

Graduate Certificate in Diversity Literacy

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)
 Department: Philosophy (<https://louisville.edu/philosophy/>)
 Program Webpage (https://louisville.edu/philosophy/graduate-programs/copy_of_diversity-literacy-certificate/)
 Academic Plan Code(s): DILICDL

Program Information

The Certificate in Diversity Literacy will provide a unique opportunity for students who have already earned bachelor's degrees to enhance their knowledge and skills of the theory and practice of inclusion and equity, including what diversity means, what its personal and social effects are, and how it shapes lives, workplaces, and pedagogy.

Admission Requirements

Anyone who has earned a baccalaureate degree from an accredited college or university may apply.

The application for graduate programs (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) at the University of Louisville.

The following materials will be necessary to complete an application:

- Official transcripts showing all degrees awarded and all undergraduate and graduate work (all courses) completed from each accredited college/university previously attended;
- Two letters of recommendation;
- A two-to-three page essay describing the applicant's interest in the program and how it will benefit her or his course of study and/or career path.

Program Requirements

The curriculum for this certificate consists of 15 total credit hours, structured as follows:

Code	Title	Hours
Core Courses		
PHIL 690	Philosophical Foundations of Diversity, Equity, and Inclusion	3
PHIL 691	Capstone in Diversity Literacy	3
Standard Electives¹		9
<i>Cultural Competency</i>		
URBS 656	Cultural Competency and Action	
<i>Institutions and Equity</i>		
EDAP 530	Language, Society & Power	
<i>Social Inequality</i>		
PAS, SOC, or WGST course at the 600 level or above		
Minimum Total Hours		15

¹ Electives may be substituted with the program director's consent. At least six (6) of the elective credit hours must be earned in A&S courses.

Interdisciplinary Early Childhood Education (MAT)

Master of Arts in Teaching in Interdisciplinary Early Childhood Education

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)
 Department: Special Education, Early Childhood and Prevention Science (<https://louisville.edu/education/departments/sped/>)
 Program Website (<https://louisville.edu/education/degrees/mat-iece/>)
 Academic Plan Code(s): IECEMAT, IECEMATO

Program Information

Interdisciplinary Early Childhood Education Birth to Primary Teacher Certification Program

This program can be completed 100% online (<https://louisville.edu/online-programs/masters/online-mat-in-interdisciplinary-early-childhood-education/>).

The program emphasizes in-depth academic preparation and field experiences that allow teachers to be knowledgeable about the field of early childhood/special education and to develop critical thinking and lifelong learning skills. The program emphasizes:

- Nurturing students as active agents in their own learning
- Authentic, performance-based assessment of teaching and learning
- Meeting the needs of all students
- Responding constructively to sociocultural differences among students

The program prepares students interested in working with children from birth to age 5 in a wide variety of settings—day care centers, public and private preschools, community programs, and clinics. This program gives students authentic experiences with infants, toddlers, and preschool children in the areas of curriculum development, typical and atypical child development, programs and services for children and their families, family involvement and intervention, screening and assessment, program administration, current topics, and practicum/action research.

The goals of this program include:

- IECE Teacher Certification
- Preparation of teachers for the education of typical and atypical children in different settings
- Provide background information on Kentucky Child Learning and Assessment Standards

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's degree (<http://louisville.edu/education/degrees/info/bachelors/>) with minimum undergraduate degree GPA of 2.75 (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. C or higher in ENGL 102 (or equivalent) and oral communication courses
4. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
5. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
6. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
7. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/or/>)
8. Interview

Candidates considering applying to the MAT program should contact the Education Advising and Student Services office (teacher@louisville.edu)

(<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission.

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

Program Requirements

Code	Title	Hours
EDSP 515	Communication and Socialization in Early Childhood	3
EDSP 533	Inclusive Early Childhood Curriculum	3
EDSP 534	Inclusive Early Childhood Curriculum Field Experience	1
EDSP 536	Theories of Play	3
EDSP 537	Infant/Toddler Instruction and Care	3
EDSP 583	Early Childhood Special Education Assessment	3
EDSP 584	Families and Collaboration in Interdisciplinary Early Childhood Education	3
EDSP 585	Families and Collaboration in IECE: Field Experience	1
EDSP 600	Creativity and the Young Child	3
EDSP 656	Guidance for Young Children Field Experience	1
EDSP 657	Guidance for Young Children	3
600 Level Electives approved by advisor ¹		3
<i>Mid-Point Assessment: Prior to Student Teaching (see requirements below)</i>		
EDSP 606	Student Teaching: Interdisciplinary Early Childhood Education	3
EDTP 615	Student Teaching: Elementary School	3
Minimum Total Hours		36

Midpoint Assessment: Completion of all courses listed above with 3.0 cumulative GPA or higher; satisfactory dispositions assessment; electronic documentation of 200 hours of diverse and approved field experiences; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Certification Assessment: Satisfactory dispositions assessment; passing scores on required PRAXIS exams; completion of degree requirements.

Degree Assessment: Cumulative GPA of 3.0 or higher (with at least a "C" in Student Teaching); No more than a total of two "C's" in course work; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Candidacy: If not enrolled during the semester in which you are graduating, you will need to register for degree candidacy as outlined in the Graduate Catalog (p. 13).

Praxis Disclaimer:

"Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Professional Standards Board (EPSB) website at epsb.ky.gov (<http://www.epsb.ky.gov/>) or ets.org/praxis/ky/ (<http://www.ets.org/praxis/ky/>) for current requirements."

¹ Advisor approval needed.

The Master of Arts in Teaching in Interdisciplinary Early Childhood Education program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Interdisciplinary Early Childhood Education, Alternative Certification (MAT)

Master of Arts in Teaching in Interdisciplinary Early Childhood Education
Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)
Department: Special Education, Early Childhood and Prevention Science (<https://louisville.edu/education/departments/sped/>)
Program Website (<https://louisville.edu/education/degrees/mat-iece/>)
Academic Plan Code(s): IECEMAT, IECEMATO

Program Information

Interdisciplinary Early Childhood Education Birth to Primary Teacher Certification Program

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/online-mat-in-interdisciplinary-early-childhood-education/>).

The field of early childhood education includes a vast number of professionals who begin working in early childhood settings when they turn 18 years of age. Since this group of professionals is working in child care settings full-time, a traditional program is not possible for them to continue on a pathway to a degree or certification. This program is designed to meet the needs of the working early childhood professional who will benefit from a completely online program and the opportunity to learn in their own classrooms while they teach and continue to improve their practice through ongoing professional learning opportunities.

This program is designed for candidates who are not certified teachers. The purpose of this program is to provide candidates currently holding a Bachelor's (or graduate degree), a pathway to teacher certification while they are employed as a teacher of record in an approved early childhood classroom. Candidates must be concurrently enrolled and employed in order to maintain the temporary provisional certificate. If a candidate is not enrolled or employed as the teacher of record, the Division of Educator Preparation and Certification must be immediately notified.

The program emphasizes in-depth academic preparation and field experiences that allow teachers to be knowledgeable about the field of early childhood/special education and to develop critical thinking and lifelong learning skills. The program emphasizes:

- Nurturing students as active agents in their own learning
- Authentic, performance-based assessment of teaching and learning
- Meeting the needs of all students
- Responding constructively to sociocultural differences among students

The goals of this program include:

- IECE Teacher Certification
- Preparation of teachers for the education of typical and atypical children in different settings
- Provide background information on Kentucky Child Learning and Assessment Standards

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's degree (<http://louisville.edu/education/degrees/info/bachelors/>) with minimum undergraduate degree GPA of 2.75 (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. C or higher in ENGL 102 (or equivalent) and oral communication courses
4. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
5. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
6. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
7. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
8. Interview

Candidates considering applying to the MAT program should contact the Education Advising and Student Services office (teacher@louisville.edu) (<http://louisville.edu/cgi-bin/uofl.mail?teacher>) prior to applying for admission.

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

Program Requirements

Code	Title	Hours
EDSP 533	Inclusive Early Childhood Curriculum	3
EDSP 537	Infant/Toddler Instruction and Care	3
EDSP 600	Creativity and the Young Child	3
EDTP 627	Practicum for Alternative Certification Program ¹	3
EDSP 632	Universal Design for Learning Using Technology	3
EDSP 657	Guidance for Young Children	3
<i>Mid-Point Assessment (see requirement below)</i>		
EDSP 515	Communication and Socialization in Early Childhood	3
EDSP 583	Early Childhood Special Education Assessment	3
EDSP 584	Families and Collaboration in Interdisciplinary Early Childhood Education	3
EDTP 678	Supporting the Second Year Alternative Certification Teacher I	1.5
EDTP 679	Supporting the Second Year Alternative Certification Teacher II	1.5
Minimum Total Hours		30

¹ EDTP 627 is taken for two semesters at 1.5 credits each, for a total of 3 credits.

Midpoint Assessment: Completion of all courses listed above with 3.0 cumulative GPA and no lower than a “C” in each course; satisfactory dispositions assessment; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Assessment: All program course work with 3.0 cumulative GPA (and no more than a total of two “C’s” in degree courses); satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Candidacy: Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in Academic Policies, Procedures, and Requirements (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/>).

Certification Assessment: Satisfactory dispositions assessment; passing scores on required PRAXIS exams; completion of degree requirements.

Praxis Disclaimer: Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Professional Standards Board (EPSB) website at www.e-psb.ky.gov/ or ets.org/praxis/ky (<http://www.ets.org/praxis/ky/>) for current requirements.

The Master of Arts in Teaching in Interdisciplinary Early Childhood Education (Alternative Certification) prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification, you should first determine your

state’s criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state’s licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Interdisciplinary Early Childhood Education, Teacher Residency (MAT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Arts in Teaching in Interdisciplinary Early Childhood Education, Teacher Residency

Unit: College of Education and Human Development (<https://louisville.edu/education/>)

Department: Special Education, Early Childhood and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Academic Plan Code(s): IECEMAT

Program Information

The program emphasizes in-depth academic preparation and field experiences that allow teachers to be knowledgeable about the field of early childhood/special education and to develop critical thinking and lifelong learning skills. The program emphasizes:

- Nurturing students as active agents in their own learning
- Authentic, performance-based assessment of teaching and learning
- Meeting the needs of all students
- Responding constructively to socio-cultural differences among students

The program prepares students interested in working with children from birth to age 5 in a wide variety of settings - day care centers, public and private preschools, community programs, and clinics. This program gives students authentic experiences with infants, toddlers, and preschool children in the areas of curriculum development, typical and atypical child development, programs and services for children and their families,

family involvement and intervention, screening and assessment, program administration, current topics, and practicum/action research.

The Teacher Residency program is designed to assist local school districts in meeting the demand for a diverse cadre of qualified teachers. Residents are enrolled in a one-year MAT program at the University of Louisville while employed with JCPS as a resident. Candidates receive personalized instruction throughout the process to help them succeed in the classroom. Candidates selected for the Louisville Teacher Residency (LTR) program commit to teach in accelerated improvement schools (AIS) for five years.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Teacher Residency program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu) prior to applying for admission. Admission is competitive.

Candidates who meet minimum academic requirements are not guaranteed admission to the program:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Grade of C or higher in ENGL 102 (<https://catalog.louisville.edu/search/?P=ENGL%20102>) (or equivalent)
4. Oral Communication (<http://louisville.edu/education/degrees/info/oral-comm/course>)
5. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
6. Professional Statement (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
7. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
8. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
9. Acceptable interview with school district

Educational Administration (EdS)

Specialist in Education in Educational Administration

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Educational Leadership, Evaluation, and Organizational Development (<http://louisville.edu/education/departments/eleod/>)
Program Webpage (<https://louisville.edu/education/degrees/eds-ea/>)
Academic Plan Code(s): EDADESPRN, EDADESSPV

Program Information

The EdS (Education Specialist) degree in Educational Administration is a 30 credit hour, post-master's degree program. It can lead to certification in principalship and supervisor of instruction.

The EdS program is designed to prepare school leaders to engage staff, improve the instructional capacity of schools, and deal effectively with the educational challenges of the 21st century. The goal of the EdS program is to provide field experience, clinical practice, and conceptual and theoretical knowledge necessary for roles in instructional leadership. The Department of Educational Leadership, Evaluation, and Organizational Development maintains a strong collaboration with school districts in preparing exemplary P-12 school administrators.

The candidate's admission packet must demonstrate his/her skills and understanding of the following: ability to improve student achievement, leadership, and advanced knowledge of curriculum, instruction, and assessment. Candidates applying for admission are jointly screened by both the University of Louisville faculty and local school district personnel.

Admission Requirements

- Evidence of bachelor's and master's degrees
- Transcripts of all undergraduate and graduate work

Admission to this Program

- A 3.3 grade point average from the master's degree program
- Signed copies of the following forms: Acceptable Use of Technology Agreement and Professional Code of Ethics for Kentucky School Personnel

Includes both Principal Certification and Supervisor of Instruction Certification

Degree Program Admission Requirements

- Joint screening by ELEOD Department and local school district personnel
- A candidate admissions essay prompt response
- A current resume
- Two written letters of recommendation attesting to the candidate's skills and understanding of (a) ability to improve student achievement, (b) leadership, (c) advanced knowledge of curriculum, instruction, and assessment. One must be from the current site supervisor.
- Three years of successful K-12 teaching experience in Kentucky or three years (one year = 140 contract days) of successful K-12 teaching outside the state of Kentucky.

Program Requirements

LEAD 637	Ensuring High Performance School and Community Engagement	3
LEAD 620	Education Law and Policy Review in P-12 Education	3
LEAD 622	Fiscal and Human Resources in P-12 Education	3
LEAD 609	Internship in Educational Leadership	3
Total Hours for Level 1 ²		24
Level 2		
LEAD 782	Reflective Practice for School Leaders	3
LEAD 720	Instructional Leadership 3	3
Exit Assessment ⁴		
Minimum Total Credit Hours for EdS		30
Minimum Total Credit Hours for Rank I ⁵		60

Degree Program Completion Requirements

A grade point average of 3.3 in all courses counting on this program

Successful completion of a capstone in LEAD 782 and LEAD 720 and at the completion of Level 2

Successful completion of a program portfolio at the end of Level 2. Information about the portfolio is found in "Guidelines for Portfolio Completion Requirement," available from your advisor

Certification requirements

The Education Professional Standards Board is responsible for issuing and renewing certificates for all Kentucky teachers and administrators.

Candidates for principal certification must pass the SLLA 6990. This test may be taken during the last semester of coursework for Level 1 Principal Certification. Current information about the Kentucky assessment program may be retrieved from epsb.ky.gov (<http://www.epsb.ky.gov/mod/book/view.php?id=93>).

Completion of three years of full-time teaching experience

- ¹ Mid-point Assessment: Satisfactory dispositions assessment; Satisfactory completion of hallmark/dispositions assessments in LEAD 633, LEAD 634, LEAD 635, and LEAD 636. Must maintain a GPA of 3.3.
- ² Refer to program completion requirements for Level 1 prior to Level 2
- ³ TBD by student and advisor - may be a course leading to additional certification
- ⁴ Exit Assessment: Students in the EdS program will be required to complete an exit portfolio in their last semester of the program.
- ⁵ Completion of a Rank 1 program requires a minimum of 60 credit hours in approved program. For Rank 1 purposes, approved graduate hours at the master's level may be counted to reach 60 credit hours, though some of those hours may not count toward certification. Students seeking Rank 1 simultaneously with this certification program must complete the appropriate form with the advisor. The advisor must approve electives/unnamed courses.

The Specialist in Education In Educational Administration (EdS) program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Educational Administration (Rank 1)

Rank 1 Program for Educational Administration

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Educational Leadership, Evaluation, and Organizational Development (<http://louisville.edu/education/departments/eleod/>)
Academic Plan Code(s): EDADRK1

Program Information

Rank 1 programs are not degree programs.

Rank 1 programs are planned, graduate-level programs designed for Kentucky teachers seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank 1

status is 60 credit hours of approved graduate credit including a master's degree.

Teachers who complete a Rank I program may obtain a rank change for salary purposes in Kentucky. Through a Rank I program, teachers may increase their depth of knowledge in their teaching areas or in additional areas of certification, as appropriate.

Admission Requirements

Graduates of the University of Louisville EdS in Educational Administration, are eligible to pursue this Rank 1 program.

Candidates who have completed a specialist's degree in Educational Administration from other institutions must provide documentation, before applying for admission, that they have completed the requirements leading to the provisional and standard certificates in Kentucky.

Students may apply to the program by first going to the Graduate School (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) website. Admission requirements include the following credentials:

- Official transcripts with a GPA of 2.75 in the bachelor's degree and a GPA of 3.0 in the master's degree
- For international students, TOEFL/IELTS/Duolingo (students holding a baccalaureate or advanced degree from an accredited institution in the U.S. are exempt from this requirement.)

Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services) (<http://wes.org/>) or ECE (Educational Credential Evaluators) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.

Please have transcripts sent to the **Graduate School** (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

If transcripts are sent electronically, please have them sent to the following email: gradadm@louisville.edu

Please contact the Office of Educator Preparation Student Services at teacher@louisville.edu or (502) 852-0411 for more information.

Program Requirements

Rank I Program in Educational Administration

Code	Title	Hours
<i>Inquiry (Select one of the following)</i>		3
LEAD 601	Applied Statistics	
LEAD 700	Research Concepts and Design	
LEAD 704	Qualitative Field Research Methods	
<i>Advocacy (Professional Leader)</i>		
Leadership: (Select one of the following)		3
LEAD 613	Administration and Supervision in Special Education	
LEAD 634	Fundamentals of School Leadership	
LEAD 649	District Leadership: The Contemporary Superintendent	
LEAD 715	Advanced Organizational Theory	
Diversity: (Select one of the following)		3

LEAD 610	Collaboration and Communication for Effective Leadership	
LEAD 636	Instructional Leadership 2	
LEAD 667	Instructional Planning for Student Learning and Achievement	
LEAD 720	Instructional Leadership 3	
Area of Emphasis (in consultation with advisor)		12-18
Electives (in consultation with advisor)		0-6
Action (select one of the following)		3
LEAD 679	Systems for Change: Continuous School Improvement-A Clinical Practicum	
LEAD 782	Reflective Practice for School Leaders	
Minimum Total Hours		30

Mid-Point Requirement: Candidates are required to submit a mid-point performance assessment to their faculty advisor at the completion of 15 credit hours of coursework and designed collaboratively with the faculty advisor. The faculty advisor will assess the candidate's performance assessment, which must be at the exemplary or accomplished level. The performance assessment must address the PSEL standards and include a leadership profile and personal growth goal to be assessed in the exit portfolio and/or oral defense of the portfolio.

Exit Assessment: Hallmark Assessment Task for LEAD 679 OR LEAD 782 or equivalent project that demonstrates proficiency in the PSEL Standards; Course project must address all of the PSEL Standards including artifacts associated with each standard submission. Additionally, an updated leadership profile and a reflection of personal progress toward the midpoint growth goal is required. Students must have a minimum 3.0 cumulative grade point average. No course credit equivalent to a GPA of 2.5 or lower will be accepted.

Educational Leadership and Organizational Development (EdD)

Doctor of Education in Educational Leadership and Organizational Development

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Educational Leadership, Evaluation, and Organizational Development (<https://louisville.edu/education/departments/eleod/>)

Program Website (<https://louisville.edu/education/degrees/edd-elod/>)
Academic Plan Code(s): ELODEDD

Program Information

The doctoral degree is granted in recognition of scholarly proficiency and distinctive achievement in a specific field/discipline. All candidates for a doctoral degree in the College of Education and Human Development must successfully complete qualifying exams and a dissertation/professional portfolio that clearly indicates the candidate has mastered and can exhibit/articulate the content knowledge, skills and dispositions specific to their discipline, and can utilize appropriate research methodologies to contribute to the body of knowledge in their field.

Distinctive Characteristics of Doctoral Programs in the College of Education and Human Development

1. Social Justice and Equity

Doctoral students in our program build experience and expertise in the issues of social justice and equity which aligns with our metropolitan mission and focus on student achievement.

2. Leadership

Our doctoral students gain expertise in supervising and leading others to achieve organizational goals and missions, managing complex systems, addressing administrative issues and procedures, conducting research to enhance leadership and teaching others about the art of organizational leadership.

3. Practical Experience

The doctoral program contains practicums, internships, or embedded field experience that aligns with program and career goals. These mentored experiences may include teaching, research, administration or other appropriate areas.

4. Scholarship/Research

An emphasis on scholarship includes experience and mentorship in ethics, publications, presentation, grantsmanship, and other forms of creative activity. The research component is characterized by the development of vertical research teams: senior faculty, junior faculty, doctoral students, master's students, and in some programs, undergraduate students, working together on research projects and research areas. These may be bolstered by partnerships with local school districts, businesses, or community agencies.

Admission Requirements

Potential students must meet the minimum requirements for admission to the University of Louisville Graduate School

Additionally, the following is required by the program:

- Master's degree in education or related field**
- Letter of Introduction** - No more than two pages highlighting your career accomplishments to date, your reason for considering doctoral level work, and your anticipated areas of interest for action research project(s).
- Current Resume or Curriculum Vita** - Submit a current resume or curriculum vita. The program faculty expects applicants to have prior professional experience in P-12 education. The EdD program is practitioner-based and intended for experienced professionals in the field.
- Three Letters of Recommendation** - Select three individuals who are familiar with your background as a professional or graduate student to complete Letter of Recommendation (two letters required by the graduate school for admission may count in this total). At least one of the recommendations must come from someone familiar with your work ethic and work products, **A letter from an immediate supervisor is encouraged.**
- Official copies of all collegiate transcripts** Graduates of the University of Louisville need not provide a transcript.
- GPA of at least 3.5 for prior graduate coursework.**
- Applicants submitting foreign transcripts** must submit transcript to either the World Education Evaluation Service (WES) or Education Credentials Evaluators (ECE) for evaluation. If you have a master's degree from the U.S., this requirement is waived.

8. **Students for whom English is not their primary language** must show English language proficiency by successfully completing one of the following:
- International English Language Testing System (IELTS) examination (<https://www.ielts.org/>) – minimum score: 6.5
 - Test of English as a Foreign Language (TOEFL) examination (<https://www.ets.org/toefl/>) – minimum scores: 550 on the paper-based TOEFL, 213 on the computer-based TOEFL or 80 or higher on the internet-based TOEFL
 - Duolingo English Test with Subscores (https://englishtest.duolingo.com/applicants/?utm_source=google&utm_medium=search&utm_campaign=EnglishTier1Campaign&utm_content=&utm_term=brand-broad&gclid=CjwKCAiAyPyQBhB6EiwAFUuakrtGPRRW-6LWFstq8XBfUXEzPQde1_PQmLRqJH7n01zpwXQcxv7MxoCRc0QAvD_BwE) – minimum score of 105 and exam must have been taken after January 1, 2020
 - Note: International students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.
9. **Submission of a writing prompt** provided when the application materials are received and to be submitted prior to the interview. The writing prompt will focus on a contemporary issue in the P-12 education landscape and will require appropriate research tasks aimed to assess the capacity of the candidate for admission to process, analyze, and communicate (in written form) their response to the prompt.
10. **Interview with Program Faculty**- Program faculty reserve the right to request additional information to resolve admission status including, but not limited to, GRE scores, additional letters of recommendation, professional references for consultation, etc.

All application materials are reviewed by the program faculty and are considered holistically when determining admission status. Students will be notified in writing of their admission status.

Program Requirements
Master's degree prerequisite + 60 credit hours minimum

The Student and Program Committee must develop courses, programs and experiences that clearly identify and address the specific themes of Education Policy Development and Implementation, Scholarly Research, and Transformational Leadership. These areas of emphasis must have descriptive competencies that the student should attain and the Committee can assess.

The doctoral degree is granted in recognition of scholarly proficiency and distinctive achievement in a specific field/discipline. All candidates for a doctoral degree in the CEHD must successfully complete qualifying exams and a dissertation/professional portfolio that clearly indicates the candidate has mastered and can exhibit/articulate the content knowledge, skills and dispositions specific to their discipline and can utilize appropriate research methodologies to contribute to the body of knowledge in their field.

Required Coursework

Code	Title	Hours
Specialty Components ¹		33
LEAD 715	Advanced Organizational Theory	
Additional Specialty Component courses selected with Program Committee approval		

Research Methodology ¹		27
LEAD 601	Applied Statistics (or equivalent required)	
Research Course to aid in the completion of the EdD Degree		
Research Course to aid in the completion of the EdD Degree		
Research Electives (e.g., Field Survey Research, additional qualitative methodologies and/or quantitative methodologies) ²		
LEAD 777	Capstone for Doctor of Education Degree in Educational Leadership and Organizational Development (12 credit hours)	

Minimum Total Hours	60
¹ EdD students complete 33 credit hours of Specialty Component coursework and 27 credit hours of Research Methodology for a minimum total of 60 credit hours of eligible graduate work. Courses are selected with Program Committee Approval within program guidelines/framework.	
² Selected with Program Committee Approval within program guidelines/framework. Students have the opportunity to take courses in other disciplines. LEAD 600 may not be used to satisfy this requirement.	

Educational Leadership and Organizational Development (PhD)
Doctor of Philosophy in Educational Leadership and Organizational Development

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Educational Leadership, Evaluation, and Organizational Development (<http://louisville.edu/education/departments/eleod/>)

Program Website (<https://louisville.edu/education/degrees/phd-elod/>)

Academic Plan Code(s): ELODPHD

Program Information

The Doctor of Philosophy in Educational Leadership and Organizational Development encompasses five specialties:

- P-12 Administration
- Post-secondary Administration
- Sport administration
- Human Resource Development
- Evaluation

The doctoral degree is granted in recognition of scholarly proficiency and distinctive achievement in a specific field/discipline. All candidates for a doctoral degree in the College of Education and Human Development must successfully complete qualifying exams and a dissertation/professional portfolio that clearly indicates the candidate has mastered and can exhibit/articulate the content knowledge, skills and dispositions specific to their discipline and can utilize appropriate research methodologies to contribute to the body of knowledge in their field.

Distinctive Characteristics of Doctoral Programs in the College of Education and Human Development

1. Social Justice and Equity

Doctoral students in our program build experience and expertise in the issues of social justice and equity which aligns with our metropolitan mission and focus on student achievement.

2. Leadership

Our doctoral students gain expertise in supervising and leading others to achieve organizational goals and missions, managing complex systems, addressing administrative issues and procedures, conducting research to enhance leadership and teaching others about the art of organizational leadership.

3. Practical Experience

An emphasis on scholarship includes experience and mentorship in ethics, publications, presentation, grantsmanship, and other forms of creative activity. The research component is characterized by the development of vertical research teams: senior faculty, junior faculty, doctoral students, master's students, and in some programs, undergraduate students, working together on research projects and research areas. These may be bolstered by partnerships with local school districts, businesses, or community agencies.

Admission Requirements

Application Materials Overview

The LEAD Department PhD Admissions Committee evaluates an applicant's potential to succeed in the doctoral program, including academic writing and analysis, theory and conceptual processing, and overall program readiness. This evaluation of an applicant is conducted through a holistic review of an applicant's fully submitted application materials. These materials include the following:

- Graduate Application
- Résumé or Curriculum Vitae
- Letters of Recommendation: 2 Required (academic references preferred, but required for all applicants whose undergraduate work was completed within the last five years)
- English Language Exam: TOEFL, IELTS, or Duolingo English Test required* for applicants for whom English is not their primary language
- Transcripts: all official transcripts from any courses or degree programs taken at previous postsecondary institutions (other than dual credit)
- Personal Statement
- Analysis Essay

In addition, an applicant may submit or participate in additional opportunities such as the following that are optional but not required for admission:

1. Interview
2. GRE Scores
3. Any academic or published works/ creative artifacts you have been a part of or produced

Additional information on each required and optional application materials can be found in the following sections:

Required Application Materials

1. **Graduate Application** (<http://louisville.edu/graduate/apply/>) (even if currently enrolled in a University of Louisville program). All other application materials, except GRE Scores and online recommendation letters should be sent to the address at the bottom of this page.
2. **Resume or Curriculum Vitae.** It is expected that applicants have prior academic and professional experience in their field of interest. The PhD program is intended for experienced professionals, holding relevant academic degrees and who are qualified to undertake advanced study at the doctoral level. It is important that the academic and professional experience of applicants match the educational focus of the program curriculum and the educational and professional orientation of the program faculty.
3. **Letters of Recommendation.** Using the Graduate School on-line application (<http://louisville.edu/graduate/apply/>) choose two individuals familiar with your background to provide a Letter of Evaluation (<https://louisville.edu/education/degrees/files/new-letter-of-eval.pdf>). Academic references preferred, but required for all applicants whose undergraduate work was completed within the last five years.
4. **English Language Exam.** Students for whom English is not their primary language must show English language proficiency by successfully completing one of the following:
 - International English Language Testing System (IELTS) examination (<https://www.ielts.org/>) – minimum score: 6.5
 - Test of English as a Foreign Language (TOEFL) examination (<https://www.ets.org/toefl/>) – minimum scores: 550 on the paper-based TOEFL, 213 on the computer-based TOEFL or 80 or higher on the internet-based TOEFL
 - Duolingo English Test with Subscores (https://englishtest.duolingo.com/applicants/?utm_source=google&utm_medium=search&utm_campaign=EnglishTier1CanBroad&gclid=CjwKCAiAyPyQBhB6EiwAFUuakrtGPRRW-6-LWFstq8XBfUXEzPQde1_PQmLRqJH7n01zpwXQcxv7MxoCRc0QAvD_BwE) – minimum score of 105 and exam must have been taken after January 1, 2020. *Note:* Students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.
5. **Transcripts—undergraduate and graduate** (All official, non-UofL). Send official transcripts for all previous undergraduate and graduate coursework from any courses or degree programs taken at previous postsecondary institutions (other than dual credit) to the address indicated below. Do not provide UofL transcripts and transcripts previously submitted to the College of Education and Human Development. If you have records at UofL, but outside the CEHD, attach a note so indicating and we will secure them. It is expected that applicants would have GPAs of at least 3.5 for prior undergraduate and graduate degrees. Applicants submitting **foreign transcripts** must submit such transcript to analysis by either of the following two agencies and have the agency submit their report to the address below for inclusion in the application packet: World Education Evaluation Service (<http://www.wes.org/>) or Education Credentials Evaluators (<http://www.ece.org/>). The applicant must send the official transcript to the transcript evaluation agency. The agency will do an evaluation according to US guidelines and mail an official copy of the evaluation to UofL. We do not need the transcript if we have the official evaluation from ECE or WES. The agency also

validates that the transcript is official and legitimate. In some cases, the applicant may only have one official copy of the transcript. In that situation, WES or ECE will mail the official transcript back to the student after the evaluation has been completed. If you have a graduate degree from the U.S., this requirement is waived.

6. **Personal Statement.** Your Personal Statement is an opportunity for you to offer the admissions committee insights about your background, interests, future contributions to the academic community at the University of Louisville, and academic potential with your field of study.
 - As you author your Personal Statement, consider how your background and life experiences – including educational, cultural, financial, geographical, and/or other opportunities or barriers – motivated your decision to pursue a doctoral degree at the University of Louisville?
 - In your statement, share your research interests and career goals, as well as how you see this doctoral program helping you achieve those future goals as well as why you have chosen to pursue doctoral study at this time.
 - Tell us about what you have done, what is unique about you, what you have learned and achieved (including evidence of progress) to support and recognize your accomplishments to date and how that has prepared you for doctoral study in this program.
7. **Analysis Essay.** For this essay, please identify a contemporary issue, challenge, or opportunity in your specialty area (e.g., human resource development, higher/postsecondary education, education administration, program evaluation, sports administration). Your essay should intertwine several messages that: (a) provide a background to your chosen topic, (b) inform your reader why your chosen topic is important and what is known about the topic, (c) articulate at least two avenues for how you could address your chosen topic using research articles in support of your points, (d) recommend an avenue or perspective in which to take along with supported rationale, and (e) provide a summary along with concluding remarks that bring your essay to a logical conclusion.
 - Your essay should demonstrate some level of analysis and be between 2500 and 3000 words (8- 10 pages double spaced) not including a title page, references or citations, tables, figures, or graphs.
 - Include any references to literature and empirical research sources that you use to help shape your analytic essay.
 - Your analysis essay does not need to be on a topic that you think you'd like to focus on in your doctoral studies, but it can be. Ultimately, we are interested in learning more about how you present a topic, offer competing perspectives, and your analysis associated with that discussion.

Optional Application Materials

1. **Interview.** Using a holistic process, the LEAD PhD Admissions Committee will evaluate your application packet. They may, at their discretion, invite you for a brief interview with faculty in your chosen area of concentration to learn more about your interests. The interview is optional, but often can be helpful in finding fit within an academic program of study.
2. **GRE Scores.** The GRE test can help committees evaluate students, especially those from unfamiliar colleges or universities. LEAD PhD Admissions Committee recognizes that tests have their limitations and may pose a financial burden for some students. To ensure that

we support equity, inclusion, and a holistic review process, GRE scores are optional for admission to the PhD Program.

- Applicants who do not submit GRE scores will be given full consideration to the program.
- If you have taken the GRE, and wish to submit your scores as an option, have the Education Testing Service forward scores to UofL (UofL's code for sending GRE scores is 1838).
- If you are a former UofL student and believe your scores are already at the University Graduate School, attach a note indicating so with your Graduate Application.
- Scores, whether a new applicant or a former UofL student, should be no more than 5-years old

3. Academic Published Works/ Creative Artifacts. If you have published any academic research or been a part of some form of creative artifact that adds to your application packet, please feel free to include those works as a .pdf within your packet as optional material.

Program Requirements

Master's degree prerequisite + 60 credit hours minimum

The Student and Committee must develop courses, programs and experiences that clearly identify and address the specific themes of Leadership, Scholarship, Social Justice and Equity. These areas of emphasis must have descriptive competencies that the student should attain and the Committee can assess.

Coursework Requirements

Electrical Engineering (MEng)

Master of Engineering in Electrical Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (SP)

Department: Electrical and Computer Engineering (<https://engineering.louisville.edu/academics/departments/electrical/>)
Academic Plan Code(s): EE_MEN

Program Information

General Information

The Bachelor of Science in Electrical Engineering degree will provide a student with the basis to be able to complete the Master of Engineering (MEng) in Electrical Engineering degree. The Master of Engineering in Electrical Engineering degree program is accredited by the Engineering Accreditation Commission (EAC) of ABET (<https://www.abet.org>), under the Commission's General Criteria and the Program Criteria for Electrical, Computer, Communications, Telecommunication(s), and Similarly Named Engineering Programs.

Since the Electrical Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Electrical Engineering bachelor's degree program at Speed School. Therefore, students who earn an undergraduate degree at a school or university other than the University of Louisville pursue the MS degree instead of the MEng degree.

Master of Engineering Program Educational Objectives

Graduates of the Master of Engineering program in the Electrical and Computer Engineering Department are expected within a few years of graduation to have:

1. Established themselves in successful and productive careers or advanced studies in electrical engineering or a related area, possess technical competency in electrical engineering, and are effective team members and effective communicators.
2. Demonstrated the ability to engage in lifelong learning in electrical engineering and related fields.
3. Acquired a sense of professionalism, with emphasis on professional ethics, an awareness of professional licensing, and participation in the affairs of the profession.

Master of Engineering Student Outcomes

In order to achieve these objectives, the Master of Engineering program in the Electrical and Computer Engineering Department has the following outcomes set for its graduates. Graduates will demonstrate:

1. An ability to communicate effectively with a range of audiences.
2. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Residency

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. A candidate for the Master of Engineering degree who does not register for credit hours must maintain active registration by paying a fee each semester for MEng residency until the degree is awarded (i.e., the candidate must maintain continuous registration, including summer terms, in Graduate Studies). Failure to pay the MEng residency fee will be cause to cancel a student's residency. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. In order to be restored to residency, the student must submit a new application, have the recommendation of the department chair, receive the approval of the Associate Dean and pay the fee for each of the semesters during which the residency was void.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing is 3.00 for all academic work completed while in graduate studies.
2. Any student with a cumulative graduate GPA below 3.00 will be placed on academic warning. Students on academic warning are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms.

Students who do not bring their cumulative graduate GPA back at or above a 3.00 in the semester immediately following Academic Warning, will be placed on Academic Probation for the next semester of enrollment. Students on probation are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms. Any student who remains in academic probation for more than a single semester may be considered for dismissal from the program.

3. Students receiving graduate assistantships (teaching, research or service) shall be provided adequate training and shall be required to understand and adhere to University policies related to these areas. The performance of teaching, research and service duties by such students shall be periodically evaluated. Students with teaching assistantships shall be evaluated annually.
4. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs.
5. A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

Degree Requirements

The following degree requirements are mandatory of all Master of Engineering candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's degree students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. Students following the thesis option must follow the Procedures and Standards for Master of Engineering Theses.
4. The total requirements must be completed within six years after admission into graduate studies. The time limit imposed by the rule may be extended in individual cases upon recommendation of the department chair and approval of the associate dean for academic and student affairs.
5. The MEng degree cannot be conferred prior to the BS degree.

Admission Standards

Since the Electrical Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for

students who have matriculated through the Electrical Engineering bachelor degree program at Speed School.

The application form is available online (<http://louisville.edu/speed/academics/forms/MEngGraduateStudiesApplication/>).

The requirements for admission or readmission to a Master of Engineering program are:

1. Submission of a completed MEng application for the field of specialization in which the student is earning a bachelor degree from the J.B. Speed School of Engineering. Students can apply to the MEng program with fewer than thirteen (13) credit hours of BS degree requirements remaining and no later than two years post conferral of their baccalaureate degree. A student's admission into the MEng program is contingent upon successful completion of their undergraduate degree;

2. Recommendation by the faculty and chair of the student's department for admission or readmission to graduate studies;

3. Cumulative baccalaureate grade point average of 2.75. However, those students with cumulative baccalaureate grade-point averages from 2.50 to 2.75 may be admitted upon petition and approval of the chair and faculty of the department.

A student becomes a candidate for the Master of Engineering degree upon admission to graduate studies and initial registration as a graduate student.

Program Requirements

The Master of Engineering in Electrical Engineering degree requires the following over and above the Bachelor of Science in Electrical Engineering Degree.

Code	Title	Hours
Master of Engineering Coursework		
ECE Design Electives (see list below)	^{1,2,3}	12
ECE Electives (see list below)	^{1,3,4}	6
Technical Electives	^{1,5}	6
Select one of the following:		6-7
<i>Thesis/Paper Option:</i>		
ECE 697	Master of Engineering Thesis or Paper in Electrical Engineering	
<i>Non-Thesis/Paper Option:</i>		
ECE 695	Graduate Seminar in Electrical and Computer Engineering	
ECE Electives (see list below)	^{1,3,4}	
Minimum Total Hours		30-31

The Master of Engineering degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the Master of Engineering degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

¹ Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis or paper, are 600-level.

² A minimum of twelve (12) credit hours must be classified as Design Electives. Design Electives must be chosen from the approved list of regular courses (see below).

³ ECE electives must be chosen from an approved list

⁴ ECE 697 Master of Engineering Thesis or Paper in Electrical Engineering is an elective for a total of six (6) credit hours. For the thesis/paper option, a student is urged to select both an approved M.Eng. thesis/paper topic and the director and members of the thesis/paper committee during the first term of graduate studies. The thesis/paper director must give approval for enrollment in ECE 697.

⁵ Technical electives can be ECE or non-ECE courses. Technical electives must be approved by the department. A maximum of six (6) credit hours of non-ECE courses will count toward the MEng degree. Non-ECE technical electives must be approved by the department.

Design Electives

Code	Title	Hours
ECE 510 & ECE 511	Computer Design Computer Design Laboratory	4
ECE 515 & ECE 514	Introduction to VLSI Systems Introduction to VLSI Systems Laboratory	4

ECE 653	Digital Communications	3
ECE 654	Advanced Voice/Data Networks	3
ECE 655	Pattern Recognition and Machine Intelligence Laboratory	1
ECE 660	Introduction to Robust Control	3
ECE 661	Sampled-Data Control Systems	3
ECE 662	Introduction to Optimum Control	3
ECE 664	Modern Adaptive Control	3
ECE 665	Theory of Nonlinear Systems	3
ECE 682	Advanced Power System Analysis	3
ECE 697	Master of Engineering Thesis or Paper in Electrical Engineering	1-6

Electrical Engineering (MS)

Master of Science in Electrical Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Electrical and Computer Engineering (<https://engineering.louisville.edu/academics/departments/electrical/>)
Academic Plan Code(s): EE_ _MS, EE_ _MS_O

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-science-in-electrical-engineering/>).

General Information

The MS degree program is intended for persons having an accredited baccalaureate degree in Electrical Engineering, but is available to those with other backgrounds. Applicants with other backgrounds should plan on taking some undergraduate background coursework. Students interested in the MS degree program should consult the Director of Graduate Studies in the Department of Electrical and Computer Engineering.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (p. 16) section of this catalog.

Admission Standards

The admission standards for the master of science program in electrical engineering are as follows:

1. All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - At least two letters of recommendation, and
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
4. International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background.

The minimum curricular requirements for the master's program are:

Code	Title	Hours
ECE Electives ^{1,2}		15
Technical Electives ^{1,2}		9
Select one of the following:		6
Thesis or Paper Option		
ECE 690	Master of Science Thesis or Paper in Electrical Engineering ³	
Project Option		
ECE 692	Master of Science Advanced Level Independent Project ⁴	
ECE Electives ¹		

Course-Only Option

ECE Electives ¹**Minimum Total Hours** 30

- ¹ Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis, are 600-level; at least fifteen (15) credit hours of coursework must be in ECE.
- ² Technical Electives can be ECE or non-ECE courses. Technical Electives must be approved by the department.
- ³ For the thesis/paper option, a student is required to select both an approved MS thesis/paper topic and the director and members of the thesis/paper committee during the first term of Graduate Studies. The thesis/paper director must give approval for enrollment in ECE 690.
- ⁴ Must include a course from a list of approved research/project courses, maintained by the Department.

Electrical Engineering (PhD)

Doctor of Philosophy in Electrical EngineeringUnit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)Department: Electrical and Computer Engineering (<https://engineering.louisville.edu/academics/departments/electrical/>)

Academic Plan Code(s): EE_ _PHD

Program Information

General Information

The PhD degree program is intended for persons having an accredited master's and/or baccalaureate degree in electrical engineering. Students interested in the PhD degree program should consult the Director of Graduate Studies in the Department of Electrical and Computer Engineering.

Degree Requirements

The award of a Doctor of Philosophy degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform independent scholarly research. Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework attempted in Graduate Studies.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Admission Standards

The admission standards for the PhD program in electrical engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - An application fee
 - Results from the Graduate Record Examination (GRE)
 - At least two letters of recommendation
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum degree requirement for admission is an accredited baccalaureate degree in electrical engineering or closely related field.

- The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
- The successful applicant will typically have a GRE combined Verbal and Quantitative Reasoning score of 295 or above.
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Normally, it is expected that the student will complete a master's degree before being admitted to the PhD Program. However, qualified applicants may be admitted directly to the doctoral program after receiving a baccalaureate degree. These students will be required to complete an additional 30 credit hours of coursework at the 500 and 600 level under an individual plan developed in conjunction with the department's Director of Graduate Studies. Also, remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background.

The minimum curricular requirements for the doctoral program are:

Code	Title	Hours
Courses - Post Bac		
	Approved Master's Level Course Work	30
	Electives (minimum of 15 credit hours) ¹	15
	ECE 700: Dissertation Research in EE ²	15
Minimum Total Hours		60

Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic work attempted in Graduate Studies

- Electives can be ECE, non-ECE courses, or non-engineering courses and are approved by the candidates advisor.
- Candidates can take fewer than fifteen (15) credit hours of ECE 700 and more elective hours beyond fifteen (15) credit hours, so as not to exceed 30 credit hours total for elective credit hours and ECE 700 credit hours.

Elementary Education (MAT)

**Master of Arts in Teaching in Elementary Education**Unit: College of Education and Human Development (<http://louisville.edu/education/>)

Department: Elementary, Middle, and Secondary Education (<https://louisville.edu/education/departments/mise/>)
 Program Webpage (<http://louisville.edu/education/degrees/mat-eee/>)
 Academic Plan Code(s): EREDMAT

Program Information

The MAT in Elementary Education enables graduate students to earn their initial teaching certificate for grades P-5 in Kentucky. Candidates learn to teach through instruction in pedagogy, child development, special education, gifted education, technology, and diversity. They develop their skills in field experiences in local area schools. The Elementary Education program emphasizes meeting the needs of the individual learner using best instructional practices in a standards-based environment. Through coursework and clinical field experiences, teacher education students become critical thinkers who are prepared to meet the demands of 21st-century elementary education.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission. Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

1. Application to Graduate School (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-eee-prereq/>)
4. Oral Communication (<http://louisville.edu/education/degrees/info/oral-comm/course>)
5. Grade of C or higher in ENGL 102 (or equivalent)
6. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>) All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.
7. Professional Writing Requirements (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
8. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
9. Acceptable interview.

Program Requirements

Code	Title	Hours
EDTP 631	Integrated Teaching and Learning I	3
EDTP 632	Integrated Teaching and Learning II	3

The above courses must be completed prior to the content methods courses.

EDTP 603	P-5 Language Arts Methods	3
EDTP 604	P-5 Mathematics Methods	3
EDTP 605	Teaching Elementary School Science	3
EDTP 606	P-5 Social Studies Methods	3
EDTP 503	Developing Cross-Cultural Competence: Teaching Students from Diverse Backgrounds ¹	3

Code	Title	Hours
EDTP 615	Student Teaching: Elementary School	9
Total Minimum Hours		30

¹ Can be taken at any point in the program.

Mid-Point Assessment: Prior to Student Teaching: Satisfactory dispositions assessment; no lower than a "C" in each content methods class; all prerequisites met; all courses listed above passed; electronic documentation of 200 hours of diverse and approved field experiences; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Certification Assessment: After Student Teaching: Satisfactory dispositions assessment; passing scores on PRAXIS content and PLT exams; completion of degree requirements.

Degree Assessment: All program course work with 3.0 cumulative GPA (and no more than a total of two "C's" grades in degree courses); a "C" or higher in student teaching; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Praxis Disclaimer: Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Profession Standards Board (EPSB) website at www.e-psb.ky.gov (<http://www.e-psb.ky.gov/>) or www.ets.org/praxis (<http://www.ets.org/praxis/>) for current requirements.

Degree Candidacy: Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

The Master of Arts in Teaching in Early Elementary Education (EREDMAT) prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us?tab=disclosures>).

Elementary Education, Alternative Certification (MAT)

Master of Arts in Teaching in Elementary Education, Alternative Route to Certification

Unit: College of Education and Human Development (<https://louisville.edu/education/>)

Department: Elementary, Middle, and Secondary Education (<https://louisville.edu/education/departments/mise/>)

Program Webpage (<https://louisville.edu/education/degrees/mat-eee/>)

Academic Plan Code(s): EREDMAT

Program Information

The MAT in Elementary Education enables graduate students to earn their initial teaching certificate for grades P-5 in Kentucky. Candidates learn to teach through instruction in pedagogy, child development, special education, and technology. The Elementary Education program emphasizes meeting the needs of the individual learner using best instructional practices in a standards-based environment.

The Alternative Certification program is designed to assist local school districts in meeting the demand for qualified teachers. The program provides candidates with an opportunity to pursue initial teacher certification while working as a full-time teacher on a temporary provisional license. Employment is not required for initial acceptance to the program. However, candidates must be employed in a Kentucky-accredited school by the start of the school year in order to continue in the program. This program is a two-year, 30 credit hour program resulting in initial teacher certification and a Master of Arts in Teaching (MAT) degree.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Alternative Certification program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission. Admission is competitive.

Candidates who meet minimum academic requirements are not guaranteed admission to the program:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>) (<http://louisville.edu/graduate/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's Degree (<http://louisville.edu/education/degrees/info/bachelors/>) from Accredited College or University with major in content area and a minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-eee-prereq/>)
4. Grade of C or higher in ENGL 102 (or equivalent)
5. Oral Communication (<http://louisville.edu/education/degrees/info/oral-comm/course>)

6. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
7. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
8. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
9. Acceptable interview

Program Requirements

Code	Title	Hours
EDTP 631	Integrated Teaching and Learning I	3
EDTP 632	Integrated Teaching and Learning II	3
EDTP 633	Integrated Teaching and Learning III	3
EDTP 627	Practicum for Alternative Certification Program (Fall Semester)	1.5
EDTP 627	Practicum for Alternative Certification Program (Spring Semester)	1.5
EDTP 656	Elementary Content Methods: Language Arts & Social Studies	3
<i>Mid-Point Assessment</i>		
EDTP 650	Elementary Content Methods: Mathematics and Science	3
EDTP 503	Developing Pedagogical Competence	3
EDSP 518	Structured Literacy for Diverse Learners	3
EDTP 678	Supporting the Second Year Alternative Certification Teacher I	1.5
EDTP 599	Music, Art, and Motion in P-5 (or Graduate level elective)	3
EDTP 679	Supporting the Second Year Alternative Certification Teacher II	1.5
Minimum Total Hours		30

Notes:

a. A graduate level Special Topics course (EDTP 597) may be offered as a replacement for two prerequisite courses - MATH 151 and MATH 152.

b. To maintain your Temporary Provisional Certificate, you MUST be enrolled in Alternative certification coursework.

Midpoint Assessment: Completion of all courses listed above; satisfactory dispositions assessment; 3.0 cumulative GPA in course work above with no lower than a "C" in each course – and no more than a total of two "C's"; all pre-requisites met; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Assessment: All program course work with 3.0 cumulative GPA (and no more than a total of two "C's" on degree courses); satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Candidacy: If not enrolled during the semester in which you are graduating, you will need to register for a degree candidacy as outlined in the Graduate Catalog (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/>).

Certification Assessment: Satisfactory dispositions assessment; passing scores on PRAXIS content and PLT exams; completion of degree requirements.

Praxis Disclaimer: Teacher certification requirements are subject to change. Before registering for the test(s), please refer to the Education Professional Standards Board (EPSB) website at epsb.ky.gov/ (<http://www.epsb.ky.gov/>) for current requirements.

The Master of Arts in Teaching in Early Elementary Education (EREDMAT) prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Elementary Education (RANK1)

Rank 1 Program in Elementary Education Advanced Practitioner

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)

Program Webpage (<https://louisville.edu/education/degrees/rank/>)

Academic Plan Code(s): ERERK1LAP

Program Information

Rank 1 programs are not an academic degree programs.

Rank 1 programs are planned graduate-level programs designed for Kentucky teachers seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank 1 status is 60 credit hours of approved graduate credit including a master's degree.

Teachers who complete a Rank 1 program may obtain a Rank change for salary purposes in Kentucky. Through a Rank 1 program, teachers may increase their depth of knowledge in their teaching areas or in additional areas of certification, as appropriate.

Admission Requirements

Students may apply to the program by first going to the Graduate School website and completing the graduate application (<https://graduate.louisville.edu/admission/apply/>).

Admission requirements include the following credentials:

- Official transcripts with a GPA of 2.75 in the bachelor's degree and a GPA of 3.0 in the master's degree.

- Teaching certificate in Elementary Education and a master's degree/Rank II.
- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.
- Signed Professional Code of Ethics/Technology User Agreement.

Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services) (<http://wes.org/>) or ECE (Educational Credential Evaluators) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.

Please have transcripts sent to:

University of Louisville
Graduate School, Admissions
Houchens Building, Suite 105
Louisville, KY 40292

If transcripts are sent electronically, please have them sent to the following email: gradadm@louisville.edu.

Program Requirements

Rank I Program in Elementary Education Advanced Practitioner

(Teachers Who Have Earned a Master's Degree/Rank II)

Code	Title	Hours
Inquiry		3
Select one of the following:

Area of Emphasis		12-18
Elective		0-6
Action (Problem Solver)		3

EDAP 681 Teacher Leadership in Practice

Minimum Total Hours 30

Up to fifteen (15) credit hours of graduate credit may be transferred to the Rank I program as long as the student will have completed 60 credit hours of approved graduate credit including a Masters degree at the end of the Rank I program. Transfer credit must be officially accepted by the advisor, and final acceptance is dependent upon receipt of official transcripts.

In the Rank 1 program, at least fifteen (15) credit hours of new graduate coursework must be taken at the University of Louisville.

To complete the program, a minimum grade point average of 3.0 is required. No credit shall be accepted for a grade lower than a B-minus.

Midpoint Requirement

Candidates are required to submit a mid-program performance assessment at the completion of fifteen (15) credit hours of coursework. The faculty advisor will assess the candidate's performance assessment, which must be at the Exemplary or Target level. The performance assessment must address content, classroom environment, teaching, assessment, and reflection, and include an artifact (such as a video) to document professional learning.

Exit Requirements

Hallmark Assessment Task for EDAP 681 or equivalent project that demonstrates proficiency in the Kentucky Teacher Performance Standards.

Elementary Education - Teacher Residency (MAT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Elementary Education, Teacher Residency (MAT)

Unit: College of Education and Human Development (<https://louisville.edu/education/>)

Department: Elementary, Middle, and Secondary Education (<https://louisville.edu/education/departments/mise/>)

Program Webpage (<https://louisville.edu/education/degrees/mat-eee/>)

Academic Plan Code(s): EREDMAT

Program Information

The MAT in Early Elementary Education enables graduate students to earn their initial teaching certificate for grades P-5 in Kentucky. Candidates learn to teach through instruction in pedagogy, child development, special education, technology, and diversity. The Early Elementary Education program emphasizes meeting the needs of the individual learner using best instructional practices in a standards-based environment.

The Teacher Residency program is designed to assist local school districts in meeting the demand for a diverse cadre of qualified teachers. Residents are enrolled in a one-year MAT program at the University of Louisville while employed with JCPS as a resident. Candidates receive personalized instruction throughout the process to help them succeed in

the classroom. Candidates selected for the Louisville Teacher Residency (LTR) program commit to teach in accelerated improvement schools (AIS) for five years.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Teacher Residency program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission. Admission is competitive.

Candidates who meet minimum academic requirements are not guaranteed admission to the program:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-eee-prereq/>)
4. Grade of C or higher in ENGL 102 (<https://catalog.louisville.edu/search/?P=ENGL%20102>) (or equivalent)
5. Oral Communication (<http://louisville.edu/education/degrees/info/oral-comm/>)course
6. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
7. Professional Statement (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
8. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
9. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
10. Acceptable interview with school district

Program Requirements

Code	Title	Hours
EDTP 651	Comprehensive Teaching and Learning I	3
EDTP 652	Comprehensive Teaching and Learning II	3
EDTP 653	Comprehensive Teaching and Learning III	3
EDAP 604	Special Problems or Field Experience in Curriculum Development (District and School Level Supported Learning I) ¹	3

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> ([https://louisville.edu/online/About-Us/?tab=disclosures](https://louisville.edu/online/About-Us?tab=disclosures)).

Elementary Mathematics Specialist P-5 (CERT)

Graduate Certificate in Elementary Mathematics Specialist (P-5)

Unit: College of Education and Human Development (<https://louisville.edu/education/>)

Program Webpage (<https://louisville.edu/online/programs/certificate-programs/certificate-in-teaching-english-as-an-international-language/>)

Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)

Academic Plan Code(s): EMASCGR, EMASCGRO

Program Information

This program can be completed 100% online.

The Elementary Mathematics Specialist (EMS) Graduate Certificate is a 5-course program designed to increase the math teaching expertise of elementary teachers and prepare leaders in mathematics education.

It is the same coursework as the current EMS non-degree Kentucky endorsement. With adherence to the NCTM standards for Elementary Teachers and the AMTE standards for Elementary Mathematics Specialists, the program provides multiple experiences for candidates to learn in collaboration with classroom teachers, administrators, students, and local and professional communities.

The graduate certificate program is not designed to lead to initial licensure in any state and is intended to prepare certified Kentucky teachers to earn an endorsement to their license. Although some or all of the program's coursework may count toward stand-alone licenses or endorsements in other states, this program is not an approved endorsement program in states other than Kentucky. Out of state students who intend to pursue licensure or an endorsement should check with their state licensing board before making a decision about whether this program will meet their needs. For Kentucky certified teachers, completion of the certificate leads to a teaching endorsement. The EMS program can be a stand-alone Graduate Certificate or embedded as a specialty area within the Masters in Education (M.Ed.) in Teaching and Learning or Education Specialist (Ed.S.) in Curriculum and Instruction, or Rank 1 programs.

The learning outcomes for the Graduate Certificate in the Elementary Math Specialist program are as follows:

The EMS Program is designed to enhance teachers' knowledge and skills in teaching mathematics, as well as prepare them as leaders to support mathematics instruction in schools and districts. Program learning outcomes are to:

1. Demonstrate skill in teaching K-5 mathematics developmentally, model effective mathematics teaching practices, and improve students' conceptual understanding, mathematical fluency, and dispositions towards mathematics.
2. Develop skills in facilitating professional learning, including coaching, to support colleagues related to improving mathematics teaching and learning.

Admission Requirements

- Admission to the graduate school (<https://graduate.louisville.edu/admission/apply/>) or current enrollment in a graduate program at the University of Louisville.
- Bachelor's Degree with undergraduate GPA of 2.75 (minimum 3.0 for graduate work)
- Transcripts of all undergraduate and graduate work.
- Valid Teaching Certificate (Certified teachers outside Kentucky should be advised that we cannot guarantee the program will meet licensure, salary, advancement or other requirements in their state. As part of the admission process, we require a written statement confirming interest in the program for personal development and understanding that the program is designed to meet Kentucky certification requirements only.)
- Content prerequisites, as applicable
- Signed KY Code of Ethics and Signed Acceptable Use of Technology Agreement
- International applicants with transcripts that are not in English, in addition to submitting official copies of native language records, must also submit a notarized, verbatim translation in English prepared by an appropriate university or government official. The records must show both the degree granted and all coursework taken during the course of study. Applicants who are submitting transcripts from outside the United States must verify their records by submitting them to one of the following organizations: World Education Services (WES), Educational Credential Evaluators (ECE), and other NACES approved evaluators found here <https://www.naces.org/members> (<https://www.naces.org/members/>).
- Students for whom English is not their primary language must show English language proficiency by successfully completing one of the following:
- International English Language Testing System (IELTS) examination (<https://www.ielts.org/>) – minimum score: 6.5
- Test of English as a Foreign Language (TOEFL) examination (<https://www.ets.org/toefl.html>) – minimum scores: 550 on the paper-based TOEFL, 213 on the computer-based TOEFL or 80 or higher on the internet-based TOEFL
- Duolingo English Test with Subscores (https://englishtest.duolingo.com/applicants/?utm_source=google&utm_medium=search&utm_campaign=EnglishTier1Campaign&utm_content=&utm_term=brandbroad&gclid=CjwKCAiAyPyQBhB6EiwAFUuakrtGPRRW-6-LWFstq8XBfUXEZPQde1_PQmLRqJH7n01zpwXQcxv7MxoCRc0QAvD_BwE) examination – minimum score of 105 and exam must have been taken after January 1, 2020
- *Note: International students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.*

Program Requirements

Code	Title	Hours
EDAP 546	Mathematical Reasoning in K-12	3
EDAP 646	Advanced Methods: Number and Algebra	3
EDAP 647	Advanced Methods: Geometry and Data	3
EDAP 648	Teaching Fractions in K-8	3

EDAP 682	Mathematics Coaching and Professional Learning, K-12	3

Minimum Total Hours	15

Graduation Requirements

- Cumulative GPA ≥ 3.0
- Each course GPA $\geq C$
- Score Target or above on all professional standards rubrics for each course signature assessment (Hallmark Assessment Task) and the CAEP Standard RA1 Six sub-components

Engineering Logistics (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Engineering Logistics

Unit: Speed School of Engineering (<https://engineering.louisville.edu/>) (GS)

Department: Industrial and Systems Engineering (<https://engineering.louisville.edu/academics/departments/industrial/>)

Academic Plan Code(s): ENLOCGR, ENLOCGR0

Program Information

This program can be completed 100% online. (<https://engineering.louisville.edu/academics/graduate-programs/cert-in-engr-logistics/>)

The graduate certificate in Engineering Logistics provides a focused study of Industrial and Systems Engineering skills and methods as applied to logistics systems.

Students who complete the certificate program will acquire advanced methodologies and tools in optimization, and simulation to address challenging problems in network design, inventory management, production planning, facility layout, and demand forecasting.

The certificate will create an opportunity for engineering professionals to have access to a continuing education program and an opportunity for future engineering professionals to have access to an experiential learning program in logistics.

Admission Requirements

The admission standards for the Graduate Certificate program in Engineering Logistics are as follows:

1. All admission applications for the Graduate Certificate program shall include:
 - a. A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - b. Application fee
 - c. Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.

- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale). Applicants with a GPA between 2.5 and 2.75 may be considered for admission and will be required to submit additional application materials, including recommendation letters, a resume or personal statement, and prior academic performance in specific classes. Such applicants may be considered for conditional admission, and we may require that specific academic standards be met in the first semester to transition to admission in good standing.
- Applicants are required to have completed Calculus I or higher. To find out whether there is a need for remedial work and discuss available options at UofL, consult with the director or admissions consultant.
- International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score, or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79 or higher, an overall IELTS score of 6.5 or higher or Duolingo score of 105.

Applicants may be required to complete 1-2 prerequisite course(s), which would not be counted as part of the nine (9) credit hour requirement. Students are required to complete the nine (9) credit hour program with a minimum GPA of 3.0.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

Certificate Requirements

A total of nine (9) credit hours are required.

Code	Title	Hours
Select one course from the following:		3
ISE 646	Operations Research Methods	
ISE 645	Systems Simulation	
Select two courses from the following:		6
ISE 621	Facility Location and Layout	
ISE 625	Production and Inventory Systems	
ISE 657	Models for Design and Analysis of Logistical Systems	
ISE 655	Supply Chain Engineering	
Minimum Total Hours		9

¹ Requires background in probability and statistics.

The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Engineering Management (MEng)

Master of Engineering in Engineering Management

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (SP)

Department: Industrial and Systems Engineering (<https://engineering.louisville.edu/academics/departments/industrial/>)
Academic Plan Code(s): EM_ _MEN, EM_ _MENO

Program Information

This program can be completed 100% online (<http://louisville.edu/online/programs/masters/master-of-engineering-in-engineering-management/>).

The Department of Industrial and Systems Engineering of the J.B. Speed School of Engineering offers an online program in Engineering Management. The program is designed to build upon the student's mathematical and analytical expertise gained from prior engineering, math, or related scientific education as well as upon his or her professional experience gained in the course of active engineering employment.

Degree Requirements

The following degree requirements are mandatory of all Master of Engineering candidates:

- The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
- Master's degree students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
- The total requirements must be completed within six years after admission into graduate studies. The time limit imposed by the rule may be extended in individual cases upon recommendation of the department chair and approval of the associate dean for academic and student affairs.

Admission Standards

The admission standards for the MEng program in engineering management are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - Application fee
 - At least two letters of recommendation
 - Personal statement or resume
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the Bachelor of Science degree or its equivalent in engineering, math, or related scientific field from an accredited institution.
- Introduction to Statistics and Calculus I are required. To find out whether there is a need for remedial work and to discuss available options at UofL, consult with the director or admissions consultant.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale). Applicants with a GPA between 2.5 and 2.75 may be considered for admission and

will be required to submit additional application materials, including recommendation letters, a resume or personal statement, and prior academic performance in specific classes. Such applicants may be considered for conditional admission, and we may require that specific academic standards be met in the first semester to achieve admission in good standing.

5. International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Admission in good standing shall be made only if all admission credentials have been received, evaluated and approved and all academic requirements met. A student may be admitted provisionally if academic requirements are met but application materials are incomplete (usually missing letters of recommendation or official transcripts). Students have one semester to furnish any credentials missing at the time of admission and may not enroll for a second consecutive term in provisional status.

Any conditional acceptance shall be made on an individual basis and shall require a statement of the rationale for the exception, plans for monitoring progress and performance and stated success criteria. Such justification must be provided in writing and must be accepted by the program chair and the Speed School associate dean for academic affairs. This will allow consideration of special circumstances in which the potential for acceptable graduate performance has been clearly demonstrated by other means.

Program Requirements

The Master of Engineering in Engineering Management degree requires the following courses.

Code	Title	Hours
EM 613	Operations Management ²	3
EM 661	Engineering Statistics II	3
EM Electives ¹		15
Technical Electives ¹		9
Minimum Total Hours		30

Candidates for the Master of Engineering degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements.

Additionally, the master of engineering degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

¹ Electives must be chosen so that at least one-half of the credits counted toward the degree, are 600-level. Technical Electives may be taken within or outside the Department. All selections require the approval of the student's faculty advisor.

² Students with a BS Industrial Engineering degree from Speed School will not receive credit for both EM 613 & EM 661. They will be required to take two additional courses in the EM program.

English (MA)

Master of Arts in English

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: English (<http://louisville.edu/english/graduate/>)

Program Website (<http://louisville.edu/english/graduate/ma-in-english/>)

Academic Plan Code(s): ENGLMA

Program Information

Mission Statement

The Master of Arts in English provides graduate training in literatures written in English, creative writing, and rhetoric and composition.

Goals for the MA are that students will:

1. Gain advanced knowledge of British, American, and other literary traditions, and
2. Write a thesis or culminating project in which they initiate and complete specialized research addressing a significant question in literary studies or rhetoric and composition, or produce a significant body of creative work.

Admission Requirements

MA with Graduate Teaching Assistant application:

- Fall Semester only: Due January 5

MA without Graduate Teaching Assistant application:

- Fall Semester: Due July 15
- Spring Semester: Due December 1
- Summer Semester: Due April 15

All applicants should submit:

1. Online Graduate Application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) (including application fee).
2. A current CV or resume. For applicants who wish to be considered for a Graduate Teaching Assistantship (Fall admission only), the CV should detail your teaching and/or tutoring experience and other relevant background or training. It should also include the contact information for two persons who can comment on your teaching performance and/or potential.

3. Complete official transcripts of **all** college level work. Official transcripts must be sent directly to the Graduate School directly from the previous institution or transcript service.
4. Two academic letters of recommendation. Letters from employers and personal references are not acceptable. The reference should speak to the prospective student's ability to succeed in their graduate studies. Discursive letters must be attached to the PDF form.
5. A personal statement (1000 words max.) describing your areas of interest within English studies, your future academic/career plans, and your reasons for applying to our MA program.
6. A writing sample (ca. 10 pages) that demonstrates your skills in critical and analytical writing. For example, this can be a substantial analysis paper or research paper written for an (under)graduate course, or a chapter from a Bachelor's or Honors thesis.
7. **For applicants intending to focus on Creative Writing:** A creative writing sample, in addition to the critical/analytical writing sample.
8. **For applicants who wish to be considered for a Graduate Teaching Assistantship:** Applicants wishing to be considered for a GTA position should submit a teaching statement (500-1000 words) describing how they would approach teaching in general and teaching writing in particular. If you have experience as a teaching or tutor, describe your teaching philosophy and provide some specific examples of how you turn that philosophy into practice in the classroom or writing center. What are the most important concepts and skills you think student writers need to learn? If you do not have experience as a teacher or tutor, describe what, as a student, you have found effective in your best teachers. What approaches to teaching and what personal qualities did you value in their work? Describe how you would approach teaching based on what you have experienced. What are the most important concepts and skills you think student writers need to learn?
9. **For international applicants:** Official reports of the TOEFL, IELTS, or Duolingo examination demonstrating English language proficiency. All applicants for whom English is a second language must submit one of the following: official TOEFL scores (213 or higher on the computer based test or 80 or higher on the internet-based test); official IELTS scores with at least a 6.5 overall band score from the academic module exam; or official Duolingo scores of 105 or higher. Only official Duolingo tests with subscores are accepted. Applicants holding a bachelor's or advanced degree from an accredited U.S. institution may be exempt from the English proficiency requirement.

Special notes:

- GRE test scores are not required.
- To be considered for a GTA position, see deadline information above.

Program Requirements

The Master of Arts in English requires 30 credit hours of academic work at the graduate level. In addition to fulfilling the core requirements, students may take additional work in literary studies, creative writing, or rhetoric and composition. Students may take no more than three 500-level graduate courses. Creative writing courses (including up to six (6) credit hours of thesis guidance) may total no more than 15 credit hours. Students may count one elective outside the Department of English toward their degree upon approval by the director of graduate studies. Detailed requirement information can be found in the (<https://louisville.edu/english/graduate/graduate-program-guidelines-2/>)English Department Graduate Program Guidelines (<https://louisville.edu/english/graduate/graduate-program-guidelines/>).

(<https://louisville.edu/english/graduate/graduate-program-guidelines-2/>).

- Thesis Option = 24 credit hours of coursework + six (6) credit hours of thesis guidance
- Non-Thesis Option = 30 credit hours of coursework + culminating project

Graduate-level English courses beyond those listed may count towards requirements depending on the topics covered. Detailed course descriptions (<http://louisville.edu/english/graduate/graduate-course-descriptions/>), available on the English Department website, will provide this information and can be discussed during advising with the director of graduate studies.

Code	Title	Hours
Required Courses		
General Requirements		3
ENGL 601	Introduction to English Studies	
Theory Requirement		3
ENGL 691	Contemporary Theories of Interpretation	
	or ENGL 692 Topics in Interpretive Theory Since 1900	
Literature before 1700 (3 Credit Hours)		3
ENGL 515	Introduction to Old English	
	or ENGL 541 Studies in Old and Middle English Literature - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 542 Studies in Tudor and Elizabethan Literature - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 543 Studies in Stuart and Commonwealth Literature - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 561 Chaucer - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 562 Shakespeare - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 563 Milton - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 572 Studies in American Literature, 1865-1910 - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 581 Studies in Renaissance Drama - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 624 Old English and Middle English Language and Literature	
	or ENGL 631 Renaissance Drama	
	or ENGL 632 Shakespeare	
	or ENGL 633 Renaissance Poetry and Prose	
	or ENGL 671 History of Rhetoric I	
Literature from 1700-1900 (3 Credit Hours)		3
ENGL 545	Studies in British Literature of the Romantic Period - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	
	or ENGL 544 Studies in Restoration and Eighteenth-Century British Literature - CUE (https://catalog.louisville.edu/undergraduate/general-education-requirements/)	

- or ENGL 545 Studies in British Literature of the Romantic Period - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 546 Studies in British Literature of the Victorian Period - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 642 Eighteenth-Century Fiction
- or ENGL 643 Eighteenth-Century Poetry and Prose
- or ENGL 644 Romantic Poetry and Prose
- or ENGL 651 Nineteenth-Century Fiction
- or ENGL 652 Nineteenth-Century British Poetry and Prose
- or ENGL 661 Nineteenth-Century American Fiction
- or ENGL 662 Nineteenth-Century American Poetry and Prose

Literature After 1900 (3 Credit Hours) 3

- ENGL 547 Studies in Modern British and/or Irish Literature - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 548 Studies in Contemporary British and/or Irish Literature - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 549 Studies in Post-Colonial and/or Ethnic Literature - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 573 Studies in American Literature, 1910-1960 - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 574 Studies in American Literature, 1960 - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 577 The Harlem Renaissance - CUE (<https://catalog.louisville.edu/undergraduate/general-education-requirements/>)
- or ENGL 606 Creative Writing I
- or ENGL 607 Creative Writing II
- or ENGL 654 Twentieth-Century Literature
- or ENGL 664 American Authors: 1900-Present
- or ENGL 665 Contemporary Poetry
- or ENGL 685 Seminar in Modern British Studies
- or ENGL 686 Seminar in American Studies

Electives (15 Credit Hours) 15

One elective may be taken outside of the department. Students pursuing the thesis option take ENGL 615: Thesis Guidance (6 credit hours), which takes the place of two electives.

Minimum Total Hours 30

English Rhetoric and Composition (PhD)

Doctor of Philosophy in English Rhetoric and Composition

Unit: Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: English (<https://louisville.edu/english/graduate/>)

Program Webpage (<https://louisville.edu/english/graduate/ph-d-in-rhetoric-composition/>)

Academic Plan Code(s): ERC _ PHD

Program Information

Mission Statement

The Doctor of Philosophy in Rhetoric and Composition provides graduate training in the history and theory of rhetoric; theory and empirical research in composition; an area of literary study; and the relation of rhetoric and composition to allied fields (e.g., critical theory, cultural studies, linguistics).

Goals for the PhD are that students will:

1. Gain specialized and current disciplinary knowledge;
2. Write a dissertation in which they initiate and complete specialized research that addresses an original and significant question in rhetoric and composition; and
3. Acquire experience and expertise as writing teachers.

Admission Requirements

Application Due: January 5 (Fall admission only)

All applicants should submit:

1. Online Graduate Application (<https://graduate.louisville.edu/admission/apply/>) (including application fee).
2. A current CV or resume. For applicants who wish to be considered for a Graduate Teaching Assistantship, the CV should detail your teaching and/or tutoring experience and other relevant background or training. It should also include the contact information for persons who can comment on your teaching performance and/or potential.
3. A written statement of no more than 1,000 words detailing the applicant's professional goals in the field of rhetoric and composition.
4. Complete official transcripts of **all** college-level work. Official transcripts must be sent directly to the Graduate School by the previous institution.
5. Three academic letters of recommendation. Letters from employers and personal references are not acceptable. The reference should speak to the prospective student's ability to succeed in their graduate studies. Discursive letters must be attached to the PDF form.
6. A critical writing sample of at least 15 pages. This writing sample should demonstrate your skills in critical thinking and analytical writing. For example, this can be a substantial analysis paper or research paper written for an (under)graduate course, a chapter from a Bachelor/Honors/Master thesis, or a published journal article.
7. A teaching statement (1-2 pages) describing how you would approach teaching in general and teaching writing in particular. If you have experience as a teaching or tutor, describe your teaching philosophy and provide some specific examples of how you turn that philosophy into practice in the classroom or writing center. What are the most important concepts and skills you think student writers need to learn? If you do not have experience as a teacher or tutor, describe what, as a student, you have found effective in your best teachers. What approaches to teaching and what personal qualities did you value in their work? Describe how you would approach teaching based on what you have experienced. What are the most important concepts and skills you think student writers need to learn?
8. **For international applicants:** Official reports of the TOEFL, IELTS, or Duolingo examination demonstrating English language proficiency. All applicants for whom English is a second language must also submit one of the following: official TOEFL scores (213 or higher on the computer based test, 550 or higher on the paper based test,

or 80 or higher on the internet-based test); official reports of the TOEFL, IELTS scores with at least a 6.5 overall band score from the academic module exam; or official Duolingo scores of 105 or higher. Only official Duolingo tests with subscores are accepted. Applicants holding a bachelor's or advanced degree from an accredited U.S. institution may be exempt from the English proficiency requirement.

Special notes:

- GRE scores are not required.
- The entire application must be completed by January 5th to be considered for a Graduate Teaching Assistant (GTA) position.

Degree Requirements

All doctoral students are expected to complete a minimum of 42 graduate credit hours, which must include twelve (12) credit hours of Dissertation Research (ENGL 690); successfully complete the Modern and Contemporary Rhetoric and Composition exam and the Specified Literature Area exam; and complete and defend a dissertation.

More information on requirements can be found in the English Department Graduate Program Guidelines (<https://louisville.edu/english/graduate/graduate-program-guidelines/>).

Graduate-level English courses beyond those listed may count towards requirements depending on the topics covered. Detailed course descriptions (<http://louisville.edu/english/graduate/course-descriptions/>), available on the English Department website, will provide this information and can be discussed during advising with the director of graduate studies.

Code	Title	Hours
General Requirements		
ENGL 602	Teaching College Composition ¹	3
ENGL 620	Research in the Composition	3
GS 799	Doctoral Exam Prep ²	0
Pedagogy and Program Administration		3
ENGL 667	Assessing and Responding to Student Writing or ENGL 670 Composition Theory and Practice	
Rhetoric		3
ENGL 603	Studies in Genres or ENGL 671 History of Rhetoric I or ENGL 672 History of Rhetoric II or ENGL 673 Rhetoric and Textual Analysis or ENGL 676 The Rhetoric of Science	
Critical Theory		3
ENGL 691	Contemporary Theories of Interpretation or ENGL 692 Topics in Interpretive Theory Since 1900	
Literature ³		6
ENGL 603	Studies in Genres or ENGL 605 Teaching Literature: Theory and Practice or ENGL 606 Creative Writing I or ENGL 607 Creative Writing II or ENGL 624 Old English and Middle English Language and Literature or ENGL 631 Renaissance Drama or ENGL 632 Shakespeare or ENGL 633 Renaissance Poetry and Prose	

or ENGL 642 Eighteenth-Century Fiction	
or ENGL 643 Eighteenth-Century Poetry and Prose	
or ENGL 644 Romantic Poetry and Prose

or ENGL 654 Twentieth-Century Literature	
or ENGL 660 African-American Literature	
or ENGL 661 Nineteenth-Century American Fiction	
or ENGL 662 Nineteenth-Century American Poetry and Prose	
or ENGL 664 American Authors: 1900-Present	
or ENGL 665 Contemporary Poetry	
or ENGL 681 Seminar in Special Studies	
or ENGL 685 Seminar in Modern British Studies	
or ENGL 686 Seminar in American Studies	
Electives	9
Three further seminars in Rhetoric and Composition; or two Rhetoric and Composition seminars plus one course taken outside the department.	
Dissertation Research	0
ENGL 690	Dissertation Research ⁴ 12
Minimum Total Hours	42

¹ ENGL 602 is a requirement even for those students who have completed an equivalent course at another institution. The Director of Composition has the sole right to waive this requirement.

² Non-GTA PhD students are not required to be enrolled in GS 799 at any point.

³ The six (6) credit hours of Literature courses may be selected from any of the courses listed, as approved by the Director of Graduate Studies. Students may fulfill this requirement with critical theory, literature, or creative writing. Three (3) of the six (6) credit hours may be in creative writing (ENGL 606 or ENGL 607).

⁴ The program requires at least twelve (12) credit hours of ENGL 690 (Dissertation Research).

Entrepreneurship (PhD)

Doctor of Philosophy in Entrepreneurship
Unit: College of Business (<http://business.louisville.edu/>) (GB)
Department: Entrepreneurship (<http://business.louisville.edu/eship/>)
Program Website (<https://business.louisville.edu/academics-programs/graduate-programs/eandi-phd/>) (<https://business.louisville.edu/academics-programs/graduate-programs/eandi-phd/>)
Academic Plan Code(s): ENTRPHD

Program Information

Admission to the program is highly competitive. It is based on an applicant's past graduate and undergraduate school records, score on the graduate management admissions test (GMAT) and/or Graduate Record Examination (GRE), relevant professional and research experiences, a personal statement, and letters of recommendation.

No specific graduate or undergraduate major is required. However, an MBA or entrepreneurship-related master's degree is preferred. A student who does not have a master's degree in business may be required to complete a set of courses equivalent to a "core" that is covered in

an MBA program. Questions about prerequisites should be directed to the program director. This is a full-time program, requiring year-round study and a 20-hour/week paid research assistantship. Typically, students can finish their coursework in two years and the program in four years, subject to progress on a dissertation. Students must complete 52 credit hours, which consists of required and elective seminars, independent research, and a professional development workshop. A student's curriculum choices are supervised and approved by an advisory committee.

All required courses are offered on a biennial basis in the Fall, Spring, and Summer semesters, along with a variety of elective courses.

Admission Requirements

Admission to the program is highly competitive. This is a full-time program, requiring year-round study and a 20 hour/week paid research assistantship. Typically, students can finish their coursework in two years and the program in four years, subject to progress on a dissertation. Students generally take about fifteen courses consisting of seminars and directed readings and/or research. A student's curriculum choices are supervised and approved by an advisory committee.

The following application materials are **required**:

- Complete a graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for admission through the Graduate School.
- Official transcripts of all undergraduate and graduate work. An undergraduate degree is required. No specific graduate or undergraduate major is required. However, an MBA is preferred. A student who does not have a master's degree in business may be required to complete a set of courses covered in an MBA program.
- Official GMAT score. A GMAT score is required that is no more than two years old from date of application. A GRE score may be substituted for a GMAT score where GMAT testing is not available.
- Two letters of recommendation.
- Resume or CV.
- Personal statement about the applicant's interest in entrepreneurship research.
- Applicants with credentials from foreign universities must submit them for evaluation to one of the following services, which will issue a report that will become part of the applicant's application:
 - World Education Services www.wes.org (<http://www.wes.org>)
 - Education Credentials Evaluator ece.org (<http://ece.org>)
- Applicants with a degree from a non-English speaking university or those for whom English is not their native language must submit a TOEFL (<https://www.ets.org/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>) score.

All required courses are offered on a biennial basis in the fall, spring and summer semesters.

Degree Requirements

The PhD program in Entrepreneurship produces aspiring scholars who become faculty members at leading business schools worldwide, well trained to both teach and conduct high quality research in the domain of entrepreneurship, as well as provide valuable service to their institutions, the scholarly profession, and their local communities.

To prepare for their future faculty roles, students are full-time students and serve as research assistants during the first two years of the

program. Students gain teaching experience during the last two years in the program. Students will also participate in a professional development workshop throughout their tenure in the program.

After passing qualifying exams, required courses, and writing required papers, students proceed into candidacy and write their doctoral dissertations in their remaining years of the program.

The following are the current curriculum requirements for the Entrepreneurship PhD, which includes 52 credit hours of approved course work. Because the state of the knowledge in the field changes, both the content and sequencing of these course requirements changes to address topics of current interest in the field. Faculty may change as well.

The curricular requirements include:

- At least 52 credit hours at the 700-level that includes pre-dissertation/dissertation research coursework.
- Included with the 52 credit hours, students will complete a minimum of 39 credit hours in courses dedicated to the primary area of study. This includes:
 - Entrepreneurship core which consists of a minimum of 12 credit hours required of all PhD students that includes: ENTR 723, ENTR 724, ENTR 745, and ENTR 746.
 - Research design and methods which consists of a minimum of 12 credit hours required of all PhD students that includes: ENTR 702, ENTR 741, ENTR 710, and ENTR 711
 - Supporting field seminars which consist of a minimum of 15 credit hours in supporting course work that is approved by the PhD advisory committee.

Applicants should contact the Program Director, Dr. Daniel Bennett, at daniel.bennett.2@louisville.edu (danielbennett.2@louisville.edu) if they have questions about the curriculum requirements.

Code	Title	Hours
<i>Primary Area Courses</i>		
Entrepreneurship Core		12

Epidemiology (MS)

Master of Science in Epidemiology

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>) (GH)

Department: Epidemiology and Population Health (<https://louisville.edu/sphis/departments/eph/>)

Program Website (<https://louisville.edu/sphis/departments/eph/academics/>)

Academic Plan Code(s): EPIDMS_O

Program Information

This program is completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-science-in-epidemiology/>).

The Master of Science (MS) in Epidemiology program is designed as a terminal degree to prepare students for a career as an epidemiologist, and also prepares students for the PhD program in Public Health Sciences with a specialization in Epidemiology. The MS in Epidemiology is offered by the Department of Epidemiology and Population Health.

Competencies

To graduate, students in the MS program in epidemiology must maintain a GPA of 3.0 or higher and be able to demonstrate the following competencies:

- Explain the evolving paradigms of epidemiologic theory and study design and their impact on public health and medical sciences
- Summarize scientific literature on an epidemiologic problem
- Formulate epidemiologic research questions and testable hypotheses
- Apply computer software for data management and analysis
- Design and apply methods for data collection and management for epidemiologic research
- Apply advanced quantitative methods to analyze an epidemiologic problem
- Integrate cross-disciplinary knowledge from molecular to population levels to make appropriate causal inferences
- Communicate in written and oral presentations epidemiologic concepts and findings to diverse audiences

In greater detail, an MS student must specifically demonstrate:

- Mastery of the principles of epidemiologic, observational study design, including:
 - The merits and limitations of cross-sectional, retrospective and prospective designs
 - Methods of disease surveillance and case ascertainment
 - Methods of population-based sampling
 - Sample size and statistical power calculation
 - Issues in the measurement of exposure and disease transmission
 - Identification and correct interpretation of potential biases in study design
- Knowledge of the socioeconomic and geographic distribution, risk factors, and etiology of major acute, infectious and chronic morbidity and mortality.
- Mastery of basic methods of analysis of epidemiologic data, including:
 - Measures of disease frequency, prevalence and incidence
 - Methods for adjusting rates for age, gender, etc.
 - Measures of association, odds ratio, relative risk
 - Control of confounding and effect modification through stratification and statistical control
 - Modeling in multiple logistic regression
 - Principles of survival analysis
 - Correct interpretation of results with regard to issues of error, bias and criteria for causality

These competencies are demonstrated through the successful completion of the coursework.

Curriculum

The program is designed as a fifteen month (4 semester) program of coursework.

Faculty Advisor

Upon admission to the MS program, each student is assigned a faculty advisor by the department chair or program director. Students and/or advisors who wish to change their assigned relationship must make a written request to the department chair or program director.

Admission Requirements

Students with a prior baccalaureate degree or an advanced degree in an appropriate field of study from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies/#RegionalInstitutional>) are eligible for the MS program in Epidemiology.

Successful completion of college level algebra (or higher level math) with a grade of B or higher is required, evidenced via college transcripts. High School AP credit does not satisfy this requirement. Previous coursework in statistics is required, and biological or health sciences (for example, biology, biochemistry, anatomy, physiology, and/or microbiology) is strongly recommended. Applicants who are judged to not have sufficient prior coursework or experience in these areas may be required to take additional coursework.

The following are required for admission:

- Formal application through the Graduate School (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) with transcripts and curriculum vitae,
- A one-page personal statement describing the applicant's background and interest in epidemiology,
- Two letters of recommendation,
- Undergraduate GPA at least 3.0 on 4.0 scale,
- Official transcripts of all degrees
 - International applicants: Foreign credential evaluation of all degrees from non-U.S. institutions.
- International students for whom English is not their primary language must show English language proficiency by one of the following:
 - Demonstration of a degree awarded from an institution with instruction primarily in English, as formally documented by an appropriate institutional official
 - Duolingo test score of 105 or higher
 - IELTS test score of 6.5 or higher
 - TOEFL examination score of 213 (computer based test) or 79 (internet based test)

Application Deadline

Fall semester - July 1

Spring semester - Applications are not accepted.

Summer semester – Applications are not accepted.

Program Requirements

Degree requirements include required coursework in epidemiology, including epidemiologic methods, theory, and substantive knowledge, as outlined in the course plan.

Academic Standing

To maintain good academic standing in the MS in Epidemiology program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any MS in Epidemiology student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Coursework

30 total credit hours of required coursework

Semester 1		Hours
PHEP 612	Statistics for Epidemiologic Research and Practice	3
PHEP 618	Epidemiologic Methods I	4
Hours		7
Semester 2		
PHEP 619	Biology of Disease in Populations	3
PHEP 627	Survey Research Methods	3
PHEP 628	Computational Epidemiology with SAS	3
Hours		9
Semester 3		
PHEP 630	Study Coordination Skills for Epidemiologic Research	3
PHEP 623	Theoretical Foundations of Epidemiology	3
Hours		6
Semester 4		
PHEP 629	Computational Epidemiology with R	3
PHEP 614	Introduction to Clinical Epidemiology	2
PHEP 620	Environmental and Occupational Epidemiology	3
Hours		8
Minimum Total Hours		30

Successful completion of both PHEP 612 and PHEP 618 is required in order to enroll in the remaining courses. The remaining courses (listed in semesters 2, 3, and 4) can be taken in any order.

Exercise Physiology (MS)

Master of Science in Exercise Physiology (EXP MS)

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Health and Sport Sciences (<http://louisville.edu/education/departments/hss/>)

Program Webpage (<https://louisville.edu/education/degrees/ms-ep/>)

Academic Plan Code(s): EXP_MS

Program Information

Students who complete the Master of Science degree in Exercise Physiology are prepared to pursue a number of career options. Graduates from our program have continued their education by completing the PhD degree in fields such as exercise physiology, physiology, biochemistry, while others continue to the MD. Many students have pursued careers in allied health fields such as nursing and physical therapy as well as in such fields as aviation physiology, cardiac rehabilitation, corporate wellness, and ergonomics.

The MS in Exercise Physiology program prepares students to sit for examinations to qualify for certifications offered by private organizations including the American College of Sports Medicine, the National Strength & Conditioning Association, and the Collegiate Strength and Conditioning Coaches Association. These certifications are sometimes preferred or required for employment in specific settings (e.g., hospitals, college campuses) within the exercise physiology field. However, the program is not designed to prepare students for any professional licensure issued by any US state or other jurisdiction.

Because many of our students seek to work in the fields of cardiac rehabilitation and corporate wellness, the curriculum is structured to satisfy the preliminary requirements for certification as "exercise technologist" or "exercise specialist" as set by the American College of Sports Medicine. The curriculum provides students the necessary knowledge base and coursework to satisfy entrance into the certification process (which is under the control of the American College of Sports Medicine and requires both a written and practical exam).

Admission Requirements

- Complete a graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) for admission.
- Earning an undergraduate major (exercise science, kinesiology, physical therapy, medicine, physiology, nursing, biology, chemistry, etc.) with a Grade-Point Average ≥ 2.75 on a 4-point scale. All applicants must submit **official transcripts showing** all degrees awarded and all undergraduate and graduate work (all courses) completed from each accredited college/university previously attended.
- Completion of all prerequisite courses from the following list with a grade ≥ 3.0 on a 4-point scale: Exercise Physiology; Biomechanics/Structural Kinesiology; Anatomy & Physiology (minimum of six (6) credit hours).
- A resume where candidates will describe the experience they have accumulated in the fields of exercise science, exercise physiology, sport science, and/or strength and conditioning and a personal statement (500 words or less) where candidates will explain their interest in the program and professional objectives.
- Three letters of recommendation.
- All applicants for whom English is a second language must also submit official TOEFL scores of 80 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.

- Following review of materials listed above, eligible candidates will be invited to an interview with the selection committee where they will be provided with information about the program and will further discuss the content of their application.

Degree Requirements

Note: Students will choose either EXP 620 Exercise Physiology Internship (six (6) credit hours) or EXP 699 Thesis (six (6) credit hours).

Family Business Management and Advising (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Family Business Management and Advising
Unit: College of Business (<https://business.louisville.edu/>)
Program Website (<https://business.louisville.edu/learnmore/onlinefamilybusiness/>)
Academic Plan Code(s): FBMACGRO

Program Information

This program is completed 100% online (<https://business.louisville.edu/learnmore/onlinefranchise/>).

This program is designed to align with the needs of family enterprises, their current and future leaders (both family and non-family), and the professional advisors who serve them. This graduate certificate program will provide students with knowledge and skills that will help them understand, manage, and navigate the intricacies of family businesses and provide tools to advise them.

Courses in this certificate program will also count toward the College of Business MBA program.

Admission Requirements

Students must have a bachelor's degree from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>) and a minimum undergraduate GPA of 2.5 to be admitted to the Family Business Management and Advising certificate program.

GMAT/GRE scores will not be required for admission to the program.

Students will be required to complete all courses and maintain a 3.0 GPA in order to graduate.

Franchise Management (CERT)

Graduate Certificate in Franchise Management

Unit: College of Business (<https://business.louisville.edu/>) (GB)
Program Website (<http://louisville.edu/online/programs/certificate-programs/franchise-management/franchise-management-certificate/>)
Academic Plan Code(s): FM_ _CFM, FM_ _CFMO

Program Information

This program can be completed 100% online. (<https://business.louisville.edu/learnmore/onlinefranchise/>)

The Franchise Management Certificate is a nine (9) credit hour certificate that focuses on the unique skills and knowledge necessary to succeed as a franchisee—including acquiring, running, and growing franchise operations.

The curriculum was designed in close partnership with industry experts. The six accelerated, highly focused, 1.5 credit hour courses are designed for individuals who plan to become franchisees, as well as existing single-site franchisees who want to gain the skills and knowledge necessary to grow their franchise business. Those working for franchisors will also benefit in understanding the franchising industry, allowing them to create even stronger relationships with their franchisees. The curriculum is 100% asynchronous, allowing students the flexibility to learn at the time best for them.

The Franchise Management certificate can be taken in conjunction with the MBA program (p. 105). For students who are accepted into the MBA program, it will count towards fulfilling elective requirements in the MBA curriculum.

Admission Requirements

Students must have a bachelor's degree from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/>)

higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional) and a minimum undergraduate GPA of 2.0 to be admitted to the Franchise Management certificate program.

GMAT/GRE scores are not required for admission to the program.

Complete a graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Please note: Students who desire to complete an MBA in conjunction with the Franchise Management certificate must be separately admitted to the MBA program (p. 105).

Program Requirements

Code	Title	Hours
FRAN 601	Franchise Fundamentals	1.5
FRAN 610	Franchise Law	1.5
FRAN 620	Buying and Growing a Franchise	1.5
FRAN 630	Franchise Human Resources Infrastructure	1.5
FRAN 640	Leading Franchise Teams	1.5
FRAN 650	Building a Profitable Relationship with Your Franchisor	1.5
Minimum Total Hours		9

To complete the program, students must have a minimum of a 3.0 cumulative grade point average.

Geography, Applied (MS)

Master of Science in Applied Geography

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Department: Geographic and Environmental Sciences (<http://louisville.edu/geogeo/>)

Academic Plan Code(s): AGEOMS

Program Information

The Master of Science in Applied Geography is designed to provide students with the analytical skills and background knowledge needed to solve real-world problems with geographic dimensions. Graduate students experience a nucleated body of coursework designed to foster and support the theoretical knowledge and advanced skill sets demanded for the professional and academic/research fields. Coupled with the enhanced level of course content, quantitative, qualitative and spatial data analysis applications, and the departmental emphasis upon critical reasoning, effective writing and communication skills, graduates will be capable and prepared for effective integration into a broad diversity of professional fields.

Our course offerings and faculty research areas include geographic information systems (GIS), remote sensing, climatology and meteorology, urban and regional studies, quantitative and qualitative methods, medical geography, globalization, hydrology and water resources, geomorphology, transportation and location analysis, border security, land use/land cover change and the geography of food and race.

Geographic information systems (GIS) proficiency is required for all students. If not attained at the undergraduate level or in a job-related environment, students will be required to take GEOG 558 in addition to the

coursework listed as program requirements. The department has state-of-the-art computer facilities with GIS and remote sensing software.

The program offers both a thesis and non-thesis option. Students who choose the non-thesis option are required to take a written comprehensive exam near the end of their course of study. Students may attend either full or part-time.

Admission Requirements

Students from geography and related fields are encouraged to apply. All applicants must hold a BA or BS degree from an accredited college or university and must have earned a minimum cumulative 3.0 GPA to be admitted in good standing. Students with a minimum cumulative 2.75 GPA may be accepted under special conditions.

All applicants must complete/submit the following:

- A graduate admissions application (<https://graduate.louisville.edu/admission/apply/>)
- Official transcripts from all colleges and/or universities attended
- Two letters of recommendation addressing the candidate's academic abilities, readiness for graduate study, and potential for success. Letters from current and/or former faculty members are preferred.
- A statement of interests and intent covering relevant experience, potential areas of research/study, academic/career goals, and how the MS in Applied Geography would allow the applicant to achieve these goals.

All materials must be submitted to the Graduate School.

Application deadlines:

- May 15 for fall semester (individuals desiring consideration for Graduate Assistantships should apply by March 15)
- November 15 for Spring semester

Upon acceptance, students receive an enrollment form from the Department with questions about credit hours and financial assistance.

Program Requirements

The Master of Science in Applied Geography is a 30 credit hour program with both a thesis and a non-thesis option.

Geographic information systems (GIS) proficiency is required for all students. If not attained at the undergraduate level or in a job-related environment, students will be required to take GEOG 558 in addition to the [coursework requirements](#) listed [below](#).

Thesis Option

Code	Title	Hours
Required Foundation Courses		12
GEOG 600	History and Philosophy of Geography ¹	
GEOG 656	Spatial Statistics ¹	
GEOG 660	Qualitative Methods in Applied Geography ¹	
GEOG 641	Research Design and Proposal Development in Applied Geography	
Electives at 500 or 600 level ²		12
Thesis		6
Minimum Total Hours		30

After the second semester, each thesis student will choose a thesis advisor and two other faculty members for a thesis committee.

Non-Thesis Option

Code	Title	Hours
Required Foundation Courses		12
GEOG 600	History and Philosophy of Geography ¹	
GEOG 656	Spatial Statistics ¹	
GEOG 660	Qualitative Methods in Applied Geography ¹	
GEOG 641	Research Design and Proposal Development in Applied Geography	
Electives at 500 or 600 level ²		18
Comprehensive Examination		
Minimum Total Hours		30

Non-thesis students will choose a three member advising committee to administer and evaluate the comprehensive exam.

¹ GEOG 600, GEOG 656 and GEOG 660 are prerequisites to GEOG 641.

² Up to two courses used to satisfy the elective requirement may be from outside the department (non-GEOS/ENVS courses). A minimum of 15 credit hours counted towards the degree (excluding thesis, practicum and internship credit) must be taken at the 600-level.

Health Administration (MS)

Master of Science in Health Administration (HEADMS)

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>) (GH)

Department: Health Management and Systems Sciences (<https://louisville.edu/sphis/departments/health-management-systems-sciences/>)

Program Website (<https://louisville.edu/sphis/departments/health-management-systems-sciences/academics-1/ms-in-health-administration/>)

Academic Plan Code(s): HEADMS, HEADMS_O

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-science-in-health-administration/>).

Please note: The last admit semester for the **EVENING TRACK/IN-PERSON OPTION (HEADMS)** is Fall 2025.

Healthcare management is a broad field serving one of the largest and most essential industry segments in the United States and Canada. Management is needed in multiple aspects of the industry which include: hospitals, nursing homes, physician's offices, pharmaceutical and device manufacturers, consulting, government and public policy, and many more.

The Department of Health Management and Systems Sciences (HMSS) offers the Master of Science in Health Administration degree for students with no healthcare experience (MSHA-evening) and a modified curriculum for working mid-careerists (MSHA-online). Evening track and Online track students may be enrolled full or part-time. HMSS recognizes the need to train and further educate skilled population health leaders and managers to meet immediate critical organizational system-wide challenges

through effective, efficient utilization of healthcare resources to provide quality healthcare equitably.

Competencies

The Program will use the University of Louisville's Population Health Leadership (PHL) Competency Model. This competency model is a modified version of the National Center for Health Care Leadership (NCHL) competency model ([nchl.org](http://www.nchl.org) (<http://www.nchl.org>)).

For a complete listing of the competencies for this program, please visit the MSHA webpage (<http://louisville.edu/sphis/departments/health-management-systems-sciences/academics-1/ms-in-health-administration/>) for the School of Public Health and Information Sciences.

Curriculum

The curriculum has three main components beginning with an exploration of broad principles and key influencers of leading healthcare organizations, moving to an examination of evidence-based and data-driven frameworks for strategic leadership and effective management of healthcare organizations and issues, and then to an analysis of the external health care and policy environments that impact population and community healthcare management.

Accreditation

The Master of Science in Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME) (<https://www.cahme.org/>).

Faculty Advisor

On matriculation, each student is assigned a faculty advisor. The faculty advisor serves as academic practicum advisor, academic mentor, and counselor on career and employment opportunities, professional development, and opportunities beyond graduate school. Evening track students are encouraged to meet at least twice each semester with their advisor. Online track students will meet with their advisor at least once each semester to ensure appropriate enrollments align with degree completion requirements.

Dual MPH in Health Policy – Masters in Health Administration

DUAL MPH-HP – MSHA TO BE CLOSED: LAST ADMIT TERM FALL 2025

The dual MPH (Health Policy) - MSHA degree program facilitates development of advanced population and public health management professionals that may leverage knowledge and practices from both public health science and healthcare management domains to serve in leadership roles within public health institutions, federal-state-local agencies, and healthcare organizations. For more information about the dual program, please visit the program webpage (<https://louisville.edu/sphis/departments/hmss/academics-1/dual-mph-in-health-policy-msha-program/>).

The dual MPH - MSHA program is not available to MSHA Online track students. Only MSHA Evening track students may apply.

Dual MBA – Masters in Health Administration

DUAL MBA – MSHA TO BE CLOSED: LAST ADMIT TERM FALL 2025

The dual MBA - MSHA degree program provides select, high aptitude graduate students a pathway for rigorous, advanced competency development by providing complementary graduate management and healthcare management education over a three-year period in a dual degree format. The residential, one-year MBA provides fundamental business and management development and is followed by the residential, two-year MSHA providing advanced competencies focused in healthcare management that extend development from the MBA program through coursework, health administrative internship/practicum experiences, and extra-curricular graduate healthcare management case study and applied research competitions. Graduates of the dual MBA-MSHA program are expected to be exceptionally competitive for national administrative fellowship placement and/or seek executive-track developmental positions in healthcare finance, operations, and strategy. For more information about the dual program, please visit the program webpage (<https://louisville.edu/sphis/departments/hmss/academics-1/dual-mba-msha/>).

The dual MBA - MSHA program is available for on campus MBA and Evening track MSHA students only.

This program is not accepting applications for admission in the spring 2025 term; applications for admission will reopen beginning in fall 2025.

Admission Requirements

The Department of Health Management and Systems Sciences (HMSS) offers the Master of Science in Health Administration degree for students with no healthcare experience (evening track) and a modified curriculum for working mid-careerists (online track).

Prospective students must have a bachelor's degree from an accredited institution or its equivalent. It is recommended that applying students have a minimum undergraduate GPA of 3.0 on a 4.0 scale

Prospective students must also submit:

- Application
 - Graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) submitted to the Graduate School.
 - Application Fee
- Official transcripts of all degrees
- Resume or curriculum vitae (CV)
- One-page personal statement written by the applicant that is a clear, substantive description of his or her goals in public health and health care management, noting any professional or research experience.
- Three letters of recommendation written within the last twelve months.
- International applicants: Foreign credential evaluation of all degrees from non-U.S. institutions. Please contact the MSHA program prior to completing this requirement.
- Admission interviews by the HMSS Health Leadership Committee are required and are in addition to your application for admission. An interview provides the HMSS Health Leadership Committee an additional source of information and perspective about your potential fit for the University of Louisville.
- If candidate's primary language is not English, one of the following:

- Test of English as a Foreign Language (TOEFL) exam with a minimum score of 79
- IELTS scores of at least 6.5 overall
- Duolingo overall score of 105
- Degree from an accredited U.S. institution

Evening Track Admissions

Last Admit Term: Fall 2025

Students entering the MSHA Evening track are expected to have less than five years of working experience and be seeking an on-campus, synchronous learning experience. A portion (5) of the Evening track required courses will be offered online, combining course sections with Online track students.

Online Track Admissions

Students entering the MSHA online track must have a minimum of five years working experience. Preference will be given to students with healthcare-related work experience. Click here to apply to the online MSHA program (<http://louisville.edu/online/programs/masters/online-master-of-science-in-health-administration/>).

Dual MPH in Health Policy/MSHA Admissions

Last Admit Term: Fall 2025

Students must apply to and be accepted into both the MPH-HP and MSHA programs. *Each program will require a separate application and application fee.* [For more information about the dual program, please visit the program webpage.](#)

Dual MBA/MSHA Admissions

Last Admit Term: Fall 2025

Students must apply to and be accepted into both the MBA and MSHA residential, full-time programs. *Each program will require a separate application and application fee.* [For more information about the dual program, please visit the program webpage \(https://louisville.edu/sphis/departments/hmss/academics-1/dual-mba-msha/\).](https://louisville.edu/sphis/departments/hmss/academics-1/dual-mba-msha/)

Application Deadlines

- Evening Track: Applications are accepted for Fall semester only.
 - March 1st for International applicants
 - July 1st for Domestic applicants
- To be competitive for available program scholarship opportunities, applicants should apply on or before March 1st for full consideration.
- Spring semester - Applications are not accepted.
- Summer semester - Applications are not accepted.
- Online Track: Applications are accepted on a rolling basis.
 - July 1st for Fall I Term
 - Spring semester - Applications are not accepted.
 - Summer semester - Applications are not accepted.

For information on the application process, please contact:

MSHA Program Coordinator
Department of Health Management and Systems Sciences
School of Public Health and Information Sciences
University of Louisville
485 E. Gray Street

Louisville, KY 40292
P. 502-852-2797
Email: sphishms@louisville.edu

Program Requirements

To graduate, students must successfully complete the 46 (Evening track) or 43 (Online track) credit hour curriculum, earn a grade of B or above in the MSHA Capstone Course, and have an overall 3.0 GPA in program coursework.

All courses within the curriculum are required and there are no electives. Students within both the evening and online tracks take the same courses except for the MSHA Practicum. The practicum is designed to expose students new to the health management field to working conditions in healthcare organizations between their first and second year in the Program. MSHA evening track students will register in the Practicum for one (1) credit hour in three consecutive semesters beginning in Spring I for a total of three (3) credit hours. Since the online track students have working organizational experience, the practicum is not required.

Academic Standing

To maintain good academic standing in the MS in Health Administration program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any MS in Health Administration student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Evening Track Requirements

Education Plan

The evening track is designed so that students can work as full-time employees and attend evening classes. The practicum courses, PHMS 686, PHMS 691, and PHMS 692, are designed to expose students new to the health management field to working conditions in healthcare organizations between their first and second year in the Program.

Coursework

Year 1		
Fall		
		Hours
PHMS 505	Governance and Management of Healthcare Organizations	3
PHMS 509	Health Finance and Financial Management	3
PHMS 680	Health Management Leadership Seminar (8 wk Online - F1*)	1

Minimum Total Hours 46

* F1, F2, S1, S2 refer to 1st or 2nd 8-week session for Fall and Spring terms.

Online Track Requirements

Education Plan

The guiding philosophy for the online track in the MSHA curriculum design is that an online, primarily asynchronous learning basis will be used so that the mid-careerists can continue working in their current jobs while in the Program. Courses will be developed in partnership with the Delphi Center for Online Learning adhering to the Quality Matters online course development standards. Courses will be offered in five eight-week terms within the Fall (F1, F2), Spring (S1, S2), and Summer terms to facilitate year-round student enrollments and the ability for working professionals to focus on fewer courses within concentrated periods of time.

Coursework

Year 1

Fall		Hours
Session 1:		
PHMS 505	Governance and Management of Healthcare Organizations	3
PHMS 520	Foundations of Public Health in Health Management	3
PHMS 680	Health Management Leadership Seminar	1

Minimum Total Hours		43

PHMS 686 MSHA Practicum Experience I, PHMS 691 MSHA Practicum Experience II, and PHMS 692 MSHA Practicum III (three (3) credit hours total) – Evening Track only

Students develop an understanding and gain knowledge of the complex health care industry and the internal and external factors that influence decision-making in an assigned organization.

PHMS 690 MSHA Capstone Course (three (3) credit hours)

The primary objective of the course is to assist students in the transition from theory to practice and from learner to user of management knowledge and skills. The course will emphasize the integration and application of management theory in ‘real world’ context.

Dual MPH in Health Policy/MSHA Program Requirements

The Dual program is not available to MSHA Online track students. Only MSHA Evening track students may apply.

Accreditation

The School of Public Health and Information Sciences is accredited by the Council on Education for Public Health (CEPH).

The University of Louisville is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

The Master of Public Health with a concentration in Population Health Management program is currently undergoing the initial Commission on Accreditation of Healthcare Management Education (CAHME) accreditation approval process and is in “candidacy” status. Once the MSHA degree is approved, HMSS will inform CAHME of the curriculum change and the accreditation will transfer to the MSHA.

For more information, see the School’s accreditation webpage (<http://louisville.edu/sphis/accreditation/>).

Dual Master of Science, Health Administration - Master of Public Health, Health Policy

[Unit: Public Health and Information Sciences](#)

Academic Plan Code: PH_ _MPHHP, HEADMS

Program Information

The dual MPH (Health Policy) - MS Health Administration degree program facilitates development of advanced population and public health management professionals that may leverage knowledge and practices from both public health science and healthcare management domains to serve in leadership roles within public health institutions, federal-state-local agencies, and healthcare organizations. For more information about the dual program, please visit the [program webpage](#).

Admission Requirements

Students must apply to and be accepted into both the MPH-HP and MS-HA programs. Only MS-HA Evening track students may apply. [Each program will require a separate application and application fee.](#)

The dual program is not available to MSHA Online track students.

Program Requirements

Health and Physical Education (MAT)

Master of Arts in Teaching Health and Physical Education

Unit: College of Education and Human Development (<https://louisville.edu/education/>) ([GE](#))

Department: Health and Sport Sciences (<https://louisville.edu/education/departments/hss/>)

Program Website (<https://louisville.edu/education/degrees/mat-hpe/>)

Academic Plan Code(s): HPEDMAT

Program Information

The Master of Arts in Health and Physical Education degree provides Kentucky certification in grades P-12.

The Departments of Teaching and Learning and Health and Sport Sciences are committed to the highest standards of professional preparation. Our programs have sought and received national accreditation from the Council for the Accreditation of Educator Preparation. Graduates of initial teacher certification programs at the University of Louisville begin their teaching careers secure in the knowledge that they have been prepared for the real world of classrooms through a rigorous teacher preparation program.

The degree offers school-based methods in the fall semester (August-December) in health and physical education for grades P-12. During the fall semester, candidates will take their methods courses and a reading and writing across the curriculum course. During the spring semester, candidates complete 15-weeks of student teaching at both the elementary and secondary levels, and a weekly seminar class. The program's schedule coincides with that of the public schools. Candidates progress through the program in a cohort group. The program is full-time and classes are offered only during the day.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program. Candidates considering application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission. UofL undergraduate students, with a major in Health and Human Performance - Physical Education Teacher Preparation, should direct questions to Dr. Carla Vidoni at carla.vidoni@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?carla.vidoni>).

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

1. Graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)/MAT Program. This should be completed three to four weeks prior to the application deadline.
2. Praxis II Content Exam(s) (<https://praxis.ets.org/>) The praxis test of content "Health & Physical Education" required for admissions.
3. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required). If you are a current UofL student, you do not need to submit transcripts!
4. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-hpe-prereq/>)
5. Grade of C or higher in Oral Communication Course
6. Grade of C or higher in ENGL 102
7. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
8. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
9. Three Letters of Recommendation
10. Acceptable interview
11. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admission Guidelines

Program Requirements

Code	Title	Hours
HSS 605	Teaching and Learning for Elementary Physical Education	4
HSS 606	Teaching and Learning for Secondary Physical Education	4
HSS 609	Teaching and Learning for Health Education	4
EDTP 620	Reading and Writing Across the Curriculum	3
Mid-point assessment ¹		
HSS 611	Seminar in Student Teaching in Health and Physical Education	3
HSS 612	Student Teaching: Elementary Physical Education ¹	4
HSS 613	Student Teaching: Middle/Secondary Physical Education ¹	4
HSS 615	Student Teaching: Health Education	4
Minimum Total Hours		30

¹ These courses are the exit requirements for this program. Includes teacher certification in P-12 health and physical education

Mid-point Assessment: All content methods classes listed above passed with a cumulative 3.0 GPA; satisfactory dispositions assessment; Electronic documentation of 200 hours of diverse and approved field experiences; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Certification Assessment: Satisfactory dispositions assessment; passing scores on required PRAXIS exams; completion of degree requirements.

Degree Assessment: All program coursework with 3.0 cumulative GPA (no more than two "C"s" in degree courses); 2.5 cumulative GPA in content course requirements; a "C" GPA or higher in each student teaching;

satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Candidacy: Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

Praxis Disclaimer: Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Professional Standards Board (EPSB) website at www.epsb.ky.gov (<http://www.epsb.ky.gov/>) or www.ets.org/praxis/ky (<https://www.ets.org/praxis/ky/>) for current requirements.

The Master of Arts in Teaching Health and Physical Education (HPEDMAT) program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Healthcare Ethics (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Health Care Ethics
Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)
Department: Philosophy (<http://louisville.edu/philosophy/>)
Program Website (<https://louisville.edu/philosophy/academics/graduate/>)
Academic Plan Code(s): HCE_CGR

Program Information

Health care in the twenty-first century faces a series of ethical challenges arising from unprecedented advances in the medical sciences, combined with radical cultural and organizational change. The big business of health care can bring issues of social difference and injustice directly to our attention in the faces of individual patients.

The graduate certificate in Health Care Ethics is a 15 credit hour interdisciplinary graduate certificate is drawn primarily from coursework already offered for the MA and can be completed in one academic year. The certificate focuses on issues of social justice and the importance of race, gender, class, sexuality, religion, and culture on health and health care. The certificate is designed to serve mid-career professionals, faculty

and staff on hospital ethics committees, and students in graduate and professional programs who want to enhance their credentials.

Admission Requirements

Students may be admitted to the graduate Health Care Ethics certificate program in any of the three ways:

1. Completion of a graduate admissions application (<https://graduate.louisville.edu/admission/apply/>);
2. Admission to any graduate or professional degree program at UofL, plus a letter of interest with the name of a faculty member who is willing to endorse the student's readiness to pursue the certificate;
3. A graduate or professional degree in a related field from an accredited institution of higher learning, plus a letter of interest with one professional reference; or
4. Meeting the admissions requirements already established for the MA in Applied Philosophy.

Certificate Requirements

Code	Title	Hours
Select nine (9) credit hours from the list below:		9
BETH 621	Ethical Theory

SOC 685	Race and Ethnicity
SOC 740	Social Policy
MSSW 602	Social Welfare Policy I
MSSW 603	Diversity, Oppression, and Social Justice Practice
MSSW 622	Social Welfare Policy II
MSSW 626	Research Methodology and Design
MSSW 633	Social Work and Human Sexuality
MSSW 636	Advanced Death & Grief
MSSW 684	Spirituality and Social Work

Minimum Total Hours**15**

Students may graduate with the Certificate after completing nine (9) credit hours of core Bioethics (BETH) courses plus six (6) credit hours of electives drawn from either i) additional core courses, or ii) the list of approved electives in the HCE MA program, or another elective approved by the director of graduate studies for the Philosophy department.

At least nine (9) credit hours must be at the 600 level. An average of a B, with no more than one C, will be required for graduation; GPA of 3.0 or above.

Healthcare Financial Management (CERT)

Graduate Certificate in Healthcare Financial Management

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>)

Department: Health Management & Systems Sciences (<https://louisville.edu/sphis/departments/hmss/>)

Program Webpage (https://louisville.edu/online/programs/certificate-programs/online-graduate-certificate-in-healthcare-financial-management/?utm_source=SPHIS-website-referral) (<https://louisville.edu/theatrearts/aatp/>)

Academic Plan Code(s): HCFMCGRO

The Graduate Certificate in Healthcare Financial Management provides students the foundational competencies of Healthcare Financial Management: health finance, health economics, managerial accounting in health organizations, and health insurance and alternative payment models.

Those interested in the possibility of pursuing the Master of Science in Health Administration (MSHA) may use this program as a stepping stone towards completion of the MSHA degree. University policy states that, "Upon approval of the graduate program, students may apply the coursework from no more than one certificate program towards a graduate degree program." (See the Graduate Catalog, General Policies, Procedures and Requirements (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/#text>) - **Transfer of Credit**.)

This program is available in an online (<https://louisville.edu/online/programs/certificate-programs/online-graduate-certificate-in-healthcare-financial-management/>) format only.

Competencies

The successful student is able to demonstrate:

- Financial Skills
- Achievement Orientation
- Analytic Thinking
- Innovative Thinking
- Collaboration
- Communication Skills
- Performance Measurement
- Public Health Methods

Prior to graduation, students in the program will have demonstrated these competencies by completing the curriculum.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited institution with a minimum of 2.75 GPA on a 4.0 scale.

Application requirements are submitted to the Graduate School and include:

- Graduate application (<https://graduate.louisville.edu/admission/apply/>) submitted to the Graduate School
- Official transcripts indicating conferral of a bachelor's degree from an accredited institution.
 - Transcripts from institutions outside of the United States will require a foreign credential evaluation.
- Curriculum vitae or resume
- One-page personal statement written by the applicant that is a clear, substantive description of his or her goals in public health and healthcare management.
- Application fee
- Students whose primary language is not English must show English language proficiency by attaining one of the following:
 - TOEFL score of 79 or higher (after conversion for test type)
 - IELTS test score of 6.5 or higher
 - Duolingo English test score of 105 or higher
- Demonstration of a degree award from an acceptable English language institution, as formally documented by an appropriate institutional official.

For specific information about the degree program or the application process, students should contact the HMSS Program Coordinator (sphishms@louisville.edu).

Applications are accepted for the Fall semester. Preferred, to facilitate processing, application deadlines are August 1. There are no Spring or Summer admissions.

Certificate Requirements

Program Information

This certificate includes twelve (12) credit hours of required coursework.

Academic Standing

To maintain good academic standing in the Certificate in Healthcare Financial Management program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any Certificate in Healthcare Financial Management student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Code	Title	Hours
PHMS 509	Health Finance and Financial Management	3
PHMS 662	Health Economics	3
PHMS 687	Managerial Accounting for Healthcare Managers	3
PHMS 689	Insurance & Alternative Payment Models	3
Minimum Total Hours		12

If a student chooses to pursue the Master of Science in Health Administration (MSHA) degree at any time after enrolling in or completing the Certificate program, then all coursework completed within the preceding three years with a grade of B or better may be applied towards the coursework for the MSHA degree.

MSHA graduates or currently enrolled MSHA students are not intended to be eligible to receive this certificate as the CAHME-accredited degree is appropriate and sufficient development and credentialing.

Formerly enrolled MSHA students may apply for certificate admission and utilize previously earned credits (grades of B or higher) toward certificate completion.

Accreditation

The School of Public Health and Information Sciences is accredited by the Council on Education for Public Health (CEPH).

The University of Louisville is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

For more information, see the School of Public Health and Information Sciences accreditation webpage (<http://louisville.edu/sphis/accreditation/>).

Healthcare Management (CERT)

Graduate Certificate in Healthcare Management

Healthcare Systems Engineering (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Graduate Certificate in Healthcare Systems Engineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu/>) (GS)

Department: Industrial and Systems Engineering (<https://engineering.louisville.edu/academics/departments/industrial/>)
Academic Plan Code(s): HSENCGR, HSENCGR0

Program Information

This program can be completed 100% online. (<https://engineering.louisville.edu/academics/graduate-programs/cert-healthcare-systems-engr/>)

The graduate certificate in Healthcare Systems Engineering will provide a focused study of industrial and systems engineering skills and methods as applied to healthcare delivery systems and processes. Students who complete the certificate program will acquire skills in healthcare engineering, quality of care, patient safety, health IT, clinician support, healthcare analytics, and data visualization. The certificate program offers the field of industrial and systems engineering a focused program of study in the healthcare domain while also providing healthcare professionals an opportunity to acquire industrial and systems engineering skills as applied to health care delivery and process improvement.

This is a nine (9) credit hour certificate program.

Admission Requirements

The admission standards for the Graduate Certificate program in Healthcare Systems Engineering are as follows:

1. All admission applications for the Graduate Certificate program shall include the following:
 - a. Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - b. Application fee,
 - c. Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution
3. The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale). Applicants with a GPA between 2.5 and 2.75 may be considered for admission and will be required to submit additional application materials, including recommendation letters, a resume or personal statement, and prior academic performance in specific classes. Such applicants may be considered for conditional admission, and we may require that specific academic standards be met in the first semester to achieve admission in good standing.
4. Applicants are required to have completed Calculus I or higher. To find out whether there is a need for remedial work and discuss available options at UofL, consult with the director or admissions consultant.

GRE scores are not required.

Students whose native language is not English or whose degree is from a non-US accredited institution are required to demonstrate proficiency in the English language as specified by the admission policies of the Speed School of Engineering.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

Certificate Requirements Program Requirements

A total of nine (9) credit hours are required.

Code	Title	Hours
ISE 682	Quality of Care and Patient Safety	3
ISE 684	Health IT and Clinician Support	3
ISE 662	Predictive Analytics for Decision Making I	3

Health Professions Education (CERT)

Graduate Certificate in Health Professions Education

Unit: School of Medicine (<https://louisville.edu/medicine/>)

Program Webpage (<https://louisville.edu/medicine/departments/hpe/hpe-graduate-certificate/>) (<https://louisville.edu/online/programs/certificate-programs/online-certificate-in-health-professions-education/>)
Academic Plan Code(s): HLTHCGRO

Program Information

This program is completed 100% online (<https://louisville.edu/online/>).

The certificate in Health Professions Education is offered through the School of Medicine. The program is designed specifically for faculty, future faculty, residents, fellows, and graduate students in the health sciences, including medicine, nursing, dentistry, public health, clinical and allied health professions. The program includes four graduate-level courses (twelve (12) credit hours total) leading to an academic credential.

All courses are part of the School of Medicine graduate curriculum and may be applied to other degree programs, such as the master's degree in Health Professions Education. Each course is focused on education in both the clinical learning environment and the didactic or classroom environment. For example, instructional techniques include working not only in the classroom but also in clinical settings. Class projects can be designed for both didactic and clinical education.

Program Purpose: To promote effective clinical teaching and student instruction in various health sciences educational settings and develop skills in designing education activities, curriculum development, and programmatic assessment.

Admission Requirements

The HPE Admissions Committee requires the following materials:

- Complete the online application to the Graduate School (<https://graduate.louisville.edu/admission/apply/>).
- Transcripts of all undergraduate and graduate work.
- Unconditional admission requires a minimum cumulative grade point average (GPA) of 2.5 for all coursework taken at the undergraduate and/or graduate degree-granting institution; or a terminal professional degree (e.g., MD, DO, DMD, DNP, PhD, EdD).
 - Applicants with a GPA less than 2.5 at the undergraduate/graduate level may inquire about conditional admission
- International applicants with transcripts that are not in English, in addition to submitting official copies of native language records, must also submit a notarized, verbatim translation in English prepared by an appropriate university or government official. The records must show both the degree granted and all coursework taken during the course of study. Applicants who are submitting transcripts from outside the United States must verify their records by submitting them to one of the following organizations: World Education Services (WES), Educational Credential Evaluators (ECE), and other NACES approved evaluators found here <https://www.naces.org/members> (<https://www.naces.org/members/>).
- Students for whom English is not their primary language must show English language proficiency by successfully completing one of the following:
 - International English Language Testing System (IELTS) examination (<https://www.ielts.org/>) – minimum score: 6.5

- Test of English as a Foreign Language (TOEFL) examination (<https://www.ets.org/toefl.html>) – minimum scores: 550 on the paper-based TOEFL, 213 on the computer-based TOEFL or 80 or higher on the internet-based TOEFL
- Duolingo English Test with Subscores (https://englishtest.duolingo.com/applicants/?utm_source=google&utm_medium=search&utm_campaign=EnglishTier1Campaign&utm_content=&utm_term=brand-broad&gclid=CjwKCAiAyPyQBhB6EiwAFUuakrtGPRRW-6-LWFstq8XBfUXEzPQde1_PQmLRqJH7n01zpwXQcxv7MxoCRc0QAvD_BwE) – minimum score of 105 and exam must have been taken after January 1, 2020
- *Note: International students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.*
- One letter of recommendation. Personal references (e.g., family, friends) are not accepted.
- Personal goal statement written by the applicant that is a clear, substantive description of your goals within health professions education (approx. 1-2 pages).
- Current Resume/CV

Admission is competitive. Meeting the GPA minimum does not guarantee acceptance into the program.

Program Requirements

The current required courses are as follows (courses can be taken in any order):

Code	Title	Hours
HPE 650	Evaluation & Assessment in Health Professions Education	3
HPE 665	Teaching and Learning in Health Professions Education	3
HPE 675	Program Development in Health Professions Education	3
HPE 676	Instructional Strategies in Health Professions Education	3

History (MA)

Master of Arts in History

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: History (<http://louisville.edu/history/>)

Program Website (<http://louisville.edu/history/graduate/>)

Academic Plan Code(s): HISTMA, HISTMA_ACC

Program Information

The Master of Arts program in History offers students a flexible curriculum, access to outstanding faculty, research opportunities, and career preparation through internship placements with a network of local

cultural heritage organizations. Students obtain a thorough grounding in historical method and theory, and they leave the program with the knowledge and skills they need pursue further study at the PhD level and/or to meet their career goals in fields ranging from education and cultural heritage management to law and government.

The structure of the program and the varied specialties of our faculty allow our students to acquire a worldwide vision of history. In addition to completing a set of core courses that offer a foundation in historical research methods and public history skills, all students are required to select a Major Field in Americas, World, or Public History.

Soaring Scholars (Accelerated BA/MA) Program in History

Undergraduate students interested in the program's accelerated option should visit the catalog page for the BA in History (<https://catalog.louisville.edu/undergraduate/majors/history-ba/>) for more information.

Admission Requirements

The History Department conducts a holistic review of all credentials presented by the applicant in order to identify each applicant's academic abilities and potential for success in our graduate program; no single factor alone leads to either accepting or excluding an applicant.

Applicants to the MA program in History should have:

- A minimum undergraduate GPA of 3.0 on a 4.0 point scale (a GPA based on a 3.0 scale will be converted to a 4.0 scale)
- 21 undergraduate credit hours in history, with a minimum GPA of 3.0.

Students with an undergraduate GPA of between 2.5 and 2.99 may be accepted conditionally into the program at the discretion of the Director of Graduate Studies, provided they meet all other requirements for admission. Conditional admission requires that the student maintain a GPA of 3.0 in the first nine (9) credit hours of graduate coursework.

Students with fewer than 21 undergraduate credit hours in history will be required to take additional history courses to bring their total undergraduate hours up to the required number.

Admission Materials

Applicants must submit the following materials to the University of Louisville Graduate School:

- A completed graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) form and application fee
- Official transcripts, verifying the receipt of a BA from an accredited institution
- At least two letters of recommendation from individuals familiar with the applicant's academic and/or professional capabilities and potential
- A writing sample of no more than 15 double-spaced pages
- A *curriculum vitae* highlighting past awards, scholarships, leadership and work experiences, or internships
- A statement of purpose, not to exceed 500 words, outlining in reasonably specific terms, the applicant's academic and career objectives and how they can be advanced through graduate work

in our program. The statement should also indicate the applicant's intended area(s) of interest, preparation for this field of study, and, if possible, the departmental faculty with whom the applicant wishes to study.

Deadlines:

Applications for Fall semester: February 20 *

Applications for Spring semester: December 1

* February 20 is the deadline for all students who want to be considered for available fellowships, assistantships, and internships. Students who do not intend to apply for these funding sources may submit their applications until May 15. For a list of the graduate assistantships, scholarships, fellowships, and internships, see louisville.edu/history/graduate-studies/funding (<http://louisville.edu/history/graduate-studies/funding/>)

Program Requirements

All graduate students are required to take the Core Courses (15 credit hours in total) along with approved Major Field courses.

Code	Title	Hours
Core Courses		15
HIST 605	Research Methods and Materials	
HIST 608	Practicum in Public History	
HIST 612	Studies in American History (Digital History)	
or HIST 607	Oral History	
HIST 697	Introduction to Public History	
HIST 603	Thesis	
Major Field Courses		15-18
Thesis option students take 15 credit hours; non-thesis/exam option students take 18 credit hours (see below).		
Minimum Total Hours		30-33

All History M.A. students choose one of the following three Major Fields and take 15 credit hours (if they are working toward the thesis option) or 18 credit hours (if they are working toward the exam option):

- **Americas:** Five (thesis option) or six (exam option) content courses with at least one course on Latin American/Borderlands history.
- **World:** Five (thesis option) or six (exam option) content courses on the history of regions, peoples, and cultures primarily outside of the Western hemisphere.
- **Public History:** Two public history methods courses, two (thesis option) or three (exam option) content courses, and HIST 618 Practicum in Public History II.

MA students in the History Department normally take nine (9) credit hours of coursework per semester (three courses). With the approval of the Director of Graduate Studies, a student may take up to 12 credit hours (four courses) in a semester. Students may take up to six (6) credit hours HIST 601 Directed Study and up to six (6) credit hours of graduate courses outside of the History Department. No pass-fail courses may be applied to an MA in History.

If a student's cumulative GPA falls below 3.0, he or she is subject to academic probation and may be dismissed from the MA program.

For MA-level work in certain areas, knowledge of foreign languages or knowledge of other specialized research tools may be required.

Students will be allowed to transfer up to six (6) credit hours of appropriate coursework from outside the University of Louisville. Up to nine (9) credit hours of non-degree graduate coursework in History may be transferred into the MA program.

Students may choose to complete the MA by thesis or by exam.

Thesis Option

Completion of 30 credit hours of coursework, 15 credit hours in the required Core Courses and 15 credit hours in the student's chosen Major Field. The thesis must be in the Major Field. Following an oral defense, it must be approved by a thesis committee consisting of the thesis director and at least two other faculty members, one of whom must come from another department. The committee requires prior approval by the Department Chair and the Academic Unit.

Examination Option

Completion of 33 credit hours of coursework, 15 credit hours in the required Core Courses and 18 credit hours in the student's chosen Major Field. The exam consists of two written examinations, one covering the competencies addressed in the Core Courses and one in the Major Field, and an oral examination. A committee will evaluate the written and oral examinations on their content and the relevant areas of history. The committee will consist of three faculty members, normally the two faculty members who administer the examinations and a third faculty member who may be in the Department of History. The committee requires approval by the Department Chair and the Academic Unit.

Holistic Sports Coaching Education (CERT)

Graduate Certificate in Holistic Sports Coaching Education

Unit: College of Education and Human Development (<https://education.louisville.edu/>)

Department: Health & Sport Sciences (<https://education.louisville.edu/academic-programs/academic-departments/health-sport-sciences-hss/>)
Academic Plan Code(s): HSCECGRO

Program Information

This program is completed 100% online (<https://louisville.edu/online-program-finder/>).

This 100% online, one-year (15-credit hour) certificate prepares coaches to lead with purpose, enhance athlete wellbeing, and elevate the sport experience through an interdisciplinary and research-based approach.

The program is structured around the National Standards for Sport Coaches (NSSC), third edition, developed by SHAPE America and aligned with the United States Center for Coaching Excellence (USCCE). These national standards are built on the latest scientific research and define seven core responsibilities of effective coaching, including:

- Setting vision, goals, and standards for the program
- Engaging in and supporting ethical practice
- Building relationships
- Creating a safe sport environment
- Creating a positive and inclusive sport environment

- Conducting practices and preparing for competition
- Striving for continuous improvement

The program also incorporates competencies from the International Sport Coaching Framework (ICCE), preparing coaches to meet the demands of increasingly complex and diverse sport environments.

Students will gain applied knowledge in areas such as pedagogy, motor learning, sport science, injury prevention, ethical leadership, long-term athlete development, and inclusive coaching strategies.

By the end of the program, graduates will be able to:

- Design and lead athlete-centered environments across all sport levels
- Apply professional, interpersonal, and intrapersonal knowledge in daily practice
- Create physically and emotionally safe, inclusive learning climates
- Implement evidence-based coaching practices to improve performance and wellbeing

This certificate is ideal for professionals working in youth, high school, collegiate, or elite sport who aim to lead with integrity, foster athlete growth, and contribute to the professionalization of coaching.

Admission Requirements

Students will need to meet the following requirements to apply to the graduate certificate.

1. A completed graduate application (<https://graduate.louisville.edu/admission/apply/>) for the Graduate School
2. Application fee
3. A bachelor's degree from an accredited institution
4. A minimum undergraduate GPA of 2.5 (on a 4.00 scale); Applicants with a GPA between 2.5 - 2.74 will be conditionally admitted and must achieve a 2.75 GPA to remain in good standing.
5. An updated resume or CV (Curriculum Vitae)
6. A one-page personal statement written by the applicant that is a clear, substantive description of the applicant's goals in relation to sport coaching
7. Two letters of recommendation related to the applicant's work in sport coaching
8. International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score, or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 80 or higher, an overall IELTS score of 6.5 or Duolingo score of 105.

NOTE: International students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the certificate

program. Students who seek to return after such a period of time must contact the graduate program director.

Students must achieve a 3.0 or better cumulative grade point average and be in satisfactory standing to be awarded a certificate. Graduate certificate students must take all certificate course-work at the University of Louisville. No transfer credits will be accepted toward this graduate certificate.

Horse Racing Industry Business (CERT)

Graduate Certificate in Horse Race Industry Business

Unit: College of Business (<https://business.louisville.edu/>) (GB)
Program Website (http://louisville.edu/online/programs/certificate-programs/online-horse-racing-industry-business-certificate/?utm_source=cob-website-referral)
Academic Plan Code(s): HRIBCGRO

Program Information

This program is completed 100% online (<https://business.louisville.edu/learnmore/onlineequine/>).

Fast-paced and global in scope, the horse racing industry's complexities and challenges define the need for leaders who meld innovation, technology, and character into a strategy for the future. The Horse Racing Industry Business Certificate is a nine (9) credit hour certificate developed to immerse students into the horse racing industry through business strategies that focus on innovative approaches. Students participating in this program will graduate with an in-depth knowledge of the issues that challenge the industry and the insight into solving them.

Collaborative efforts between Equine Industry Program and horse racing industry specialists led to the creation of a uniquely tailored curriculum that addresses racing's most pressing issues. Faculty expertise along with industry professionals will provide students a broad-based knowledge in the areas of crisis management planning, business ethics, sports and wagering analytics, leadership strategy, regulations, and industry nuances.

Kentucky is known globally as the *Thoroughbred Capital of the World*, and is the reason horse racing remains its most valued signature industry. Louisville is home to Churchill Downs, which hosts the Kentucky Derby, the Greatest Two-Minutes in Sports, on the first Saturday in May. The Kentucky Derby is the oldest consecutively run major sporting event in the U.S. Kentucky is also a major hub for the international trade through its renowned Thoroughbred auctions, breeding farms, stallion stations, and industry-related associates and organizations.

The Equine Industry Program is located less than two-miles from Churchill Downs. It has been educating equine business leaders for over three decades. The Horse Race Industry Business Certificate is a natural extension of the program's commitment to the horse industry through education, research, and service.

The Horse Race Industry Business Certificate can be taken in conjunction with the MBA program (<https://catalog.louisville.edu/graduate/programs-study/master-business-administration/>).

Admission Requirements

Students must have a bachelor's degree from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies/#RegionalInstitutional>) and a minimum undergraduate GPA of 2.5 to be admitted to the Horse Racing Industry Business certificate program. GMAT/GRE scores are not required for admission to the program.

To apply for the certificate program, please complete a graduate application (<https://graduate.louisville.edu/admission/apply/>).

Please note: Students who desire to complete an MBA in conjunction with the Horse Racing Industry Business certificate must be separately admitted to the MBA program (p. 105).

Program Requirements

Human Resources and Organization Development (MS)

Master of Science in Human Resources and Organization Development

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Educational Leadership, Evaluation, and Organizational Development (<http://louisville.edu/education/departments/eleod/>)

Program Website (<http://louisville.edu/education/degrees/ms-hrod/>)

Academic Plan Code(s): HRODMS, HRODMS_O

Program Description

This program can be completed 100% online (<http://louisville.edu/online/programs/masters/master-of-science-in-human-resources-and-organization-development/>).

This program educates professionals who lead workplace performance, development, and learning through discovery and critical inquiry. Students and graduates work in corporations, government agencies, health-care organizations, the military, non-profit organizations, education institutions, and community-based groups.

Admission Requirements

The HROD Admissions Committee requires the following materials to make a decision about admission:

- **Graduate School Application:** Complete the online application to the Graduate School (<https://graduate.louisville.edu/admission/apply/>).
- **Official transcripts of all undergraduate and graduate work.** Unconditional admission requires a minimum cumulative grade point average (GPA) of 2.75 for all coursework taken. Cumulative undergraduate GPAs ranging from 2.5 to 2.75 will be considered for conditional admission on a case-by-case basis. Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services) (<http://wes.org/>) or ECE (Educational Credential Evaluators) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.

Please have transcripts sent to:

Graduate School
University of Louisville
Louisville, KY 40292

If transcripts are sent electronically,

please have them sent to the following e-mail:
gradadm@louisville.edu

- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5

overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

- **Two letters of recommendation.** If you have studied at a college or university in the last five years, the admissions committee prefers to see at least one letter from a faculty member. Other references can include work supervisors. Personal references (e.g. family, friends) are not accepted.
- **Goal Statement Sheet [PDF].** The Admissions Committee evaluates applications based on how an applicant's goals, professional experiences, and commitment to education are an appropriate fit with this program.
- **Current Resume**

Admission is competitive. Meeting the GPA minimum does not guarantee that prospective students will be accepted into the program.

Program Information

The program requires ten courses consisting of 30 credit hours (including portfolio/fieldwork).

The curriculum is centered around five program goals:

- Investigate Gap
- Produce Interventions
- Implement and Lead Change
- Evaluate Outcomes
- Integrate Foundational Knowledge and Skill

Program Purpose: To prepare professionals who lead people, performance, development, and learning through discovery and critical inquiry.

Code	Title	Hours
Core Coursework		18
LEAD 605	Leadership in HROD	
LEAD 611	Strategic Human Resources	
LEAD 617	Evidence Based Research in HROD	
LEAD 661	Adult & Organizational Learning	
LEAD 662	Organizational Analysis	
LEAD 616	HROD Integrative Capstone	
Electives		12
Choose 12 credit hours from the following:		
LEAD 578	Workplace and Information Ethics	
LEAD 614	Program and Organization Evaluation	
LEAD 612	Talent Acquisition and Management	
LEAD 624	Global Human Resources Development	
LEAD 631	Performance Management and Rewards	
LEAD 660	Diversity and Inclusion	
LEAD 663	Methods of Facilitation	
LEAD 664	Organizational Change and Consulting	
LEAD 671	Performance Improvement	
LEAD 672	Instructional Design and Development	
LEAD 674	Advanced Leadership Theory	

LEAD 696 Independent Study: HRE or IT

Minimum Total Hours**30****Degree Assessment:**

- A minimum of 30 credit hours with an overall GPA of 3.0; no more than two grades of C (six (6) credit hours)
- Satisfactory completion of program portfolio
- Successful completion of Capstone project equal to 75 applied hours

Humanities (MA)

**Master of Arts in Humanities**Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)Department: Interdisciplinary and Public Humanities (<http://louisville.edu/humanities/>)Program Website (<https://louisville.edu/humanities/graduate/ma/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information

The MA in Humanities is an interdisciplinary, comparative, and globally-oriented master's program offered by the Department of Comparative Humanities in the College of Arts and Sciences. It is designed for students who seek to integrate two disciplines in the arts and humanities, and/or historical periods, with community enrichment. The MA in Humanities can be undertaken as an intensive two-year program, but there is the possibility of a part-time schedule for students with full-time jobs.

Degree Summary

Code	Title	Hours
Concentration (see tab) ¹		21-24
Research Methods		3
Thesis/Directed Project ²		3-6
Minimum Total Hours		30-33

A minimum of 15 credit hours must be at the 600 level, excluding HUM 655. In addition to the coursework requirements listed above, some students may need to satisfy the foreign language competency requirement.

¹ Hours vary between concentrations and depending on whether students opt for a Thesis or a Directed Study Project option.

² Thesis option students take six (6) credit hours of HUM 645; Directed Study Project option students take three (3) credit hours of HUM 655.

Specific coursework information can be found on the Degree Requirements tab.

Areas of Concentration

The MA in Humanities offers three areas of concentration:

- Interdisciplinary Humanities
- Linguistics
- Public Humanities

Soaring Scholar Accelerated BA/MA in Humanities

Undergraduate students interested in the program's accelerated option should visit the catalog page for the BA in Humanities (<https://catalog.louisville.edu/undergraduate/majors/humanities-ba/>) for more information.

Admission Requirements

Regular admission to the Master of Arts in Humanities occurs twice yearly, for entry during the fall and spring semesters. The official deadline for Fall admission is January 15. The official deadline for Spring admission is September 15.

All applicants must have completed a BA in an appropriate field of study prior to beginning the program.

Applications should consist of the following:

- Online Graduate Application (<https://graduate.louisville.edu/admission/apply/>) for admission
- Payment of Application fee
- A statement of intent (about 1000 words) focusing on the research interests or the applicant's professional goals
- A scholarly or creative writing sample (5,000-10,000 words)
- Official transcripts of all undergraduate and graduate-level work
- Two letters of recommendation from former instructors/co-workers attesting to capability for graduate-level work and/or work ethic.
- If applicable, proof of English proficiency (for international students from countries where English is not the native language).

Program Requirements

Code	Title	Hours
Concentration (see Concentration tab) ¹		21-24
First Core Area (12-15 credit hours)		
Second Core Area (9-12 credit hours)		
Research Methods		3
HUM 609	Interdisciplinary Theory: Arts and Humanities or HUM 610 Methods and Theories in the Study of Religion	
Thesis/Directed Project ²		3-6
HUM 655	Directed Study Project	

or HUM 645 Thesis Guidance

Minimum Total Hours 30

In addition to the course work requirements listed above, students in two of the three concentrations need to satisfy a foreign language competency requirement.

¹ Concentration credit hours vary depending on whether students opt for a Thesis or a Directed Study Project.

² Thesis option students take six (6) credit hours of HUM 645; Directed Study Project option students take three (3) credit hours of HUM 655.

Concentrations

These concentrations are designed to provide students with a broad grasp of the Arts and Humanities with special strengths in selected areas such as Linguistics, Interdisciplinary Humanities, and Public Humanities.

In each track, students take a minimum of eight or nine classes and either write and defend a Thesis or a Directed Study Project at the end of the program.

Each concentration requires a minimum of 30 credit hours, with a minimum of 15 credit hours at the 600 level (excluding HUM 655 or HUM 645).

Beyond the course work requirements outlined below, students in two of the three concentrations need additional credits to satisfy the foreign language competency requirement.

Interdisciplinary Humanities (formerly "Traditional" track)

Academic Plan Code(s): HUM_MA_TRD, HUM_MA_TAC

Students in this track can combine the study of two disciplines or focus on the culture of a particular historical period. The cultural periods included are: Ancient, Medieval and Renaissance, Early Modern, and Modern/Contemporary.

In addition to the course work listed below, MA students in the Interdisciplinary Humanities concentration must satisfy a foreign language competency requirement and complete a final oral defense of a thesis or Directed Study Project.

Code	Title	Hours
Interdisciplinary Humanities, Thesis		
First Core Area ^{1,2}		12
Second Core Area ^{1,2}		9
HUM 609	Interdisciplinary Theory: Arts and Humanities	3
or HUM 610	Methods and Theories in the Study of Religion	
HUM 645	Thesis Guidance	6
Minimum Total Hours		30

Code	Title	Hours
Interdisciplinary Humanities, Directed Study Project		
First Core Area ^{1,2}		15
Second Core Area ^{1,2}		9
HUM 609	Interdisciplinary Theory: Arts and Humanities	3

Code	Title	Hours
or HUM 610	Methods and Theories in the Study of Religion	
HUM 655	Directed Study Project	3
Minimum Total Hours		30

A minimum of 15 credit hours for the degree must be at the 600 level (excluding HUM 655).

¹ Core Areas may include (but are not limited to) the following: Art History, Classical and Modern Languages, Literature, Film, Jewish Studies, Music History, Philosophy, Religious Studies, Theatre Arts, Medieval/Renaissance Studies, Early Modern (17th and 18th Century Studies), Pan African Studies, Latin American and Latino Studies, Women's, Gender and Sexuality Studies or Modern and Contemporary Cultural Studies.

² Students without either Hum 590 or Hum 595 in their undergraduate coursework may be required to take one of these as part of their core area course work.

Public Humanities

Academic Plan Code(s): HUM_MA_PH

Students in this track are interested in bringing the ideas of academic debate into the public sphere, or are enrolled in the Joint JD/MA (<https://louisville.edu/humanities/graduate/ma/accelerated/jd-ma/>) or MA/MBA (<https://louisville.edu/humanities/graduate/ma/accelerated/dual-mba-ma-concentration-in-public-humanities/>) Programs. They can combine the study of Public Humanities with a discipline or a focus on the culture of a particular historical period. The cultural periods included are: Ancient, Medieval and Renaissance, Early Modern, and Modern/Contemporary.

In addition to the course work listed below, MA students in the Public Humanities concentration must complete one required internship, but have no foreign language competency requirement. They can choose between a final oral defense of a Directed Study Project or a Thesis.

Code	Title	Hours
Public Humanities, Thesis		
Public Humanities Core Area, including:		12
HUM 636	Introduction to Public Humanities	
HUM 650	Graduate Internship	
HUM 671	Introduction to Public History	
Second Core Area ¹		9
Required HUM course (Theories and Methodologies)		
HUM 609	Interdisciplinary Theory: Arts and Humanities	3
or HUM 610	Methods and Theories in the Study of Religion	
HUM 645	Thesis Guidance	6
Minimum Total Hours		30

¹ Core Areas may include (but are not limited to) the following: Art History, Classical and Modern Languages, Literature, Film, Jewish Studies, Music History, Philosophy, Religious Studies, Theatre Arts, Medieval/Renaissance Studies, Early Modern (17th and 18th Century Studies), Pan African Studies, Latin American and Latino Studies, Women's, Gender and Sexuality Studies or Modern and Contemporary Cultural Studies.

Code	Title	Hours
Public Humanities, Directed Study Project		
Public Humanities Core Area, including:		12-15
HUM 636	Introduction to Public Humanities	
HUM 650	Graduate Internship	
HUM 671	Introduction to Public History	
Second Core Area ¹		9-12
Required HUM course (Theories and Methodologies)		
HUM 609	Interdisciplinary Theory: Arts and Humanities	3
or HUM 610	Methods and Theories in the Study of Religion	
HUM 655	Directed Study Project	3
Minimum Total Hours		30

A minimum of 15 credit hours for the degree must be at the 600 level (excluding HUM 655 or HUM 645).

¹ Core Areas may include (but are not limited to) the following: Art History, Classical and Modern Languages, Literature, Film, Jewish Studies, Music History, Philosophy, Religious Studies, Theatre Arts, Medieval/Renaissance Studies, Early Modern (17th and 18th Century Studies), Pan African Studies, Latin American and Latino Studies, Women's, Gender and Sexuality Studies or Modern and Contemporary Cultural Studies.

Linguistics

Academic Plan Code(s): HUM_MA_LIN, HUM_MA_LAC

Students in this track combine in a unique way the study of the interdisciplinary humanities with a specialized concentration in linguistics. Students take three core courses and then a minimum of two additional 600-level linguistics courses. Along with our Humanities faculty, students are able to study with linguists in the adjacent departments of Classical and Modern Languages, English, Philosophy, and Psychology.

In addition to the course work listed below, MA students in the Linguistics concentration must satisfy a foreign language competency requirement and complete a final oral defense of a Directed Study Project or a Thesis.

Code	Title	Hours
Linguistics, Thesis		
Linguistics Core Sequence ¹		9
LING 603	Syntax	
LING 610	Phonetics and Phonology	
or LING 630	Language and Culture	
or LING 640	Linguistic Anthropology	
Six (6) additional credits from the following:		6
Sociocultural Linguistics		
LING 523	History of the English Language	
or ENGL 523	History of the English Language	
LING 570	Language and Social Identity	
or ENGL 570	Language and Social Identity	
LING 621	Sociolinguistics	
Structural Linguistics		
LING 522	Structure of Modern English	

or ENGL 522 Structure of Modern English		
LING 606	Historical and Comparative Linguistics	
LING 620	Special Topics in Linguistics	
LING 624	Language and Cognition	
LING 641	Recent Philosophy of Language	
Other graduate-level Linguistics courses		
LING 600	Independent Study	
LING 690	Seminar in Linguistics	
Second Area Core ³		9
HUM 609	Interdisciplinary Theory: Arts and Humanities	3
or HUM 610	Methods and Theories in the Study of Religion	
HUM 645	Thesis Guidance	6
Minimum Total Hours		33

Code	Title	Hours
Linguistics, Directed Study Project		
Linguistics Core Sequence ¹		9
LING 603	Syntax	
LING 610	Phonetics and Phonology	
LING 630	Language and Culture	
or LING 640	Linguistic Anthropology	
Six additional credits from the following:		6
Sociocultural Linguistics		
LING/ENGL 523	History of the English Language	
LING/ENGL 570	Language and Social Identity	
LING 621	Sociolinguistics	
Structural Linguistics		
LING/ENGL 522	Structure of Modern English	
LING 606	Historical and Comparative Linguistics	
LING 624	Language and Cognition	
LING 641	Recent Philosophy of Language	
Other graduate-level Linguistics courses		
LING 600	Independent Study ²	
LING 620	Special Topics in Linguistics	
LING 690	Seminar in Linguistics	
Second Core Area ³		9
HUM 609	Interdisciplinary Theory: Arts and Humanities	3
or HUM 610	Methods and Theories in the Study of Religion	
HUM 655	Directed Study Project	3
Minimum Total Hours		30

A minimum of 15 credit hours for the degree must be at the 600 level (excluding HUM 655 or HUM 645).

¹ Students with no prior undergraduate linguistics coursework are encouraged to audit or enroll on a pass/fail (P/F) basis in LING 325. These credits will not apply to the hours needed to complete the MA degree.

² Under direction of Linguistics-affiliated faculty

³ Core Areas may include (but are not limited to) the following: Art History, Classical and Modern Languages, Literature, Film, Jewish Studies, Music History, Philosophy, Religious Studies, Theatre Arts,

Medieval/Renaissance Studies, Early Modern (17th and 18th Century Studies), Pan African Studies, Latin American and Latino Studies, Women's, Gender and Sexuality Studies or Modern and Contemporary Cultural Studies.

Humanities (PhD)

Doctor of Philosophy in Humanities

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Department: Interdisciplinary and Public (<https://artsandsciences.louisville.edu/academics-programs/academic-departments/interdisciplinary-and-public-humanities/>) Humanities (<http://louisville.edu/humanities/>)

Program Website (<https://louisville.edu/humanities/graduate/phd/>)

Academic Plan Code(s): HUM_PHDCCC, HUM_PHDPAL, HUM_PHDA&C, HUM_PHDSC

Program Information

Established in 2003, the University of Louisville's Doctoral Program in Humanities is a four-year course of study providing rigorous interdisciplinary training in the Humanities.

Administratively housed in the Department of Comparative Humanities, its faculty belongs to many departments across the university. Our students have the possibility to work with research-active scholars, artists, and writers across the Humanities, the Social Sciences, Studio Arts, Medicine, Law, and more.

The program was redesigned in 2013 in order to increase its focus on theoretical and global perspectives with the goal to produce top-level scholars and artists not only for the academic profession, but for innovative careers well beyond the academy.

Program Options

The Program currently offers two specialized career tracks:

- The traditional, yet innovative, **Culture, Criticism, and Contemporary Thought (C3T)**: for scholars oriented toward the academy, museums, and other institutions and organizations employing doctoral degree recipients.
- The unique **Public Arts and Letters (PAL)**: for artists and writers across fields wishing to produce works of literature, art, music, opera, performance, film, etc. that is grounded in and informed by intensive scholarship.

Admission Requirements

Admission to the Humanities PhD Program is exclusively for the fall semester of each academic year.

All materials must be received by January 15 for the following fall. No late applications will be accepted.

All applicants must have completed an appropriate master's degree (MA, MFA, MDiv, or other) prior to beginning the program.

All applicants must also have fulfilled all requirements of the Graduate School.

Application requirements include:

- Online Graduate Application for Admission (<http://louisville.edu/graduate/apply/>)
- Graduate Application fee
- A current curriculum vitae
- A statement of intent (about 1000 words) focusing on the research interests and the applicant's professional goals
- A scholarly or creative writing sample
- Official transcripts of all undergraduate and graduate level work
- Graduate Record Examination (GRE) General Test scores are optional. The Humanities Graduate Admissions Committee will do a **holistic review** of all the application material in order to make a final decision.
- Three letters of recommendation from former professors or colleagues attesting to capability for doctoral-level work
- If applicable, proof of English proficiency

Program Requirements

In addition to the coursework outlined below, students are required to demonstrate basic proficiency in two classical and/or modern languages, or advanced proficiency in one (in addition to English).

It also is strongly recommended that students orient completion of specialization coursework toward a specific discipline, and supplement required coursework with elective courses in that discipline.

Required Coursework

Culture, Criticism, and Contemporary Thought (3CT) or **Public Arts and Letters (PAL)** tracks: there are no track specific course requirements beyond the **Foundations** and **Theories and Methods** courses listed below.

Code	Title	Hours
Foundation Courses		12
HUM 660	Proseminar: Introduction to Doctoral Study (Global Humanities)	
HUM 661	Historical Perspectives on Arts & Culture I	
HUM 662	Historical Perspectives on Arts & Culture II	
HUM 663	Global Perspectives on Arts & Culture	
Theories and Methods Courses		6
HUM 673	Topics in Cultural Theory	
HUM 674	Topics in Aesthetic Theory	
Supervised Projects		9
HUM 650	Graduate Internship	
HUM 653	Doctoral Project I	
HUM 654	Doctoral Project II	

Courses in Area of Specialization	12
Dissertation Research	9
HUM 700 Dissertation Research	
Minimum Total Hours	48

Industrial and Systems Engineering (MS)

Master of Science in Industrial and Systems Engineering (ISE MS)

Unit: Speed School of Engineering (<http://engineering.louisville.edu>)(GS)

Department: Industrial and Systems Engineering (<https://engineering.louisville.edu/academics/departments/industrial/>)

Academic Plan Code(s): IE__MS, IE__MSO

Program Information

This program can be completed 100% online (<http://louisville.edu/online/programs/masters/online-master-of-science-in-industrial-engineering/>). (<http://louisville.edu/online/programs/masters/online-master-of-science-in-industrial-engineering/>)

General Information

The MS degree program is suitable for individuals with an accredited baccalaureate degree in engineering or from any other discipline (e.g. mathematics, business, psychology, physics, and alike). Applicants with a baccalaureate degree other than Industrial Engineering should consult with the Director of the MS program in the Department of Industrial and Systems Engineering on their readiness and necessary remedial work in order to succeed.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Industrial and Systems Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<https://graduate.louisville.edu/admission/apply/>) for the Graduate School
 - An application fee
 - Resume
 - At least two letters of recommendation
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and professionally translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- Calculus I or higher required.

- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale). Applicants with a GPA between 2.5 and 2.75 may be considered for admission and will be required to submit additional application materials, including recommendation letters, a resume or personal statement, and prior academic performance in specific classes. Such applicants may be considered for conditional admission, and we may require that specific academic standards be met in the first semester to achieve admission in good standing.
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background. The minimum curricular requirements for the master's program are:

Code	Title	Hours
Core Courses		
ISE 560	Probability and Statistics for Engineers	3
ISE 664	Experimental Design in Engineering	3
Focus Area Courses ^{1,2}		9
5XX and/or 6XX Technical Electives ^{3,4}		9
Select one of the following:		6
<i>Course Only Option</i>		
5XX and/or 6XX Technical Electives ^{3,4}		
<i>Thesis Option</i>		
ISE 690	Master of Science Thesis in Industrial Engineering ⁵	
<i>Project Option</i>		
ISE 699	Industrial Engineering Master's Degree Project	
5XX and/or 6XX Technical Elective ^{3,4}		
Minimum Total Hours		30

¹ See Focus Area Options below with the courses included in each area.

² Focus area is not required. Student could plan a "General" MS Industrial and Systems Engineering degree if coursework does not fit into a specific focus area.

³ Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis, are 600-level.

⁴ Electives must be chosen so that at least fifteen (15) credit hours of coursework are in ISE.

⁵ For the thesis option, a student is required to select both an approved MS thesis topic and the thesis director and members of the thesis committee. The thesis director must give approval for enrollment in ISE 690.

Focus Areas

Data Analytics and Operations Research

Code	Title	Hours
ISE 561	Decision Support Systems	3
ISE 645	Systems Simulation	3
ISE 646	Operations Research Methods	3
ISE 662	Predictive Analytics for Decision Making I	3

Logistics and Supply Chain

Code	Title	Hours
ISE 621	Facility Location and Layout	3
ISE 646	Operations Research Methods	3
ISE 625	Production and Inventory Systems	3
ISE 655	Supply Chain Engineering	3
ISE 657	Models for Design and Analysis of Logistical Systems	3

Advanced Manufacturing

Code	Title	Hours
ISE 600	Additive Manufacturing Processes	3
ISE 629	Quality Control	3
ISE 619	Digital and Advanced Manufacturing Systems	3

Human Factors

Code	Title	Hours
ISE 669	Introduction to Human Factors Engineering and Ergonomics	3
ISE 671	Advanced Topics in Human Factors Engineering	3
ISE 675	Usability Engineering	3
ISE 682	Quality of Care and Patient Safety	3
ISE 684	Health IT and Clinician Support	3

Industrial and Systems Engineering (PhD)

Doctor of Philosophy in Industrial and Systems Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>)(GS)

Department: Industrial and Systems Engineering (<https://engineering.louisville.edu/academics/departments/industrial/>)
Academic Plan Code(s): IE_ _PHD

Program Information

General Information

The PhD degree program is intended for persons having an accredited baccalaureate degree in Industrial and Systems Engineering, but is available to those with other backgrounds. Applicants with other backgrounds should plan on taking some undergraduate background coursework. Students interested in the PhD degree program should consult the Director of the PhD program in the Department of Industrial and Systems Engineering.

Degree Requirements

The award of a Doctor of Philosophy degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform

independent scholarly research. Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework approved in their flight plan for the doctoral program.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Admission Standards

The admission standards for the PhD program in Industrial and Systems Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School
 - An application fee
 - At least two letters of recommendation
 - Statement of Purpose (include intended area of study and/or research interests)
 - Resume
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 3.00 or above (on a 4.00 scale).
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Normally, it is expected that the student would have completed a master's degree before being admitted to the PhD Program. However, qualified applicants may be admitted directly to the doctoral program after receiving a baccalaureate degree. Such post-baccalaureate degree students will be required to complete an additional 30 credit hours of graduate coursework approved by the department's Director of PhD program. Also, remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background.

The PhD program has three different focus areas available: Data Analytics & Operations Research (DA-OR), Human Factors (HF), and Advanced Manufacturing (AM). The minimum curricular requirements for each focus area in the doctoral program are:

Code	Title	Hours
Post-Baccalaureate Coursework		
Approved Master's Level Coursework ¹		30
Core Courses (Select two courses from a focus area below)		6
Technical Electives ²		9
ISE 700	Dissertation Research in Industrial Engineering	9
ISE 695	PhD Seminar ³	2
Minimum Total Hours		56

- ¹ Master's level coursework must be approved by the Department.
² Non-ISE Electives must be approved by the department.
³ 75% attendance (or excused absence approved by the Department) is required yearly until graduation and one presentation a year (or excused absence approved by the Department) is required by a Doctoral candidate until graduation.

Focus Areas

Data Analytics & Operations Research

Code	Title	Hours

Instructional Computer Technology (CERT)

Graduate Certificate in Instructional Computer Technology (P-12)

Unit: College of Education and Human Development (<https://louisville.edu/education/>)
 Program Webpage (<https://louisville.edu/online/programs/certificate-programs/certificate-in-teaching-english-as-an-international-language/>)
 Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)
 Academic Plan Code(s): ICT_CGRO

Program Information

This program is completed 100% online.

The ICT program advances knowledge and understanding across disciplines and constituencies to develop instructional computer technology leaders who will inform policy, improve practice, strengthen communities, and address pressing social concerns. People in the 21st century live in a technology and media-inundated environment that includes: 1) access to an abundance of information, 2) rapid changes in technology tools, and 3) the ability to collaborate and make individual contributions on an unprecedented scale. To be effective in the 21st century, K-12 teachers must be able to exhibit a range of functional and critical thinking skills related to information, media and technology. As

such, the ICT program models evidence-based practices for instructing P-12 students to prepare teachers to manage resources, publish on the web, and connect digitally with colleagues, students, parents, and local and global communities.

The graduate certificate program is not designed to lead to initial licensure in any state and is intended to prepare certified Kentucky teachers to earn an endorsement to their license. Although some or all of the program's coursework may count toward stand-alone licenses or endorsements in other states, this program is not an approved endorsement program in states other than Kentucky. Out of state students who intend to pursue licensure or an endorsement should check with their state licensing board before making a decision about whether this program will meet their needs. For Kentucky certified teachers, completion of the certificate leads to a teaching endorsement.

The ITC graduate certificate can be completed as stand-alone or as part of a graduate degree for teachers (M.Ed. in Teaching and Learning, Ed.S. in Curriculum & Instruction, or non-degree Rank 1).

The learning outcomes for the Graduate Certificate in Instructional Computer Technology program are as follows:

1. Support teachers and educational leaders in designing classrooms and schools that reflect high standards for incorporating educational technologies in PreK-12 schools as defined in (a) International Society for Technology in Education (ISTE) and (b) Interstate Teacher Assessment and Support Consortium (InTASC) Standards.
2. Increase teachers' understanding of the role that technology serves in providing access, equity, and inclusion in preK-12 learning.
3. Collaborate with school partners to identify and attend to technologies (and related implementation of them) that have the highest potential to support student learning of content across the curriculum and to develop students as digital citizens in the 21st century.

Admission Requirements

- Admission to graduate school (<https://graduate.louisville.edu/admission/apply/>) along with the application fee or current enrollment in a graduate program at the University of Louisville.
- Bachelor's Degree from an accredited institution with an undergraduate GPA of 2.75 (minimum 3.0 for graduate work)
- Valid Teaching Certificate (Certified teachers outside Kentucky should be advised that we cannot guarantee the program will meet licensure, salary, advancement or other requirements in their state. As part of the admission process, we require a written statement confirming interest in the program for personal development and understanding that the program is designed to meet Kentucky certification requirements only.)
- Content prerequisites, as applicable
- Signed KY Code of Ethics and Signed Acceptable Use of Technology Agreement
- International applicants with transcripts that are not in English, in addition to submitting official copies of native language records, must also submit a notarized, verbatim translation in English prepared by an appropriate university or government official. The records must show both the degree granted and all coursework taken during the course of study. Applicants who are submitting transcripts from outside the United States must verify their records by submitting them to one of the following organizations: World Education Services (WES), Educational Credential Evaluators

(ECE), and other NACES approved evaluators found here <https://www.naces.org/members> (<https://www.naces.org/members/>).

- Students for whom English is not their primary language must show English language proficiency by successfully completing one of the following:
- International English Language Testing System (IELTS) examination (<https://www.ielts.org/>) – minimum score: 6.5
- Test of English as a Foreign Language (TOEFL) examination (<https://www.ets.org/toefl.html>) – minimum scores: 550 on the paper-based TOEFL, 213 on the computer-based TOEFL or 80 or higher on the internet-based TOEFL
- Duolingo English Test with Subscores (https://englishtest.duolingo.com/applicants/?utm_source=google&utm_medium=search&utm_campaign=EnglishTier1Campaign&utm_content=&utm_term=brand-broad&gclid=CjwKCAiAyPyQBhB6EiwAFUuakrtGPRRW-6-LWFstq8XBfUXEzPQde1_PQmLRqJH7n01zpwXQcxv7MxoCRc0QAvD_BwE) examination – minimum score of 105 and exam must have been taken after January 1, 2020
- Note: International students who have earned a degree from an accredited college or university in the U.S. are not required to complete the TOEFL, IELTS, or Duolingo.*

Program Requirements

Interdisciplinary Studies (MA)

Interdisciplinary (MA) and (MS)

This program allows faculty to propose interdisciplinary tracks of study that will form the basis for suitable areas of concentration to train students. Students may not propose individualized degrees through this program.

Interdisciplinary programs typically cross departmental and unit boundaries. The concentration proposed by the faculty must meet the criteria in terms of minimum credit hours and the distribution of coursework across disciplinary lines. Proposed areas of concentration and interdisciplinary tracks of study will be subject to approval by the following academic bodies:

- Unit Curriculum and Budget Committees
- Graduate Council
- Office of Academic Planning and Accountability

The development of an interdisciplinary track is the responsibility of the faculty, but the Associate Dean for Interdisciplinary Studies will provide assistance and guidance. Participating faculty must have the consent of their departmental chair or dean to participate in an Interdisciplinary Track.

Requests for further information or assistance should be addressed to:

Associate Dean for Interdisciplinary Studies

Graduate School

Houchens Building, Suite 105

University of Louisville

Louisville, Kentucky 40292

Phone: (502) 852-6495

Email: graduate@louisville.edu

Applicants for tracks within the interdisciplinary master's program must present complete admission credentials to be admitted. Admission must be recommended by the Director of Graduate Studies for the track on the recommendation of the track's admissions committee. The required credentials are:

- The application for admission;
- Transcripts showing all undergraduate and graduate course work and all degrees earned;
- Scores on the Graduate Record Examination General Test; if required for admission;
- Three letters of recommendation;
- TOEFL, IELTS or Duolingo score if the applicant's native language is not English and he/she has not earned a degree from a university or college in the U.S.;
- A written statement of career objectives and rationale for obtaining an advanced degree..

All these credentials must be sent to the Graduate School, Graduate Admissions, University of Louisville, for distribution to the appropriate offices.

Curriculum will be determined during the development of each individual student's program proposal for the individually-designed programs. For an Interdisciplinary Track program, a core of faculty may propose a curriculum that will form the basis for an area of concentration.

In addition to the above stipulations regarding admissions, each interdisciplinary master's degree program track must meet specific criteria as follow

- An overall minimum of 30 credit hours at 500 or 600 level.
- A thesis (maximum of six (6) hours for thesis in a 30 credit hour program) or six (6) additional credit hours of 600-level courses for non-thesis. Interdisciplinary students must enroll in GS 699 for thesis credit.
- At least one-half of the non-thesis, non-practicum, non-internship credit hours must be at the 600 level.
- A minimum of six (6) credit hours of 600-level course work must be taken in each of at least two departments or programs offering degrees through the Graduate School.
- No single department or program may offer more than half the total number of credit hours required by the program.
- Exclusive of thesis credit, no more than six (6) credit hours may be taken in courses of the independent-study or practicum type; such course work may not be counted toward criteria specified in 3 or 4.

7. Courses designated as fulfilling degree requirements must be offered with sufficient frequency to permit the student to complete degree requirements within a reasonable time (two years for a 30 credit hour program).
8. If a thesis is required, the student's primary mentor must meet their unit's minimum graduate faculty guidelines for directing theses.

Interdisciplinary Studies (MS)

Interdisciplinary Studies (MS) and (MA)

Faculty may propose interdisciplinary tracks of study that will form the basis for suitable areas of concentration to train students. Students may not propose individualized degrees through this program.

Interdisciplinary programs often cross departmental and unit boundaries. The concentration must meet the criteria outlined above in terms of minimum credit hours and the distribution of coursework across disciplinary lines. Proposed areas of concentration and interdisciplinary tracks of study will be subject to approval by the following academic bodies:

1. Unit Curriculum and Budget Committees
2. Graduate Council
3. Office of Academic Planning and Accountability

The development of an interdisciplinary track is the responsibility of the faculty, but the Associate Dean for Interdisciplinary Studies will provide assistance and guidance. Participating faculty must have the consent of their departmental chair or dean to participate in an Interdisciplinary Track.

Requests for further information or assistance should be addressed to:

Associate Dean for Interdisciplinary Studies
Graduate School
Houchens Building, Suite 105
University of Louisville
Louisville, Kentucky 40292
Phone: (502) 852-6495
Email: graduate@louisville.edu

Admission Requirements

Applicants for tracks within the interdisciplinary master's program must present complete admission credentials to be admitted. Admission must be recommended by the Director of Graduate Studies for the track on the recommendation of the track's admissions committee. The required credentials are:

1. The application for admission;
2. Transcripts showing all undergraduate and graduate course work and all degrees earned;
3. Scores on the Graduate Record Examination General Test; if required for admission;
4. Three letters of recommendation;
5. TOEFL, IELTS or Duolingo score if the applicant's native language is not English and he/she has not earned a degree from a university or college in the U.S.;
6. A written statement of career objectives and rationale for obtaining an advanced degree..

All these credentials must be sent to the Graduate School, Graduate Admissions, University of Louisville, for distribution to the appropriate offices.

Program Requirements

Curriculum will be determined during the development of each individual student's program proposal for the individually-designed programs. For an Interdisciplinary Track program, a core of faculty may propose a curriculum that will form the basis for an area of concentration.

In addition to the above stipulations regarding admissions, each interdisciplinary master's degree program track must meet specific criteria as follow

1. An overall minimum of 30 credit hours at 500 or 600 level.
2. A thesis (maximum of six (6) hours for thesis in a 30 credit hour program) or six (6) additional credit hours of 600-level courses for non-thesis. Interdisciplinary students must enroll in GS 699 for thesis credit.
3. At least one-half of the non-thesis, non-practicum, non-internship credit hours must be at the 600 level.
4. A minimum of six (6) credit hours of 600-level course work must be taken in each of at least two departments or programs offering degrees through the Graduate School.
5. No single department or program may offer more than half the total number of credit hours required by the program.
6. Exclusive of thesis credit, no more than six (6) credit hours may be taken in courses of the independent-study or practicum type; such course work may not be counted toward criteria specified in 3 or 4.
7. Courses designated as fulfilling degree requirements must be offered with sufficient frequency to permit the student to complete degree requirements within a reasonable time (two years for a 30 credit hour program).
8. If a thesis is required, the student's primary mentor must meet their unit's minimum graduate faculty guidelines for directing theses.

Interdisciplinary Studies (PhD)

Interdisciplinary Studies (PhD)

This program allows faculty to propose interdisciplinary programs of study that will form the basis for suitable areas of specialization to train students. Students may not propose individualized degrees through this program.

Interdisciplinary programs often cross departmental and unit boundaries. The area of specialization proposed by the faculty must meet the criteria in terms of minimum credit hours and the distribution of coursework across disciplinary lines. Proposed areas of specialization will be subject to approval by the following academic bodies:

1. Unit Curriculum and Budget Committees
2. Graduate Council
3. Office of Academic Planning and Accountability

The development of an interdisciplinary specialization is the responsibility of the faculty, but the Associate Dean for Interdisciplinary Studies will provide assistance and guidance. Participating faculty must have the consent of their departmental Chair or Dean to participate in an Interdisciplinary specialization. Students will choose a primary mentor from the faculty who are participating in the program.

Requests for further information or assistance should be addressed to:

Graduate School**Associate Dean for Interdisciplinary Studies**

Houchens Building, Suite 105

University of Louisville

Louisville, Kentucky 40292

Phone: (502) 852-6495

Email: graduate@louisville.edu

Admission Requirements

Applicants for interdisciplinary doctoral programs must present complete admission credentials in order to be formally admitted by the Graduate School.

The required credentials are:

1. A 3.25 grade point average.
2. Scores on the Graduate Record Exam General Test, if required by one of the programs for admissions.
3. Proof of a Baccalaureate Degree and official transcripts of all undergraduate and graduate course work.
4. International students for whom English is not their primary language must show English language proficiency by one of the following:
 - a. TOEFL examination score at or above (5.0 on the TWE test), 213 (computer-based test), 79 (internet-based test)
 - b. IELTS test score of 6.5 or higher
 - c. Duolingo score of 105 or higher
 - d. Demonstration of a degree awarded by an acceptable English-language institution.
5. Three letters of recommendation from individuals who are able to comment on the student's academic abilities and potential for success in graduate studies.

Program Requirements

In addition to established Graduate School policies and requirements, each Interdisciplinary PhD Program Track will be required to meet specific criteria as follows:

1. The curriculum must include coursework representing each of the disciplinary areas in the interdisciplinary degree program. An overall minimum of 36 credit hours of graduate level coursework is required, but may be higher to reflect the standards for doctoral study in the disciplines represented in the interdisciplinary degree program.
2. Each program must be designed so that it is not dominated by a single department's offerings. A minimum of six (6) credit hours of 600-level course work must be taken in each of at least two different departments or programs offering graduate degrees.
3. The curriculum plan must include coursework that provides training in research methodology deemed suitable to the interdisciplinary nature of the program.
4. A dissertation involving original research that crosses established disciplinary lines is required.
5. Faculty serving on committees and as mentors in the Interdisciplinary Studies PhD program must have a doctorate degree or substantial evidence of relevant experience and must hold membership in the Graduate Faculty of a unit.

6. A student's primary mentor must meet their unit's minimum graduate faculty guidelines for directing doctoral dissertations. If a student's mentor has not directed a dissertation in the past, the student must also have a co-mentor who has previous experience directing dissertations and be currently eligible to serve as a dissertation committee chair for per the graduate faculty guidelines.

Interdisciplinary Studies: Concentration in Sustainability (MA/ MS)

**Master of Arts/Master of Science in Interdisciplinary Studies,
concentration in Sustainability**

Unit: Graduate School (<https://louisville.edu/graduate/>) (GI)

Academic Plan Code(s): IS_MA_SUS, IS_MS_SUS

Program Information

The program is not accepting new student applications and is suspending admissions for the 2025-2026 academic year.

The large-scale goal of the Master of Interdisciplinary Studies in Sustainability Degree programs (both MA and MS degree programs are available) is to prepare students to address complex regional, state, national and global challenges posed by the intersection of human exponential growth and increasingly limited resources that support society. Students seeking a career involving research or doctoral program should consider pursuing the Master of Science option.

The exponentially rising demands that human populations make on natural resources and ecological systems that supply us with energy, food, water, and many other ecosystem services will be further threatened by climate change and the pollution of air, soil, and water. Continued reliance on a "business as usual" approach to the economic production and consumption of goods and services, often characterized by the stresses it places on The Commons and by a disregard for environmental and social justice, now threatens the ability of the natural world to absorb our collective impact, erodes our collective security, and polarizes our societies. Substantial changes in social contracts, economic systems, as well as individual and institutional behaviors will be needed to provide more sustainable, healthy and secure societies. National, regional and local experimentation is needed to find solutions to societal challenges.

This Master of Interdisciplinary Studies in Sustainability program is an initiative of the University of Louisville's Sustainability Council which seeks to integrate sustainability into everything that goes on at UofL. Students in the program are encouraged to contribute to the Sustainability Council's efforts to explore sustainable solutions for UofL and our community.

More information about the UofL Sustainability Council can be found on their website (<http://louisville.edu/sustainability/>).

Admission Requirements

The program is not accepting new student applications and is suspending admissions for the 2025-2026 academic year.

Applicants must have a bachelor's degree (any major is acceptable), and provide a completed application form, a transcript of all undergraduate course work, and letters of recommendation.

Admission is competitive. The minimum requirements for unconditional admission are the baccalaureate degree or its equivalent from an accredited institution, an undergraduate grade point average of 3.0 on a 4.0 scale.

Those applicants whose native language is not English and who do not hold a degree from a university where the language of instruction is English, must complete the Test of English as a Foreign Language (TOEFL) with a score of at least 79 on the internet-based test, the International English Language Testing System (IELTS), with a minimum score of 6.5 or Duolingo score of 105.

Application Deadlines

The program maintains a rolling admissions policy. Target dates include:

Fall semester: July 15

Spring semester: November 15

Summer semester: April 15

Application Materials

The following materials must be submitted via the Graduate School website:

1. **Graduate Application**
2. **Application Fee**
3. **Transcript(s):** Transcripts of your college records from all of the schools you have attended must be submitted to the Graduate School, Graduate Admissions. Students must have earned an undergraduate degree from an accredited college or university.*
4. Those for whom English is not their native language must also submit TOEFL scores, International English Language Testing System (IELTS) or Duolingo.*
5. **Three Recommendation Letters:** Three letters of recommendation from academic sources are required and must be submitted online to the Graduate School, Graduate Admissions.

The committee for reviewing student applications will consist of faculty currently serving on the Sustainability Council's Education Committee.

For answers to commonly asked questions by applicants, please review the Frequently Asked Questions page of the Graduate School website.

*There are additional requirements for international students. These requirements are listed at louisville.edu/graduate/futurestudents/international-applicants/international-students (<https://louisville.edu/graduate/futurestudents/international-applicants/international-students/>).

Accelerated Degree Admissions Process

Students should apply to these programs in their junior year. Advising to ensure the requirements are met without extraneous credit hours is imperative and strongly recommended for timely degree completion and financial considerations for the accelerated degrees. Please be sure to consult with advisors and the director of the master's program.

Special Requirements for Accelerated Master's Degree Program Admission

1. An undergraduate GPA of 3.0 or better
2. Completion of SUST 101, 201, 202, 301, 302 and 303 with a minimum GPA of 3.0

The accelerated degree program allows a student to complete the Bachelor of Arts in Sustainability and the Master of Arts or Master of Science in Interdisciplinary Studies: Concentration in Sustainability over a five year period. The first four years consist of undergraduate studies, including three core sustainability graduate level courses taken during the senior year, culminating in the award of the Bachelors of Arts in Sustainability degree. Core courses should include PLAN 675, SUST 602, and research methods.

The fifth year consists of graduate coursework leading to completion of the Master of Arts or Master of Science in Interdisciplinary Studies: Concentration in Sustainability.

The accelerated curriculum allows students to apply 9 credit hours of graduate core course work taken during their undergraduate studies towards the completion of both the BA and Master's degrees. An additional semester of research may be required to complete a thesis for the Master of Science degree.

Program Requirements for a Master of Arts Degree

Code	Title	Hours
Required Course		3
URBS 631	Sustainability Theory	
Core Courses		
Students are required to take one course in each Core Area:		
Sustainability and the Built Environment		3
URBS 633	Sustainable Development & Planning

Interdisciplinary Studies: Concentration in Nanomedicine (MS)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Science in Interdisciplinary Studies, concentration in Nanomedicine

Unit: Graduate School (<https://louisville.edu/graduate/>)

Academic Plan Code(s): IS_MS_NAN

Program Information

The goal of the Master of Interdisciplinary Studies, Concentration in Nanomedicine program is to provide students with skills and knowledge in nanotechnology, bioengineering, pharmacology, toxicology, and medicine, with an emphasis on interdisciplinary collaboration. The field of nanomedicine integrates bioengineering with pharmacology to apply engineering to develop innovative biological/medical solutions to sustain, restore, or improve human life. The program focuses on the benefits to healthcare gained through nanotechnology-based solutions to address disease detection, prevention, and treatment. A nanomedicine-based approach may be used to improve therapy efficacy while reducing side effects and enabling treatment personalization.

Students with a bachelor's degree in engineering, physics, biology, biochemistry, or a health care-related field are eligible to apply. The program is particularly relevant to students interested in the field

of nanomedicine and those seeking to enter professional programs (medical, dental, pharmacy, nursing, etc.), since it provides a non-thesis MS degree that would strengthen an applicant's CV.

The program can typically be completed in one full year (three semesters), with emphasis on mastery of skills required to design, develop, and test nanotechnology for biological/medical purposes. The program is offered in person with some courses available online.

Admission Requirements

Entry into the Nanomedicine Track in the Interdisciplinary Master's Program requires a bachelor's degree in science (such as biology, biochemistry, chemistry, physics), bioengineering, or related discipline, from an accredited university. The Nanomedicine track targets students interested in earning advanced knowledge in the field of nanotechnology, with the goal to apply this knowledge to health care.

Successful applicants will typically have a 3.00 cumulative GPA in the courses of their major. Applicants with a GPA of 2.75 will be considered for provisional acceptance; however, they must maintain a 3.00 GPA at a minimum in their first semester of study or they will not be allowed to continue in the program.

Applicants must submit the documentation required for Master's programs at the University of Louisville, including:

1. application to the graduate school (<https://graduate.louisville.edu/admission/>)
2. transcripts of all college-level courses
3. a written statement by the applicant describing previous experience related to their undergraduate major or health care and how the Master's Program will allow them to fulfill their career goals
4. two letters of recommendation. Students whose native language is non-English or degree is from a non-US accredited institution are required to submit TOEFL scores (administered by the Educational Testing Service). A minimum TOEFL score of 79 or higher on the internet-based test or 550 or higher on the paper-based test is required. Alternatively, a minimum of 6.5 on the International English Language Testing System (IELTS) or a Duolingo score of 105 or higher will be accepted.

International applicants with transcripts that are not in English, in addition to submitting official copies of native language records, must also submit a notarized, verbatim translation in English prepared by an appropriate university or government official. The records must show both the degree granted and all coursework taken during the course of study. Applicants who have attended colleges, universities, postsecondary programs outside of the United States. Currently, all international students must have their credentials reviewed by an approved evaluation company that can provide an evaluation of their transcripts. Approved evaluation agencies are listed at NACES (<https://naces.org/members/>) or AICE (<https://aice-eval.org/endorsed-members/>).

Interdisciplinary Studies: Specialization in Bioinformatics (PhD)

Doctor of Philosophy in Interdisciplinary Studies, specialization in Bioinformatics

Unit: Graduate School (<http://louisville.edu/graduate/>) (GI)

Academic Plan Code(s): IS_ _PHDINF

Program Information

The Interdisciplinary PhD Program in Bioinformatics (the Bioinformatics Program) trains students in bioinformatics for careers in research, education, and industry. Bioinformatics is a broad and diverse domain, ranging from management of biological research databases to computational approaches to biomedical modeling and data analysis.

The Bioinformatics Program focuses on those aspects of bioinformatics that reflect the research interests and experience of the Program's faculty. These include basic research in biostatistical methodology, computer science and mathematical modeling with applications to biochemistry, cell biology, and molecular biology. The following areas have been identified and named by the Bioinformatics Program faculty to represent the focus application areas of the Program:

- Biomedical and Natural Sciences
- Computational Sciences
- Mathematics and Statistics

Students in the Bioinformatics Program specialize in one of the three focus application areas and graduate with cutting-edge expertise in this area and working knowledge in the other two focus application areas.

To earn the Doctor of Philosophy in Interdisciplinary Studies, specialization in Bioinformatics, a student is required to successfully complete the following:

- Core coursework in the focus application areas
- Required coursework in the student's area of specialization
- Elective courses in the student's area of specialization
- Qualifying examination
- Dissertation
- Presentation and defense of a dissertation

Upon successful completion of the written and oral portions of the qualifying examination, the examination committee will recommend acceptance into PhD candidacy. Successful completion of the dissertation and its presentation and defense is established by the approval of the student's dissertation committee and the approval of the chair of the sponsoring department and the program chair.

Admission Requirements

Applicants for interdisciplinary doctoral programs must present complete admission credentials and have an approved program of study in order to be formally admitted by the Graduate School (<http://louisville.edu/graduate/>).

- Complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).
- A 3.25 grade point average.
- Competitive scores on the Quantitative, Verbal, Critical Thinking and Analytical portions of the Graduate Record Exam (GRE).
- Proof of a Baccalaureate Degree and official transcripts of all undergraduate and graduate course work.
- International students for whom English is not their primary language must show English language proficiency by one of the following:
 - TOEFL examination score 213 (computer-based test) or 79 (internet-based test)
 - IELTS test score of 6.5 or higher
 - Duolingo score of 105.
 - Demonstration of a degree awarded from an acceptable English language institution.
- Three letters of recommendation from individuals who are able to comment on the student's academic abilities and a potential for success in graduate studies.

Programs of Study

Course requirements for the Interdisciplinary PhD Degree Program in Bioinformatics consist of 16 core credit hours (that will be conditional based upon focus area) and 21 credit hours derived from a combination of required courses from a chosen focus area and electives from each of the three focus areas. Students with an appropriate background in the biomedical and natural sciences may petition to substitute a course in either the Computational Sciences or Mathematics and Statistics focus for the core course BIOC 545 and a corresponding course in either the Computational Sciences or Mathematics and Statistics, thus maintaining 16 core credit hours. Following acceptance into a focus area, students will be required to complete three courses totaling at least nine hours from the declared focus area. At least four additional elective courses (twelve (12) credit hours) will be selected from available elective courses, with the provision that two elective courses must be selected in each of the other two focus areas. The Program of Study will be determined by the student and approved by both an advisor residing in a declared focus area department and the Executive Committee. The following tables list the required courses for the core as well as the

required and elective courses in each of the focus areas. Students must accumulate at least nine (9) credit hours of dissertation.

Good standing requires that the student maintain a minimum 3.0 grade point average. Upon successful completion of the written and oral portions of the qualifying examination, the examination committee will recommend acceptance into PhD candidacy. Successful completion of the dissertation and its presentation and defense is established by the approval of the student's dissertation committee and the approval of the chair of the sponsoring department and the program chair.

Interdisciplinary Studies: Specialization in Translational Neuroscience (PhD)

Doctor of Philosophy in Interdisciplinary Studies, specialization in Translational Neuroscience

Unit: Graduate School (<http://louisville.edu/graduate/>) (GI)

Program Webpage (<https://louisville.edu/translational-neuroscience/>)

Academic Plan Code(s): IS_ _PHDSTN

Program Information

The program is not accepting new student applications and is suspending admissions for the 2025-2026 academic year.

The Interdisciplinary Program in Translational Neuroscience is a PhD program designed to provide broad training in neuroscience to prepare students for careers in academic, clinical and translational research involving the nervous system including disease, trauma, and developmental disorders.

Students will be assigned advisors initially to help them with course selection, choosing laboratories to rotate in and finding research mentors. Committee members will be assembled from the participating professors/lecturers representing a broad range of both basic and clinical Neuroscience. Individualized curricula will emphasize basic genetic, molecular, cellular, and/or systems mechanisms that underlie a wide range of neurological and neuropsychiatric diseases and disorders.

Students who successfully complete the program will gain a strong academic background in the neurosciences and intellectual mastery of relevant scientific literature with a major emphasis either in the system/cognitive or cellular/molecular areas. They will gain a good understanding of the ethical issues involved in conducting translational research and receive outstanding training in how to conduct basic science research and/or clinical research with patients.

Areas of focus include:

- Spinal cord injury, motor systems, and rehabilitation
- Vision, retina, and visual pathways
- Sensory systems, autonomic nervous system, and pain
- Developmental neurobiology
- Behavioral & cognitive neuroscience
- Neuropharmacology and neurochemistry

The program is not accepting new student applications and is suspending admissions for the 2025-2026 academic year.

Admission Requirements

1. Complete graduate application to the Graduate School (apply by December 15)
2. 3.25 grade point average
3. Three letters of recommendation from individuals who are able to comment on the student's academic abilities and potential for success in graduate studies
4. Proof of a Baccalaureate Degree and official transcripts of all undergraduate and graduate course work
5. International students for whom English is not their primary language must show English language proficiency by one of the following:
 - a. TOEFL examination score of 213 (computer-based test), or 79 (internet-based test/iBT)
 - b. IELTS test score of 6.5 or higher
 - c. Duolingo score of 105
 - d. Demonstration of a degree award from an acceptable English language institution.

Program Requirements

To earn the Doctor of Philosophy in Interdisciplinary Studies: Specialization in Translational Neuroscience, a student is required to successfully complete the following:

- Core Courses
- Other required and elective courses as approved
- Qualifying examination
- Laboratory Rotations
- Original Investigation
- Dissertation and defense

Coursework

Laboratory Rotations (at least two recommended, see below)		6
GS 699	Interdisciplinary Research	
Research		
GS 799	Doctoral Exam Prep (see below)	
Dissertation/Defense		
Minimum Total Hours		36

Laboratory Rotations

It is recommended that each student will complete two rotations in different laboratories prior to the start of his/her third semester. The rotations will expose the student to different approaches and areas of research and will help the student to choose a laboratory for his/her dissertation research. Rotations will count as a three (3) credit hour course (GS 699 Interdisciplinary Research). Rotations are graded on

a pass/fail basis and a brief written rotation reports will be expected from each host investigator indicating a pass or fail grade.

Mentor and Advisory Committee

Once a student selects a mentor, he or she will form an Advisory Committee consisting of the mentor plus four additional members of the program faculty. The faculty members composing the Advisory Committee will represent a minimum of three different participating departments and include at least one faculty member with primary clinical expertise relevant to the student's research area. The Advisory Committee may be reformulated with the permission of the Executive Committee as the student progresses towards completion of the degree.

Research Hours

Upon completion of the mandatory course work, laboratory rotations and mentor selection, research hours are taken as Original Investigation (GS 699 Interdisciplinary Research) until and after the student enters candidacy by successfully completing his/her Research Proposal and Qualifying exam.

Research Proposal and Qualifying Examination

Upon completion of course work, each student is required to prepare a Research Proposal that will be presented and defended before the end of the fall semester of year three. The Research Proposal will consist of an NIH F31 format grant proposal that describes the student's planned research.

Preparation and defense of the proposal will consist of the following steps:

1. Develop a specific aims page and outline of the proposed experiments and present this aims page to the Advisory Committee for approval.
2. Based on the approved specific aims page and outline, prepare a Research Proposal in the F31 format.
3. Distribute the Research Proposal to the Advisory Committee at least two weeks before the presentation and defense.
4. Present the proposal in a 30-40 minute seminar, plus a question and answer period, attended by all the members of the Advisory Committee and other faculty/trainees from representative departments.
5. Appropriately answer any questions from the committee members regarding the proposal and defense.
6. Appropriately answer one written question from each committee member presented to the student during the question/answer period of the proposal presentation. These questions should be prepared by each committee member prior to the defense and should be designed to explore the various clinical/translational/basic science aspects of the proposed work and the underlying biological concepts. Each committee member will indicate on the document if the student answers the member's question appropriately. If not, the student will be given two weeks to prepare a one-to-two-page written answer that will be submitted, along with the question, to that committee member. The committee member will submit both the question and answer to the mentor indicating whether or not the student's answer was appropriate and sufficient.

Overall success or failure will be determined by majority vote of the committee.

A student who fails the Research Proposal and Qualifying Examination will have two months to prepare for a second presentation with written questions that will be presented to the committee only. Failure on the second attempt will result in a recommendation of dismissal from the program. Upon successful completion, a Proposal Defense/Qualifying Examination form will be filled out by the mentor stating the outcome and will be signed by each member of the Advisory Committee. This evaluation form will become part of the student's permanent academic record.

Annual Presentations

Each student who has completed class work is required to give a research update presentation to either the home department of the mentor or as part of the research update seminar series for the Kentucky Spinal Cord Injury Research Center. Notification of the seminar should be dispersed to the entire Neuroscience community.

Dissertation Defense

The candidate must complete all requirements for the degree of Doctor of Philosophy within four calendar years after passing the qualifying examination. The dissertation should contain data sufficient for approximately three publishable manuscripts. Upon completion of a draft of the student's dissertation and prior to scheduling of his/her defense, the student must distribute a copy to each Advisory Committee member. The committee will have two weeks to read and approve the completed draft of the dissertation or recommend major changes that need to be completed prior to scheduling a defense date.

Once the dissertation is approved by the committee, the student will schedule a Dissertation Defense and distribute an edited copy to each committee member. The Graduate School requires that an announcement of the defense be made at least two weeks prior to the scheduled date. The defense will consist of a public oral presentation (approximately 45 minutes in length) of the research completed during the student's graduate training. Non-committee members in the audience will be allowed to ask questions. The general audience will then be dismissed and the student will defend the dissertation before the committee. Upon completion, a written report stating the outcome of the defense will be completed by each committee member and will become a permanent part of the student's record.

Approval by the majority of Advisory Committee members will signify successful completion of the PhD degree.

Latin American and Latino Studies (CERT)

Graduate Certificate in Latin American and Latino Studies

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/>) (GA)

Program: Latin American and Latino Studies (<http://louisville.edu/latinamericanstudies/>)

Academic Plan Code(s): LAS_CLA

Program Information

The Graduate Certificate in Latin American and Latino Studies (LALS) at the University of Louisville is an interdisciplinary program that delves into the rich tapestry of Latin American and Latino cultures in the United States. Housed within the College of Arts and Sciences, the program offers students a comprehensive understanding of the region through diverse course options. These courses explore various facets of Latin

American societies, including history, social structure, economic and political systems, literature, art, and culture.

The 15 credit hour program can be completed as a standalone program or combined with other graduate programs, providing flexibility for students with diverse academic backgrounds and interests. Whether you are a recent graduate seeking to specialize in Latin American studies or a seasoned professional looking to enhance your cultural competency, the LALS program can help you achieve your goals.

Admissions Requirements

Applicants need to have completed an undergraduate baccalaureate degree granted by a United States institution of higher education or its equivalent in another country. To be accepted into the LALS Graduate Certificate Program, students must meet the standard criteria for general admission to the University of Louisville Graduate School, and supply all standard documentation required for admission.

Students wishing to pursue the graduate certificate in conjunction with a graduate degree program in another University of Louisville department should first apply and be admitted to the degree program before applying for admission to the LALS Graduate Certificate Program. The Director of the Latin American and Latino Studies Program will interview each student as part of the application process and an Admissions Committee will review applications and decide if a student may be recommended to the LALS Graduate Certificate Program.

Potential students should complete an online application for graduate programs (<http://louisville.edu/graduate/apply/>) at the University of Louisville.

Certificate Requirements

The graduate certificate in Latin American and Latino Studies requires at least 15 credit hours of graduate level coursework. Three of the five required courses must be taken at the 600 level. Coursework toward the graduate certificate in LALS may also count toward the student's graduate degree.

Students also must meet a minimum language requirement of three hours of previous coursework in Spanish or Portuguese at the 200 level or above, or demonstrate equivalent language proficiency.

Code	Title	Hours
At least one of the following:		3
LALS 680	Issues in Latin American and Latino Studies	
SPAN 670	Special Topics	
POLS 647	Seminar in Latin America	
HIST 503	Advanced Studies in History	
PAS 510	Advanced Topics in Afro-American and African Studies	

Four courses with a substantial Latin American content from at least three different disciplines

These may include the following disciplines but could include others if a course is offered with a substantial Latin American content: Anthropology, Art History, History, Humanities, Linguistics, Modern Languages, Pan-African Studies, Political Science, Portuguese, and Spanish, and Women's and Gender Studies.^{1, 2}

Minimum Total Hours

15

- ¹ Students may not apply 500-level courses taken for undergraduate credit to the LALS graduate certificate.
- ² Substitutions may be made at the discretion of the Director of Latin American and Latino Studies. Additional courses with substantial Latin American content, which are not listed below, may also be taken to fulfill the requirements for the LALS Graduate Certificate. This list is updated regularly on the LALS website (<http://louisville.edu/latinamericanstudies/>).

Managerial Analytics (CERT)

Graduate Certificate in Managerial Analytics

Unit: College of Business (<https://business.louisville.edu>)

Program Website (<http://louisville.edu/online/programs/certificate-programs/online-managerial-analytics-certificate/>)

Academic Plan Code(s): MAN_CGR, MAN_CGRO

Program Information

This program can be completed 100% online. (<https://business.louisville.edu/learnmore/onlinemananagerialanalytics/>)

The Managerial Analytics Certificate is a twelve (12) credit hour certificate that provides business professionals with the skills to thrive in a data-driven environment. The need for skilled professionals in the area of managerial analytics has become very acute. This certificate offers an efficient and effective way to address the need for analytics talent by allowing current employees to retool themselves without having to obtain a graduate degree.

Students completing the stand-alone Managerial Analytics Certificate may count the twelve (12) credit hours toward their MBA degree. Students in the full-time, professional, innovation, and online MBA degree programs are able to complete the certificate within their cohort flight plan at no additional tuition charge or program credit hour requirements.

Admission Requirements

Students must have a bachelor's degree from an accredited university and a minimum undergraduate GPA of 2.5 to be admitted to the Managerial Analytics certificate program.

GMAT/GRE scores are not required for admission to the program.

Complete a graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Program Requirements

Code	Title	Hours
Students must take three (3) credit hours from the list below:		3
MBA 631	Introduction to Statistics and Data Analytics (3 credit hours)	
or ANLY 631	Introduction to Statistics and Data Analytics	
MBA 602	Decision Analysis (1.5 credit hours, in conjunction with another 1.5 credit hour course for a total of 3 credit hours)	
MBA 651	Introduction to Business Analytics (1.5 credit hours, in conjunction with another 1.5 credit hour course for a total of 3 credit hours)	
MAC 668	Statistical Analysis (3 credit hours)	

Students must take nine (9) credit hours from the list below:

ANLY 610	Database	1.5
ANLY 615	Artificial Intelligence	1.5
ANLY 620	Advanced Business Analytics	1.5
ANLY 625	Spreadsheet Modeling for Analytics	1.5
ANLY 630	Blockchain	1.5
ANLY 635	Storytelling with Data	1.5

Minimum Total Hours 12

Materials and Energy Science and Engineering (MS)

Master of Science in Materials and Energy Science & Engineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu/>) (GS)

Program Website (<https://engineering.louisville.edu/academics/areasofstudy/materials-and-energy-science/>)

Academic Plan Code: MESEMS, MESEMS_O

Program Information

This program can be completed 100% online (<http://louisville.edu/online/programs/masters/master-of-science-in-materials-and-energy-science-engineering/>).

The Master of Science in Materials and Energy Science and Engineering will offer advanced level training to provide students with in-depth knowledge of materials and energy science and engineering in areas such as materials science and engineering, materials chemistry and physics, processing, energy conversion and storage devices, and systems-level engineering. Student educational experiences will be enhanced by research opportunities in laboratories conducting basic and translational research on solar energy conversion, energy storage, biofuels and biomass conversion, solar fuels, materials characterization, and advanced energy materials. The MS in MESE will prepare students for career tracks in industry such as semiconductor/opto-electronics, catalysts and energy. This degree track will allow students to pursue entrepreneurialism and join government and corporate labs and provides a strong foundation for those wishing to pursue doctoral studies in their respective disciplines.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (p. 16) section of this catalog.

Admission Standards

The admission standards for the Master of Science program in Materials and Energy Science & Engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,

- c. A current resume,
 - d. Written interest statement describing what motivated you to apply to the MESE program, including previous experience in the field and how this degree will help you fulfill your career goals.
 - e. At least two letters of recommendation, and
 - f. Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the Bachelor's degree in Engineering or an equivalent bachelor's degree in Physics or Chemistry from an accredited university
 3. The successful applicant will typically have an undergraduate grade point average of 3.0 or above (on a 4.00 scale).
 4. International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Remedial work may be specified for those applicants who, in the opinion of the faculty, do not have a sufficient background. Remedial courses do not count towards the degree.

The minimum curricular requirements for the master's program are:

Code	Title	Hours
MS in Materials and Energy Science & Engineering		
Core Courses		6
MESE 600	Energy Science and Engineering	
MESE 601	Materials Science and Engineering	
Fundamental Courses (Select 3 from the list below) ^{1,2}		9
Energy Processing Courses (Select 2 from the list below) ^{1,2}		6
Energy Conversion Courses (Select 2 from the list below) ^{1,2}		6
Select one of the following Energy Engineering Courses:		3
<i>Project Option</i>		
MESE 690	Master's Project ³	
<i>Course Option</i>		
Energy Engineering Course (Select 1 from list below) ^{1,2}		
Minimum Total Hours		30

The Master of Science degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the master of science degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

¹ Courses must be chosen so that at least one-half of the credits counted toward the degree are 600-level.

² Any course substitutes that are not on the current list of approved courses must be approved by the department/faculty advisor.

³ The project can be replaced with an external internship or practicum opportunity. Faculty advisors will assist in developing plans for MESE 690 completion.

Fundamental Courses

Mathematics (MA)

Master of Arts in Mathematics

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Mathematics (<https://louisville.edu/math/>)

Program Webpage (<https://louisville.edu/math/graduate/>)

Academic Plan Code(s): MATHMA, MATHMA_ACC

Program Information

The University of Louisville Department of Mathematics is a research-oriented department that prides itself on delivering first-rate graduate instruction. There is a broad range of courses and ample opportunities to interact with faculty. The Department also maintains an active colloquium series with talks given by visiting mathematicians, statisticians and scientists.

Appropriate preparation for a Master of Arts in Mathematics is undergraduate coursework equivalent to a major in mathematics from

an accredited university. This should include a one-year course in either analysis or abstract algebra, equivalent to MATH 501-MATH 502 and MATH 521-MATH 522 at the University of Louisville. Candidates who have not taken both must complete them by the end of the second year of their MA program.

Accelerated BA/BS-MA Option in Mathematics

Students must apply for admission to the program no later than the end of their junior year to be eligible enroll in graduate coursework in their final year of the program and must have completed MATH 205, MATH 206, MATH 301, and MATH 325, or equivalent courses, prior to application.

Applicants must have a minimum overall GPA of 3.5, and minimum GPA of 3.66 in mathematics courses. As part of the combined degree, students must complete MATH 405 and at least four of the following: MATH 501, MATH 502, MATH 521, MATH 522, MATH 561, MATH 562, or MATH 581, including at least one sequence from among these courses.

The student may take a nine to twelve (9-12) credit hours for graduate credit, depending on the graduate option selected, which will also apply to the requirements for the baccalaureate degree in Mathematics. All 600-level courses numbered 689 or below qualify, as do 500-level courses when completed in accord with the stipulations for graduate credit outlined in the syllabus.

Admission Requirements

Apply online (<http://louisville.edu/graduate/apply/>) via the Graduate School.

Complete applications require the following:

1. Complete online application form (<http://louisville.edu/graduate/apply/>) along with paid application fee.
2. Cover letter to math department including any information you believe will help process your application. **Please indicate in this letter whether you are interested in a GTA position**, for example.
3. Transcripts (an official copy for each undergraduate institution attended. UofL transcripts are automatically submitted).
4. Letters of recommendation (<https://louisville.app.box.com/s/w9jkkbu3cg10q7jtbwxs5rdkn2d1mjaa/>) (at least two, preferably three; electronic recommendations preferred).
5. **Recent** (within three years) GRE scores (only the general exam is required).
6. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test for verification of English proficiency. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or Duolingo score of 105.

Degree Requirements

1. Candidates must complete a program of study approved by the department. All courses (maximum of twelve (12) credit hours total) taken outside the Department of Mathematics must have prior departmental approval.
2. All students must complete a minimum of 30 credit hours of non-thesis graduate credit, including at least 15 credit hours in

Mathematics (MATH) courses numbered 601-689. Non-Thesis Option students must complete at least one full-year sequence in Mathematics (MATH) courses numbered 601-689; Thesis Option students are required to complete at least two full-year sequences in Mathematics (MATH) courses numbered 601-689.

3. Students must satisfy one of the following three requirements:

- **Master's Level Examination Option:** Pass written examination in three areas of mathematics chosen from a list prepared by the department. At most, two attempts are allowed. Examinations will be approved and administered by the departmental Graduate Studies Committee.
- **Thesis Option:** Write a thesis on an advanced topic in the mathematical sciences. A total of two full-year sequences among courses numbered 601 through 689 must be completed.
- **PhD Qualifier Option:** Pass two qualifier examinations for the departmental PhD Program. These examinations need not be taken together and each may be attempted at most twice.

Students choosing the Thesis Option must pass a final oral examination described under Requirements for the Master's Degree (p. 16).

Thesis Option Coursework

Code	Title	Hours
Core Courses		12
Choose two full-year sequences from the following:		
MATH 601 & MATH 602	Real Analysis I Real Analysis II	
MATH 621 & MATH 622	Algebra I Algebra II	
MATH 681 & MATH 682	Combinatorics and Graph Theory I Combinatorics and Graph Theory II

Mathematics, Applied and Industrial (PhD)

Doctor of Philosophy in Applied and Industrial Mathematics

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Mathematics (<https://louisville.edu/math/>)

Program Website (<https://louisville.edu/math/graduate/>)

Academic Plan Code(s): MATHPHD

Program Information

The University of Louisville Department of Mathematics is a research-oriented department that prides itself on delivering first-rate graduate instruction. There are a broad range of courses and ample opportunities to interact with faculty. The Department also maintains an active colloquium series with talks given by visiting mathematicians, statisticians and scientists.

The PhD program in Applied and Industrial Mathematics offers a blend of advanced mathematical and statistical knowledge with the experience to apply that knowledge. Students completing the program have a unique perspective from which they can see the whole of mathematics integrated with applied and industrial needs. A broad and rigorous mathematical core combined with customized application electives and an industrial internship prepares students with life-long career skills in teaching, research, and industry.

Prerequisites

Undergraduate coursework equivalent to a major in mathematics from an accredited university. This should include at least a one-year course in either analysis or abstract algebra, equivalent to MATH 501-MATH 502 and MATH 521-MATH 522 at the University of Louisville.

Candidates who have not taken both must complete the second in their program.

Dual Degree Program in Applied and Industrial Mathematics (PhD) and Biostatistics (MS)

Dual degrees in Biostatistics and Applied and Industrial Mathematics are offered by the College of Arts and Sciences and the School of Public Health and Information Sciences. Upon completion of the program, students will receive a PhD in Applied and Industrial Mathematics and a Master of Science in Biostatistics.

Admission Requirements

Interested applicants should have completed undergraduate coursework equivalent to a major in mathematics from an accredited university. This should include at least a one-year course in either analysis or abstract algebra, equivalent to MATH 501-MATH 502 and MATH 521-MATH 522 at the University of Louisville.

Candidates who have not taken both sequences must complete the second in their program.

Prospective students can apply online (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>). Complete applications require the following:

1. Graduate Application form along with paid application fee
2. Cover letter to Mathematics department including any information you believe will help process your application. Please indicate in this letter whether you are interested in a GTA position, for example
3. Transcripts (an official copy for each undergraduate institution attended. University of Louisville transcripts are automatically submitted)
4. At least two letters of recommendation
5. Recent (within three years) GRE scores (only the general exam is required)
6. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

For full consideration please submit complete applications by:

Spring admission deadline: November 1

Fall admission deadline: March 1

Late applications will be considered.

Dual Degree Program in Applied and Industrial Mathematics and Biostatistics Application Procedure

To be admitted to the program, the student is required to apply to and be accepted by both the Department of Mathematics and the Department of Bioinformatics and Biostatistics. A student seeking admission into this program must submit letters to both the Department of Mathematics and the Department of Bioinformatics and Biostatistics stating the intent to take advantage of the dual degree program, as well as their choice of the thesis or non-thesis option for the MS in Biostatistics. Students must submit two recent letters of recommendation with their letter of intent. Applicants will receive written notification stating whether their admission request has been approved or disapproved.

Students currently enrolled in the PhD in Applied and Industrial Mathematics program will need to submit complete application materials to the Department of Bioinformatics and Biostatistics for admission to the MS component of the dual degree, as well as notify his/her advisor in the Department of Mathematics of the intention to enter into the dual degree program. Letters of recommendation for admission to the MS program can be taken from the letters of recommendation written for admission to the PhD program, provided they have been written sufficiently recently.

Program Requirements Doctor of Philosophy in Applied and Industrial Mathematics

All students admitted to the program must complete the following coursework (or their approved equivalent) and other degree requirements:

Code	Title	Hours
Core Courses		
Select two sequences from the following:		12
MATH 621 & MATH 622	Algebra I Algebra II	
MATH 681 & MATH 682	Combinatorics and Graph Theory I Combinatorics and Graph Theory II	
MATH 601 & MATH 602	Real Analysis I Real Analysis II	
Select two sequences from the following:		12
MATH 635 & MATH 636	Mathematical Modeling I Mathematical Modeling II	
MATH 667 & MATH 668	Statistical Inference Linear Statistical Modeling	
MATH 663 & MATH 664	Theory of Probability I Theory of Probability II	
Area of Specialization (see note below)		18
Dissertation		12-18
MATH 700	Doctoral Research	
MATH 710	Doctoral Dissertation	
Minimum Total Hours		54-60

Additional Topics and Area of Specialization

In addition to the core, an application area of 18 credit hours will be required. The courses may be in a department outside Mathematics. They will be chosen in consultation with the student's advisory committee.

Qualifying Examinations

Students must pass three written examinations. Two of these will be chosen from the areas of Algebra, Combinatorics and Real Analysis. The third will be chosen from the areas of Mathematical Modeling, Mathematical Statistics and Probability. Normally, these will be taken within a year of completion of the core coursework. These examinations need not be taken together and each may be attempted at most twice.

Industrial Internship

Each student, with prior approval of the Graduate Studies Director, has to complete an internship in an appropriate industrial or governmental setting, or have equivalent experience.

Computing Project

Each student must complete an approved computer project related to the student's area of concentration.

Candidacy Examination

Each student must pass an oral examination in the chosen area of concentration. Usually, at most two attempts at passing this examination will be permitted. Students who wish to make a third attempt must petition the Graduate Studies Committee of the department for permissions to do so.

Dissertation

12 to 18 credit hours: A doctoral dissertation is required of each student.

Dual Degree Program in Applied and Industrial Mathematics (PhD) and Biostatistics (MS)

Required Courses

The required courses for the dual degree program consist of all non-overlapping core courses for both the PhD in Applied and Industrial Mathematics, as well as the course requirements for the MS in Biostatistics. Courses taken to satisfy the Biostatistics component of the dual degree program can be applied to these 18 credit hours of electives which are required for the PhD in Applied and Industrial Mathematics.

Students currently enrolled in the PhD in Applied and Industrial Mathematics program will need to submit complete application materials to the Department of Bioinformatics and Biostatistics for admission to the MS component of the dual degree, as well as notify his/her advisor in the Department of Mathematics of the intention to enter into the dual degree program (see Admissions tab).

Requirements for the PhD in Applied and Industrial Mathematics

Code	Title	Hours
Core Courses		
Select two sequences from the following:		12
MATH 621 & MATH 622	Algebra I Algebra II	
MATH 681 & MATH 682	Combinatorics and Graph Theory I Combinatorics and Graph Theory II	
MATH 601 & MATH 602	Real Analysis I Real Analysis II	
Select two sequences from the following:		12
MATH 635 & MATH 636	Mathematical Modeling I Mathematical Modeling II	
MATH 667 & MATH 668	Statistical Inference Linear Statistical Modeling	
MATH 663 & MATH 664	Theory of Probability I Theory of Probability II	
Application Area Courses (see note below)		18
Dissertation		12-18
MATH 700	Doctoral Research	
MATH 710	Doctoral Dissertation	
Minimum Total Hours		54-60

Elective/Application Area Courses

18 credit hours of Application Area courses are chosen in consultation with a student's advisory committee. These courses can be outside of the Department of Mathematics. Courses taken to satisfy the Biostatistics component of the dual degree program can be approved to satisfy these 18 credit hours.

Industrial Internship

Each student, with prior approval of the Graduate Studies Director and the Industrial Internship Director, has to complete an internship in an appropriate industrial or governmental setting, or have equivalent experience. The Industrial Internship required by the Department of Mathematics and the Master's Project or Thesis required for the MS can be satisfied by a single internship and technical report which simultaneously satisfies the requirements for both degrees. Specifically, the internship must both focus on biostatistics so that it satisfies the Project or Thesis, and contain advanced mathematical content so that it satisfies the Industrial Internship. Likewise, the technical report must meet two requirements: it must satisfy the requirements for a Master's Project report or Master's Thesis for the MS degree and it must be written at an advanced mathematical level expected Industrial Internship. Students should enroll in the Master's Project (PHST 675) or Master's Thesis (PHST 666) courses during or shortly after completion of the Industrial Internship to take advantage of the combined Industrial Internship and Master's Project/Thesis.

Dual-degree students will not be permitted to enroll in the Master's Project (PHST 675) or Master's Thesis (PHST 666) courses until at least two qualifying examinations toward the PhD in Applied and Industrial Mathematics have been completed.

Other Requirements

Students must pass qualifying examinations, complete an approved computing project, and pass a candidacy examination as detailed in the catalog entry for the PhD in Applied and Industrial Mathematics.

Dissertation

In order for the student to fulfill the PhD requirements, the student must satisfy both the qualifying examination and dissertation requirements (12-18 credit hours) for the PhD in Applied and Industrial Mathematics. Failure to complete these requirements will not jeopardize the MS degree if all its requirements have been satisfactorily completed.

MS in Biostatistics

Code	Title	Hours
Core Course Requirements		
Select one of the following sequences: ¹		6
PHST 661 & PHST 662	Probability Mathematical Statistics	
MATH 561 & MATH 562	Probability Mathematical Statistics	
PHST 680 & PHST 681	Biostatistical Methods I Biostatistical Methods II ²	6
PHPH 523	Public Health in the United States ³	3
PHST 624	Clinical Trials I: Planning and Design	2
PHST 625	Clinical Trials II	2
PHST 683	Survival Analysis	3
PHST 684	Categorical Data Analysis	3
Various Biostatistics Electives ⁴		8
Additional Requirements - Option Thesis		
PHST 666	Master's Thesis Research ⁵	6
Minimum Total Hours		39

¹ The PHST 661-PHST 662/MATH 561-MATH 562 requirement is waived if the student takes MATH 663 and MATH 667. The PHST 681-PHST 682 requirement is waived if the

student takes MATH 667-MATH 668. Both requirements (PHST 661-PHST 662/MATH 561-MATH 562 and PHST 681-PHST 682) are waived **only if** the student completes both the MATH 663-MATH 664 and MATH 667-MATH 668 sequences.

- ² Courses taken to satisfy the Biostatistics component of the dual degree program can be applied to the 18 credit hours of electives which are required for the PhD in Applied and Industrial Mathematics.
- ³ A course in public health is a requirement for any student graduating with the MS degree from the Department of Bioinformatics and Biostatistics. These credit hours are not applied to the MS degree.
- ⁴ Electives are chosen in consultation with an advisor, typically from PHST 603, PHST 620, PHST 640, PHST 675, and PHST 682.
- ⁵ To be completed in accordance with the guidelines written in the catalog entry for the MS in Bioinformatics and Biostatistics Degree.

Combined Industrial Internship, Practicum and Master's Thesis [six - eight (6-8) credit hours]

The Industrial Internship required by the Department of Mathematics and the Master's Project or Thesis required for the MS can be satisfied by a single internship and technical report which simultaneously satisfies the requirements for both degrees. Specifically, the internship must both focus on biostatistics so that it satisfies the Project or Thesis, and contain advanced mathematical content so that it satisfies the Industrial Internship. Likewise, the technical report must meet two requirements: it must satisfy the requirements for a Master's Project report or Master's Thesis for the MS degree and it must be written at an advanced mathematical level expected Industrial Internship. Students should enroll in the Master's Project (PHST 675) or Master's Thesis (PHST 666) courses during or shortly after completion of the Industrial Internship to take advantage of the combined Industrial Internship and Master's Project/Thesis.

Students will not be permitted to enroll in the Master's Project (PHST 675) or Thesis (PHST 666) courses until at least two qualifying examinations toward the PhD in Applied and Industrial Mathematics have been completed.

Special Considerations: Students who have already completed a master's degree in the Department of Mathematics

To preserve the spirit of a dual degree, such students need to complete 36 credit hours of courses as required for the MS in Biostatistics. Six (6) credit hours of the previous master's degree coursework can be applied to this requirement. The remaining credit hours must be chosen from the list of not covered by core courses approved electives for the Department of Bioinformatics and Biostatistics, with preference given to courses in the Departments of Mathematics and Bioinformatics and Biostatistics. Combined Industrial Internship, Practicum and Master's Thesis cannot be replaced by a previous master's thesis. This requirement must be satisfied as previously described, meeting the specifications of both departments.

Mechanical Engineering (MEng)

Master of Engineering in Mechanical Engineering (ME MEN)

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (SP)

Department: Mechanical Engineering (<https://engineering.louisville.edu/academics/departments/mechanical/>)

Academic Plan Code(s): ME_ _MEN

Program Information

General Information

The Bachelor of Science in Mechanical Engineering degree will provide a student with the basis to be able to complete the Master of Engineering (MEng) in Mechanical Engineering degree. The Master of Engineering in Mechanical Engineering degree program is accredited by the Engineering Accreditation Commission (EAC) of ABET, under the Commission's General Criteria and the Program Criteria for Mechanical and Similarly Named Engineering Programs.

Since the Mechanical Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Mechanical Engineering bachelor degree program at J.B. Speed School of Engineering. Therefore, students who earn an undergraduate degree at a school or university other than the University of Louisville pursue the MS degree instead of the MEng degree.

Master of Engineering Program Educational Objectives

The purpose of the five-year Master of Engineering Program is to bring together the faculty, staff, and capital resources to meet the following program educational objectives:

1. Succeed as practicing mechanical engineers in government, industry, academia, and other economic sectors.
2. Use their knowledge and skills in mathematics, science, engineering, and other disciplines to identify, define, and solve problems, and to anticipate the global, societal, and environmental impact of their solutions.
3. Understand the importance of professional licensure, and act upon that understanding by pursuing registration.
4. Comply with professional ethics codes, practice sustainable engineering, undertake professional development, and engage in life-long technical learning.
5. Display skills in teamwork, communication, critical thinking, and leadership.
6. Demonstrate an engineering knowledge base of greater depth and breadth than that expected of baccalaureate-only graduates, helping them understand and influence contemporary technological issues as engineering innovators and managers.

Master of Engineering Student Outcomes

In order to achieve these objectives, the Master of Engineering has developed an outcomes set for its graduates.

Graduates will demonstrate:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts

5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. An ability to apply masters-level knowledge in a specialized area related to mechanical engineering

Residency

All graduate students are expected to make steady and satisfactory progress toward the completion of degrees. A candidate for the Master of Engineering degree who does not register for credit hours must maintain active registration by paying a fee each semester for MEng residency until the degree is awarded (i.e., the candidate must maintain continuous registration, including summer terms, in Graduate Studies). Failure to pay the MEng residency fee will be cause to cancel a student's residency. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the program. In order to be restored to residency, the student must submit a new application, have the recommendation of the department chair, receive the approval of the Associate Dean and pay the fee for each of the semesters during which the residency was void.

Academic Performance

The J.B. Speed School of Engineering has established the following performance policies:

1. The minimum grade point average requirement for good standing is 3.00 for all academic work completed while in graduate studies.
2. Any student with a cumulative graduate GPA below 3.00 will be placed on academic warning. Students on academic warning are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms.

Students who do not bring their cumulative graduate GPA back at or above a 3.00 in the semester immediately following Academic Warning, will be placed on Academic Probation for the next semester of enrollment. Students on probation are limited to enrollment for thirteen (13) credit hours in a fall or spring semester and seven (7) credit hours for summer terms. Any student who remains in academic probation for more than a single semester may be considered for dismissal from the program.
3. Students receiving graduate assistantships (research or service) shall be provided adequate training and shall be required to understand and adhere to University policies related to these areas. The performance of teaching, research and service duties by such students shall be periodically evaluated.
4. Students who fail to meet performance goals or who do not meet other requirements as outlined in the admission letter, program requirements or the university catalog may be subject to academic dismissal from their programs.
5. A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

Degree Requirements

The following degree requirements are mandatory of all master of engineering candidates:

1. The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.
2. Master's degree students must take at least 24 credit hours of coursework at the University of Louisville to satisfy the residency requirement for the master's degree. A maximum of six (6) credit hours of graduate credit may be transferred from accredited institutions.
3. Students following the thesis option must follow the Procedures and Standards for Master of Engineering Theses.
4. The total requirements must be completed within six years after admission into graduate studies. The time limit imposed by the rule may be extended in individual cases upon recommendation of the department chair and approval of the associate dean for academic and student affairs.
5. The MEng degree cannot be conferred prior to the BS degree.

Admission Standards

Since the Mechanical Engineering MEng is accredited as part of a five-year program with one-year of co-op experience, it is only available for students who have matriculated through the Mechanical Engineering bachelor degree program at J.B. Speed School of Engineering.

The application form is available online (<https://engineering.louisville.edu/meng-graduate-application-form/>).

The requirements for admission or readmission to a master of engineering program are:

1. Submission of a completed MEng application for the field of specialization in which the student is earning a bachelor degree from the J.B. Speed School of Engineering. Students can apply to the MEng program with fewer than thirteen (13) credit hours of BS degree requirements remaining and no later than two years post conferral of their baccalaureate degree. A student's admission into the MEng program is contingent upon successful completion of their undergraduate degree;
2. Recommendation by the faculty and chair of the student's department for admission or readmission to graduate studies;
3. Cumulative baccalaureate grade point average of 2.75. However, those students with cumulative baccalaureate grade-point averages from 2.50 to 2.75 may be admitted upon petition and approval of the chair and faculty of the department.

A student becomes a candidate for the master of engineering degree upon admission to graduate studies and initial registration as a graduate student.

Students are only permitted to enter the MEng ME program with a maximum of one D grade in ME prefixed courses from the BS ME curriculum. A student who accumulates more than one D in ME courses during the BS ME program must repeat courses for which grades of D were earned until only one D grade in an ME prefixed course remains.

Program Requirements

The Master of Engineering in Mechanical Engineering degree requires the following over and above the Bachelor of Science in Mechanical Engineering Degree.

Code	Title	Hours
ME Electives ¹		15
Technical Electives ^{1,2}		9
Select one of the following:		6
<i>Thesis Option:</i>		
ME 697	Master of Engineering Thesis or Paper in Mechanical Engineering ³	
<i>Non-Thesis Option:</i>		
ME 645	Mechanical Engineering Structured Research Project	
ME Elective ¹		
Minimum Total Hours		30

The Master of Engineering degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the Master of Engineering degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

A maximum of eight (8) credit hours of graduate level courses taken as an undergraduate may be used to satisfy MEng degree requirements; these courses cannot have been used to also satisfy BS degree requirements.

¹ Electives must be chosen so that at least one-half of the total credits counted toward the degree, exclusive of thesis, are 600-level

² Technical Electives can be ME or non-ME courses. Technical Electives must be approved by the student's research advisor or the ME Director of Graduate Studies.

³ For the thesis option, a student is required to select both an approved MEng thesis topic and the director and members of the thesis committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in ME 697.

Mechanical Engineering (MS)

Master of Science in Mechanical Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Mechanical Engineering (<https://engineering.louisville.edu/academics/departments/mechanical/>)

Academic Plan Code(s): ME_ _MS

Program Information

The Master of Science (MS) degree program is intended for persons having an accredited baccalaureate degree in mechanical engineering but is available to those with other backgrounds. Applicants with other backgrounds may need to take some undergraduate coursework to meet pre-requisites for graduate courses. Students interested in the MS degree program should consult the Director of Graduate Studies in the Department of Mechanical Engineering.

Degree Requirements

The program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally,

the program of study must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

The requirements for the Master of Science degree are discussed in more detail in the Degree Requirements (p. 16) section of this catalog.

Admission Standards

The admission standards for the master of science program in mechanical engineering are as follows:

- All admission applications for the program shall include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee,
 - At least two letters of recommendation, and
 - Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
- The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).
- International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

The minimum curricular requirements for the master's degree program are:

Code	Title	Hours
ME Electives ¹		15
Technical Electives ^{1,2}		9
Select one of the following:		6
<i>Thesis Option</i>		
ME 690	Master of Science Thesis or Paper in Mechanical Engineering ³	
<i>Non-Thesis Option</i>		
ME Electives ¹		
Minimum Total Hours		30

The master of science degree must be completed with a 3.00 GPA or better for all graduate courses used to satisfy degree requirements. Additionally, the master of science degree must be completed with a 3.00 GPA or better for all academic work attempted in graduate studies.

¹ Electives must be chosen so that at least one-half of the credits counted toward the degree, exclusive of thesis, are 600-level.

² Technical Electives can be ME or non-ME courses. Technical Electives must be approved by the department.

³ For the thesis option, a student is required to select both an approved MS thesis topic and the director and members of the thesis committee during the first term of Graduate Studies. The thesis director must give approval for enrollment in ME 690.

Mechanical Engineering (PhD)

Doctor of Philosophy in Mechanical Engineering

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)

Department: Mechanical Engineering (<https://engineering.louisville.edu/academics/departments/mechanical/>)

Academic Plan Code(s): ME_ _PHD

Program Information

The PhD degree program is intended for persons having an accredited master's and/or baccalaureate degree in mechanical engineering but is available to those with other related backgrounds. Applicants with other backgrounds may need to take some undergraduate coursework to meet pre-requisites for graduate courses or to facilitate conducting dissertation research as directed by the primary research mentor. Students interested in the PhD degree program should consult the Director of Graduate Studies in the Department of Mechanical Engineering.

Degree Requirements

The award of a Doctor of Philosophy degree indicates that a student has attained mastery of a field and has demonstrated the capacity to perform independent scholarly research. Candidates for the Doctor of Philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic coursework attempted in Graduate Studies.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Admission Standards

The admission standards for the PhD program in mechanical engineering are as follows:

1. All admission applications for the program shall include:
 - a. A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - b. An application fee,
 - c. Results from the Graduate Record Examination (GRE),
 - d. At least two letters of recommendation, and
 - e. Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is a baccalaureate degree or its equivalent from an accredited institution or current enrollment in an undergraduate Speed School program.
3. The successful applicant will typically have an undergraduate grade point average of 3.00 or above and a graduate grade point average of 3.25 or above (on a 4.0 scale) if previous graduate course credits are to be applied toward doctoral degree requirements.
4. The successful applicant will typically have a GRE Combined Verbal and Quantitative Reasoning score of 302 or above.
5. International students whose primary language is not English must show English language proficiency by either TOEFL/IELTS/Duolingo score or demonstration of a degree awarded from an acceptable English language institution. The successful applicant will typically have a TOEFL score of 79 or higher or overall IELTS score of 6.5 or higher or a Duolingo score of 105 or higher.

Program Requirements

Normally, it is expected that the student will complete a master's degree before being admitted to the PhD program. However, qualified applicants may be admitted directly to the doctoral program after receiving a baccalaureate degree. These students will be required to complete an additional 30 credit hours of coursework at the 500 and 600 level under an individual plan developed in conjunction with their primary dissertation research mentor and the department's Director of Graduate Studies.

The minimum curricular requirements for the doctoral program are:

Code	Title	Hours
Master's Degree or Approved Master's-Level Course Work		30
Technical Electives ¹		15
ME 700	Dissertation Research in Mechanical Engineering	15
Minimum Total Hours		60

Candidates for the doctor of philosophy degree must have a minimum final cumulative grade point average of 3.00 for all academic work attempted in graduate studies.

¹ Technical Electives can be ME or non-ME courses. Technical Electives must be approved by the department. Students are allowed to take at most six (6) credit hours of Independent Study (ME 588/ME 688) as part of the coursework credit hours.

Medieval and Renaissance Studies (CERT)

Graduate Certificate of Medieval and Renaissance Studies

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Humanities (<https://louisville.edu/humanities/>)

Program Website (<http://louisville.edu/medieval/the-graduate-certificate-in-medieval-and-renaissance-studies/>)

Academic Plan Code(s): MRSTCMR

Program Information

The Graduate Certificate in Medieval and Renaissance Studies is designed for students who wish to pursue their interest in pre-modern and early modern culture in a supportive, interdisciplinary, and intellectually stimulating environment.

Admission Requirements

Language Proficiency

Demonstration of language proficiency by completing a graduate level language course or passing a language competency exam while enrolled in the program (the latter typically involves translating an intermediate 350-500 word passage using a dictionary over three hours).

The Graduate Certificate in Medieval and Renaissance Studies can be completed on its own OR in conjunction with another graduate degree.

- Hold a bachelor's degree from an accredited college or university;
- Complete the University of Louisville, Graduate School, Graduate Admissions application (<http://louisville.edu/graduate/apply/>).

- Schedule an interview with the program director, Dr. Andrew Rabin (andrew.rabin@louisville.edu), Department of English, University of Louisville, Louisville, KY 40292 (502) 852-1722

Program Requirements

1. A total of 18 credit hours in courses approved for graduate credit in accordance with the policies of the Graduate School.
2. Nine (9) credit hours from the list of "Approved Medieval and Renaissance Courses" must be taken in the student's home department. These credit hours may also count towards the student's graduate degree. In cases where the student's home department does not offer a sufficient number of medieval and renaissance courses, the student may develop an alternative course of study with the approval of the program director.
3. Nine (9) credit hours from the list of "Approved Medieval and Renaissance Courses" must be taken outside of the student's home department. These credits must be distributed as follows: three (3) credit hours from the list of courses designated by the program as "History and Culture Courses"; three (3) credit hours from the list of courses designated by the program as "Textual Studies Courses"; three (3) credit hours from the list of courses designated by the program as "Arts and Music Courses." Substitutions must be approved by the program director.
4. Attendance at lectures and participation in workshops conducted each semester by visiting faculty selected by the graduate programs committee.
5. Student must demonstrate reading knowledge at the Master's level in one of the following: Latin, Greek, French, Italian, Hebrew, German, Spanish, Portuguese, or Arabic. Reading knowledge in other languages may be used to fulfill this requirement at the discretion of the program director. Reading knowledge may be demonstrated either by taking a language exam or by earning a B or above in a graduate level language course. Fulfillment of this requirement may overlap with the completion of a language requirement in the student's home department.
6. At least nine (9) credit hours must be at the 600 level.
7. A single course may fulfill more than one of these requirements.
8. Independent studies may not count towards the fulfillment of these requirements.
9. 500-level courses taken for undergraduate credit may not count towards the fulfillment of these requirements. As is standard practice, those students enrolled in 500-level courses for credit towards the certificate must complete the requirements for graduate-level work specified by the instructor.
10. Coursework towards the graduate certificate in medieval and renaissance studies may count towards the student's graduate degree.

Code	Title	Hours

Microbiology and Immunology (MS)

Master of Science in Microbiology and Immunology (MBIOMS)

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)

Department: Microbiology and Immunology (<http://louisville.edu/medicine/departments/microbiology/>)

Program Website (<http://louisville.edu/medicine/departments/microbiology/degrees/>)

Academic Plan Code(s): MBIOMS

Program Information

The Department of Microbiology and Immunology, in the School of Medicine, offers a program of study leading to the degree of Master of Science. The MS program includes training in a broad range of research areas using state-of-the-art immunological, microbiological, and molecular technologies.

Admission Requirements

For admission to the MS program, the applicant must have attained a BS or BA degree with a minimum grade-point average of 3.0 (on a 4.0 scale). All applicants accepted into the master's program must be self-supporting, as financial assistance is not available.

In addition, the following should be submitted online (<https://graduate.louisville.edu/admission/apply/>) directly to the Graduate School, Graduate Admissions:

- A completed application form and application fee
- The TOEFL/IELTS/Duolingo (when applicable)
- Three letters of recommendation
- A brief statement of purpose describing interests and career goals
- A current resume or curriculum vitae
- A letter of agreement from a Department of Microbiology and Immunology faculty member to mentor student
- Official transcripts of all undergraduate and graduate course work submitted to the Graduate School (for international applicants, transcript credentials must be verified by a NACES accredited organization)

The applicant must meet the other general requirements of the Graduate School as outlined in the Application and Admission section (p. 10) of this catalog. The applications are accepted on a rolling basis.

The applicant is expected to have completed the following undergraduate courses prior to admission to the graduate program: Introductory Biology, Organic Chemistry, Introductory Calculus, and Biochemistry.

Prospective students may be invited for a personal interview with members of the admissions committee and departmental faculty as part of the application process.

Program Requirements

Thesis Option

Code	Title	Hours
Coursework Requirements		
MBIO 601 or MBIO 602	Molecular Microbiology (2 credits) ¹ Immunology	3
MBIO 606	Seminar	1
MBIO 610	Methods and Analysis in the Biomedical Sciences	2
MBIO 619	Research	1-12
ASNB 622	Analytics in Biomedical Science	3

BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics	1

Electives ²		
BIOC 667	Cell Biology	3
BIOC 668	Molecular Biology	3-4
MBIO 601	Molecular Microbiology ¹	2
MBIO 602	Immunology ¹	3
MBIO 604	General Virology	1
MBIO 611	Learning Theories & Instructional Strategies in Science Education	2
MBIO 621	Advanced Immunology: Innate and Adaptive Immunity	2
MBIO 622	Advanced Immunology of Disease	2
MBIO 632	Basic Immunology	1
MBIO 687	Microbial Pathogenesis	2
BIOC 663	High-Throughput Sequencing Data Analysis	3
BIOC 670	Biomedical Genetics and Genomics	3-5

Minimum Total Hours 35-38

¹ If MBIO 601 is taken as a Required Course then MBIO 602 can be taken as an elective. Likewise, if MBIO 602 is taken as a Required Course then MBIO 601 can be taken as an elective.

² A minimum of three courses is required and must be a scientific course from the list below with at least two being MBIO. Additional courses outside of the department can be taken in consultation with the research advisor and director of graduate studies.

Research Advisor and Project

Students in the MS thesis option program are required to obtain a Research Advisor before being admitted to the program. Students should form a Thesis Committee and decide upon a research project early in the second semester of graduate study. Students, in consultation with their Advisor, should form a Thesis Committee consisting of three graduate faculty members with at least two with primary appointments in the Department of Microbiology and Immunology. Should the Research Advisor be an associate member of the Department of Microbiology and Immunology, one of the Microbiology and Immunology Primary faculty will serve as a Co-Advisor. The Thesis Committee may consist of more than three faculty members, however, a majority of the faculty on the Thesis Committee must have primary appointments in the Department of Microbiology and Immunology. Selection of the Research Advisor and formation of the Thesis Committee must be approved by the Chair of the Microbiology and Immunology and the Associate Dean for Graduate Education in the School of Medicine.

Evaluation of Student's Progress

The Thesis Committee will meet at least annually to evaluate the student's progress. Students are expected to maintain satisfactory progress in their research project each semester. Students may proceed to degree candidacy provided they have successfully maintained an overall and program GPA of 3.0 or higher (with a grade no lower than a B-minus in any MBIO course), Pass grades in all required courses with Pass/Fail (P/F) grading, and successful completion of all required coursework.

Master's Thesis Examination

Students pursuing the thesis option are required to write and defend a master's degree thesis. The thesis must be a work of sufficient quality to demonstrate the student's ability to participate effectively on a research project. Following preliminary review and approval by the Research Advisor, the thesis should be distributed to the Thesis Committee members, and a written request submitted to the Graduate School, at least two weeks prior to the scheduled date of the final oral exam. The final oral defense/exam will be preceded by a research seminar open to all graduate faculty members, students, and other interested persons. The oral exam will be administered by the Thesis Committee. To satisfactorily pass the thesis defense, a majority of the committee members must approve it. The final copy of the thesis must be submitted as advised by the Graduate School through the ThinkIR repository. The directions on submission will be provided upon review of the thesis by the Graduate School. Please find the published deadline dates (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/>) by the Graduate School.

Guidelines and requirements concerning the thesis and final oral examination are set forth on the Graduate School website (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/>).

Non-Thesis Option

Code	Title	Hours
Coursework Requirements		
MBIO 601 or MBIO 602	Molecular Microbiology ¹ Immunology	2-3
MBIO 606	Seminar (Fall and Spring - 1 Credit Hour each semester)	2

MBIO 632	Basic Immunology	1
MBIO 687	Microbial Pathogenesis	2
ASNB 622	Analytics in Biomedical Science	3
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics	1
BIOC 663	High-Throughput Sequencing Data Analysis	3
BIOC 670	Biomedical Genetics and Genomics	3
Minimum Total Hours		36-37

¹ If MBIO 601 is taken as a Required Course then MBIO 602 can be taken as an elective. Likewise, if MBIO 602 is taken as a Required Course then MBIO 601 can be taken as an elective.

² A minimum of three courses is required and must be a scientific course from the list below with at least two being MBIO. Additional courses outside of the department can be taken in consultation with the research advisor and director of graduate studies.

If the student has satisfactorily completed the required courses and total credit hour requirements with an overall and program GPA of 3.0, then the student may register in master's candidacy.

Evaluation of Student's Progress

Students will meet with the associate director of graduate studies at the conclusion of the Year 1 Fall and Year 1 Spring semesters. Students are required to identify a faculty advisor by completion of Year 1. The faculty advisor will provide mentorship through completion of the master's final oral examination. Students are expected to maintain satisfactory progress in their coursework. Students may proceed to degree candidacy provided they have successfully maintained an overall and program GPA of 3.0 or higher (with a grade no lower than a B-minus in any MBIO course), Pass grades in all required courses with Pass/Fail grading, and successful completion of all required coursework.

Master's Final Oral Examination

Students are required to write either a literature-based research proposal or a literature review and orally defend it to their master's final examination committee. The decision to write a research proposal or literature review will be made between the student and their faculty advisor. The Department of Microbiology and Immunology curriculum committee will name the master's final examination committee, which will be comprised of at least three graduate faculty members with at least two members with primary appointments in the Department of Microbiology and Immunology. To satisfactorily pass the master's final exam, a majority of the committee members must approve.

Microbiology and Immunology (PhD)

Doctor of Philosophy in Microbiology and Immunology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)

Department: Microbiology & Immunology (<http://louisville.edu/medicine/departments/microbiology/>)

Program Website (<http://louisville.edu/medicine/departments/microbiology/degrees/phd-mi/>)

Academic Plan Code(s): MBIOPHD

Program Information

The Department of Microbiology and Immunology, in the School of Medicine, offers a program of study leading to the degree of Doctor of Philosophy. The PhD program includes training in a broad range of research areas using state-of-the-art immunological, microbiological, and molecular technologies. A competitive stipend, health care benefits, a full waiver of tuition and fees are provided to all applicants accepted into the PhD Program.

Admission Requirements

For admission to the PhD program, the applicant must have attained a BS or BA degree with a minimum grade-point average of 3.0 (on a 4.0 point scale). In addition, the following should be submitted online (<http://>

www.louisville.edu/graduate/futurestudents/apply-materials/) directly to the Graduate School, Graduate Admissions.

- A completed application form and application fee
- The TOEFL, IELTS or Duolingo (when applicable)
- Three letters of recommendation
- A brief statement of purpose describing interests and career goals
- A current resume or curriculum vitae
- Official transcripts of all undergraduate and graduate coursework (submitted to the Graduate School, Graduate Admissions; international transcripts require NACES accredited verification)

The applicant must meet the other general requirements of the Graduate School as outlined in the General Information section of this catalog. The application deadline is March 1 each year. Submission prior to March 1 is strongly encouraged in order to ensure that all required materials (especially letters of reference) are received by the deadline.

The applicant is expected to have completed the following undergraduate courses prior to admission to the PhD program (one semester of each):

- Introductory biology
- Organic chemistry
- Introductory calculus
- Biochemistry

Prospective students may be invited for a personal interview with members of the admissions committee and departmental faculty as part of the application process.

Student Financial Support

Students accepted into the PhD program will be considered for an IPIBS graduate student fellowship. The fellowship pays an annual stipend in addition to payment of student tuition and health insurance.

Program Requirements

Coursework

Code	Title	Hours
Required Courses (minimum grade of B-is required for all)		
MBIO 600	Lab Rotations (Fall & Spring)	1
MBIO 601	Molecular Microbiology (Fall)	2
MBIO 602	Immunology (Fall)	3
MBIO 604	General Virology (Fall)	1
MBIO 606	Seminar (Fall & Spring)	1
MBIO 610	Methods and Analysis in the Biomedical Sciences (Fall)	2
MBIO 619	Research (Fall, Spring & Summer)	1-12
MBIO 623	Scientific Writing and Hypothesis Testing (Spring)	1
ASNB 622	Analytics in Biomedical Science (Fall)	3
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics (Spring)	1
BIOC 667	Cell Biology (Spring)	3
BIOC 668	Molecular Biology (Spring)	3
Elective Courses		

A minimum of three elective courses is required and must be a scientific course from the list below (at least two must be MBIO):

MBIO 611	Learning Theories & Instructional Strategies in Science Education	2
MBIO 621	Advanced Immunology: Innate and Adaptive Immunity (Spring)	2
MBIO 622	Advanced Immunology of Disease (Fall)	2
MBIO 687	Microbial Pathogenesis (Spring)	2
BIOC 663	High-Throughput Sequencing Data Analysis	3
BIOC 670	Biomedical Genetics and Genomics (Fall)	3-5
BIOC 675	Cancer Biology (Spring)	4
Minimum Total Hours		36-38

Note: Students enrolled in the MD/PhD Joint Degree Program, who have completed step I of NBME, will have satisfied all of the required course requirements except MBIO 606, BIOC 630, MBIO 610, MBIO 623, MBIO 619, and three scientific electives. They will be required to satisfactorily complete the Qualifying Exam and successfully defend a dissertation research project, in addition to attending all journal club sessions and seminars.

Qualifying Examination

Upon successful completion of the required course work, maintaining a minimum 3.0 GPA, and upon the recommendation of the advisor or chair, the student may take the PhD Qualifying Examination. The Qualifying Examination will consist of a written research proposal related to the area of primary research and an oral defense of the project, both prepared independently without help from their mentor. Three to five faculty with expertise in the area of the proposal will be selected by the Curriculum Committee to serve as the Examining Committee. The student may enter degree candidacy upon receipt of satisfactory judgment from the Examining Committee and successful completion of the final semester of coursework.

Selection of a Research Advisor, Dissertation Committee, and Research Proposal

Students must select a Research Advisor for their dissertation research by the end of their first year. Selection of the Research Advisor is a joint decision by the student and faculty member. Selection of the Research Advisor and formation of the Dissertation Committee must be approved by the Department Chair and the Dean of the School of Medicine (or their designees). The potential advisor must agree, in writing, to provide stipend and candidacy fee support from his/her research funds upon entering PhD candidacy. Upon approval of the Research Advisor, the student will formally decide upon a dissertation research project. The student and Research Advisor will form a Dissertation Committee with five graduate faculty members. The committee will be composed of the advisor, three faculty members of the Department of Microbiology and Immunology, and one additional graduate faculty member from another department. If the advisor does not have a primary appointment in the Department of Microbiology and Immunology, one of the three other departmental members with a primary appointment in the department must serve as Co-Advisor.

The committee will meet regularly to evaluate the progress of the research (at least once per year). The student will also be required to present a research seminar to the department annually on this progress. When the dissertation research is completed, the committee will conduct the final oral examination in accordance with the guidelines in the General Information section of this catalog.

Middle Grades Education (RANK1)

Rank 1 Program in Middle Grades Education Advanced Practitioner

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (ED)

Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)

Program Website (<https://louisville.edu/education/degrees/rank/>)

Academic Plan Code(s): MSERK1MAP

Program Information

Rank 1 programs are not degree programs.

Rank 1 programs are planned graduate level programs designed for Kentucky teachers seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank 1 status is 60 credit hours of approved graduate credit including a master's degree.

Teachers who complete a Rank 1 program may obtain a Rank change for salary purposes in Kentucky. Through a Rank 1 program, teachers may increase their depth of knowledge in their teaching areas or in additional areas of certification, as appropriate.

Admissions Requirements

Students may apply to the program by first going to the Graduate School (<https://graduate.louisville.edu/admission/apply/>) website. Admission requirements include the following credentials:

- Graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).
- Official transcripts with a GPA of 2.75 in the Bachelor's degree and a GPA of 3.0 in the master's degree.
- Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either World Education Services (<https://www.wes.org/>) (WES) (<https://www.wes.org/>) or Educational Credential Evaluators (<https://www.ece.org/ECE/>) (ECE) (<https://www.ece.org/ECE/>). Please note that transcript evaluations can sometimes take several weeks.
- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.
- Teaching certificate in Middle Grades Education and a master's degree/Rank II
- Signed Professional Code of Ethics/Technology User Agreement

Please have transcripts sent to:

University of Louisville
Graduate School, Admissions
 Houchens Building, Suite 105
 Louisville, KY 40292

If transcripts are sent electronically, please have them sent to the following e-mail: gradadm@louisville.edu.

Rank 1 Requirements

(For teachers who have earned a master's degree)

Code	Title	Hours
Inquiry		3
Select one of the following:		
EDAP 639	Education Research in P-12 Setting	
LEAD 601	Applied Statistics	
Advocacy (Professional Leader)		
Leadership		3
Select one of the following:		
EDAP 624	Curriculum Theory	
EDAP 637	Using Assessment to Improve Student Achievement	
EDAP 677	Developing Collaborative Groups: Facilitating, Coaching and Mentoring	
LEAD 636	Instructional Leadership 2	
Diversity		3
Select one of the following:		
EDAP 521	Teaching English Learners in the Classroom	
EDAP 638	Instructional Strategies for Diverse Learners	
EDAP 642	Literacy Learning and Cultural Differences	
EDTP 503	Developing Cross-Cultural Competence: Teaching Students from Diverse Backgrounds	
Area of Emphasis		12-18
Electives		0-6
Action (Problem Solver)		3
EDAP 681	Teacher Leadership in Practice *	
Minimum Total Hours		30

Up to fifteen (15) credit hours of graduate credit may be transferred to the Rank 1 program, as long as the student will have completed 60 credit hours of approved graduate credit including a masters degree at the end of the Rank 1 program. Transfer credit must be officially accepted by the advisor and final acceptance is dependent upon receipt of official transcripts.

In the Rank 1 program, at least fifteen (15) credit hours of new graduate coursework must be taken at the University of Louisville.

To complete the program, students must have minimum 3.0 cumulative grade point average. No grade lower than B-minus will be accepted.

Midpoint Requirement

Candidates are required to submit a mid-point performance assessment to their faculty advisor at the completion of fifteen (15) credit hours of coursework. The faculty advisor will assess the candidate's performance assessment, which must be at the Exemplary or Target level. The performance assessment must address content, classroom environment, teaching, assessing, and reflection, using an artifact (such as a video), to document professional learning.

Exit Requirements: Hallmark Assessment Task for EDAP 681 or equivalent project that demonstrates proficiency in the Kentucky Teacher Performance Standards.

* Course project must address all of the Kentucky Academic Standards.

Middle School Education (MAT)

Master of Arts in Teaching in Middle School Education

Unit: College of Education and Human Development (<http://louisville.edu/education/>) ([GE](#))

Department: Elementary, Middle, and Secondary Education (<https://louisville.edu/education/departments/mise/>)

Program Website (<https://louisville.edu/education/degrees/mat-mse/>)

Academic Plan Code(s): MSSEMAT

Program Information

The MAT in Middle School Education enables graduate students to earn their initial teaching certification for Kentucky in the content areas of English, Mathematics, Science or Social Studies, grades 5-9. Teacher candidates learn to teach through instruction in pedagogy, child development, special education, technology, and diversity. The program integrates field experiences that align both with program studies and professional education career goal.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program. Candidates considering application to the MAT program should contact the Education Advising and Student Services office (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission.

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

Applicants must complete/satisfy the following:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Praxis II (<http://louisville.edu/education/degrees/info/mat-mse-praxis-ii/>) Content Exam registration and/or scores
3. Bachelor's degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with major in content area or appropriate prerequisite courses and a minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
4. Grade of C or higher in ENGL 102 (or equivalent)
5. C or higher in oral communication course
6. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
7. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
8. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
9. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
10. Acceptable interview

Program Requirements

Praxis Disclaimer: Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Professional Standards Board (EPSB) website at epsb.ky.gov (<http://www.ets.org/praxis/ky>) for current requirements.

The Master of Arts in Teaching in Middle School Education program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> ([https://](https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure)

louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> ([https://louisville.edu/online/About-Us/?tab=disclosures](https://louisville.edu/online/About-Us?tab=disclosures)).

Middle School Education - Alternative Certification 5-9 (MAT)

Master of Arts in Teaching in Middle School Education, Alternative Route to 5-9 Certification

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)

Program Website (<https://louisville.edu/education/degrees/mat-ac/>)

Academic Plan Code(s): MSEDMATENG, MSEDMATMAT, MSEDMATSCI, MSEDMATSSST

Program Information

The Alternative Certification program is designed to assist local school districts in meeting the demand for qualified teachers in high need content areas. The program provides candidates with an opportunity to pursue initial teacher certification while working as a full-time teacher on a temporary provisional license.

Employment is not required for initial acceptance to the program. However, candidates must be employed in a Kentucky-accredited school by the start of the school year in order to continue in the program. This program is a two-year, 30 credit hour program resulting in initial teacher certification and a Master of Arts in Teaching (MAT) degree.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Alternative Certification program:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Passing scores on content Praxis II Exam(s) (<http://louisville.edu/education/degrees/info/mat-ac-praxis-ii/>)
3. Bachelor's Degree (<http://louisville.edu/education/degrees/info/bachelors/>) from Accredited College or University with major in content area and a minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
4. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-mse-prereq/>) – Applicants may apply to the program with up to six (6) credit hours of content remaining to complete.
5. Grade of C or higher in ENGL 102 (or equivalent)
6. Grade of C or higher in oral communication course
7. TOEFL (<https://www.ets.org/toefl.html>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
8. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)

9. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
10. Experience working with diverse groups of children/adolescents
11. Acceptable interview

Candidates considering application to the MAT program should contact the Education Advising and Student Services office (teacher@louisville.edu) prior to applying for admission.

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

EDTP 609	Middle School Science Methods	
EDTP 610	Middle School Social Studies Methods	
EDTP 633	Integrated Teaching and Learning III	3
EDTP 627	Practicum for Alternative Certification Program (two semesters)	3
Mid-Point Assessment ¹		
EDTP 503	Developing Cross-Cultural Competence: Teaching Students from Diverse Backgrounds	3
EDTP 620	Reading and Writing Across the Curriculum	3
EDAP 688	Designing a Technology Integrated Curriculum	3
EDTP 678	Supporting the Second Year Alternative Certification Teacher I	1-3
EDTP 679	Supporting the Second Year Alternative Certification Teacher II	1-3
Minimum Total Hours		30

To maintain your Temporary Provisional Certificate, you MUST be enrolled in Alternative certification coursework.

¹ **Mid-Point Assessment:** Completion of all courses listed above; satisfactory dispositions assessment; no lower than a "C" in content methods class(es); grade of "C" or higher in EDTP 627, EDTP 678, and EDTP 679; 2.50 cumulative GPA in content course requirements; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Certification Assessment: Satisfactory dispositions assessment; passing scores on PRAXIS content and PLT exams; completion of degree requirements.

Degree Assessment: All program course work with 3.0 cumulative GPA (and no more than a total of two "C's" in degree courses); satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Candidacy: If not enrolled during the semester in which you are graduating, you will need to register for a degree candidacy as outlined in the Graduate Catalog (p. 13).

Praxis Disclaimer: Teacher certification requirements are subject to change. Before registering for the test(s), please refer to the Education

Professional Standards Board (EPSB) website at epsb.ky.gov/ (<http://www.epsb.ky.gov/>) for current requirements.

The Master of Arts in Teaching in Middle School Education and all related content areas prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Music Composition (MM)

Master of Music in Music Composition

Unit: School of Music (<https://louisville.edu/music/>) (GU)

Program: Music Composition (<http://louisville.edu/music/academics/areas-of-study/music-composition/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information

The Master of Music Composition (MM) degree (<http://louisville.edu/music/academics/degrees-majors/master-of-music-degrees/>) is a two-year program of study designed to further the expertise and experience of students who have already completed an undergraduate degree in music composition (or its equivalent). While most students who are admitted into the MM Composition program have received undergraduate degrees in music composition, students without an undergraduate degree in music composition may be accepted in the MM composition program if they 1) demonstrate compositional skills and experience approximately equivalent to an undergraduate degree in composition, and 2) hold a Bachelor of Music degree or its equivalent.

General Information Regarding Academic Policies

1. Detailed curricular and program offerings, including specific requirements and provisions for degree programs, are published in the university catalog. Students will be provided with copies of

the "Handbook for Graduate Studies in Music", the "Guidelines for Preparation for the Graduate Music History Entrance Examination," and "Guidelines for Preparation for the Graduate Music Theory Entrance Examination." These documents are also available on the School of Music website (<http://louisville.edu/music/>).

2. Students will be required to address any deficiencies revealed by entrance examinations in courses taken within the first two semesters of study. Credit toward the degree is not granted for review coursework.
3. All students are required to complete Bibliography and Research Methods (MUS 607) by the end of the second semester of study (part-time students by the completion of 15 credit hours of graduate study). Upon satisfactory completion of requirements stated in Handbook sections B.2 and B.3, students will be considered in good standing.
4. Students will complete a project appropriate to the field of study as defined by the faculty of their program. The completion of this project (public recital, thesis, professional paper) normally takes place in the last semester of graduate study. Preparation and presentation of a recital must follow the guidelines in the "Handbook for Graduate Studies in Music" and the preparation of a thesis must follow the "Guidelines for the Preparation and Processing of Theses (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>)" issued by the Graduate School. The preparation of a thesis in music composition must also follow the "School of Music Thesis Formatting Guidelines for MM in Composition (<http://louisville.edu/music/academics/areas-of-study/music-composition/documents/ULCompThesisGuidelines.pdf>)".
5. In order to graduate, a student must be in good standing with a minimum cumulative grade point average of 3.0. No more than six (6) credit hours with any C or C+ grade will be accepted toward a degree, and no grade below a B-minus will be accepted for a course in the student's major subject area. Credit hours earned beyond the minimum in any curricular areas apply only to that area and cannot be assigned to another area in order to satisfy required credit. At least one-half of the total hours in graduate courses must be at the 600 level. Any exceptions to the program of study must be approved by the Graduate Studies Committee. A student whose cumulative GPA falls below 3.0, or who fails to satisfy the published performance criteria, will be placed on academic probation. Students are ordinarily not permitted to continue on academic probation for more than one semester.
6. When all coursework and projects have been satisfactorily completed, the student becomes a candidate for the degree and is approved to take the graduate oral examination. A candidate who fails the oral examination at the end of one semester may not be given a second one before the end of the following semester. A candidate who fails the second oral examination will not be granted the degree of MM or MME from the University of Louisville.
7. Upon request, a maximum of six (6) credit hours of earned graduate credit with a minimum grade of B may be transferred from accredited institutions that offer advanced degrees. Credit for applied music will not be transferred, but advanced standing may be awarded at a jury. Ensemble credits appropriate to the student's degree program may be considered for transfer, but not to exceed one (1) credit hour per semester. Music history and music theory credits will be evaluated for transfer by the Director of Graduate Studies and the respective faculty. Transfer of more than six (6) credit hours may be requested provided that they are not earned by extension, or as thesis or practicum hours, and that the residency requirement of 24 credit hours is maintained by the addition of the University of Louisville

credits to the total program. Transfer of graduate credit hours within the University of Louisville toward a graduate degree in music may be requested provided that the minimum residence requirement of 24 credit hours is maintained.

8. Students receiving a graduate assistantship (teaching, research, or service) will be provided with adequate training and will be required to adhere to university policies. Performance of duties in research and service by graduate assistants will be periodically evaluated. Students with teaching assistantships will be evaluated each semester.
9. Part-time students (with the exception of those in the MME degree program) must participate in one ensemble for every 18 credit hours of completed coursework. If part-time study precludes completing ensemble degree requirements, other coursework may be substituted.

Admission Requirements

1. Applications for admission to a graduate program require the following:
 - a. Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) and application fee
 - b. Official transcripts for all previous post-secondary course work (all transcripts not in English must be certified as authentic and translated verbatim into English)
 - c. At least two letters of recommendation
2. Applications to specific degree programs require evidence of preparation for advanced study as follows:
 - a. In performance, an acceptable audition
 - b. In academic specializations (music composition, music history, music theory), a portfolio of work appropriate to the field of study
 - c. In music education, evidence of classroom teaching experience
3. Applicants whose primary language is not English must show English language proficiency in one of the following ways:
 - a. Minimum TOEFL examination score of 213 on the computer-based test, or 79-80 on the internet based test, IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.
 - b. Documentation of the award of a degree from a recognized English language institution.
4. Applicants must possess a baccalaureate degree from an accredited institution in the area to be pursued in advanced studies, or they must present evidence of equivalent preparation.
5. Applicants must have a minimum cumulative undergraduate grade point average of 2.75 on a 4-point scale.

Applicants who meet the requirements listed in items 1-5 will be considered for conditional admission for graduate study at the School of Music. For additional entrance requirements specific to the degree of interest, consult the section relevant to the degree program below. Entrance examinations in music history, theory and, if appropriate, jazz, will be administered before the first term of study. The School of Music provides guidelines to assist in preparing for the entrance examinations.

Any exception to the above expectations will be evaluated individually and will require a statement indicating criteria to be met in a specified time frame with provisions for monitoring progress and performance. Justification must be provided in writing and must be accepted by the faculty of the student's proposed program, the Director of Graduate Studies, and the Dean of the School of Music. Students who fail to meet performance standards or who do not meet other requirements as

outlined in the letter of admission, program of study, or the catalog of the University of Louisville are subject to dismissal from their programs.

Prerequisites

1. Bachelor of Music degree or equivalent.
2. A demonstration, by examination, of skills and capacities in the following fields:
 - a. Written, aural, and keyboard harmony
 - b. Melodic, harmonic, and rhythmic dictation
 - c. Elementary counterpoint
 - d. History and literature of music, and analytic understanding of musical forms and genres
3. Evidence of preparation for advanced work in the area, as follows:
 - a. Applicants for the track in Music Composition must submit original works to indicate ability and technical facility in the field of composition.
 - b. Students should have a thorough and practical knowledge of piano, as well as a thorough knowledge in the areas of string, brass, woodwind, and percussion instruments.

Program Requirements

Coursework

Code	Title	Hours
MUS 500	Music History Review ¹	0
MUS 400	Theory Review ¹	0
MUS 600	Graduate Oral Exam Preparation	0
MUS 607	Bibliography and Research Methods	3
	Music History Seminar (600 level)	3
	Music Theory ²	6
	Additional Music Theory or Music History Seminar (500 or 600 level) ³	3
Select one of the following:		3
MUS 647	Advanced Chromatic Harmony and Analysis	
MUS 648	Advanced Post-Tonal Theory and Analysis	
MUS 651	Schenkerian Analysis	
MUS 653	Advanced Analysis	
	Ensemble ⁴	3
	Concentration Requirements (see tab) ⁵	11-19
	Thesis	4
Minimum Total Hours		36-44

Other Requirements

All students must pass an oral examination after all coursework is completed.

- ¹ These courses may be satisfied by passing the entrance examinations in these areas
- ² Students should take MUS 667 Introduction to Electronic and Computer Music and MUS 668 Advanced Topics in Computer Music. Co-requisite for MUS 667/MUS 668 sequence.
- ³ Students in Electronic Music Composition Track should take AUDI 606 offered by Heuser Hearing Institute and Audiology Department in lieu of an additional Theory or History Seminar.
- ⁴ Three semesters of major ensemble or MUS 551 Studies in Improvisation (two (2) credit hours) and one (1) elective credit hour, which can be satisfied by a major ensemble or two semesters of minor

ensemble, but may also be satisfied by an academic or applied elective at the 500 or 600 level.

- ⁵ Music Composition and Electronic Music Composition concentrations require 11 credits; Acoustic and Electronic Music Composition concentration requires 19 credits.

Concentration Requirements

Music Composition Concentration

Academic Plan Code(s): MUSIMM COM

Code	Title	Hours
MUSA 643	Advanced Private Instruction in Composition and Orchestration I ¹	3
MUSA 644	Advanced Composition and Orchestration II ¹	3
MUSA 645	Advanced Composition and Orchestration III ¹	3
MUS 669	Graduate Composition Seminar ²	0
	Applied Music ³	2
Total Credit Hours (Concentration)		11
Minimum Total Hours (Degree)		36

¹ Graduate composition majors are required to present public performances of their works within at least two semesters of their enrollment, for a total of at least 20 minutes of music. The graduate thesis will not be granted final approval until this requirement is met.

² Four semesters required (Co-requisite for MUSA 643, MUSA 644, MUSA 645, or MUSA 646).

³ 500 level or above# minimum of two semesters# may include Conducting or Seminar in Conducting MUS 659/MUS 660 (sections designated for students who are not conducting majors); may include Composition for Digital Media (MUS 683); but excludes additional semesters of Applied Composition.

Electronic Music Composition Concentration

Academic Plan Code(s): MUSIMM EMC

Code	Title	Hours

MUS 669	Graduate Composition Seminar ¹	0
Applied Music ²		2
Computer Science or New Media Elective ³		2
Total Credit Hours (Concentration)		19
Minimum Total Hours (Degree)		44

¹ Co-requisite for MUSA 643, MUSA 644, MUSA 645, MUS 683, MUS 684, MUSA 685.

² 500 level or above; minimum of 2 semesters; may include Conducting or Seminar in Conducting MUS 659/MUS 660 (sections designated for students who are not conducting majors). Students in Acoustic and Electronic Music Composition can't take additional Applied Composition or Composition for Digital Media courses.

³ Must be approved by the Director of Computer Music Studies.

Music Education (MAT)

Master of Arts in Teaching in Music Education

Unit: School of Music (<https://louisville.edu/music/>); College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Elementary, Middle, and Secondary Education (<https://louisville.edu/education/departments/mise/>)

Program Webpage (<https://louisville.edu/education/degrees/mat-me/>)

Academic Plan Code(s): EDMUMAT

Program Information

The MAT in Music Education at the University of Louisville combines advanced coursework in music and education with hands-on teaching experiences in diverse school environments. Students will engage in a rigorous curriculum that fosters pedagogical expertise, musicianship, and leadership, preparing them to inspire the next generation of musicians. The degree requires two semesters of student teaching in elementary and secondary schools, enabling graduate students to earn their initial teaching certification for Kentucky, grades P-12.

The Department of Teaching and Learning is committed to the highest standards of professional preparation. Our programs have sought and received national accreditation from the National Council for Accreditation of Teacher Education.

Graduates of initial teacher certification programs at the University of Louisville begin their teaching careers secure in the knowledge that they have been prepared for the real world of classrooms through a rigorous teacher preparation program.

The School of Music provides each student with a copy of the "Handbook for Graduate Music Students." Students are expected to read the Music Handbook and the Graduate Catalog and to follow regulations and procedures regarding their specific degree program at the University of Louisville.

Admission Requirements

Candidates to initial teacher certification programs are required to submit credentials supporting their academic ability, creativity and collaboration, communication and critical thinking skills, positive disposition, and commitment to the teaching profession. These credentials include test scores, transcripts, writing samples, and letters of recommendation which support the candidate's ability to succeed in a rigorous teacher education program. Competitive candidates will be invited to a formal, faculty interview (<http://louisville.edu/education/degrees/info/interview/>).

Candidates for admission should review the following which outlines the expectations of the teaching profession:

1. Professional Code of Ethics for Kentucky School Personnel [PDF] (<http://louisville.edu/education/degrees/forms/Ethics%20Technology%20Forms%20August%202008.pdf>)
2. CEHD Acceptable Use of Technology Agreement [PDF] (<http://louisville.edu/education/degrees/forms/Ethics%20Technology%20Forms%20August%202008.pdf>)
3. Character and Fitness Questionnaire [PDF] (<http://louisville.edu/education/degrees/forms/character-fitness-questionnaire.pdf>)
4. Professional Dispositions Rubric [PDF] (<http://louisville.edu/education/degrees/forms/dispositions-rubric.pdf>)
5. Diversity Rubric [PDF] (<http://louisville.edu/education/degrees/forms/diversity-rubric.pdf>)
6. Effective Written Communication Rubric [PDF] (<http://louisville.edu/education/degrees/forms/effective-written-communication-rubric.pdf>)

Application

Questions about the application should be directed to teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>). Candidates will be notified via e-mail regarding the admission decision no later than six weeks after the application deadline. Applicants who are selected for admission will receive information about a mandatory orientation session.

Application Deadlines

University of Louisville Music Education students applying for the MAT program should have already applied and been accepted, to the College of Education and Human Development teacher education program.

The teacher education admission deadline occurs February 1 each year and the application is typically submitted in the Spring semester of the sophomore year. For more information about this process, please click on the "how to apply" tab at louisville.edu/education/degrees/bme (<http://louisville.edu/education/degrees/bme/>).

All students must be admitted to teacher education to enroll in MUED coursework.

University of Louisville undergraduate students who plan to pursue the MAT program will submit an online graduate application during the last semester of their senior year. Please see Admission Criteria below. Application deadline: March 1st for Fall admission

Admission Criteria for application to the MAT program

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program. Candidates considering applying to the MAT program should contact their Music Education faculty advisor prior to applying for admission. Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>)
2. PRAXIS II exams (official scores or registration ticket) (<http://louisville.edu/education/degrees/info/mat-mse-praxis-ii/>)
3. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a minimum 2.75 Grade Point Average (University of Louisville students are not required to submit a UofL transcript)
4. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-me-prereq/>)
5. Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>) (Letters submitted previously with teacher education application may be used.)
6. Professional Writing Requirements (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>) (Professional Writing Requirements submitted previously with teacher education application may be used.)
7. C or higher in ENGL 102
8. C or better in oral communication course

Program Requirements

Prerequisites

Completion of the pre-teacher education courses:

- EDTP 107/ECPY 507/ECPY 607 - Learning and Human Development
- EDTP 201/EDTP 502/EDTP 602 - Exploring Teaching P - 12, and
- EDTP 420/MUED 556 Special Methods in Secondary Teaching.

Appropriate bachelor's degree or specific music education content required. For specific admission requirements, contact the School of Music.

Professional Education Requirements

Code	Title	Hours
MUED 628	Qualitative Research Methods	2
MUED 629	Foundations of Music Education	2
MUED 630	Quantitative Research Methods & Materials in Music Education	2

MUSA 512	Principal Applied Study	2
or MUSA 612	Applied Music	
or MUS 660	Seminar in Conducting II	

Exit Requirements

MUED 607	Student Teaching Seminar I	3
MUED 609	Capstone Seminar (Second semester of student teaching) ¹	3
MUED 610	Music Student Teaching in the Elementary/Secondary Schools I (CE) ¹	6
MUED 611	Music Student Teaching in the Elementary/Secondary Schools II (CE) ¹	6

Minimum Total Hours **30**

¹ Electronic documentation of 200 hours of diverse and approved field experiences required prior to student teaching.

Certification Exit Assessment

Satisfactory dispositions assessment; passing scores on required PRAXIS exams; completion of degree requirements.

Degree Exit Assessment

All certification and degree coursework completed with a 3.0 cumulative GPA; 2.5 cumulative GPA in content course requirements; "B-" or higher in each student teaching placement; satisfactory performance on all Hallmark Assessment Tasks; Target or better performance on all rubrics.

Degree Candidacy

If not enrolled during the semester in which you are graduating, you must register for degree candidacy as outlined in the graduate catalog (see General Policies, Procedures and Requirements (p. 13)).

Praxis Disclaimer

"Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Professional Standards Board (EPSB) website at epsb.ky.gov (<http://www.ets.org/praxis/ky>) or <http://www.ets.org/praxis/ky/> for current requirements."

The Master of Arts in Teaching in Music Education program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Us?tab=disclosures (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Music Education (MME)

Master of Music Education in Music Education

Unit: School of Music (<http://louisville.edu/music/>) (GU)

Program Website (<https://louisville.edu/music/academics/areas-of-study/music-education/>)

Academic Plan Code(s): MUEDMME

Program Information

The Master of Music Education program allows an applied music minor in an instrument, voice, or conducting. Each degree program has specific prerequisites, entrance requirements, and programmatic expectations that are described in the relevant section of the catalog.

General Information Regarding Academic Policies

1. Detailed curricular and program offerings, including specific requirements and provisions for degree programs, are published in the university catalog. Students will be provided with copies of the "Handbook for Graduate Studies in Music", the "Guidelines for Preparation for the Graduate Music History Entrance Examination," and "Guidelines for Preparation for the Graduate Music Theory Entrance Examination." These documents are also available on the School of Music website (<http://louisville.edu/music/>).
2. Students will be required to address any deficiencies revealed by entrance examinations in courses taken within the first two semesters of study. Credit toward the degree is not granted for review coursework.
3. All students are required to complete Bibliography and Research Methods (MUS 607) by the end of the second semester of study (part-time students by the completion of 15 credit hours of graduate study). Upon satisfactory completion of requirements stated in Handbook sections B.2 and B.3, students will be considered in good standing.
4. Students will complete a project appropriate to the field of study as defined by the faculty of their program. The completion of this project (public recital, thesis, professional paper) normally takes place in the last semester of graduate study. Preparation and presentation of a recital must follow the guidelines in the "Handbook for Graduate Studies in Music" and the preparation of a thesis must follow the "Guidelines for the Preparation and Processing of Theses (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-information/>)" issued by the Graduate School. The preparation of a thesis in music composition must also follow the "School of Music Thesis Formatting Guidelines for MM in Composition (<http://louisville.edu/music/academics/areas-of-study/music-composition/documents/ULCompThesisGuidelines.pdf>)".
5. In order to graduate, a student must be in good standing with a minimum cumulative grade point average of 3.0. No more than six (6) credit hours with any C or C+ grade will be accepted toward a degree, and no grade below a B-minus will be accepted for a course in the student's major subject area. Hours earned beyond the minimum in any curricular areas apply only to that area and cannot be assigned to another area in order to satisfy required credit. At least one-half of the total credit hours in graduate courses must be at the 600 level. Any exceptions to the program of study must be approved by the Graduate Studies Committee. A student whose cumulative GPA falls below 3.0, or who fails to satisfy the published performance criteria, will be placed on probation. Students are ordinarily not permitted to continue on probation for more than one semester.
6. When all coursework and projects have been satisfactorily completed, the student becomes a candidate for the degree and is approved to take the graduate oral examination. A candidate who fails the oral examination at the end of one semester may not be given a second one before the end of the following semester. A candidate who fails the second oral examination will not be granted the degree of MM or MME from the University of Louisville.
7. Upon request, a maximum of six (6) credit hours of earned graduate credit with a minimum grade of B may be transferred from accredited institutions that offer advanced degrees. Credit for applied music will not be transferred, but advanced standing may be awarded at a jury. Ensemble credits appropriate to the student's degree program may be considered for transfer, but not to exceed one (1) credit hour per semester. Music history and music theory credits will be evaluated for transfer by the Director of Graduate Studies and the respective faculty. Transfer of more than six (6) credit hours may be requested provided that they are not earned by extension, or as thesis or practicum hours, and that the residency requirement of 24 credit hours is maintained by the addition of University of Louisville credits to the total program. Transfer of graduate hours within the University of Louisville toward a graduate degree in music may be requested provided that the minimum residence requirement of 24 credit hours is maintained.
8. Students receiving a graduate assistantship (teaching, research, or service) will be provided with adequate training and will be required to adhere to university policies. Performance of duties in research and service by graduate assistants will be periodically evaluated. Students with teaching assistantships will be evaluated each semester.
9. Part-time students (with the exception of those in the MME degree program) must participate in one ensemble for every 18 credit hours of completed coursework. If part-time study precludes completing ensemble degree requirements, other coursework may be substituted.

Admission Requirements

1. Applications for admission to a graduate program require the following:
 - a. A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>);
 - b. An application fee;
 - c. Official transcripts for all previous post-secondary course work (all transcripts not in English must be certified as authentic and translated verbatim into English); and
 - d. At least two letters of recommendation.
2. Applications to specific degree programs require evidence of preparation for advanced study as follows:
 - a. In performance, an acceptable audition;
 - b. In academic specializations (music composition, music history, music theory), a portfolio of work appropriate to the field of study; and
 - c. In music education, evidence of classroom teaching experience.
3. Applicants whose primary language is not English must show English language proficiency in one of the following ways:
 - a. A minimum TOEFL examination score of 213 on the computer-based test, or 79-80 on the internet-based [test](#); [IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.](#)

- b. Documentation of the award of a degree from a recognized English language institution.
4. Applicants must possess a baccalaureate degree from an accredited institution in the area to be pursued in advanced studies, or they must present evidence of equivalent preparation.
5. Applicants must have a minimum cumulative undergraduate grade point average of 2.75 on a 4-point scale.

Applicants who meet the requirements listed in items 1-5 will be considered for conditional admission for graduate study at the School of Music. For additional entrance requirements specific to the degree of interest, see below.

Entrance examinations in music history, theory and, if appropriate, jazz, will be administered before the first term of study. The School of Music provides guidelines to assist in preparing for the entrance examinations.

Any exception to the above expectations will be evaluated individually and will require a statement indicating criteria to be met in a specified time frame with provisions for monitoring progress and performance. Justification must be provided in writing and must be accepted by the faculty of the student's proposed program, the Director of Graduate Studies, and the Dean of the School of Music.

Students who fail to meet performance standards or who do not meet other requirements as outlined in the letter of admission, program of study, or the catalog of the University of Louisville are subject to dismissal from their programs.

Prerequisites

1. Bachelor of Music degree or equivalent
2. Classroom teaching experience (exclusive of practice teaching and prior to, or concurrent with, graduate study)
3. Demonstration, by examination, of skills and capacities in the following fields:
 - Written, aural, and keyboard harmony
 - Melodic, harmonic, and rhythmic dictation
 - Elementary counterpoint
 - History and literature of music, and analytic understanding of musical forms and genres

Minimum Total Hours	30

Other Requirements

It is recommended that full-time MME students enroll in ensembles during their degree program.

All students must pass an oral examination after all course work is completed.

¹ These course may be satisfied by passing the entrance examinations in these areas.

² Students are required to prepare either a thesis (four (4) credit hours) or a professional paper (without credit). In the latter case, four (4) credit hours of coursework will be determined by the student and graduate advisor in order to achieve the 30 credit hour minimum requirement.

Music History and Literature (MM)

Master of Music in Music History and Literature

Unit: School of Music (<http://louisville.edu/music/>) (GU)

Program Webpage (<https://louisville.edu/music/academics/areas-of-study/music-history/>)

Academic Plan Code(s): MUSIMM_MUH

Program Information

The School of Music offers training toward two specific graduate degrees in music: Master of Music requiring a minimum of 36 credit hours of graduate credit, and Master of Music Education requiring 30 credit hours. All programs require a minimum of 24 credit hours of residence at the University of Louisville. Major subjects in the Master of Music curriculum are music performance with concentrations in choral, wind, or orchestral conducting; instrumental, piano, or vocal performance; jazz performance or jazz composition and arranging; piano, string, or wind band pedagogy; music history; music theory; and music composition. The Master of Music Education program allows an applied music minor in an instrument, voice, or conducting. Each degree program has specific prerequisites, entrance requirements, and programmatic expectations that are described in the relevant section of the catalog.

The MM in Music History program, a two-year course of study, is particularly suitable for those who wish to explore further both the content and the methodologies by which the history of music may be critiqued and investigated. Applicants must have an undergraduate degree in music or its equivalent. Graduate students in music history undertake a series of seminars and complete a thesis under faculty supervision, as well as satisfy a foreign language requirement and a final oral examination. Past graduates in music history from the University of Louisville have made careers as musicologists, music librarians, arts administrators, and music critics.

General Information Regarding Academic Policies

1. Detailed curricular and program offerings, including specific requirements and provisions for degree programs, are published in the university catalog. Students will be provided with copies of the "Handbook for Graduate Studies in Music", the "Guidelines for Preparation for the Graduate Music History Entrance Examination," and "Guidelines for Preparation for the Graduate Music Theory Entrance Examination." These documents are also available on the

School of Music website (<https://louisville.edu/music/resources/current-students/documents/>).

2. Students will be required to address any deficiencies revealed by entrance examinations in courses taken within the first two semesters of study. Credit toward the degree is not granted for review coursework.
3. All students are required to complete MUS 607 Bibliography and Research Methods by the end of the second semester of study (part-time students by the completion of 15 credit hours of graduate study). Upon satisfactory completion of requirements stated in Handbook sections B.2 and B.3, students will be considered in good standing.
4. Students will complete a project appropriate to the field of study as defined by the faculty of their program. The completion of this project (public recital, thesis, professional paper) normally takes place in the last semester of graduate study. Preparation and presentation of a recital must follow the guidelines in the "Handbook for Graduate Studies in Music" and the preparation of a thesis must follow the "Guidelines for the Preparation and Processing of Theses (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>)" issued by the Graduate School. The preparation of a thesis in music composition must also follow the "School of Music Thesis Formatting Guidelines for MM in Composition (<http://louisville.edu/music/academics/areas-of-study/music-composition/documents/ULCompThesisGuidelines.pdf>)".
5. In order to graduate, a student must be in good standing with a minimum cumulative grade point average of 3.0. No more than six (6) credit hours with any C or C+ grade will be accepted toward a degree, and no grade below a B-minus will be accepted for a course in the student's major subject area. Hours earned beyond the minimum in any curricular areas apply only to that area and cannot be assigned to another area in order to satisfy required credit. At least one-half of the total credit hours in graduate courses must be at the 600 level. Any exceptions to the program of study must be approved by the Graduate Studies Committee. A student whose cumulative GPA falls below 3.0, or who fails to satisfy the published performance criteria, will be placed on probation. Students are ordinarily not permitted to continue on probation for more than one semester.
6. When all coursework and projects have been satisfactorily completed, the student becomes a candidate for the degree and is approved to take the graduate oral examination. A candidate who fails the oral examination at the end of one semester may not be given a second one before the end of the following semester. A candidate who fails the second oral examination will not be granted the degree of MM or MME from the University of Louisville.
7. Upon request, a maximum of six (6) credit hours of earned graduate credit with a minimum grade of B may be transferred from accredited institutions that offer advanced degrees. Credit for applied music will not be transferred, but advanced standing may be awarded at a jury. Ensemble credits appropriate to the student's degree program may be considered for transfer, but not to exceed one (1) credit hour per semester. Music history and music theory credits will be evaluated for transfer by the Director of Graduate Studies and the respective faculty. Transfer of more than six (6) credit hours may be requested provided that they are not earned by extension, or as thesis or practicum hours, and that the residency requirement of 24 credit hours is maintained by the addition of University of Louisville credits to the total program. Transfer of graduate hours within the University of Louisville toward a graduate degree in music may be requested

provided that the minimum residence requirement of 24 credit hours is maintained.

8. Students receiving a graduate assistantship (teaching, research, or service) will be provided with adequate training and will be required to adhere to university policies. Performance of duties in research and service by graduate assistants will be periodically evaluated. Students with teaching assistantships will be evaluated each semester.
9. Part-time students (with the exception of those in the MME degree program) must participate in one ensemble for every 18 credit hours of completed coursework. If part-time study precludes completing ensemble degree requirements, other coursework may be substituted.

Admission Requirements

1. Applications for admission to a graduate program require the following:
 - a. Completed graduate application (<https://graduate.louisville.edu/admission/apply/>) and application fee
 - b. Official transcripts for all previous post-secondary course work (all transcripts not in English must be certified as authentic and translated verbatim into English)
 - c. At least two letters of recommendation
2. Applications to specific degree programs require evidence of preparation for advanced study as follows:
 - a. In performance, an acceptable audition
 - b. In academic specializations (music composition, music history, music theory), a portfolio of work appropriate to the field of study
 - c. In music education, evidence of classroom teaching experience
3. Applicants whose primary language is not English must show English language proficiency in one of the following ways:
 - a. A minimum TOEFL examination score of 213 on the computer-based test, or 79-80 on the internet-based test; IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.
 - b. Documentation of the award of a degree from a recognized English language institution.
4. Applicants must possess a baccalaureate degree from an accredited institution in the area to be pursued in advanced studies, or they must present evidence of equivalent preparation.
5. Applicants must have a minimum cumulative undergraduate grade point average of 2.75 on a 4-point scale.

Applicants who meet the requirements listed in items 1-5 will be considered for conditional admission for graduate study at the School of Music. For additional entrance requirements specific to the degree of interest, consult the section relevant to the degree program below. Entrance examinations in music history, theory and, if appropriate, jazz, will be administered before the first term of study. The School of Music provides guidelines to assist in preparing for the entrance examinations.

Any exception to the above expectations will be evaluated individually and will require a statement indicating criteria to be met in a specified time frame with provisions for monitoring progress and performance. Justification must be provided in writing and must be accepted by the faculty of the student's proposed program, the Director of Graduate Studies, and the Dean of the School of Music. Students who fail to meet performance standards or who do not meet other requirements as outlined in the letter of admission, program of study, or the catalog of the University of Louisville are subject to dismissal from their programs.

Program Requirements

Coursework

Code	Title	Hours
MUS 500	Music History Review ¹	0
MUS 400	Theory Review ¹	0
MUS 600	Graduate Oral Exam Preparation	0
MUS 607	Bibliography and Research Methods	3
Music History Seminar (600-level)		3
Music Theory		2
Additional Music Theory or Music History Seminar (500- or 600-level)		3
Select one of the following Analysis courses:		3
MUS 647	Advanced Chromatic Harmony and Analysis	
MUS 648	Advanced Post-Tonal Theory and Analysis	
MUS 651	Schenkerian Analysis	
MUS 653	Advanced Analysis	
Ensemble (3 semesters of major ensemble) ²		3
Thesis		4
Music History and Literature Concentration		
Music History Seminars (600-level)		6
MUS 593	Perspectives and Practices of Ethno/musicology	1
MUS 593	Perspectives and Practices of Ethno/musicology	1
Electives (500-600 level) ³		7
Minimum Total Hours		36

Other Requirements

All students must pass an oral examination after all course work is completed. Students must have or acquire reading proficiency in a language other than English (and that is not their native language). The student can fulfill this requirement either by passing an exam or taking three courses of instruction in that language. Students will choose their foreign language study in consultation with their advisor and should choose a language that will further their studies in musicology/ethnomusicology as well as their own research interests.

¹ These courses may be satisfied by passing the entrance examinations in these areas.

² Ethno/musicology pro-seminar is offered once a year and MM Music History students will need to take MUS 593 once each year for a total of 2 years and two (2) credit hours.

³ Students are encouraged to take at least one course outside the School of Music, chosen in consultation with their advisor, to fulfill their elective requirement. Electives should be taken at the appropriate graduate course level(s).

Music Performance (MM)

Master of Music in Music Performance

Unit: School of Music (<https://louisville.edu/music/>) (GU)

Program Website (<https://louisville.edu/music/academics/areas-of-study/instrumental-vocal-performance/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information

The School of Music offers training toward two specific graduate degrees in music: Master of Music (MM) requiring a minimum of 36 credit hours of graduate credit, and Master of Music Education (MME) requiring

30 credit hours. All programs require a minimum of 24 credit hours of residence at the University of Louisville. Major subjects in the Master of Music curriculum are music performance with concentrations in choral, wind, or orchestral conducting; instrumental, piano, or vocal performance; jazz performance or jazz composition and arranging; piano, string, or wind band pedagogy; music history; music theory; and music composition. The Master of Music Education program allows an applied music minor in an instrument, voice, or conducting. Each degree program has specific prerequisites, entrance requirements, and programmatic expectations that are described in the relevant section of the catalog.

The Department of Performance Studies is dedicated to the development of the musical and technical abilities of the music student through classical performance training on the individual performance instruments. The department offers training in voice and in the brass, wind, percussion, string and keyboard instruments, as well as conducting. The lessons are presented in a one-on-one, nurturing environment. The faculty members are all active performers. A student's mastery of a major performance instrument is an extremely important component of advanced musical training, and opportunities for performance experience are provided through various venues. The faculty also coach chamber music and teach courses regarding the literature for and pedagogy of their various instruments.

General Information Regarding Academic Policies

1. Detailed curricular and program offerings, including specific requirements and provisions for degree programs, are published in the university catalog. Students will be provided with copies of the "Handbook for Graduate Studies in Music," the "Guidelines for Preparation for the Graduate Music History Entrance Examination," and "Guidelines for Preparation for the Graduate Music Theory Entrance Examination." These documents are also available on the School of Music website (<https://louisville.edu/music/resources/current-students/>).
2. Students will be required to address any deficiencies revealed by entrance examinations in courses taken within the first two semesters of study. Credit toward the degree is not granted for review coursework.
3. All students are required to complete Bibliography and Research Methods (MUS 607) by the end of the second semester of study (part-time students by the completion of 15 credit hours of graduate study). Upon satisfactory completion of requirements stated in Handbook sections B.2 and B.3, students will be considered in good standing.
4. Students will complete a project appropriate to the field of study as defined by the faculty of their program. The completion of this project (public recital, thesis, professional paper) normally takes place in the last semester of graduate study. Preparation and presentation of a recital must follow the guidelines in the "Handbook for Graduate Studies in Music" and the preparation of a thesis must follow the "Guidelines for the Preparation and Processing of Theses (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-information/>)" issued by the Graduate School. The preparation of a thesis in music composition must also follow the "School of Music Thesis Formatting Guidelines for MM in Composition (<http://louisville.edu/music/academics/areas-of-study/music-composition/documents/ULCompThesisGuidelines.pdf>)".
5. In order to graduate, a student must be in good standing with a minimum cumulative grade point average of 3.0. No more than six (6) credit hours with any C or C+ grade will be accepted toward a degree, and no grade below a B-minus will be accepted for a course in the

student's major subject area. Hours earned beyond the minimum in any curricular areas apply only to that area and cannot be assigned to another area in order to satisfy required credit. At least one-half of the total credit hours in graduate courses must be at the 600 level. Any exceptions to the program of study must be approved by the Graduate Studies Committee. A student whose cumulative GPA falls below 3.0, or who fails to satisfy the published performance criteria, will be placed on probation. Students are ordinarily not permitted to continue on probation for more than one semester.

6. When all coursework and projects have been satisfactorily completed, the student becomes a candidate for the degree and is approved to take the graduate oral examination. A candidate who fails the oral examination at the end of one semester may not be given a second one before the end of the following semester. A candidate who fails the second oral examination will not be granted the degree of MM or MME from the University of Louisville.
7. Upon request, a maximum of six (6) credit hours of earned graduate credit with a minimum grade of B may be transferred from accredited institutions that offer advanced degrees. Credit for applied music will not be transferred, but advanced standing may be awarded at a jury. Ensemble credits appropriate to the student's degree program may be considered for transfer, but not to exceed one (1) credit hour per semester. Music history and music theory credits will be evaluated for transfer by the Director of Graduate Studies and the respective faculty. Transfer of more than six (6) credit hours may be requested provided that they are not earned by extension, or as thesis or practicum hours, and that the residency requirement of 24 credit hours is maintained by the addition of University of Louisville credits to the total program. Transfer of graduate hours within the University of Louisville toward a graduate degree in music may be requested provided that the minimum residence requirement of 24 credit hours is maintained.
8. Students receiving a graduate assistantship (teaching, research, or service) will be provided with adequate training and will be required to adhere to university policies. Performance of duties in research and service by graduate assistants will be periodically evaluated. Students with teaching assistantships will be evaluated each semester.
9. Part-time students (with the exception of those in the MME degree program) must participate in one ensemble for every 18 credit hours of completed coursework. If part-time study precludes completing ensemble degree requirements, other coursework may be substituted.

Admission Requirements

1. Applications for admission to a graduate program require the following:
 - a. A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>);
 - b. An application fee;
 - c. Official transcripts for all previous post-secondary course work (all transcripts not in English must be certified as authentic and translated verbatim into English); and
 - d. At least two letters of recommendation.
2. Applications to specific degree programs require evidence of preparation for advanced study as follows:

- a. In performance, an acceptable audition;
- b. In academic specializations (music composition, music history, music theory), a portfolio of work appropriate to the field of study; and
- c. In music education, evidence of classroom teaching experience.
3. Applicants whose primary language is not English must show English language proficiency in one of the following ways:
 - a. A minimum TOEFL examination score of 213 on the computer-based test, or 79-80 on the internet-based test; IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105.
 - b. Documentation of the award of a degree from a recognized English language institution.
4. Applicants must possess a baccalaureate degree from an accredited institution in the area to be pursued in advanced studies, or they must present evidence of equivalent preparation.
5. Applicants must have a minimum cumulative undergraduate grade point average of 2.75 on a 4-point scale.

Applicants who meet the requirements listed in items 1-5 will be considered for conditional admission for graduate study at the School of Music. For additional entrance requirements specific to the degree of interest, see below.

Entrance examinations in music history, theory and, if appropriate, jazz, will be administered before the first term of study. The School of Music provides guidelines to assist in preparing for the entrance examinations.

Any exception to the above expectations will be evaluated individually and will require a statement indicating criteria to be met in a specified time frame with provisions for monitoring progress and performance. Justification must be provided in writing and must be accepted by the faculty of the student's proposed program, the Director of Graduate Studies, and the Dean of the School of Music.

Students who fail to meet performance standards or who do not meet other requirements as outlined in the letter of admission, program of study, or the catalog of the University of Louisville are subject to dismissal from their programs.

Program Requirements

Coursework

Code	Title	Hours
Core Curriculum Courses		
MUS 500	Music History Review ¹	0
MUS 400	Theory Review ¹	0
MUS 600	Graduate Oral Exam Preparation	0
MUS 607	Bibliography and Research Methods	3
	Music History Seminar (500 or 600 level)	3
	Music Theory (500 or 600 level) ²	4
	Applied Study (600 level) ³	8
Concentration Coursework (see Concentration Requirements tab)		18
MUSA 697	Graduate Recital	0
Minimum Total Hours		36

Other Requirements

All students must pass an oral examination after all course work is completed.

¹ These courses may be satisfied by passing the entrance examinations in these areas.

² For students in the Concentration in Jazz, Advanced Jazz Theory (MUS 539) is recommended. For students in the Concentration in Jazz Composition and Arranging, MUS 654 is required and Advanced Jazz Theory (MUS 539) is recommended.

³ The applied course numbers for the degree concentrations are as follows: Choral Conducting: MUSA 601, MUSA 602, MUS 659, MUS 660. (Students may substitute additional semesters of MUS 659 and MUS 660 for MUSA 601 and MUSA 602 at the discretion of the Director of Choral Activities). Orchestral/Wind Conducting/Wind Band Pedagogy/Piano Pedagogy/String Pedagogy: MUSA 601, MUSA 602, MUSA 611, MUSA 612. Jazz Performance: MUSA 605, MUSA 606, MUSA 615, MUSA 616. Students enrolled for applied jazz composition and arranging may not also get credit for MUS 656 or MUS 657. Instrumental/Organ/Piano/Vocal Performance: MUSA 603, MUSA 604.

⁴ Taken concurrently with final semester of applied study. Performance and pedagogy degree recitals are expected to show a performer's musical maturity and versatility. A degree recital program must be approved by the student's applied instructor. Minimum recital lengths will be determined by the appropriate area faculty and indicated on all applied syllabi.

Other Requirements

Students are expected to present a public recital that comprises no less than sixty minutes of music and follows the guidelines governing public recitals.

Concentration in Vocal Performance

Academic Plan Code(s): MUSIMM_VOC

Code	Title	Hours
MUSA 613	Applied Music	4
MUSA 614	Applied Music	4
Select two of the following:		4
MUS 561	Literature (Vocal Literature I)	
MUS 562	Literature (Vocal Literature II)	
MUS 661	Literature (Graduate Vocal Literature I)	
MUS 662	Literature (Graduate Vocal Literature II)	
MUS 640	Advanced Vocal Pedagogy	2
Ensemble ¹⁵		2

Music Electives ¹⁶	2
Minimum Total Hours	18

Other Requirements

Students are expected to present a public recital that comprises no less than sixty minutes of music and follows the guidelines governing public recitals.

- ¹ Must be taken in the semester of the graduate degree recital.
- ² May include such courses as pedagogy, literature, the student's principal applied instrument, instrumental conducting, or a maximum of two (2) additional ensemble credit hours.
- ³ One two (2) credit hour course required of all orchestral conducting majors, the second two (2) credit hour course optional depending on the individual needs of the student in consultation with their advisor. If the student only needs two (2) credit hours of choral, they will be required to have two additional music electives.
- ⁴ To be chosen from courses in music theory, literature, the student's principal applied instrument, or a maximum of two (2) additional ensemble credit hours.
- ⁵ In comparing degree programs, please note that among universities, many times ensembles are required, but without credit. Our required ensembles are included in the number of required degree hours. New Music Ensemble is acceptable for the concentration in String Pedagogy.
- ⁶ Up to two (2) additional ensemble credit hours are acceptable.
- ⁷ To be chosen from pedagogy, literature, research methods, learning themes, the student's principal applied instrument, a maximum of two semesters of functional applied study, or a maximum of two (2) additional ensemble credit hours if performing on a secondary instrument.
- ⁸ To be chosen from pedagogy, literature, the student's principal applied instrument, a maximum of two semesters of functional applied study, or a maximum of two (2) additional ensemble credit hours.
- ⁹ Students are encouraged to choose courses in literature or pedagogy; up to two (2) additional ensemble credit hours are acceptable.
- ¹⁰ A student may substitute two additional Jazz Combo courses for one of the Jazz Ensemble courses.
- ¹¹ Applied Jazz or Ensemble will not meet this requirement; applied study in a secondary area is acceptable.
- ¹² Must include Organ Literature and Church Music Literature; additional Applied Organ or Ensemble will not meet this requirement. Applied study in a secondary area is acceptable.
- ¹³ At least three semesters of ensemble to be chosen from Piano Ensemble or New Music Ensemble.
- ¹⁴ Additional Applied Piano or Ensemble will not meet this requirement; applied study in a secondary area is acceptable.
- ¹⁵ Suggested ensembles include Opera Theatre and New Music Ensemble.
- ¹⁶ Additional Applied Voice or Ensemble will not meet this requirement; applied study in a secondary area is acceptable.

Music Theory (MM)

Master of Music in Music Theory

Unit: School of Music (<http://louisville.edu/music/>) (GU)

Program Website (<https://louisville.edu/music/academics/areas-of-study/music-theory/>)

Academic Plan Code(s): MUSIMM_MUT

Program Information

The School of Music offers training toward two specific graduate degrees in music: Master of Music requiring a minimum of 36 credit hours of graduate credit, and Master of Music Education requiring 30 credit hours. All programs require a minimum of 24 credit hours of residence at the University of Louisville.

The Music Theory area is committed to the instillment of a core of performative and analytical skills that will serve musical practitioners throughout their careers. In graduate courses, students apply these core skills to the study of a broad musical repertory. Students pursuing a master's degree in music theory work closely with our faculty to develop their interests in research and pedagogy and prepare themselves for careers in teaching and performance.

General Information Regarding Academic Policies

1. Detailed curricular and program offerings, including specific requirements and provisions for degree programs, are published in the university catalog. Students will be provided with copies of the "Handbook for Graduate Studies in Music", the "Guidelines for Preparation for the Graduate Music History Entrance Examination," and "Guidelines for Preparation for the Graduate Music Theory Entrance Examination." These documents are also available on the School of Music website (<https://louisville.edu/music/resources/current-students/>).
2. Students will be required to address any deficiencies revealed by entrance examinations in courses taken within the first two semesters of study. Credit toward the degree is not granted for review coursework.
3. All students are required to complete MUS 607 Bibliography and Research Methods by the end of the second semester of study (part-time students by the completion of 15 credit hours of graduate study). Upon satisfactory completion of requirements stated in Handbook sections B.2 and B.3, students will be considered in good standing.
4. Students will complete a project appropriate to the field of study as defined by the faculty of their program. The completion of this project (public recital, thesis, professional paper) normally takes place in the last semester of graduate study. Preparation and presentation of a recital must follow the guidelines in the "Handbook for Graduate Studies in Music" and the preparation of a thesis must follow the "Guidelines for the Preparation and Processing of Theses (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-information/>)" issued by the Graduate School. The preparation of a thesis in music composition must also follow the "School of Music Thesis Formatting Guidelines for MM in Composition (<http://louisville.edu/music/academics/areas-of-study/music-composition/documents/ULCompThesisGuidelines.pdf>)".
5. In order to graduate, a student must be in good standing with a minimum cumulative grade point average of 3.0. No more than six (6) credit hours with any C or C+ grade will be accepted toward a degree, and no grade below a B-minus will be accepted for a course in the student's major subject area. Hours earned beyond the minimum in any curricular areas apply only to that area and cannot be assigned to another area in order to satisfy required credit. At least one-half of the total credit hours in graduate courses must be at the 600 level. Any exceptions to the program of study must be approved by the Graduate Studies Committee. A student whose cumulative GPA falls below 3.0, or who fails to satisfy the published performance criteria,

will be placed on probation. Students are ordinarily not permitted to continue on probation for more than one semester.

6. When all coursework and projects have been satisfactorily completed, the student becomes a candidate for the degree and is approved to take the graduate oral examination. A candidate who fails the oral examination at the end of one semester may not be given a second one before the end of the following semester. A candidate who fails the second oral examination will not be granted the degree of MM or MME from the University of Louisville.
7. Upon request, a maximum of six (6) credit hours of earned graduate credit with a minimum grade of B may be transferred from accredited institutions that offer advanced degrees. Credit for applied music will not be transferred, but advanced standing may be awarded at a jury. Ensemble credits appropriate to the student's degree program may be considered for transfer, but not to exceed one (1) credit hour per semester. Music history and music theory credits will be evaluated for transfer by the Director of Graduate Studies and the respective faculty. Transfer of more than six (6) credit hours may be requested provided that they are not earned by extension, or as thesis or practicum hours, and that the residency requirement of 24 credit hours is maintained by the addition of University of Louisville credits to the total program. Transfer of graduate hours within the University of Louisville toward a graduate degree in music may be requested provided that the minimum residence requirement of 24 credit hours is maintained.
8. Students receiving a graduate assistantship (teaching, research, or service) will be provided with adequate training and will be required to adhere to university policies. Performance of duties in research and service by graduate assistants will be periodically evaluated. Students with teaching assistantships will be evaluated each semester.
9. Part-time students (with the exception of those in the MME degree program) must participate in one ensemble for every 18 credit hours of completed coursework. If part-time study precludes completing ensemble degree requirements, other coursework may be substituted.

Admission Requirements

1. Applications for admission to a graduate program require the following:
 - a. A completed graduate application (<https://graduate.louisville.edu/admission/apply/>);
 - b. An application fee;
 - c. Official transcripts for all previous post-secondary course work (all transcripts not in English must be certified as authentic and translated verbatim into English);
 - d. At least two letters of recommendation.
2. Applications to specific degree programs require evidence of preparation for advanced study as follows:
 - a. In performance, an acceptable audition;
 - b. In academic specializations (music composition, music history, music theory), a portfolio of work appropriate to the field of study;
 - c. In music education, evidence of classroom teaching experience.
3. Applicants whose primary language is not English must show English language proficiency in one of the following ways:
 - a. A minimum TOEFL examination score of 550 on the paper-based test, 213 on the computer-based test, or 79-80 on the internet-based test; official IELTS scores of at least 6.5 overall band score from the academic module exam; Duolingo overall score of 105.

- b. Documentation of the award of a degree from a recognized English language institution.

4. Applicants must possess a baccalaureate degree from an accredited institution in the area to be pursued in advanced studies, or they must present evidence of equivalent preparation.
5. Applicants must have a minimum cumulative undergraduate grade point average of 2.75 on a 4-point scale.

Applicants who meet the requirements listed in items 1-5 will be considered for conditional admission for graduate study at the School of Music. For additional entrance requirements specific to the degree of interest, see below.

Entrance examinations in music history, theory and, if appropriate, jazz, will be administered before the first term of study. The School of Music provides guidelines to assist in preparing for the entrance examinations.

Any exception to the above expectations will be evaluated individually and will require a statement indicating criteria to be met in a specified time frame with provisions for monitoring progress and performance. Justification must be provided in writing and must be accepted by the faculty of the student's proposed program, the Director of Graduate Studies, and the Dean of the School of Music.

Students who fail to meet performance standards or who do not meet other requirements as outlined in the letter of admission, program of study, or the catalog of the University of Louisville are subject to dismissal from their programs.

Program Requirements

Coursework

Code	Title	Hours
Core Coursework		
MUS 400	Theory Review ¹	0
MUS 500	Music History Review ¹	0
MUSA 509	Major Ensembles (Three Semesters)	3
MUS 600	Graduate Oral Exam Preparation	0
MUS 607	Bibliography and Research Methods	3

MUS 694	Research (2 semesters)	4
MUS 665	Music Theory Seminar (4 semesters)	0
Music Electives ¹		4
Minimum Total Hours		14

¹ One course of HUM 661, HUM 662, or HUM 663 may be substituted for three music elective credits.

Nurse Practitioner - APRN (Post-Graduate Certificate)

Post-Graduate Certificate in Nurse Practitioner (APRN)

Unit: School of Nursing (<https://louisville.edu/nursing/>)

Academic Plan Code(s): NUPRCNPAGA, NUPRCNPAGP, NUPRCNPFNP, NUPRCNPPSY, NUPRCNPNNP, NURSCGPAC

Program Information

The post-graduate APRN certificate program prepares registered nurses for eligibility and licensure for national certification in an advanced practice specialty. Students will progress through a specialized curriculum that focuses on the student's area of interest. Registered nurses holding a Master of Science degree in nursing or a terminal degree (e.g., PhD, EdD, DNP) are eligible to apply.

Six specialties are available:

- Adult Gerontology Acute Care Nurse Practitioner
- Adult Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Psychiatric/Mental Health Nurse Practitioner
- Neonatal Nurse Practitioner
- Pediatric Acute Care Nurse Practitioner

Please see Certificate Requirements tab for specific requirements for each specialty.

Admissions Criteria

A holistic review process is used when considering applications for admission. The holistic review considers multiple criteria for admissions, including the applicant's professional career goals, academic capabilities, grade point averages, work experience, leadership, and community engagement.

Only registered nurses holding a Master of Science degree in nursing or a terminal degree (e.g., PhD, EdD, DNP) are eligible to apply. To be considered for admission to the post graduate APRN certificate program, the following items must be submitted:

To the Graduate School

- University of Louisville Graduate Admission Application (<https://graduate.louisville.edu/admission/apply/>) with the application fee.

1. **Official Transcripts** representing all college course work. Graduate program degree in nursing must be from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>) and a CCNE-, ACEN-, or NLN-accredited nursing program. Recommended graduate cumulative grade point average of 3.0 on a 4.0 scale.
2. Applicants who have attended a college or university outside of the United States are also required to submit a course-by-course evaluation of their transcripts through World Education Services (<https://www.wes.org/>) (WES) or Educational Credential Evaluators (<https://www.ece.org/>) (ECE). Recommended graduate cumulative grade point average of 3.0 on a 4.0 scale.
3. **Two letters of recommendation** from individuals who can speak to your academic and/or professional capabilities and potential. Recommendations should be requested from former faculty members, current or immediate past employers, or other nursing/health professionals. Recommendations must have been completed within the last year.
4. **Current resume or curriculum vitae** (CV) including RN license number.
5. **Unencumbered RN license** from a US state board of nursing. (Prior to clinicals a RN license in the state of Kentucky or a compact state is required).
6. Upload a goal statement addressing the following: describe your reasons for applying to the selected track including your short and long term goals, your motivation for choosing your selected specialty, and explain your professional growth and development which has specifically prepared you for the specialty for which you have applied.
7. Students for whom English is not their primary language must show **English Proficiency** (<https://louisville.edu/graduate/futurestudents/application-directions/>).
8. Students offered admission will need to submit a Criminal Background check through the third-party vendor Castlebranch which will need to be approved prior to enrollment.

Additional requirements for acute care specialties:

Neonatal specialty: Minimum of one year of RN clinical experience in a Level III or Level IV NICU required prior to admission. All NNP applicants must have the equivalent of two years of full-time RN clinical experience (within the last 5 years) in Level III and/or IV NICU inpatient settings before beginning clinical courses.

Adult-Gerontology Acute Care specialty: One year of RN experience in the ICU or one year of RN experience in any area and a commitment to complete one year of RN clinical practice in an ICU before beginning clinical courses. Applicants that do not have one year of RN experience at the point of application, but will complete one year prior to beginning clinical courses, will satisfy the work requirement.

Pediatric Acute Care specialty: One year of RN experience in an acute care setting or one year of RN experience in any area and a commitment to complete one year in an acute care setting before beginning clinical courses.

Prerequisite Requirements

Code	Title	Hours
Core Courses		
NURS 740	Advanced Pharmacology ¹	3
NURS 741	Advanced Pathophysiology	4
NURS 742	Advanced Physical Assessment ¹	3
Minimum Total Hours		10

Advanced Practice Registered Nurse (APRN) Specialty Requirements

Minimum clinical hour requirements: APRNs seeking an additional specialty will complete a minimum of 504 population-specific clinical hours. All other students will be required to complete a minimum of 672 patient care clinical hours and 84 professional role clinical hours. Pediatric acute care nurse practitioner specialty requires a minimum of 588 clinical hours if there is no documentation of well-child care in primary certification. 1 credit hour of clinical coursework is equivalent to 84 clinical clock hours.

Note: Currently the School of Nursing requires 672 direct patient care clinical hours for program completion. For students who are seeking initial licensure as an APRN in a state where the board of nursing requires a minimum of 750 clinical hours for licensure, an additional clinical hour (equivalent to 84 direct patient care clock hours) will be available to students who wish to meet this requirement. Standard tuition and fees will apply to the additional credit hour.

A program of study for postgraduate applicants will be created based upon a gap analysis of all official college transcripts and professional credentials.

A minimum grade point average of 3.0 is required in all course work to meet graduation requirements.

Adult Gerontology Acute Nurse Practitioner

Academic Plan Code(s): NUPRCNPAGA

The patient population of the adult-gerontology acute care nurse practitioner practice includes the entire spectrum of adults including adolescents, adults, and aging adults. Acute care nurse practitioners work in the intensive care unit (ICU), progressive care unit (PCU), other hospital units and specialty provider's offices.

Pediatric Acute Care Nurse Practitioner

Academic Plan Code(s): NURSCPGPAC

The pediatric acute care nurse practitioner (PACNP) is educationally prepared to provide advanced nursing care to meet the specialized needs of infants, children, adolescents, and young adults with complex, acute, critical, and chronic health conditions, including the delivery of acute care services, as delineated in the acute care nurse practitioner competencies. PACNPs work in hospital-based pediatric acute care areas, pediatric intensive care units, pediatric cardiac intensive care units, emergency

departments, and pediatric specialty practices that manage acutely ill patients.

¹ Course not required for Neonatal specialty.

² Course not required for APRNs seeking a second specialty.

³ Course not required for APRN with PNP or FNP certification and evidence of previous coursework.

⁴ This course contains population specific patient care clinical hours. These hours should be considered direct patient care clinical hours.

⁵ This course contains 84 advanced practice professional role clinical hours. These hours should not be considered direct patient care clinical hours.

Graduates from the APRN certificate program are eligible for national certification in an advanced practice specialty upon graduation; however, educational preparation does not guarantee professional licensure. If you have questions regarding Kentucky APRN licensure, please contact the Kentucky Board of Nursing (<https://kbn.ky.gov/advanced-practice-registered-nurse/Pages/default.aspx>). For APRN licensure questions in other states, please contact the respective state board of nursing (<https://ncsbn.org/contact-bon.htm>).

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> ([https://](https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure)

louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/).

Nursing - Leadership (MSN)

Master of Science in Nursing - Leadership (MSN)

Unit: School of Nursing (<http://louisville.edu/nursing/>) (GN)

Program Website (<https://louisville.edu/nursing/academics/mepn-program/mepn/>)

Academic Plan Code(s): NURSMSNNPO, NURSMSNNEO

Program Information

This program is completed 100% online (https://louisville.edu/nursing/academics/msn-leadership/?utm_source=uoflonline-website&utm_medium=uoflonline-tile).

The Master of Science in Nursing - Leadership is designed for Registered Nurses with a Bachelors of Science in Nursing. The program offers two concentrations: Nursing Practice and Nursing Education.

The MSN in Leadership program provides students with advanced knowledge and skills in nursing leadership, with a focus on leadership in nursing practice or nursing education. Graduates can choose to work in a variety of settings and leadership capacities within the nursing profession, and can advance their career as nurse leaders. Upon completion of the program, graduates of the Nursing Practice concentration are eligible to sit for the Nurse Executive Certification (NE-BC) while graduates of the Nursing Education concentration are eligible to sit for the Certified Nurse Educator (CNE) exam.

The University of Louisville School of Nursing is an essential partner of a research-intensive academic health science center in a nationally recognized university serving a metropolitan community. The School of Nursing is a community in which faculty, staff and students collaborate to promote excellence in the profession of nursing. This is accomplished through research and scholarship that inform undergraduate and graduate education, support evidence-based practice and foster advances in nursing science.

Students are prepared to demonstrate excellence in nursing science, practice and leadership, in a variety of settings for the benefit of clients across the lifespan and to meet the evolving health care needs of society.

Note: Graduates of the Accelerated BSN program at UofL complete eight (8) hours of graduate level coursework during their program. If admitted to the MSL-Leadership program, graduates of the Accelerated BSN may be eligible to apply these eight (8) graduate credit hours towards their MSN core requirements. To be eligible to apply these courses towards the MSN-Leadership degree, students must have earned a B- or higher in these designated courses.

Admissions Criteria

Students may be admitted into the Master of Science in Nursing (MSN) for a summer, fall, or spring term.

A holistic review process is used when considering applications for admission to the master's program. The holistic review considers multiple criteria for admissions, such as: the applicant's professional goals, academic capabilities, and grade point averages.

The University of Louisville School of Nursing participates in Nursing's Centralized Application Service (<http://nursingcas.org/about/>) (NursingCAS), which provides you with an online application.

NursingCAS collects and processes your application documents and verifies your transcripts. The School of Nursing will receive your application information from NursingCAS and use it to make admission decisions.

In addition to the NursingCAS application fee, you will be required to pay a supplemental application fee directly to UofL Graduate Admissions in order to be considered for admission.

To NursingCAS

- Official transcripts representing all college coursework with a recommended cumulative grade point average of at least 3.0 on a 4.0 scale. Bachelor of Science in Nursing degree must be from an accredited institution and a NLN, CCNE or ACEN accredited nursing program.
- Applicants who have attended a college or university outside the United States are also required to submit a course by course evaluation of their transcript through World Education Services (WES) (<http://wes.org/>) or Educational Credential Evaluators (ECE) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.
- Two letters of recommendation. Within the NursingCAS application, submit names and email addresses of individuals who can speak to your academic and/or professional capabilities and potential.
- Goal statement, 500 words or less, explaining your reasons for seeking the program, including short- and long-term professional goals. Describe how past educational, work, and/or life experiences have prepared you for this next step in the career.
- Resume.
- Verification of RN license in good standing. from a U.S. state board of nursing.
- Students for whom English is not their primary language must show English Proficiency. (<https://louisville.edu/graduate/futurestudents/application-directions/>)
- Criminal background check submitted through CastleBranch.com (<https://discover.castlebranch.com/>).
- An interview with faculty may be required.

Students who do not meet admission requirements may contact the University of Louisville School of Nursing Office of Student Services for an advising appointment.

Important Note: All applicants, regardless of their application status, are required to submit official transcripts for all college work completed. An application fee is required of all applicants regardless of where previous degrees were earned. A reduced UofL application fee is assessed for nursing programs participating in the Common Application System (CAS).

Program Requirements

Master's of Science in Nursing - Leadership

Students in both concentrations in the MSN in Leadership will need to compete the following core requirements:

Code	Title	Hours
MSN Program Core		
NURS 607	Foundational Concepts of Evidence Based Practice	3

Nursing (MSN)

Master of Science in Nursing

Unit: School of Nursing (<http://louisville.edu/nursing/>) (GN)
Academic Plan Code(s): NURSMSNAAG, NURSMSNAGP, NURSMSNFNP, NURSMSNNNP, NURSMSNPAC, NURSMSNPSY

Program Information

The Master of Science in Nursing (MSN) is designed to prepare baccalaureate-prepared nurses for certification as a nurse practitioner in a variety of settings for the diagnosis and management of patients across the lifespan. The MSN focuses on developing advanced practice clinical knowledge and leadership skills to improve health outcomes of individuals and populations through direct patient care.

The BSN-MSN degree requires a minimum of two years of full-time study and includes 672 patient centered clinical hours and 84 professional clinical hours.

Specialties Available

- Adult Gerontology Acute Care Nurse Practitioner
- Adult Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner

- Neonatal Nurse Practitioner
- Pediatric Acute Care Nurse Practitioner
- Psychiatric/Mental Health Nurse Practitioner

Note: Graduates of the Accelerated BSN program at UofL complete 8 credit hours of graduate level coursework during their program and are eligible to apply these 8 graduate credit hours towards their MSN core requirements.

Admissions Criteria

Criteria for Admission to the Master of Science in Nursing

A holistic review process is used when considering applications for admission to the master's program. The holistic review considers multiple criteria for admissions, including the applicant's professional career goals, academic capabilities, GPA, work experience, leadership and community engagement.

The University of Louisville School of Nursing participates in Nursing's Centralized Application Service (<https://nursingcas.org/>) (NursingCAS), which provides you with an online application. NursingCAS collects and processes your application documents and verifies your transcripts.

The School of Nursing will receive your application information from NursingCAS and use it to make admission decisions.

To be considered for admission to the Master of Science in Nursing program, the following items must be submitted:

To the Graduate School

Completed Graduate Admissions Application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) including a reduced application fee.

To NursingCAS

- **Official transcripts** representing all college coursework. BSN degree must be from an institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>) and a CCNE-, ACEN- or NLN-accredited nursing program. Recommended undergraduate cumulative grade point average of 3.0 on a 4.0 grading scale. If applicable, recommended graduate cumulative grade point average of 3.0 on 4.0 scale.
- Applicants who have attended a college or university outside the United States are also required to submit a course-by-course evaluation of their transcript through World Education Services (WES) (<http://wes.org/>) or Educational Credential Evaluators (ECE) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.
- **Two letters of recommendation** from individuals who can speak of academic and/or professional nursing capabilities and potential. Recommendation should be requested from former faculty, current or immediate past employers, or other nursing/health professionals. Recommendations must be completed within the last year.
- **Current resume or curriculum vitae (CV)**

- **Verification of unencumbered RN license** from a US state board of nursing (Prior to clinicals a RN license in the state of Kentucky or a compact state is required).
- **Responses to all questions** asked on the NursingCAS application.
- Students for whom English is not their primary language must show Proof of English Proficiency (<https://louisville.edu/graduate/futurestudents/application-directions/>).
- Students offered admission will need to submit a Criminal Background check through the third-party vendor (Castlebranch) which will need to be approved prior to enrollment.

Additional requirements for acute care specialties:

- **Neonatal specialty:** Minimum of one year of RN clinical experience in a Level III or Level IV NICU prior to admission. All NNP applicants must have the equivalent of two years of full-time RN clinical experience within the last five years in Level III and/or Level IV NICU inpatient setting before beginning clinical courses
- **Adult-Gerontology Acute:** One year of RN experience in the ICU or one year of RN experience in any area and a commitment to complete one year of RN clinical practice in the ICU prior to beginning clinical courses. Applicants that do not have one year of RN experience at the point of application, but will complete one year before beginning clinical courses, will satisfy the work requirement.
- **Pediatric Acute Care:** One year of RN experience in an acute care setting or one year of RN experience in any area and a commitment to complete one year of RN clinical practice in an acute care setting prior to beginning clinical courses. Applicants that do not have one year of RN experience at the point of application, but will complete one year before beginning clinical courses, will satisfy the work requirement.

Code	Title	Hours
Core Courses Required for Specialties		
NURS 607	Foundational Concepts of Evidence Based Practice	3
NURS 643	Quality and Safety in Advanced Practice Nursing	2
NURS 657	Health Promotion and Disease Prevention in Culturally Diverse and Vulnerable Populations	3
NURS 740	Advanced Pharmacology (Not required for Neonatal Nurse Practitioner Specialty)	3
NURS 741	Advanced Pathophysiology	4
NURS 742	Advanced Physical Assessment (Not required for Neonatal Nurse Practitioner Specialty)	3
NURS 749	The Business of Healthcare	2
NURS 807	The Professional Role of the Advanced Practice Nurse	3
NURS 726	Clinical Practicum for the MSN NP I (168 clinical hours) ¹	2
NURS 727	Clinical Practicum for the MSN NP II (168 clinical hours) ¹	2
NURS 728	Clinical Practicum for the MSN NP III (168 clinical hours) ¹	2
NURS 729	Clinical Practicum for the MSN NP IV (168 clinical hours) ¹	2
NURS 840	Clinical Seminar I	1
NURS 841	Clinical Seminar II	1

NURS 842	Clinical Practicum in the Advanced Practice Role ²	1
Minimum Total Hours		34

Minimum clinical hour requirements:

A minimum of 672 patient care clinical hours (eight (8) credit hours) is required for all specialties with the exception of the Neonatal Nurse Practitioner (NNP). The NNP requires a minimum of 756 patient care clinical hours (nine (9) credit hours). One (1) credit hour equals 84 clinical contact hours. NURS 730 and NURS 731 are optional one (1) credit hour clinical practicum courses that can be used for clinical credit as needed in the program of study. Students complete an additional 84 hours of professional role clinical.

Note: Currently the School of Nursing requires 672 direct patient care clinical hours for program completion. For students who are seeking initial licensure as an APRN in a state where the board of nursing requires a minimum of 750 clinical hours for licensure, an additional clinical hour (equivalent to 84 direct patient care clock hours) will be available to students who wish to meet this requirement. Standard tuition and fees will apply to the additional credit hour.

Master of Science in Nursing - Adult-Gerontology Acute Care Nurse Practitioner

Academic Plan Code(s): NURSMSNAAG

The patient population of the adult-gerontology acute care nurse practitioner practice includes the entire spectrum of adults including adolescents, adults and aging adults. Acute care nurse practitioners work in the intensive care unit (ICU), progressive care unit (PCU), other hospital units and specialty provider's offices.

Code	Title	Hours

NURS 804	Diagnosis and Management for Pediatric Acute Care II: Acute Illness	2
NURS 805	Diagnosis and Management for Pediatric Acute Care III: Critical Illness	3
NURS 806	The Pediatric Acute Care Nurse Practitioner Role	1
Minimum Total Hours		17

Master of Science in Nursing - Psychiatric Mental Health Nurse Practitioner

Academic Plan Code(s): NURSMSNPSY

Psychiatric mental health nurse practitioners (PMHNP) focus on individuals across the lifespan, families, and populations across the lifespan at risk for developing and/or having a diagnosis of psychiatric disorders or mental health problems. This includes assessment, diagnosis, and management of mental health and psychiatric disorders across the lifespan.

Code	Title	Hours
Courses		
NURS 770	Adv. Psychiatric Assessment of Psychopathology and Clinical Interviewing Across the Lifespan	2
NURS 771	Foundations of Individual and Group Psychotherapy for the Adv. Practice Psychiatric Mental Health NP	2
NURS 772	Psychopharmacology	2
NURS 773	Diagnosis and Management of Children and Adolescents in Adv. Psychiatric-Mental Health Nursing	3

NURS 774	Diagnosis and Management of Adults in Advanced Practice Psychiatric-Mental Health Nursing	3
NURS 775	Diagnosis and Management of Special Populations in Psychiatric Mental Health Nursing	2
NURS 794	The Psychiatric Mental Health Nurse Practitioner Role	2
Minimum Total Hours		16

¹ This course contains population specific patient care clinical hours.

These hours should be considered direct patient care clinical hours.

² This course contains 84 advanced practice professional role clinical hours. These hours should not be considered as direct patient care.

Master of Science in Nursing graduates from the UofL School of Nursing are prepared to apply for Advanced Practice Registered Nurse (APRN) certification in their population track upon graduation; however, educational preparation does not guarantee professional licensure. If you have questions regarding Kentucky APRN licensure, please contact the Kentucky Board of Nursing (<https://kbn.ky.gov/Licensure/Pages/Verification.aspx>). For APRN licensure questions in other states, please contact the respective state board of nursing (<https://ncsbn.org/contact-bon.htm>).

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Nursing (PhD)

Doctor of Philosophy in Nursing

Unit: School of Nursing (<http://louisville.edu/nursing/>) (GN)

Program Website (<http://louisville.edu/nursing/academics/phd/>)

Academic Plan Code(s): NURSPHDBSN, NURSPHDMSN, NURSPHDDNP

Program Information

The Doctor of Philosophy in Nursing is designed to prepare nurse scientists to assume a variety of roles in education, research, leadership, and health policy. The program prepares nurse scientists to:

- Generate knowledge, test interventions and evaluate outcomes to reduce risks of illness/disability and promote quality of life;
- Collaborate with other disciplines to improve the delivery of healthcare;
- Assume research, leadership, executive, public policy and/or teaching roles; and,
- Affect health policy through the application of scientific knowledge.

Three progression options are offered: 1) BSN to PhD 2) MSN to PhD and 3) DNP to PhD. Full and part-time programs of study are available.

Following completion of course work, students take a qualifying examination. A dissertation is required once coursework is completed and the qualifying exam is successfully taken. The dissertation may be completed in a traditional or manuscript option format.

Admissions Criteria

A holistic review process is used when considering applications for admission to the PhD Program in Nursing. The holistic review considers

multiple criteria for admission including: the applicant's professional career goals, academic capabilities, GPA, work experience, leadership, and community engagement, and incorporates the use of an admission rubric for consistency.

The University of Louisville School of Nursing participates in Nursing's Centralized Application Service (NursingCAS), which collects and processes application documents and verifies transcripts. The School of Nursing receives application information from NursingCAS (<https://nursingcas.org/>) and uses it to make admission decisions. Please note, the GRE is not required for admission consideration for this program.

1. A completed NursingCAS application

- a. **Official transcripts** from all undergraduate and graduate college coursework are required. An undergraduate cumulative grade point average of 3.0 or higher on a 4.0 scale is recommended for BSN-PhD and a graduate cumulative grade point average of 3.25 or higher on a 4.0 scale is recommended for MSN-PhD and DNP-PhD.

- For applicants with a degree conferred in the United States the degree must be from an institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>) and an NLN-, ACEN-, or CCNE-accredited nursing program.
- For applicants with a degree conferred outside the United States a course-by-course transcript evaluation prepared by World Education Services (<https://www.wes.org/credential-evaluations/>) (WES), Educational Credential Evaluators (<https://www.ece.org/>) (ECE), or some other NACES-approved evaluator (<https://www.naces.org/members/>) is required.

- b. International students for whom English is not their primary language must show **English language proficiency** via the Graduate School English language proficiency requirements at the following link: English Language Proficiency | Graduate School (<https://graduate.louisville.edu/admission/international/proficiency/>)

- c. **Three professional letters of recommendation** from individuals who can speak to academic and/or professional capabilities and potential for a scholarly career. Recommendations should be from former faculty members, current or immediate past employer, or other nursing/health professionals. At least two references must be from nurses. Recommendations must have been completed within the last year.

- d. **Current curriculum vitae (CV) or resume.** Please include a list of publications, if applicable.

- e. **An unencumbered nursing license.** International students need to be licensed as registered nurses in their country of origin, if licensure is available. If the research trajectory involves direct patient care activities, a Kentucky RN licensure must be obtained prior to December in the first year of study.

- f. **A personal statement** describing career goals, area(s) of expertise, research interest(s), and reasons for pursuing doctoral studies. Maximum three pages in 12-point font.

- g. **Payment of a supplemental UofL Graduate School application fee in the amount of \$40.00.** No additional documents are required.

2. **Personal interview** with School of Nursing faculty will be required.

3. **Criminal background check.** A pre-admission Certified Background Check is needed. For international applicants the pre-admission background check requirement is satisfied during the visa application process.

Program Requirements

BSN-PhD students will complete nine (9) credit hours of required courses in addition to the MSN to PhD curriculum.

Code	Title	Hours
BSN to PhD Coursework		
Courses		
NURS 607	Foundational Concepts of Evidence Based Practice	3
NURS 657	Health Promotion and Disease Prevention in Culturally Diverse and Vulnerable Populations	3
NURS 743	Epidemiology	3
Minimum Total Hours		9

MSN-PhD Students will complete the following 40 credit hours of required doctoral-level courses, the qualifying exam, and a dissertation:

Code	Title	Hours
Post-Master's Coursework		
NURS 700	Theoretical Basis of Nursing	3
NURS 702	Philosophy of Science	3

NURS 737	Grant Proposal Development	1
NURS 738	Responsible Conduct of Research	1
Advanced Statistics Courses		6
NURS 890	Dissertation for the PhD in Nursing ¹	12
Minimum Total Hours		43

¹ NURS 890 can be taken in increments of three (3), four (4), or six (6) credit hours for a total of twelve (12) credit hours.

² Cognate courses support the student's dissertation research and are chosen with approval from the advisor; they may include coursework outside of the School of Nursing. Students should consult their advisor before registration to discuss options.

Nursing Practice (DNP)

Doctor of Nursing Practice

Unit: School of Nursing (<https://louisville.edu/nursing/>) (GN)

Program Website (<https://louisville.edu/nursing/academics/dnp/>)

Academic Plan Code(s): See Degree Requirements tab.

Program Information

The Doctor of Nursing Practice is designed to prepare nurses to demonstrate excellence and leadership as a nurse practitioner in a variety of settings for the diagnosis and management across the lifespan and to meet the evolving health needs of the community.

The DNP focuses on developing advanced practice clinical knowledge and leadership skills to improve health outcomes of individuals and populations through direct patient care, quality care initiatives, administration of organizations, and/or implementation of health policy.

The University of Louisville offers both the BSN-DNP and the MSN-DNP options. The BSN-DNP requires a minimum of three years of full-time study. The last two years of the program include a minimum 1,000 clinical, professional, and project hours. The MSN-DNP is designed for advanced practice nurses and focuses on leadership in population health. A minimum of two years of part-time study is required. Clinical hours vary depending on previous master's preparation. Students must provide documentation of previous clinical hours and complete a minimum of 330 project or professional hours, for a total of 1,000 post-baccalaureate hours. (Students with less than 670 documented clinical hours in their MSN degree will need to enroll in a clinical completion course to formally complete additional clinical hours).

Specialties Available

- Adult Gerontology Acute Care Nurse Practitioner
- Adult Gerontology Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Neonatal Nurse Practitioner
- Pediatric Acute Care Nurse Practitioner
- Psychiatric/Mental Health Nurse Practitioner
- Nurse Anesthesia

Admissions Criteria

For the Nurse Anesthesia (NA) program admission requirements, please see the programs catalog page.

A holistic review process is used when considering applications for admission to the DNP program. The holistic review considers multiple criteria for admission, including the applicant's professional career goals, academic capabilities, GPA, work experience, leadership, as well as institution and community engagement.

The University of Louisville School of Nursing participates in Nursing's Centralized Application Service (<https://nursingcas.org/>) (NursingCAS), which provides you with an online application. NursingCAS collects and processes your application documents and verifies your transcripts.

The School of Nursing will receive your application information from NursingCAS and use it to make admission decisions. In addition to the Nursing CAS Application students will need to pay a supplemental application fee of \$40 to graduate admissions.

To be considered for admission to the Doctor of Nursing Practice program, the following items must be submitted:

To NursingCAS

1. Transcripts

- **BSN -DNP applicant:** Official transcripts representing all college coursework with a recommended undergraduate cumulative grade point average of at least a 3.0 on a 4.0 scale. BSN degree must be from an institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>) and a CCNE-, ACEN-, or NLN-accredited nursing program.
- **MSN-DNP applicant:** Official transcripts representing all college coursework with a recommended graduate cumulative grade point average of at least a 3.0 on a 4.0 scale. BSN degree must be from an institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>). BSN and MSN degrees must be from CCNE-, ACEN-, or NLN-accredited nursing programs.

2. Applicants who have attended a college or university outside the United States are also required to submit a course by course evaluation of their transcript through World Education Services (WES) (<http://wes.org/>) or Educational Credential Evaluators (ECE) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.
3. **Two letters of recommendation** from individuals who can speak of academic and/or professional capabilities and potential for a scholarly career. Recommendation should be requested from former faculty, current or immediate past employers, or other nursing/health professionals. Recommendations must be completed within the last year.
4. **Current resume or curriculum vitae (CV)**
5. **Verification of an unencumbered RN license** from a US state board of nursing. (Prior to starting clinicals students must have a RN license in the state of Kentucky or in a compact state).
6. **Responses to all questions** asked on the NursingCAS application.
7. Students for whom English is not their primary language must show **English Proficiency** (<https://louisville.edu/graduate/futurestudents/application-directions/>).

8. Students offered admission will need to submit a Criminal Background check through the third-party vendor (Castlebranch) which will need to be approved prior to enrollment.

Additional Admission Requirements for Acute Care Specialties

Neonatal specialty: A minimum of one year of RN clinical experience in a Level III or Level IV NICU is recommended prior to admission. All NNP applicants must have the equivalent of two years of full-time RN clinical experience within the last five years in a Level III or Level IV NICU inpatient setting before beginning clinical courses.

Adult Gerontology Acute Care specialty: One year of RN clinical experience in an ICU or one year of RN clinical experience in any area and a commitment to complete one year of RN clinical practice in an ICU before beginning clinical courses. Applicants that do not have one year of RN experience at the point of application, but will complete one year before beginning clinical courses, will satisfy the work requirement.

Pediatric Acute Care: One year of RN clinical experience in an acute care setting or one year of RN clinical experience in any area and a commitment to complete one year of RN clinical practice in an acute care setting before beginning clinical courses. Applicants that do not have one year of RN experience at the point of application, but will complete one year before beginning clinical courses, will satisfy the work requirement.

NURS 772	Psychopharmacology	2
NURS 773	Diagnosis and Management of Children and Adolescents in Adv. Psychiatric-Mental Health Nursing	3
NURS 774	Diagnosis and Management of Adults in Advanced Practice Psychiatric-Mental Health Nursing	3
NURS 775	Diagnosis and Management of Special Populations in Psychiatric Mental Health Nursing	2
NURS 794	The Psychiatric Mental Health Nurse Practitioner Role	2
Minimum Total Hours		16

DNP graduates from the UofL School of Nursing are prepared to apply for APRN certification in their population track upon graduation; however, educational preparation does not guarantee professional licensure. If you have questions regarding Kentucky APRN licensure, please contact the Kentucky Board of Nursing (<https://kbn.ky.gov/advanced-practice-registered-nurse/Pages/default.aspx>). For APRN licensure questions in other states, please contact the respective state board of nursing (<https://ncsbn.org/contact-bon.htm>).

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Nursing Practice, Specialization in Nurse Anesthesia (DNP)

The Nurse Anesthesia program is a specialized track of the Doctor of Nursing Practice (DNP) degree offered by the School of Nursing at the University of Louisville. The program is committed to fostering expertise in the art and science of anesthesia, excellence in leadership, and a commitment to the future of the Nurse Anesthesia profession. Completion of the specialty curriculum prepares students to take the National Certification Examination (NCE) offered by the National Boards of Certification and Recertification of Nurse Anesthetists (NBCRNA) (<https://www.nbcna.com/>).

Nurse Anesthesia Program Outcomes

At the completion of the Nurse Anesthesia DNP Program, the graduate must demonstrate the ability to:

Patient Safety

- Be vigilant in the delivery of patient care.
- Refrain from engaging in extraneous activities that abandon or minimize vigilance while providing direct patient care.
- Conduct a comprehensive equipment check.
- Protect patients from iatrogenic complications.

Perianesthesia

- Provide individualized care throughout the perianesthesia continuum.
- Deliver culturally competent perianesthesia care.
- Provide anesthesia services to all patients across the lifespan.
- Perform a comprehensive history and physical assessment.
- Administer general anesthesia to patients with a variety of physical conditions.
- Administer general anesthesia for a variety of surgical and medically related procedures.
- Administer and manage a variety of regional anesthetics.
- Maintain current certification in ACLS and PALS.

Critical Thinking

- Apply knowledge to practice in decision making and problem solving
- Provide nurse anesthesia services based on evidence-based principles.
- Perform a preanesthetic assessment before providing anesthesia services.
- Assume responsibility and accountability for diagnosis.
- Formulate an anesthesia plan of care before providing anesthesia services.
- Identify and take appropriate action when confronted with anesthetic equipment-related malfunctions.
- Interpret and utilize data obtained from noninvasive and invasive monitoring modalities.
- Calculate, initiate, and manage fluid and blood component therapy.
- Recognize, evaluate, and manage the physiological responses coincident to the provision of anesthesia services.
- Recognize and appropriately manage complications that occur during the provision of anesthesia services.
- Use science-based theories and concepts to analyze new practice approaches.
- Pass the National Certification Examination (NCE) administered by the NBCRNA.

Communication

- Utilize interpersonal and communication skills that result in the effective exchange of information and collaboration with patients and their families.
- Utilize interpersonal and communication skills that result in the effective interprofessional exchange of information and collaboration with other healthcare professionals.
- Respect the dignity and privacy of patients while maintaining confidentiality in the delivery of interprofessional care.

- Maintain comprehensive, timely, accurate, and legible healthcare records.
- Transfer the responsibility for care of the patient to other qualified providers in a manner that assures continuity of care and patient safety.
- Teach others.

Leadership

- Integrate critical and reflective thinking in his or her leadership approach.
- Provide leadership that facilitates intraprofessional and interprofessional collaboration.

Professional Role

- Adhere to the Code of Ethics for the Certified Registered Nurse Anesthetist.
- Interact on a professional level with integrity.
- Apply ethically sound decision-making processes.
- Function within legal and regulatory requirements.
- Accept responsibility and accountability for his or her practice.
- Provide anesthesia services to patients in a cost-effective manner.
- Demonstrate knowledge of wellness and substance use disorder in the anesthesia profession through completion of content in wellness and substance use disorder.
- Inform the public of the role and practice of the CRNA.
- Evaluate how public policy making strategies impact the financing and delivery of healthcare.
- Advocate for health policy change to improve patient care.
- Advocate for health policy change to advance the specialty of nurse anesthesia.
- Analyze strategies to improve patient outcomes and quality of care.
- Analyze health outcomes in a variety of populations.
- Analyze health outcomes in a variety of clinical settings.
- Analyze health outcomes in a variety of systems.
- Disseminate scholarly work.
- Use information systems/technology to support and improve patient care.
- Use information systems/technology to support and improve healthcare systems.
- Analyze business practices encountered in nurse anesthesia delivery settings.

Standards for Accreditation of Nurse Anesthesia Programs - Practice Doctorate, Page 17-20, Revised January 30, 2021

A holistic review process is used when considering applications for admission to the DNP Nurse Anesthesia program. The holistic review considers multiple criteria for admission, including the applicant's professional career goals, academic capabilities, GPA, work experience, leadership, and community engagement.

The University of Louisville School of Nursing participates in Nursing's Centralized Application Service (<https://nam11.safelinks.protection.outlook.com?url=https%3A%2F%2Fnursingcas.org%2F&data=05%7C02%7Ccourtney.kerr%40louisville.edu%7Cfddbf1baa33b406dc64708dc69581ae1%7Cdd246e4a54344e158ae391ad9797b25977007700%7C638501074332455554%7CUnknown%7CTWFpbGZsb3d8eyJWljiMC4wLjAwMDAiLCJQIjoiV2luMzliLCJBTiI6Ikh1aWw%7C0%7C%7C%7C&sdata=Wxdx9Lo03EwzuDbl3IfcG40FTa3Fo>)

(NursingCAS), which provides you with an online application. NursingCAS collects and processes your application documents and verifies your transcripts. The School of Nursing will receive your application information from NursingCAS and use it to make admission decisions. In addition to the NursingCAS application, students will need to pay a supplemental application fee of \$40 to graduate admission.

- Official Transcripts representing all college course work with a recommended overall cumulative grade point average of 3.0 on a 4.0 scale.
- Bachelor of Science in Nursing degree from a regionally accredited institution and a NLN, CCNE or ACEN accredited nursing program.
 - Applicants who have attended a college or university outside the United States are also required to submit a course-by-course evaluation of their transcript through World Education Services (WES) (<https://www.wes.org/>) or Educational Credential Evaluators (ECE) (<https://www.ece.org/>)
- Three letters of recommendation addressing academic ability, professional competency and professional character.
- Curriculum Vitae (CV) or resume that includes the following: work experience, certifications, scholarly activities, as well as educational leadership and/or professional organization activities.
- Minimum Science GPA of 3.0 on a 4.0 scale.
- Prerequisite courses at the undergraduate level with preference given to those who earned a B or better in all required courses.
 - Human Anatomy
 - Physiology
 - Microbiology
 - Chemistry
- Unencumbered Registered Nursing License
- Acute/Critical Care Nursing Certification (CCRN) or equivalent nursing specialty certification.
- Current certifications in BLS and either ACLS or PALS.
- Minimum one year of recent (within 2-years preferred) full-time critical care experience or the part-time equivalent with Employment Verification (<https://louisville.edu/nursing/academics/dnp/nap/files/uofl-nurse-anesthesia-employment-verification/>).
 - Preference is given to applicants who have high acuity critical care experience where hemodynamic monitoring, mechanical ventilation, and vasoactive drug administration is routinely managed.
 - Preference is given to applicants with experience in shared governance leadership.
- Completion of Graduate Record Examination (GRE) (<http://www.ets.org/gre/>), official scores must be within 5 years prior to application.
- Minimum of 24 hours of shadow experience with a CRNA (<https://louisville.edu/nursing/academics/dnp/nap/files/uofl-nurse-anesthesia-shadowing-documentation/>).
- Meet the Program Technical Standards (<https://louisville.edu/nursing/academics/dnp/nap/files/program-technical-standards/>).
- Short answer essays reflecting on your preparation for graduate work, personal and professional goals, and reasons for pursuing nurse anesthesia.
- Selected applicants will be invited for a required interview with the selection committee (<https://louisville.edu/graduate/futurestudents/application-directions/>) exam as applicable: TOEFL (Test of English

as a Foreign Language) or IELTS (International English Language Testing System)

- Students offered admission will need to:
 - submit a Criminal Background check through the third-party vendor Castlebranch which will need to be approved prior to enrollment.
 - submit a non-refundable \$1500 matriculation fee.

¹ This course contains clinical hours specific to the DNP project development. Clinical hours in this course should not be counted as direct patient care hours.

² This course contains patient care focused clinical hours. Clinical hours in this course are counted as direct patient care hours. 1 credit hour = 84 clinical hours.

The Nurse Anesthesia program is a specialized track of the Doctor of Nursing Practice (DNP) degree offered by the School of Nursing at the University of Louisville. The program is committed to fostering expertise in the art and science of anesthesia, excellence in leadership, and a commitment to the future of the Nurse Anesthesia profession. Completion of the specialty curriculum prepares students to take the National Certification Examination (NCE) offered by the National Boards of Certification and Recertification of Nurse Anesthetists (NBCRNA).

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Oral Biology (MS)

Master of Science in Oral Biology

Unit: School of Dentistry (<http://louisville.edu/dentistry/>) (GD)

Program Webpage (<https://louisville.edu/dentistry/degrees/oralbiology/msob/>)

Academic Plan Code(s): OBIOMS

Program Information

The School of Dentistry offers a research-based program leading to the Master of Science degree in Oral Biology. The program is directed toward an in-depth understanding of the biology of the oral cavity and processes leading to disease, including the interactions between oral and systemic health. Students obtain the scientific knowledge and biomedical skills required to perform contemporary dental research. This is a research-based degree for which each student completes a thesis project under the guidance of a faculty mentor. Research projects include basic, clinical, and translational studies.

The MS in Oral Biology offers training important to persons wishing to pursue a career in either academic or clinical dentistry or to enter the biotechnology sector or advance to a PhD. The program is available to students wishing to obtain only the MS in Oral Biology degree, as well as to students currently enrolled in the DMD degree program wishing to earn a dual degree (DMD/MS), and persons who have previously earned a DMD or MD (or equivalent) degree, including international applicants. See louisville.edu/dentistry/degrees/oralbiology (<http://louisville.edu/dentistry/degrees/oralbiology/>).

Areas for research training include: molecular, cellular and craniofacial biology; craniomaxillofacial diagnostic imaging; neural crest-related craniofacial and cardiovascular disorders; regulation of gene transcription; oral microbiology and immunology; cellular mechanisms of salivary gland secretion; birth defects; infection control; protein glycosylation; protein expression and trafficking; periodontology; dental materials science; orthodontics; endodontics; prosthodontics; and health services research related to dentistry. Developmental biology, oral microbiology, and innate immunology are particular strengths of the program.

A minimum of 30 credit hours is needed for the MS degree. Requirements for the degree include courses in introductory and advanced oral biology and in data analysis, participation in seminars, development of a biomedical research project, and a thesis.

Individualized programs are developed by students working with their thesis advisor and graduate committee. The graduate committee also approves proposed thesis research, reviews the thesis research, reviews the thesis for acceptance, and administers a final oral examination.

Additional important information about the program is available in the Oral Biology Program Guide (<http://louisville.edu/dentistry/degrees/oralbiology/msob/curriculum/>).

Admission Requirements

Information about application process is available on the Oral Biology program website (<http://louisville.edu/dentistry/degrees/oralbiology/msob/admissions/>).

Graduate application for the program is online. There is a non-refundable application fee. Applications are not processed until the application fee is received and all required application materials have been received by the Graduate School.

Credentials listed below should be sent to the Graduate School, Graduate Admissions, by the following admission deadlines for complete applications:

June 1 for Fall

Applications that are not complete by the deadline may not be reviewed in time for registration.

Students currently enrolled in the DMD degree program who wish to also apply to the MS degree in Oral Biology program should meet with the Program Director or Director of Student Affairs to determine a timeline for making an application.

Admission Credentials

(See Oral Biology Program Guide (<http://louisville.edu/dentistry/degrees/oralbiology/msob/admissions/>))

- Graduate Application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) and application fee
- Transcripts of all college coursework, including evidence of a baccalaureate degree
- Graduate Record Examination scores or acceptable scores on the DAT or National Boards Dental Exam (NBDE)
- Three letters of recommendation which document your research experience or academic ability
- A personal statement of research experience or interest in research, and your career goals
- TOEFL, IELTS or Duolingo English language proficiency scores, if English is not applicant's native language.
- Certification of academic credentials with course-by course evaluation (via WES or ECE) for international applicants.

Program Requirements

The **minimum** requirement for the MS Oral Biology degree is **30 credit hours**. At least one-half of the credits counting toward the degree (exclusive of thesis) must be in courses open to graduate students only (600 level or above).

Code	Title	Hours
Major Subject Core Courses		8
OIID 501	Biomedical Data Analysis: Experimental Design and Statistics	
OIID 601	Introduction to Oral Biology Research	
OIID 605	Oral Health Seminars (2 semesters, 0.5 credit hours each)	

OIID 606	Oral Biology Communication ¹	
Major Subject Selective Courses (see list below)		7-8
Thesis Research Requirements		14-15
OIID 619	Graduate Research (minimum of eight (8) credit hours required)	
OIID 620	Thesis (minimum of six (6) credit hours required)	
Minimum Total Hours		30

Major Subject Selective Courses

In addition to the list below, courses may be chosen from any 600-level courses offered by the University of Louisville that are deemed to be relevant and applicable to the student's program of study and thesis research, with approval by the student's thesis advisor/director and the Program Director.

Code	Title	Hours
OIID 600	Concepts in Oral Immunology	2
OIID 604	Oral Infections	3
OIID 610	Advanced Topics in Oral Biology ²	1-4
OBIO 611	Craniofacial Osteology	1-3
OBIO 612	Craniomaxillofacial Diagnostic Imaging	2-4
OBIO 613	The Diagnosis & Treatment of Temporomandibular Disorders	1

OBIO 615	Advanced Clinical Pharmacology ²	1
OBIO 616	Overview of Medical Genetics in Oro-Facial Disease ³	1.5
OBIO 617	Advanced Oral Pathology ²	1
BIOC 668	Molecular Biology ²	4

¹ Prerequisite: OIID 601 Introduction to Oral Biology Research

² Requires course director approval. Graduate-level clinical courses may require DMD or equivalent.

³ Course provided every second year.

Organizational Change in Higher Education (CERT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Certificate in Organizational change in Higher Education

Unit: College of Education & Human Development (<https://louisville.edu/education/>)

Department: Educational Leadership, Evaluation, and Organizational Development (<https://louisville.edu/education/departments/eleod/>)

Program Website (<http://louisville.edu/education/degrees/graduate-certificate-organizational-change-higher-education/>)

Academic Plan Code(s): OCHECGR, OCHECGRO

Program Information

This program can be completed 100% online.

The training and development of academic leaders has historically been an informal process within the academy. As the profession and the postsecondary landscape have changed, there is a need to train and develop mid-career academics and those entering leadership roles.

The purpose of this certificate program is to prepare postsecondary instructors and faculty members for professional practice related to understanding and managing organizational change within their institutions and units. The program provides breadth in its consideration of the factors that influence organizational change in colleges and universities that is often challenging to obtain through professional practice alone, particularly for academic professionals focused on teaching and learning, as opposed to administrative or student support roles.

The certificate requires twelve (12) credit hours of coursework.

Admission Requirements

- Completion of graduate admission application (<https://graduate.louisville.edu/admission/apply/>) and applicable fee.
- The minimum requirements for admission is a baccalaureate degree or its equivalent from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies#RegionalInstitutional/#RegionalInstitutional>).
- Applicants are required to submit all official transcripts.
- The GRE requirement is waived for applicants with a minimum cumulative GPA of 3.0 during undergraduate studies or a minimum cumulative GPA of 3.5 during graduate studies. Applicants below these thresholds will be considered on a case-by-case basis and the GRE may be required for admission. GRE scores used for consideration must be no older than 5 years if required for admission.
- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.
- Each applicant must submit a resume and professional goals statement. The professional goals statement must be 1-2 pages in length and address why you are interested in the program, how it relates to your career goals, the relationship between your personal and professional goals, and your experience with and interest in learning more about diversity issues in higher education. This document is also a writing sample and will be used to assess your writing skills.
- For unconditional admission, students are required to have a 2.75 cumulative GPA, or 2.75 GPA for their last 60 hours in an undergraduate program.
- All credentials are considered. Satisfying the minimum GPA does not guarantee admission into the program.

Pan-African Studies (CERT)

Graduate Certificate in Pan-African Studies

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Pan-African Studies (<http://louisville.edu/panafricanstudies/>)

Program Website (<http://louisville.edu/panafricanstudies/graduates/graduate-certificate.html>)

Academic Plan Code(s): PAS_CPA

Program Information

The Department of Pan-African Studies (PAS) fosters the multidisciplinary study of the societies and cultures of Africa and persons of African ancestry past and present, throughout the world. To this end, PAS offers an extensive program of study, including undergraduate major and minor and, ultimately, graduate programs focusing on Africa and the Diaspora. This program of study seeks to:

1. Give students a broad understanding of the history, societies, and cultures of the African world;
2. Equip students to apply Pan-Africanist scholarship to the analysis of and engagement with contemporary social and cultural issues;
3. Engage in the interrogation of prior research and build new scholarship that reflects the perspectives and experiences of people from the African Diaspora;
4. Prepare students for the workforce or for graduate work in Pan-African Studies and/or related fields;
5. Add an inter-cultural dimension to other academic programs.

Fifteen faculty members hold full or joint appointments in the Department of Pan-African Studies with areas of specialization that include art, religion, music, communications, literature, popular culture, history, anthropology, education, sociology and political science of the African world.

As scholars, the faculty of the Department contributes to the creation of new knowledge and the development of new methodologies emerging from Pan-African experiences and formulations of meaning. The Department is committed to sharing this knowledge through teaching and research, and applying it through service in the local, state, regional, national and international communities. PAS aspires, as its ultimate goal, to become a Department of national and international distinction.

Admission Requirements

Admission to the graduate certificate in Pan-African Studies is open, potentially, to any student who has completed at a minimum baccalaureate degree. Post-baccalaureate students wishing to pursue

the certificate outside the framework of a graduate degree program must apply for admission through and meet the general requirements for admission to the Graduate School. These requirements include the submission of:

- A graduate admissions application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- An official transcript reflecting previous degrees earned
- At least two letters of recommendation
- Graduate Record Examination (GRE) scores of the General Test Section

If resource limitations necessitate the imposition of restrictions, the PAS Graduate Programs Committee will select students based on the following criteria: 1) undergraduate record; 2) letters of recommendation; 3) personal interview; and 4) GRE scores.

Graduate students wishing to pursue the certificate program in Pan-African Studies in conjunction with a graduate degree must meet the requirements for admission to that degree program and should then apply for the certificate program by consulting the PAS Director of Graduate Studies after admission. Depending on the structure of the degree program, coursework toward the certificate may be either additional hours beyond those required for the degree or elective hours toward the degree or a combination of the two. The PAS Director of Graduate Studies shall then inform the student's degree program chair and work to coordinate the completion of degree and graduate certificate program requirements.

Requirements for the Graduate Certificate in Pan-African Studies

Code	Title	Hours
Approved PAS Courses (available in the Department of Pan-African Studies) ¹		9
	Historical Studies (three (3) credit hours)	
	Cultural Studies (three (3) credit hours)	
	Social Studies (three (3) credit hours)	
Approved Electives ²		6
Minimum Total Hours		15

Courses must be approved for graduate credit in accordance with the policies of the Graduate School. Students may not apply 500-level courses taken for undergraduate credit.

At least three (3) credit hours must be at the 600 level.

Coursework toward the Graduate Certificate in Pan-African Studies may also count toward the student's graduate degree.

¹ Substitutions must be approved by the Director of Graduate Studies.

² For students pursuing graduate degrees, at least one course must be outside of the department in which the student is pursuing the degree. Substitutions must be approved by the Director of Graduate Studies.

Pan-African Studies (MA)

Master of Arts in Pan-African Studies

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Pan-African Studies (<https://louisville.edu/panafricanstudies/>)

Program Website (<https://louisville.edu/panafricanstudies/graduates/master-of-arts-in-pan-african-studies.html>)

Academic Plan Code(s): PAS_MA

Program Information

The Master of Arts in Pan-African Studies program provides an opportunity for structured graduate study in the multi-disciplinary field of Pan-African Studies. Students will have the option of choosing between two areas of emphasis:

- **African American Studies**
- **African Diaspora Studies**

These broad emphases reflect sub-disciplines within the larger field of Pan-African Studies and will enable students to focus more intensively on their particular area(s) of interest. Students must successfully complete 33 credit hours of graduate level courses of which five courses must be at the 600 level. Each student also must complete a **thesis**.

The Pan-African Studies Department offers courses that may be applied toward graduate degrees in other areas. Students must obtain their program advisor's permission before enrolling in these courses. Students who are interested in more information on these courses should contact the department's Director of Graduate Studies (DGS).

Admission Requirements

The Pan-African Studies Graduate Studies Committee only considers applications for the Fall semester. The deadline for applications is January 15.

Students applying for admission to the Master of Arts in Pan-African Studies program must meet the following standards:

- Completion of Online Graduate Application (<http://louisville.edu/graduate/apply/>)
- Minimum 3.00 undergraduate cumulative grade point average
- Submission of an official transcript reflecting previous degree earned
- Three letters of recommendation
- Graduate Record Examination (GRE); successful students usually have a minimum combined score of 300

- Submission of a personal statement
- Submission of a current CV
- Writing Sample

Program Requirements

Code	Title	Hours
Core Courses		18
PAS 607	Pan-African Studies Foundations of the Field I	
PAS 608	Pan-African Studies Foundations of the Field II	
PAS 623	Qualitative Research Strategies and Pan-African Research	
Three PAS courses for graduate credit distributed as follows:		
Historical Studies (three (3) credit hours)		
Cultural Studies (three (3) credit hours)		
Social Studies (three (3) credit hours)		
Concentration Area		9
Select an area of emphasis:		
<i>African American Studies</i>		
PAS courses for graduate credit focusing on African Americans distributed as follows:		
Historical Studies (three (3) credit hours)		
Cultural Studies (three (3) credit hours)		
Social Studies (three (3) credit hours)		
OR		
<i>African and Diaspora Studies</i>		
PAS courses for graduate credit focusing on Africa and/or the Diaspora, distributed as follows:		
Historical Studies (three (3) credit hours)

Social Studies (three (3) credit hours)		
Thesis		
PAS 604	Thesis	3
Elective		
Elective in Related Field (with advisor's approval)		3
Minimum Total Hours		33

A student may be approved to transfer up to six (6) credit hours from another university or the University of Louisville graduate program or up to nine (9) credit hours from the University of Louisville Pan-African Studies graduate certificate program. Courses must be graded B or higher, cross-listed with PAS, and taken at graduate level.

Pan-African Studies (PhD)

Doctor of Philosophy in Pan-African Studies

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Pan-African Studies (<http://louisville.edu/panafricanstudies/>)

Program Website (<https://louisville.edu/panafricanstudies/graduates/ph-d-program-in-pan-african-studies-1.html>)

Academic Plan Code(s): PAS_PHD

Program Information

The PhD program in Pan-African Studies trains professional researchers at the highest level in one or more of the traditional disciplines as well as focusing on two substantive areas: African American or African Diaspora Studies.

The expertise of the present core and affiliated faculty to the Department of Pan-African Studies is spread across African American and African Diaspora history, philosophy, sociology, political science, linguistics, religion, education, social work, literature, law, geography, psychology, art, music, anthropology, women's and gender studies. This amalgam of interdisciplinary subjects makes the department a highly active research and teaching unit that is well positioned to offer a degree of Doctor of Philosophy in Pan-African Studies.

The PhD is designed to educate students with the knowledge, analytic abilities, and professional development skills important for both academic and non-academic careers. Since fall of 2012, the program has been open to all students regardless of race/ethnicity, gender, religion, sexual preference, or nationality. Graduates are employable in public and private corporations in areas of education and research, public policy, cultural heritage and public history, programs that deal with human rights and social inequality, economics and trade.

Admission Requirements

To be admitted students must have the following:

- Advanced competency in research skills, as evidenced by completion of a master's degree thesis or other independent research project, such as a sole-authored research report, published articles in peer-reviewed journals, or edited volumes
- Completion of a minimum of 33 credit hours at the master's degree level (i.e., beyond the baccalaureate degree), with a minimum GPA of 3.00
- Official GRE Scores—successful students usually have a combined score of at least 300

- A master's degree in Pan-African/Black Studies; a master's degree in a traditional discipline in the humanities or social sciences also will be considered for admittance

Students who apply for the program without a master's degree in Pan-African/Black Studies may be required to take prerequisite courses deemed necessary by the Director of Graduate Studies.

Students may transfer six (6) credit hours from a previously earned master's degree toward the PhD, subject to the approval of the degree program and the Unit Dean. Students with a PAS MA degree may request to transfer a maximum of twelve (12) credit hours to the PhD. In both cases, students must petition for additional credit hours. Only courses in which the student earned grades of B or better will be considered for transfer.

Application Process

The Pan-African Graduate Committee considers applications to the PhD program for fall admissions only. The deadline is January 15, but all applicants are encouraged to apply early!

When credentials are complete, the Graduate Admissions Committee will review applications and make selections. All applicants will be notified of their outcomes.

Applicants applying for admission to the doctoral program must submit the following required credentials to the Graduate School (<http://louisville.edu/graduate/apply/>):

1. A completed Graduate Admission application (<http://louisville.edu/graduate/apply/>)
2. Application fee
3. Proof of completion of a master's degree program or an equivalent number of graduate credits prior to admission
4. Official transcripts of all undergraduate, graduate and post-graduate work
5. Graduate Record Examination (GRE) General Test scores—successful students usually have a combined score of 300
6. Submission of three recent letters of recommendation about the applicant's potential success in a doctoral program
7. A written statement of intent of no more than a thousand words detailing the applicant's professional goals
8. Current curriculum vitae
9. A writing sample—applicants must supply a recent sample (10-20 pages) of their scholarly or professional writing

To check your application status, please visit: <https://apply.graduate.louisville.edu/portal/status> (<https://apply.graduate.louisville.edu/portal/status/>)

For questions about the admissions process contact the Graduate Admissions office at gradadm@louisville.edu.

Current or returning students with questions about policy or procedure not related to the admissions process should contact the Graduate Student Services Office at graduate@louisville.edu.

Students may transfer six (6) credit hours from a previously earned master's degree toward the PhD, subject to the approval of the degree program and the Unit Dean. Students with a PAS MA degree may request to transfer a maximum of twelve (12) credit hours to the PhD. In both cases, students must petition for additional credit hours. Only courses in which the student earned grades of B or better will be considered for transfer.

¹ Through year 2 the PhD student will take four elective PAS courses (12 credit hours) concentrated in one of two tracks: African American Studies or the African Diaspora, spanning the historical, social and cultural fields.

² Defend dissertation proposal

Performance (MFA)

Master of Fine Arts in Performance

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Theatre Arts (<http://louisville.edu/theatrearts/>)

Program Website (<http://louisville.edu/theatrearts/graduates/>)

Academic Plan Code(s): PERFMFA

Program Information

Dedicated to Art in Action and offering the only Graduate Certificate in African American Theatre in the United States, our Master of Fine Arts in Performance program offers a three-prong approach. We train actors to act, teach, and make theatre that resonates locally, nationally, and internationally. Our students push boundaries of thinking and challenge conventions of theatre and society through exploration of classical, contemporary, and global dramatic forms. Marrying theory, practice, and engaged outreach, we encourage the application of research, creativity, and sustainability in embodied, socially-conscious performance.

The MFA in Performance offers a three-year course of study that includes classes in acting, movement, voice, drama, and performance theory. Students perform in shows directed by faculty and guest artists and staged in our two main theatres. They also perform in our Repertory Company's touring production and may mount their own performance projects. The Graduate Certificate in African American Theatre, which can be completed alongside the MFA in Performance, features classes in the craft and theory of acting and directing African American theatre.

The African American Theatre Program, founded in 1993, is integral to the Department of Theatre Arts. Further information about the Graduate Certificate in African American Theatre (p. 66) can be found in the Graduate Catalog.

Admission Expectations

- Students must submit an online graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) and submit all required documentation to the Graduate School.
- Evidence of a Bachelor's Degree and 3.0 cumulative grade point average (GPA).
- Audition at the University of Louisville, at a regional or national conference site, or through a video submission. More information about MFA program auditions is available at <https://louisville.edu/theatrearts/graduates/auditions> (<https://louisville.edu/theatrearts/graduates/auditions/>)
- Transcripts of all undergraduate and (if applicable) graduate work
- Two letters of recommendation
- Personal Statement (500-800 words, double-spaced)
- Department committee reviews application materials and makes a recommendation to the Graduate School.
- All applicants are automatically considered for Graduate Teaching or Research Assistantships that include full tuition, stipend, and health insurance for the academic year (August–May).

Program Requirements

MFA candidates must complete the course requirements listed below. Students are paired with a faculty advisor to review their progress at the end of each semester, evaluating coursework, professionalism, performance projects, and any GTA responsibilities.

Code	Title	Hours

Pharmacology and Toxicology (MS)

Master of Science in Pharmacology and Toxicology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)
 Department: Pharmacology and Toxicology (<https://louisville.edu/medicine/departments/pharmacology/>)
 Program Website (<https://louisville.edu/medicine/departments/pharmacology/programs/>)
 Academic Plan Code(s): PHARMS

Program Information

The Department of Pharmacology and Toxicology is committed to academic excellence and to the attainment of regional, national, and international recognition for the quality of its educational, research, and service activities. The Department Strategic Plan includes five broad objectives:

- Provide instruction in pharmacology and toxicology of the highest quality for the education and preparation of medical, dental, and other health care professional students. Emphasis is placed on

the fundamental principles necessary for life-long learning and the essential knowledge required for rational, effective, and safe use of drug therapy.

- Advance biomedical knowledge through high quality research and other scholarly activities, particularly in pharmacology and toxicology and other areas of focus within the University of Louisville and School of Medicine Strategic Plans.
- Provide robust research and educational experiences in pharmacology and toxicology for the education and training of future biomedical scientists who will provide and advance biomedical education, research, and service.
- Provide instruction of the highest quality in pharmacology and toxicology appropriate for students at the undergraduate, graduate, and postgraduate levels.
- Provide service to the School of Medicine, the Health Sciences Center, the University of Louisville and the surrounding region, the Commonwealth of Kentucky, professional organizations, the nation, and the world.

Goals of the Program

The Department of Pharmacology and Toxicology is dedicated to advancing biomedical knowledge through active contribution to high-quality research in pharmacology and toxicology and to providing high-quality research and educational experiences for the education and training of future biomedical scientists who advance biomedical education, research, and service.

Admission Requirements

For the Department of Pharmacology and Toxicology, complete guidelines are given below.

Application Forms

All candidates for admission to graduate programs at the University of Louisville must complete a graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Applications are accepted year-round for start dates of around August 1. However, to ensure full consideration for admission, applications should be submitted by January 15th of the same calendar year. All credentials and/or communications should be submitted to the Graduate School and must include the applicant's full name and University of Louisville-issued student ID (if available). In rare and special cases, provisional admission may be granted even if some application materials are incomplete. Please contact the department (phtxapps@louisville.edu) for additional information.

Application Fee

A non-refundable application fee is required with the application form. An application will not be forwarded to the department until this fee is paid.

Transcripts

Applicants for admission to a degree program must submit an official transcript from each college attended. All University of Louisville transcripts will automatically be submitted with completion of an application. All applications are considered on an individual basis. Normally, a successful applicant will have an undergraduate GPA of 3.00 or higher and will have successfully completed sufficient coursework in biology, chemistry and mathematics.

Statement of Experience and Professional Goals

At the time of application, a 2-3 page typed statement should be sent to introduce the student to the faculty of the Department, describing past educational, laboratory and relevant life experiences, as well as outlining professional goals after the degree program.

This statement can be sent electronically to gradadm@louisville.edu

English Proficiency

1. English Proficiency. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States are exempt from this requirement. Information concerning the TOEFL exam can be obtained from: University Testing Center, or Test of English as a Foreign Language PO Box 6151 Princeton, NJ 08541 USA or [toefl.org](http://www.toefl.org) (<http://www.toefl.org>) The institutional code of UofL for TOEFL is 1838. The TOEFL department code is 30 (other biological sciences); IELTS information can be obtained from www.ielts.org (<https://www.ielts.org/>); Duolingo information can be obtained from englishtest.duolingo.com/ applicants (<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fenglishtest.duolingo.com%2Fapplicants&data=04%7C01%7Ccheryl.schroader%40louisville.edu%7C0baa30a62e8345914a7c08d9faf80847%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C637816765462146305%7CUnknown%7CTWfpbGZsb3d8eyJWljoIMC4wLjAwMDAiLCJQIjoV2luMzliLCJBTiI6IklhaWw%3D%3D%3C000&sdata=touQ%2Brap6mVG4VBHkhRok5SfbyjKROnFk0ySeS6clh8%3D&reserved=0>).

Personal Interview

Whenever possible, a personal interview, either in person or via telephone will be held before final offer and acceptance of a position in the MS program.

Letters of Recommendation

A minimum of two letters of recommendation from persons familiar with the applicant's research and/or academic work are required.

International Student Applicants

In addition to meeting the required academic credentials and demonstrating English proficiency, the University of Louisville requires an international credential evaluation for all applicants who have attended colleges, universities, or postsecondary programs outside of the United States. Furthermore, upon admission, international students must provide evidence of sufficient financial resources to cover educational and living expenses throughout their studies. They must also submit a copy of their passport's biographical page as part of the I-20/DS-2019 process. For more details, visit the Graduate School website for international applicants (<https://graduate.louisville.edu/admission/international/>).

Financial Aid

The Department generally does not provide financial support for master's degree students. Current tuition rates (<https://louisville.edu/bursar/tuitionfee/>) can be found on the Office of the Bursar website.

The University of Louisville reserves the right to change programs of study, academic requirements, fees, schedules of courses, the announced academic calendar and deadlines without prior notice.

Program Requirements

The Master of Science in Pharmacology and Toxicology program is a 1.5+ year course of study culminating in the presentation and defense of a master's thesis. The master's thesis may be based on laboratory research, a "dry" library-based research project, or a combination of the two. A non-thesis option is available, offering options in either Pharmacology or Toxicology, subject to the approval of the faculty mentor and Director of the Graduate Program.

The MS curriculum is designed for:

1. Individuals interested in a terminal master's degree who do not require extensive research experience or credentials, e.g., pharmaceutical representatives, medical insurance providers, medico-legal professionals
2. Pairing with other programs to form hybrid or dual science/business or public health degrees, such as an MS/MBA or MS/MPH programs
3. Individuals interested in progressing through management ranks in Pharmacology or biotech businesses
4. The basis for a scientific writing career, when coupled with extensive scientific writing experience or electives
5. The basis for a career in biotechnology, when combined with theoretical and practical training in laboratory analysis

Spring**Master's Candidacy**

Preparation, presentation, and defense of Master's thesis and award of MS degree (if required)

Hours	0
Minimum Total Hours	40-45

Advisor Selection and Master's Thesis Committee Formation

During the first semester, students are required to visit research laboratories of potential Principal Advisors who hold primary or secondary appointments in the Department of Pharmacology and Toxicology and whose research aligns with the students' interests. Faculty must hold Graduate Research Training Faculty status to serve as a sole advisor. The master's thesis committee must consist of at least three qualified members, including at least one primary faculty member from the Department of Pharmacology and Toxicology. The selection of the Research Advisor and the formation of the thesis committee require approval from the Director of Graduate Studies, the Department Chair, and the Associate Dean for Graduate and Postdoctoral Studies in the School of Medicine.

Minimum Program Requirements

To complete the MS degree, students must maintain good standing in the Pharmacology and Toxicology graduate program by meeting the following requirements: 1) Successfully complete all coursework with a minimum GPA of 3.0, with no grades of C or below; 2) Deliver an annual seminar presentation; 3) Submit an annual progress report; and 4) Regularly attend weekly departmental seminars. The thesis committee must meet at least once a year to evaluate the student's progress. To be eligible for Master's candidacy, students must complete a minimum of 40 credit hours by the end of their second year. The MS degree must be completed within 6 years from the start of the program. Coursework older than 6 years, including transfer credits, will not count toward the degree.

Master's Thesis Examination

Students pursuing the thesis option must complete a body of research and write a master's thesis, which they will publicly defend. The thesis must be approved by both the thesis committee and the Graduate School. The thesis must demonstrate the student's ability to conduct independent research. Students will defend their research protocol, results, and conclusions during an oral Thesis Defense. To pass, no more than one unfavorable vote from committee members is permitted. After the defense, students must complete all required thesis revisions within the same semester and meet the Graduate School's submission deadlines. Once the final, approved thesis is submitted to the Graduate School, degree requirements are fulfilled. For thesis formatting, students should refer to the latest version of the "Guidelines for the Preparation and Processing of Theses and Dissertations (<https://graduate.louisville.edu/graduation-milestones/thesis-and-dissertation/>)". Students are responsible for ensuring compliance with the most current guidelines.

Non-Thesis Option

For information about the non-thesis options in either Pharmacology or Toxicology, see the Non-Thesis Requirements tab.

Program Requirements

The Master of Science in Pharmacology and Toxicology program is a 1.5+ year course of study culminating in the presentation and defense

of a master's thesis. The master's thesis may be based on laboratory research, a "dry" library-based research project, or a combination of the two. A non-thesis option is available, offering options in either Pharmacology or Toxicology, subject to the approval of the faculty mentor and Director of the Graduate Program.

The MS curriculum is designed for:

1. Individuals interested in a terminal master's degree who do not require extensive research experience or credentials, e.g., pharmaceutical representatives, medical insurance providers, medical-legal professionals
2. Pairing with other programs to form hybrid or dual science/business or public health degrees, such as an MS/MBA or MS/MPH programs
3. Individuals interested in progressing through management ranks in Pharmacology or biotech businesses
4. The basis for a scientific writing career, when coupled with extensive scientific writing experience or electives

PHTX 619	Research	4
Hours		6
Minimum Total Hours		36-38

¹ Students in the non-thesis option who elect to take optional courses in either concentration may reduce the number of total credits taken in PHTX 619, as long as they meet the minimum 30 credit hours required for the degree.

Advisor Selection

During the first semester of their graduate study, students are required to visit research laboratories of potential Principal Advisors who hold primary or secondary appointments in the Department of Pharmacology and Toxicology and align with their interests. The Director of Graduate Studies will serve as a Temporary Advisor until a Permanent Advisor is selected. Students must select a Principal Advisor within the first semester. The selection process involves approval by the student, the Principal Advisor, the Director of Graduate Studies, and the Department Chair.

Minimum Program Requirements

At least 30 credit hours beyond the Baccalaureate Degree are required for the degree of Master of Science. A student must maintain at least a 3.0 accumulated GPA. In general, a student with a GPA that is less than 3.0 at the end of the second semester will require a 2/3 majority vote of the Departmental faculty to continue in the Program. A student may not be graduated with more than six (6) credit hours of "C" grades in their required courses.

Final Examination

Students are required to take a Final Examination during the last semester of the MS Program. This exam will take the form of a research paper or a literature review paper, plus a final oral exam. A positive recommendation for the Master of Science Degree shall require a majority vote of the Final Examination Committee (consisting of at least the Principal Advisor who will serve as Chair and two additional members of the Graduate Faculty). The Committee must have been approved by the Director of Graduate Studies, the Department Chair, and the Dean of the School of Medicine (or his/her designee) prior to the Final Examination. This recommendation shall be made at least one week before graduation.

Pharmacology and Toxicology (PhD)

Doctor of Philosophy in Pharmacology and Toxicology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)
 Department: Pharmacology and Toxicology (<https://louisville.edu/medicine/departments/pharmacology/>)
 Program Website (<https://louisville.edu/medicine/departments/pharmacology/programs/>)
 Academic Plan Code(s): PHARPHD, PHARPHDCAI, PHARPHDJIL, PHARPHDWEN

Program Information

The Department of Pharmacology and Toxicology is committed to academic excellence and to the attainment of regional, national, and international recognition for the quality of its educational, research, and service activities. The Department Strategic Plan focuses on accomplishment of five broad objectives:

- Provide instruction in pharmacology and toxicology of the highest quality for the education and preparation of medical, dental, and other health care professional students. Emphasis is placed on the fundamental principles necessary for life-long learning and the essential knowledge required for rational, effective, and safe use of drug therapy.

- Advance biomedical knowledge through high quality research and other scholarly activities, particularly in pharmacology and toxicology and other areas of focus within the University of Louisville and School of Medicine Strategic Plans.

- Provide robust research and educational experiences in pharmacology and toxicology for the education and training of future biomedical scientists who will provide and advance biomedical education, research, and service.

- Provide instruction of the highest quality in pharmacology and toxicology appropriate for students at the undergraduate, graduate, and postgraduate levels.

- Provide service to the School of Medicine, the Health Sciences Center, the University of Louisville and the surrounding region, the Commonwealth of Kentucky, professional organizations, the nation, and the world.

Goals of the Program

The Department of Pharmacology and Toxicology is dedicated to advancing biomedical knowledge through active contribution to high-quality research in pharmacology and toxicology and to providing high-quality research and educational experiences for the education and training of future biomedical scientists who advance biomedical education, research, and service.

Student Financial Support

Students accepted into the PhD program will be considered for an IPIBS graduate student fellowship. The fellowship pays an annual stipend of \$33,000 in addition to payment of student tuition and health insurance. The annual student stipend increases to \$35,000 upon achievement of PhD Candidacy. The Department also houses a NIEHS-funded T32 environmental health sciences training program (<https://louisville.edu/medicine/departments/pharmacology/research/program-description/>) and participates in the NIEHS-funded Superfund Research Program (<http://louisville.edu/enviromeinstitute/superfund/>), both provide stipend, tuition, and fees for selected students.

Since all PhD students and candidates are considered to be full-time students, they generally are not permitted to seek outside employment while enrolled in the doctoral program. In cases where financial aid is limited and additional support is essential, students needing outside employment must apply in writing for departmental faculty approval. The faculty must also approve any change in employment, as well as approving continued outside employment on an annual basis.

The University of Louisville reserves the right to change programs of study, academic requirements, fees, schedules of courses, the announced academic calendar and deadlines without prior notice.

Admission Requirements

For the Department of Pharmacology and Toxicology complete guidelines are given below:

1. **Application forms.** All candidates for admission to graduate programs at the University of Louisville must complete the online application form (<https://graduate.louisville.edu/admission/apply/>).

Applications are accepted year-round for start dates around August.

1. However, to receive full consideration for IPBS fellowships, applications should be submitted by January 15 of the same calendar year. All credentials and/or communications should be submitted to the Graduate School, Graduate Admissions, and must include the applicant's full name and University of Louisville issued student ID (if available). In rare and special cases, provisional admission may be granted even if some application materials are incomplete. Please contact (phtxapps@louisville.edu) the department for additional information.
2. Application Fee. An application will not be forwarded to the department until this fee is paid.
3. Transcripts. Applicants for admission to a degree program must submit an official transcript from each college attended. All University of Louisville transcripts will automatically be submitted with completion of an application. All applications are considered on an individual basis. Normally, a successful applicant will have an undergraduate GPA of 3.00 or higher and will have successfully completed sufficient coursework in biology, chemistry and mathematics.
4. Statement of Experience and Professional Goals. At the time of application, a 2-3 page typed statement should be sent to introduce the student to the faculty of the Department, describing past educational, laboratory and relevant life experiences, as well as outlining professional goals after the degree program. This statement can be sent electronically to gradadm@louisville.edu.
5. English Proficiency. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States are exempt from this requirement. Information concerning the TOEFL exam can be obtained from: University Testing Center, or Test of English as a Foreign Language PO Box 6151 Princeton, NJ 08541 USA or toefl.org (<http://www.toefl.org>) The institutional code of UofL for TOEFL is 1838. The TOEFL department code is 30 (other biological sciences); IELTS information can be obtained from www.ielts.org (<https://www.ielts.org/>); Duolingo information can be obtained from englishtest.duolingo.com/ applicants (<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fenglishtest.duolingo.com%2Fapplicants&data=04%7C01%7Ccheryl.schroader%40louisville.edu%7C0baa30a62e8345914a7c08d9faf80847%7Cdd246e4a54344e158a%7C7CTWfpbgZsb3d8eyJWljoIMC4wLjAwMDAIlCJQljoiv2luzMzIlCJBtIl%7C3000&sdata=touQ%2Brap6mVG4VBHkhRok5SfbyjKR0nFk0ySe56clh8%3D&reserved=0>).

6. **Personal Interview.** Whenever possible, a personal interview, either in person or via Zoom, will be held before final offer and acceptance of a position in the PhD program.
7. **Letters of Recommendation.** Three letters of recommendation from persons familiar with the applicant's research and/or academic work are required.
8. **International Student Applicants.** In addition to meeting the required academic credentials and demonstrating English proficiency, the University of Louisville requires an international credential evaluation for all applicants who have attended colleges, universities, or postsecondary programs outside of the United States. Furthermore, upon admission, international students must provide evidence of sufficient financial resources to cover educational and living expenses throughout their studies. They must also submit a copy of their passport's biographical page as part of the I-20/DS-2019 process. For more details, visit the Graduate School website for international applicants (<https://graduate.louisville.edu/admission/international/>).
9. **Financial Aid.** All applicants to the PhD program of the Department of Pharmacology and Toxicology are automatically considered for financial aid upon admission. Typically, such aid consists of a stipend, tuition remission, and a health insurance benefit.

Co-curricular

Submission, presentation, and defense of PhD proposal (NIH grant format) and MS thesis.

Awarding of MS degree and transition to PhD candidacy.

Hours	1
Minimum Total Hours	40

Advisor Selection and Ph.D. Dissertation Committee Formation

During orientation week, all incoming students will meet with primary and secondary faculty members from the Department of Pharmacology and Toxicology who have openings in their laboratories to discuss potential research projects. Students are encouraged to select two or more laboratories for research rotations to explore different research environments. Students are expected to select a Dissertation Research Advisor by the end of the spring term of their first year, and no later than the end of the summer term of the same year. Faculty must hold Graduate Research Training Faculty status to serve as a sole advisor.

The Ph.D. dissertation committee must consist of at least five qualified members, including the Advisor. All committee members must hold Graduate Faculty or Graduate Research Training Faculty status. The committee must include at least one primary faculty member from the Department of Pharmacology and Toxicology and at least one member from outside the department. The selection of the Research Advisor and the formation of the dissertation committee require approval from the Director of Graduate Studies, the Department Chair, and the Associate Dean for Graduate and Postdoctoral Studies in the School of Medicine.

Minimum Program Requirements

Ph.D. students enrolled in the Pharmacology and Toxicology graduate program must complete an M.S. degree and successfully defend their Ph.D. proposal to advance to doctoral candidacy. Students are expected to achieve doctoral candidacy within three years of entering the program. To be eligible for candidacy, students must complete a minimum of 40 credit hours by the end of their second year. Coursework older than six years, including transfer credits, will not count toward the M.S. degree or Ph.D. candidacy.

To maintain good standing and complete the Ph.D. degree, students must:

1. Successfully complete all coursework with a minimum GPA of 3.0, with no grades of C or below.
2. Complete required laboratory rotation(s).
3. Deliver an annual seminar presentation.
4. Pass written qualifying examinations.
5. Complete a master's thesis, including both written and oral defense.
6. Write a PhD proposal (serving as the written qualifying exam).
7. Pass the oral qualifying exam, which includes the presentation and defense of the PhD proposal.
8. Hold annual dissertation committee meetings with proper documentation.
9. Submit annual progress reports, including an updated Individual Development Plan (IDP).
10. Regularly attend weekly departmental seminars.

To fulfill all PhD degree requirements, students:

1. Are encouraged to publish at least one first-author manuscript or make equivalent scientific contributions.
2. Must write and publicly defend a doctoral dissertation that meets the standards of the dissertation committee and the Graduate School.

Qualifying Exam

PhD students must pass both written and oral qualifying exams to advance to doctoral candidacy. The written exam requires the preparation of a PhD dissertation proposal formatted as an NIH grant proposal, though alternative formats may be accepted if intended for submission to a different funding agency. The proposal typically includes an abstract, a biosketch, a budget and justification, specific aims, a research strategy outlining background, significance, innovation, and approaches, along with a list of cited literature. The oral exam involves presenting and defending the dissertation proposal. The research proposal must be submitted to the dissertation committee and department faculty at least two weeks before the scheduled exams. Additionally, an external reviewer with expertise in the field, selected by the student and approved by the PhD Qualifying Exam Committee, serves as an external examiner. Each committee member and the external examiner provide scores and a written critique, which are shared with the student to guide revisions and support extramural funding submissions. The PhD student must revise the dissertation proposal in response to the critiques. The majority opinion of the dissertation committee determines the final assessment of the student's performance on both the written and oral components of the qualifying exams.

Physics (MS)

Master of Science in Physics

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Physics & Astronomy (<https://louisville.edu/physics/>)

Academic Plan Code(s): PHYSMS, PHYSMS_ACC

Program Information

Mission Statement

The Master of Science degree in Physics will prepare students for PhD level graduate work in Physics or a related STEM discipline, or for a science-related career in education or industry. Students in this program develop strong analytical, quantitative, and problem-solving skills, including a deep appreciation for connections between physics and scientific computing, physics and engineering, or physics and mathematics, that serve to expand their career options in computer hardware/software companies, large semiconductor industries and many non-STEM job sectors such as finance, business and health care.

General Information

The MS is a two-year degree program available to qualified individuals possessing a bachelor's degree in Physics from an accredited college or university. Students with a bachelor's degree in other related subjects, e.g., Mathematics, Chemistry, or Engineering, also will be considered.

Qualified students will be considered for Graduate Teaching Assistantships (GTAs). As part of the educational experience, GTAs perform certain undergraduate teaching responsibilities in exchange for a stipend and full tuition remission.

The MS can be earned via a thesis or non-thesis option. The thesis option requires at least six (6) credit hours of research leading to submission of

the thesis. Non-thesis students are also required to become involved in research.

Soaring Scholar Accelerated BS/MS in Physics

Undergraduate students interested in the program's accelerated option should visit the catalog page for the BS in Physics (<https://catalog.louisville.edu/undergraduate/majors/physics-bs/>) for more information.

MS Admission Requirements

Departmental requirements for admission are as follows:

- A baccalaureate degree with at least 24 credit hours in physics, or the equivalent.
- A minimum quality-point standing of 3.0 (base 4.0) in physics courses.
- Mathematics coursework through differential equations. (MATH 405 or equivalent).

For general information concerning admission to graduate programs at the University of Louisville consult the application directions from the Graduate School (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Program Admission Procedure

Admission into the Physics MS program is competitive. The application procedure is as follows:

- Submit a completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) to the University of Louisville Graduate School, together with the required application fee. Admitted students are most commonly accepted to begin their program of studies in the Fall semester (which starts in late August). However, programs beginning in the Spring semester (which begins in early January) can be arranged. There is no formal application deadline, but to ensure full consideration for Fall entry applications should be received no later than February 1.
- Official transcripts from each university or college attended must be submitted to the Graduate School
- Arrange for at least two letters of recommendation to be sent to the Graduate School. These letters should be written by persons familiar with the applicant's academic work. Please use the recommendation form from the Graduate School (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) or complete the relevant section in the online application so that your letter writers will receive an email request to submit their recommendation electronically.
- All applicants, whose native language is not English, are required to achieve a TOEFL score greater than 79 on the internet-based test, a composite score of at least 6.5 on the IELTS test, or Duolingo score of 105. Students holding a bachelor's degree from an accredited institution in the United States are exempt from this requirement.

In individual cases, the department may recommend conditional admission of a student who does not satisfactorily meet the above requirements. If admission is granted, that student will be subject to those conditions specified by the Department of Physics and Astronomy, the College of Arts and Sciences, and the Graduate School as being necessary to remedy the conditional admission.

Program Requirements

Specific requirements for the MS degree in Physics are as follows:

Thesis Option

Code	Title	Hours
PHYS 605	Theoretical Mechanics	3
PHYS 611	Electromagnetic Theory I	3
PHYS 621	Quantum Mechanics I	3
PHYS 622	Quantum Mechanics II	3
Physics Electives ¹		6-9
Courses in one minor field ²		3-9
PHYS 699	Research	6
At least 21 credit hours must be at the 600 level or above		
Minimum Total Credit Hours		30

¹ Courses numbered 500 or above. Courses at 500 level or above which are required for the BA/BS degree will not normally satisfy this requirement.

² Mathematics is the usual minor, but another field may be chosen with the approval of the department.

Non-Thesis Option

Code	Title	Hours
PHYS 605	Theoretical Mechanics	3
PHYS 611	Electromagnetic Theory I	3
PHYS 621	Quantum Mechanics I	3
PHYS 622	Quantum Mechanics II	3
Physics Electives ¹		12-15
Courses in one minor field ²		3-9
PHYS 699	Research	3
At least 17 credit hours must be at the 600 level or above		
Minimum Total Credit Hours		33

¹ Courses numbered 500 or above. Courses at 500 level or above which are required for the BA/BS degree will not normally satisfy this requirement.

² Mathematics is the usual minor, but another field may be chosen with the approval of the department.

Physics (PhD)

Doctor of Philosophy in Physics

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/intro/>) (GA)

Department: Physics & Astronomy (<https://louisville.edu/physics/>)

Academic Plan Code(s): PHYSPHD

Program Information

Mission Statement

The Doctor of Philosophy degree in Physics will prepare students for research-oriented careers in government, industry, and academia.

Students in this program develop strong analytical, quantitative, and problem-solving skills, including a deep appreciation for connections between physics and scientific computing, physics and engineering, or physics and mathematics, that serve to expand their career options in computer hardware/software companies, large semiconductor industries, including many non-STEM job sectors such as finance, business, and health care.

General Information

The PhD is typically a five-year degree program available to qualified individuals with a bachelor's in Physics from an accredited college or university. Students with a bachelor's degree in other related subjects—e.g., Mathematics, Chemistry, and Engineering—also will be considered.

The first two years of the program are very similar to the non-thesis MS program. Under normal circumstances, PhD students will meet the requirements for the MS degree after two years of study. The remaining three years will be dedicated primarily to research leading to the required dissertation.

Graduate Assistantships

For the first two years of the program, qualified students will be considered for Graduate Teaching Assistantships (GTAs). As part of the educational experience, GTAs perform certain undergraduate teaching responsibilities in exchange for a stipend and complete tuition remission.

The GTA stipends are extended to two additional years for students in good academic standing and making research progress. Beyond 4 years, students are encouraged to seek Graduate Research Assistantships (GRAs) on extramural grants with faculty mentors or apply for PhD completion funds available with the Graduate School.

Admission Requirements

Departmental requirements for admission are as follows:

- A baccalaureate degree with at least 24 credit hours in Physics, or the equivalent.
- A minimum quality-point standing of 3.0 (base 4.0) in physics courses.
- Mathematics coursework through differential equations. (MATH 405 or equivalent).
- GRE requirement is not needed for admission to the PhD program.
- For general information concerning admission to graduate programs at the University of Louisville consult the application directions from the Graduate School (<https://graduate.louisville.edu/admission/apply/>).

Program Admission Procedure

Admission into the Physics PhD program is competitive. The application procedure is as follows:

- Submit a completed graduate application (<https://graduate.louisville.edu/admission/apply/>) to the University of Louisville, Graduate School, together with the relevant application fee.
 - a. Admitted students are most commonly accepted to begin their program of studies in the Fall semester (which starts in late August). However, programs beginning in the Spring semester (which begins in early January) can be arranged.
 - b. There is no formal application deadline, but to ensure full consideration for Fall entry applications should be received no later than February 1.

- Official transcripts from each university or college attended must be submitted to the Graduate School, Graduate Admissions.
- Arrange for at least two letters of recommendation to be sent to the Graduate School. Persons familiar with the applicant's academic work should write these letters. Through the admissions process you will have the opportunity to provide your recommender's email, they will be able to submit their recommendation electronically.
- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

In individual cases, the department may recommend conditional admission of a student who does not satisfactorily meet the above requirements. If admission is granted, that student will be subject to those conditions specified by the Department of Physics and Astronomy, the College of Arts and Sciences and the Graduate School as being necessary to remedy the conditional admission.

Program Requirements

General requirements for the PhD degree are set forth in the Degree Requirements (p. 16) section of the graduate catalog. Specific requirements for the PhD degree in physics are as follows:

Course Requirements

Code	Title	Hours
Core Courses		21
PHYS 561	Mathematical Physics I	
PHYS 605	Theoretical Mechanics	
PHYS 611	Electromagnetic Theory I	
PHYS 621	Quantum Mechanics I	
PHYS 622	Quantum Mechanics II	
PHYS 625	Statistical Mechanics	
PHYS 650	Research Methods in Physics & Astronomy	
Electives ¹		9
Dissertation		6
PHYS 699	Research	
Minimum Total Hours		36

¹ Each student is required to take nine (9) credit hours of elective courses. Courses outside the department are acceptable if approved by the student's thesis advisor and the department Graduate Program Director.

Qualifying Examination

In order to demonstrate proficiency in knowledge of Physics and the ability to apply that knowledge, students will be required to pass a qualifying exam. The qualifying exam will have a written and oral component.

Written Component

To satisfy the written component, the student will take a written exam composed by members of the faculty of the department. The exam will cover basic and intermediate problems in the areas

of mechanics, electricity and magnetism, quantum mechanics, thermal physics, and special topics in contemporary physics. It will be administered twice yearly with advance notice, typically in September and January. Students are required to pass all areas of the exam. For full-time students, this must normally be achieved by the end of their fourth semester and in all cases by the end of their sixth semester. Special arrangements may be made for part-time students. A total of four attempts at the exam will be permitted.

Once a subject area part of the exam is passed, that part does not need to be retaken. Under certain circumstances, in order to confirm their familiarity with a particular subject, a student may be extended the opportunity to take an oral examination in that subject.

Oral Component

To satisfy the oral component the student must pass an oral exam, in the form of a presentation to the PhD committee of his or her proposed research. The student is expected to take the exam before the end of their sixth semester as a graduate student. The test may be taken at most two times and must be passed by the end of the sixth semester.

Candidacy

Having passed both parts of the qualifying examination the student will register for degree candidacy and continue with their dissertation research.

Dissertation

A doctoral dissertation is required of each student.

Physiology (MS)

Master of Science in Physiology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)
Department Website: Physiology (<http://louisville.edu/medicine/departments/physiology/>)
Program Website (<http://louisville.edu/medicine/departments/physiology/degrees/ms-pb/>)
Academic Plan Code(s): PHZBMS, PHZBMS O

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-science-in-physiology/?tab=courses>).

The Department of Physiology is located in the Health Sciences Center of the University of Louisville which provides our graduate students with an active and intellectually stimulating environment. Our Graduate Program offers a Master of Science degree to provide several career options:

1. To develop competence for advanced technical positions in industry, government, and university medical laboratories and to enhance physiologic-based competencies in various medical professions;
2. To prepare students with a good general knowledge of human physiology to enable them to communicate physiological concepts to future students, patients, and professionals;
3. To explore the possibility of a future career as an independent scientist in medically-related research, and
4. To enhance student credentials for admission to and performance in professional health care programs.

Minimal Requirements for the Master's Degree

The typical Master of Science (MS) Graduate Program consists of 30 credit hours typically over a ten-month period (three semesters) for the On-Campus program or 30 credit hours over an extended (up to 4 years) period for the On-Line program to include the following: 16 credit hours of basic medical sciences coursework and at least 14 credit hours of electives.

Advisor Selection

The Director of Graduate Studies will assess the new student's academic interests to guide the student in selection of a Faculty Program Advisor.

Admission Requirements

The University of Louisville graduate catalog gives a general description of admission procedures. Application information can be found on the Graduate School website.

The following application items must be submitted to the Graduate School at the University of Louisville:

1. Graduate application (<https://graduate.louisville.edu/admission/apply/>).
2. One official transcript of the applicant's previous work for each college or university that has been previously attended.
3. Two letters of recommendation from people who are well acquainted with the applicant's previous academic work.
4. TOEFL, IELTS or Duolingo examination scores for foreign students from non-English speaking countries.
5. A non-refundable application fee to the University of Louisville.

Applicants must state in a letter to the Department but submitted to the Graduate School (referred to as the Personal Statement in the application materials), why they desire a MS degree in the Department of Physiology.

Successful applicants generally demonstrate the following:

- A cumulative undergraduate grade point average that is usually 2.8 or higher on a scale of 4.00 (A=4, B=3, etc.)
- In the case of a foreign applicant from a non-English speaking country, the applicant must achieve a TOEFL Examination score >85 on the internet exam.

Program Requirements

At least 30 credit hours (16 Required and 14 Elective credit hours) beyond the baccalaureate degree are required for the degree of Master of Science. A maximum of six (6) credit hours may be credited from post-baccalaureate work in other professional or graduate degree programs.

Minimum Course Requirements

The typical MS program must include the following courses taken on a grade basis:

Code	Title	Hours
PHZB 640	Systemic Membrane, Nerve, and Muscle Physiology	3
PHZB 641	Systemic BF, Heart, and Circulatory Physiology	3
PHZB 642	Systemic Respiratory, Renal, & Acid-Base Physiology	3
PHZB 643	Systemic Endocrine, Reproductive, and Gastrointestinal Physiology	3

Complete 4 credits from the following:

BIOC 645	Advanced Biochemistry I ¹	4
PHZB 638: Physiologic Biochemistry of Proteins and Nucleic Acids ²		
PHZB 639: New Physiologic Biochemistry of Carbohydrates and Lipids ²		
Electives (see list below)		14
Minimum Total Hours		30

¹ Required for students enrolled in the on-campus (face-to-face) program.

² Required for students enrolled in the online program.

Academic Performance

A student must have at least a 3.0 accumulated GPA to be graduated with a degree of Master of Science in Physiology. In general, a student with a GPA less than 3.0 at the end of the second semester will require a two-thirds majority vote of the Departmental faculty to continue in the Program. A student may not graduate with more than six (6) credit hours of C grades in their required courses.

Electives

All electives must be graduate-level courses. Electives may include but are not limited to:

Code	Title	Hours
<i>Fall Electives</i>		
PHZB 604	Stem Cell Biology and Regenerative Medicine	2
PHZB 607	Principles of Presentations: Self, Science, Interviews	2
PHZB 630	Biomedical Applications of Physiology in the Eye	2
PHZB 617	Seminar in Physiology and Biophysics ¹	1
PHZB 619	Research ¹	1-2
<i>Spring Electives</i>		
PHZB 608	Physiological Concepts Related to the Metabolic Syndrome	2
PHZB 611	Advanced Human Cardiovascular Physiology	2
PHZB 621	Physiological Adaptions to Exercise, Immobility and Inactivity	2
PHZB 630	Biomedical Applications of Physiology in the Eye	2
PHZB 616	Selected Topics in Physiology and Biophysics ¹	1-6
PHZB 617	Seminar in Physiology and Biophysics ¹	1
PHZB 619	Research ¹	1-4
<i>Summer Electives</i>		
PHZB 644	Cardio Pulmonary Clinical Physiology	3
PHZB 645	Gastrointestinal Renal Endocrine Clinical Physiology	3
PHZB 619	Research ¹	1-6

¹ These courses are only available for the on-campus program.

Other Potential Graduate Elective Course Areas:

Biostatistics
Cancer Biology
Cell Biology
Communications
Immunology

Molecular Microbiology
Oral Biology
Pharmacology
Physiology Seminar and Research
Psychology
Public Health
Sociology

Physiology (PhD)

Doctor of Philosophy in Physiology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)
Department Website: Physiology (<https://louisville.edu/medicine/departments/physiology/>)
Program Website (<https://louisville.edu/medicine/departments/physiology/degrees/phd-pb/>)
Academic Plan Code(s): PHZBPHD

Program Information

Program Overview and Objectives

The Department of Physiology is located in the Health Sciences Center of the University of Louisville, which provides an active and intellectually stimulating environment and a wide variety of course options. The graduate program permits studies in related disciplines, such as anatomy, neurobiology, pharmacology, toxicology, biochemistry, microbiology, immunology, and molecular biology.

The doctoral program of the Department of Physiology is offered through the School of Medicine at the University of Louisville. As such, one major goal of the Department is to provide students with advanced training, which leads to the PhD degree in Physiology. The research interests of the Department are broad enough to provide each student with a wide selection of possible research and graduate education opportunities. Our doctoral graduate program is designed primarily to prepare students for an independent research career in basic and applied physiology.

Faculty Advising

First-Year Temporary Advisor and Research Experience

The Director of Graduate Studies will meet with the new student to discuss the student's academic and research interests. The Director of Graduate Studies will serve as a Temporary Advisor until a Permanent Advisor is selected.

Selection of Principal Advisor

During the first semester, beginning graduate students will visit research laboratories in which they have an interest. First-year graduate students must select a Principal Advisor within the first five months of their graduate study. The selection process involves approval by the student, the Principal Advisor, the Director of Graduate Studies, and the Department Chair. The Principal Advisor must be a Graduate Research Training Faculty of the School of Medicine.

Advisory Committee

The Advisory Committee in this Department is an integral part of the graduate student's training. This Committee is to be extremely proactive in planning the student's curriculum and providing an appropriate breadth in the student's research experience. To that end, not only does the mentor provide guidance in developing the dissertation research plan, but the Advisory Committee has the additional responsibility to assure the independent research design will provide appropriate results for the proposed hypotheses.

After selection of the Principal Advisor, the graduate student's Advisory Committee will be determined. This Committee must have at least five members, and will contain: the Principal Advisor, as Chair; at least three Departmental faculty members; and at least one Graduate Faculty member from outside the Department. All must be appointed as Members of the School of Medicine Graduate Faculty.

In cases where the Principal Advisor holds a primary appointment in a department other than the Department of Physiology, one of the full-time Physiology Faculty will serve as Co-Advisor. The Co-Advisor will also serve on the student's Advisory Committee and serve as the Second Reader of the Dissertation Reading Committee.

Approval of the Committee membership by the Director of Graduate Studies and the Chair will be contingent upon the potential role of each Committee member in the training or in the career plans of the student. The Dissertation Defense Committee, selected by the Principal Advisor, must be approved by the Director of Graduate Studies, the Department Chair, and by the Dean of the School of Medicine (or his/her designee).

Admission Requirements

The University of Louisville Graduate School gives a general description of admission procedures. Application information can be found on the Graduate School website (<https://graduate.louisville.edu/admission/apply/>).

The following application items must be submitted to the Graduate School, at the University of Louisville.

1. Graduate application (<https://graduate.louisville.edu/admission/apply/>).
2. One official transcript of the applicant's previous work for each college or university that has been previously attended.
3. Two letters of recommendation from people who are well acquainted with the applicant's previous academic work.
4. TOEFL, IELTS, or Duolingo Examination scores for foreign students from non-English speaking countries.
5. A non-refundable application fee to the University of Louisville.
6. Applicants must state in a letter to the Department but submitted to the Graduate School (referred to as the Personal Statement in the application materials), why they desire a PhD degree in this Department of Physiology.

Applicants for combined degrees (MD/PhD or PhD/DMD) must apply and be accepted by the appropriate professional school (e.g., School of Medicine or Dentistry) before final action will be taken on the Departmental doctoral application.

Admission to the PhD program in the Department of Physiology requires:

- A genuine interest in graduate work and the desire for a significant independent research career in the health sciences
- A cumulative undergraduate grade point average that is usually 3.00 or higher on a scale of 4.00
- International students for whom English is not their primary language must show English language proficiency by demonstration of proficiency on the TOEFL examination (defined as 213 or higher on the computer-based test; >85 on the internet exam), IELTS scores of at least 6.5 overall band score from the academic module exam, Duolingo score of 105 or by successfully completing the exit examination for the advanced level of the Intensive English as a

Second Language Program or by demonstration of a degree award from an acceptable English language institution.

Program Requirements

Minimum Course Requirements

The University of Louisville PhD degree does not require a specific number of hours of academic credit. However, the Department requires that a minimum of two consecutive semesters — nine (9) credit hours in the Fall or Spring semesters and/or six (6) credit hours in the Summer — to be taken to fulfill the full time one-year doctoral residency requirement at the University of Louisville. With the approval of the Dean of the School of Medicine (or his/her designee), a maximum of twelve (12) credit hours of this requirement may be credited for post-baccalaureate work from other professional or graduate degree programs.

By the end of the program, the student also must demonstrate the ability to conduct independent research.

The required program of academic studies must include (if not completed with a grade of B or better prior to admission to the Department) the following courses:

Code	Title	Hours
PHZB 640	Systemic Membrane, Nerve, and Muscle Physiology	3
PHZB 641	Systemic BF, Heart, and Circulatory Physiology	3
PHZB 642	Systemic Respiratory, Renal, & Acid -Base Physiology	3
PHZB 643	Systemic Endocrine, Reproductive, and Gastrointestinal Physiology	3
BIOC 645	Advanced Biochemistry I (or equivalent)	4
PHZB 625	Experimental Physiology Methods	1
PHZB 617	Seminar in Physiology and Biophysics (two semesters)	2
BIOC 667	Cell Biology	3
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics	1
PHZB 609	Integrated Systemic Physiology	3
PHZB 611	Advanced Human Cardiovascular Physiology	2
PHZB 616	Selected Topics in Physiology and Biophysics (or equivalent)	3

Minimum Total Hours **31**

A student must have at least a 3.00 accumulated GPA (on a 4.0 scale) in order to take the PhD Qualifying Examination and to qualify for the PhD degree. In general, a student with a GPA of less than 3.00 after two consecutive semesters (excluding summer sessions) will require a two-thirds majority vote of the Departmental faculty to continue in the PhD Program. The student must not have received a total of more than six (6) credit hours of a grade of C in their academic work.

For Departmental purposes, passing grades in pass/fail graded courses will not be included in the GPA calculation; however, a failing grade in a pass/fail graded course will be included in the GPA calculation at zero quality points per credit hour. Students will not be allowed to graduate with failing grades on their transcript.

Minimum Requirements for the Doctor of Philosophy Degree in Physiology

The PhD degree is designed for the student who wishes a professional life that involves original, independent research and who desires knowledge that will permit competent advanced teaching in a physiology area. The PhD degree requires that the student reach a high level of creativity and expertise. Therefore, mere completion of a prescribed number of courses is not adequate for receipt of the doctoral degree. All PhD students are expected to make steady and satisfactory progress toward the completion of the degree.

To document the satisfactory progress of the PhD students, each Advisory Committee must hold at least two mandatory, semi-annual meetings and report on the student's progress (presentations, publications, grades and research progress). The mentor will submit a written report to the Director of Graduate Studies who will collate and distribute these reports to the faculty. Twice a year, the Director of Graduate Studies will lead a Departmental faculty discussion of these reports to determine the student's progress.

The PhD Qualifying Examination

Before the PhD Qualifying Examination may be taken, the student must have completed the Minimum Course Requirements listed above and have a cumulative GPA of at least a 3.0 for all coursework. It would normally be expected that the student would take the PhD Qualifying Examination by the end of five semesters of graduate studies. If the student has not taken the PhD Qualifying Examination by the end of the second year, a letter of justification for the delay must be submitted by the Principal Advisor to the Department Chair.

A PhD Qualifying Examination must be passed by the applicant in order to be admitted to doctoral candidacy. The Qualifying Examination Committee will be comprised of members of the student's Advisory Committee. The membership must be approved by the Director of Graduate Studies and the Department Chair. A passing recommendation shall not involve more than one negative vote of this Committee. If the student does not pass the Qualifying Examination, one additional retake will be allowed if approved by a majority vote of the Departmental faculty.

The purpose of the PhD Qualifying Examination is to test the student's independent use and depth of core physiology through its application to the student proposed research. This examination shall consist of a written research proposal outlining the dissertation research and an oral examination of the student's depth of current understanding of the basic physiological concepts underlying the proposed research. The student will receive the Master of Science Degree in Physiology upon satisfactory completion of the Qualifying Exam.

Maintenance of Graduate Status

A candidate for the PhD degree who has completed all residency requirements, all of the approved required program of academic studies, and passed the Qualifying Examination may register for DOCT 600 Doctoral Candidacy to maintain doctoral candidacy until the degree is awarded. Continuous registration in this status is required. Semiannual progress meetings will continue to be expected. To complete the PhD degree, the student must continue to make satisfactory progress during the candidacy period. In order to be eligible to receive the PhD degree, the student must have been admitted to candidacy and registered for doctoral candidacy for the two consecutive semesters prior to the awarding of the degree.

Dissertation

The dissertation shall represent a scholarly achievement which embodies results of independent research and which demonstrates a thorough understanding of research concepts in the field of inquiry. The completed dissertation must be in the appropriate format as required by the Graduate School and must be approved by a Dissertation Reading Committee (the Candidate's Advisory Committee). Then, at least two weeks before the scheduled dissertation defense and at least thirty days before the expected date of graduation, the dissertation shall be submitted to the Dissertation Defense Committee. The Dissertation Defense Committee, selected by the Principal Advisor, must have been approved previously by the Director of Graduate Studies, the Department Chair, and by the Dean of School of Medicine (or his designee) (see section IIC). The accepted dissertation, must be submitted electronically, one signed signature page signed by the Dissertation Defense Committee, must be deposited with the Graduate School by the published deadline (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) and one copy must be given to the Department Chair before graduation. The copy for the Department Chair may be electronic.

Dissertation Defense

The dissertation defense is an oral defense of the dissertation and a demonstration of mastery of the candidate's research field. The defense is administered by the Dissertation Defense Committee. The defense of the dissertation is a public examination and the Graduate School will notify all faculty members that they are invited to the Dissertation Defense, but only members of the Dissertation Defense Committee will vote on the student's performance. For the student to pass the Dissertation Defense, the vote of the Dissertation Defense Committee may not include more than one negative vote. The Dissertation Defense must take place at least fourteen days before the end of the semester in which the degree is anticipated.

The Department will not approve the granting of the PhD degree until the student has submitted at least one first-authored manuscript on the dissertation research and one co-authored manuscript for publication in a refereed journal. The manuscript and the choice of a journal must be approved by the Principal Advisor before manuscript submission.

In any case, where the Departmental requirements are less restrictive than those described in the School of Medicine Minimal Guidelines for Graduate Education, the School of Medicine guidelines will apply.

Exceptions

1. The above are statements of minimum Departmental requirements. However, it is recognized that there could be cases in which exceptions should be allowed. The student and advisor should consult with the Department Chair if the basis for an exception exists.
 2. In the above guidelines, the Director of Graduate Studies has considerable responsibility for program quality. To avoid any possibility of a potential conflict of interest, the Department Chair (or designee) will fulfill the role of Director of Graduate Studies for any PhD or MS student who has the Director of Graduate Studies as their Principal Advisor.

Typical Doctoral Programs

Traditional Doctoral Program

Year 1		
Fall		
PHZB 640	Systemic Membrane, Nerve, and Muscle Physiology	3
PHZB 641	Systemic BF, Heart, and Circulatory Physiology	3
BIOC 645	Advanced Biochemistry I	4
PHZB 625	Experimental Physiology Methods	1
PHZB 617	Seminar in Physiology and Biophysics	1
Hours		12
Spring		
PHZB 642	Systemic Respiratory, Renal, & Acid-Base Physiology	3
PHZB 643	Systemic Endocrine, Reproductive, and Gastrointestinal Physiology	3
BIOC 667	Cell Biology	3
PHZB 617	Seminar in Physiology and Biophysics	1
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics	1
PHZB 619	Research	1
Hours		12
Summer		
PHZB 619	Research	6
Hours		6
Year 2		
Fall		
PHZB 609	Integrated Systemic Physiology	3
PHZB 619	Research	6
Hours		9
Spring		
PHZB 611	Advanced Human Cardiovascular Physiology	2
PHZB 616	Selected Topics in Physiology and Biophysics	3
PHZB 619	Research	4
Master of Science Final Exam (PhD Qualifying Exam)		
Master of Science Degree and PhD Candidacy program		
Hours		9
Summer		
DOCT 600	Doctoral Candidacy	0
Hours		0
Year 3		
Fall		
DOCT 600	Doctoral Candidacy	0
Hours		0
Spring		
DOCT 600	Doctoral Candidacy	0
Hours		0
Summer		
DOCT 600	Doctoral Candidacy	0
Hours		0
Year 4		
Fall		
DOCT 600	Doctoral Candidacy	0
Hours		0
Spring		
DOCT 600	Doctoral Candidacy	0
Hours		0
Minimum Total Hours		48

Dissertation Defense: If more research/dissertation time is needed, the student will continue to register as DOCT 600 until completed.

Doctoral Program for Residents/Fellows

This sequence is based on the premise that the clinician will be given the equivalent of two full calendar years ("Research Leave") free to complete research without clinical duties. The Director of Graduate Studies will see that the Graduate School is notified of the transfer of the preclinical courses applicable to the Departmental doctoral requirements. The clinician will take:

1. Advanced Human Physiology,
2. Integrated Systemic Physiology,
3. Statistics,
4. Seminar, and
5. Complete initial research (PHZB 619) to define a doctoral research problem.

Year 1		
Fall		
PHZB 609	Integrated Systemic Physiology	3
PHZB 619	Research	6
Hours		9
Spring		
PHZB 611	Advanced Human Cardiovascular Physiology	2
PHZB 616	Selected Topics in Physiology and Biophysics	3
PHZB 617	Seminar in Physiology and Biophysics	1
BIOC 630	Responsible Conduct of Research: Survival Skills and Research Ethics	1
PHZB 619	Research	2
Hours		9
Summer		
PHZB 619	Research	6
Hours		6
Year 2		
Fall		
PHZB 619	Research	9
Master of Science Degree (PhD Qualifying Exam)		
Hours		9
Spring		
DOCT 600	Doctoral Candidacy	0
Hours		0
Summer		
DOCT 600	Doctoral Candidacy	0
Hours		0
Minimum Total Hours		33

Dissertation Defense: If more research/dissertation time is needed, the clinician will continue to register as DOCT 600, until completed, and dissertation defended.

Police Executive Leadership Development (CERT)

Graduate Certificate in Police Executive Leadership Development

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Criminal Justice (<http://louisville.edu/justice/>)

Program Website (<https://louisville.edu/spi/>)

Academic Plan Code(s): CPELCPL

Program Information

The **Southern Police Institute** is a division of the Department of Criminal Justice in the College of Arts and Sciences at the University of Louisville. It is an advanced education and training institute whose mission is to enhance the professional development of law enforcement practitioners. We accomplish this mission by providing educational and career development programs that are designed to challenge and to prepare law enforcement practitioners for the demands of today and tomorrow. The Southern Police Institute consistently is ranked among the top law enforcement educational and training schools in the nation.

Since the creation of the Southern Police Institute in 1951, its program of instruction has been grounded in the belief that law enforcement is a demanding activity requiring the highest level of professional preparation. The Southern Police Institute was established by its founders to provide a place where that preparation can be undertaken. The present faculty and staff dedicate themselves to this mission and continue to maintain the standards of excellence established by our founders. They are uniquely qualified as researchers, consultants, teachers, and former law enforcement practitioners to guide and to direct the educational needs of today's law enforcement professionals.

Admission Requirements

Applicants must meet the standards for good standing or provisional admission to the Master of Science in Criminal Justice, including an earned bachelor's degree and appropriate letters of recommendation. They must also achieve a qualifying score on the Southern Police Institute's admission examination and be recommended by the Chief Executive Officer of their supporting agency. Applications are reviewed for eligibility by the Southern Police Institute's faculty who are members of the University's Graduate Faculty and the Department of Criminal Justice.

Program Requirements

The curriculum of the Administrative Officers Course (AOC) may be taken only by students admitted to and enrolled in the Southern Police Institute.

The Southern Police Institute offers two 12-week AOC programs annually.

Code	Title	Hours
CJ 576	Managing Organizational Performance	3

Political Science (MA)

Master of Arts in Political Science

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/intro/>) (GA)

Department: Political Science (<https://louisville.edu/politicalscience/>)

Program Website (<https://louisville.edu/politicalscience/graduate/>)

Academic Plan Code(s): POLSMA, POLSMA_ACC

Program Information

The Department of Political Science, in the College of Arts and Sciences, offers graduate training leading to the Master of Arts degree. In addition, the Department participates in a joint degree program with the Brandeis School of Law.

The MA is designed to allow a student to pursue a degree either full or part time. Most graduate-level courses are offered in the evening. The MA is oriented toward those who wish to pursue advanced training in political science or a position in the public, private, or non-profit sector.

The Department of Political Science is especially strong in two fields of study: International Politics and American Politics. Students are encouraged to concentrate their coursework in one of these fields.

The field of International Politics includes comparative politics and international relations. Members of the Department faculty are experts in the politics of Africa, Latin America, the Middle East, Asia, North America, and Europe; they also study human rights, international law, diplomacy, religion and political violence, and climate change, among many other areas. The Center for Asian Democracy also has dedicated faculty and post-doctoral students who lend their expertise to the Department and organize public events.

The field of American Politics involves the study of U.S. political institutions, political behavior, and public policy. Members of the Department faculty possess expertise in law and public policy, political psychology, race and American politics, judicial decision making, religion and democracy, environmental policy, gender, sexuality, and politics, and urban politics.

Soaring Scholar Accelerated BA-BS/MA Political Science

Undergraduate students interested in the program's accelerated options should visit the catalog pages for the BA in Political Science (<https://catalog.louisville.edu/undergraduate/majors/political-science-ba/>) or

the BS in Political Science (<https://catalog.louisville.edu/undergraduate/majors/political-science-bs/>) for more information.

Joint MA/JD Program

The Department of Political Science offers a joint MA/JD program in partnership with the Brandeis School of Law. This program generally allows the student to obtain the MA and JD degrees in a four-year course of study. Students take their first year entirely in Political Science, take the second year entirely in Law, and for the remaining two years, take classes in both programs.

Student participating in the dual degree program can combine Law courses and Political Science courses to create well-defined concentrations of study. Examples include law and public policy, environmental law and politics, negotiations and dispute resolution, international law and politics, and comparative law and politics.

Students in the dual degree program must complete 81 credit hours in the JD curriculum (instead of the normal 90 credit hours) and either 21 credit hours in the MA curriculum (instead of the normal 30 credit hours) for the thesis option or 27 credit hours in the MA curriculum (instead of the normal 36 credit hours) for the non-thesis option.

To be admitted into the program, the student must (1) apply to, (2) meet the admission requirements of, and (3) be accepted by both the Brandeis School of Law and the Department of Political Science. Different rules related to graduate assistantships, scholarships, and other financial aid will apply in each program.

Admission Requirements

Admission into the MA program is competitive.

The procedures for admission into the MA program are as follows:

1. Submit a completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) and application fee to the Graduate School. Priority application deadlines and assistantship deadlines may vary from year to year, but are posted on the Department of Political Science Graduate Program website (<https://louisville.edu/politicalscience/graduate/>).
2. Forward official transcripts verifying the receipt of a baccalaureate degree from an accredited institution and an official transcript from all institutions attended to the Graduate School. An applicant must hold a BA or BS (or foreign equivalent) before admission to the program can be granted. Applicants selected for the program have generally earned at least a 3.2 undergraduate GPA overall or a 3.2 undergraduate GPA in the last 60 credit hours or the equivalent.
3. Provide two letters of recommendation from individuals familiar with the applicant's academic performance. Professional letters from employers are acceptable only when a substantial time has elapsed since the applicant has attended an academic institution.
4. A typed personal statement of about 300-500 words is required. Please explain your reasons for applying to the master's program in political science at the University of Louisville. Discuss your professional or occupational objectives and how you envision the department's program fitting into those objectives. Describe the areas of political science you find especially interesting for study and/or research and identify the political science faculty with whom you might be interested in working.

5. International applicants are required to take the TOEFL, IELTS or Duolingo examination if English is not the native language. TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

The Department may accept applicants who do not meet these requirements on a conditional basis if sufficient additional evidence of promise of success in the graduate program can be shown. No student will be admitted unconditionally until all materials listed above have been received.

Program Requirements

Students may select from one of three options for their graduate studies:

1. The general MA in Political Science (thesis),
2. The general MA in Political Science (non-thesis)

The curricula for these options are described below.

Thesis Option

Code	Title	Hours
POLS 670	Research Design	3
POLS 671	Introduction to Data Analysis	3
POLS 619	Seminar in Public Policy	3
POLS 629	Seminar in American Politics	3
POLS 639	Seminar in International Relations	3
POLS 649	Seminar in Comparative Politics	3
Electives *		6
POLS 699	Thesis Guidance	6
Minimum Total Hours		30

* From Political Science or other departments. Up to six (6) elective credit hours may be at the 500-level. Up to three (3) credit hours may be independent study.

Non-Thesis Option

Code	Title	Hours
POLS 670	Research Design	3
POLS 671	Introduction to Data Analysis	3
POLS 619	Seminar in Public Policy	3
POLS 629	Seminar in American Politics	3
POLS 639	Seminar in International Relations	3
POLS 649	Seminar in Comparative Politics	3
Electives **		15
POLS 695	Directed Research	3
Minimum Total Hours		36

**From Political Science and other departments. Up to six (6) elective credit hours may be taken outside of Political Science. Up to nine (9) elective credit hours may be taken at the 500-level. Up to three (3) credit hours may be independent study credit.

Population Health Management (CERT)

Graduate Certificate in Population Health Management

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>)

Department: Health Management & Systems Sciences (<https://louisville.edu/sphis/departments/hmss/>)

Program Webpage (https://louisville.edu/online/programs/certificate-programs/online-graduate-certificate-in-population-health-management/?utm_source=SPHIS-website-referral)

Academic Plan Code(s): PHM_CGRO

The graduate certificate in Population Health Management provides students the foundational competencies of Population Health Management: governance and management of healthcare organizations, public health, health policy, and population health management.

Those interested in the possibility of pursuing the the Master of Science in Health Administration (MSHA) may use this program as a stepping stone towards completion of the MSHA degree. University policy states that, "Upon approval of the graduate program, students may apply the coursework from no more than one certificate program towards a graduate degree program." (See the Graduate Catalog, General Policies, Procedures and Requirements (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/#text>) - **Transfer of Credit**.)

This program is available in an online (<https://louisville.edu/online/programs/certificate-programs/online-graduate-certificate-in-population-health-management/>) format only.

Competencies

The successful student is able to demonstrate:

- Communication
- Innovative Thinking
- Interpersonal Understanding
- Organizational Awareness
- Self-Confidence
- Community Orientation
- Public Health Methods
- Analytic Thinking
- Collaboration
- Impact and Influence
- Information Seeking
- Financial Management

Prior to graduation, students in the program will have demonstrated these competencies by completing the curriculum.

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited institution with a minimum of 2.75 GPA on a 4.0 scale.

Application requirements are submitted to the Graduate School and include:

- Graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>) submitted to the Graduate School
- Official transcripts indicating conferral of a bachelor's degree from an accredited institution.
 - Transcripts from institutions outside of the United States will require a foreign credential evaluation.
- Curriculum vitae or resume
- One-page personal statement written by the applicant that is a clear, substantive description of his or her goals in public health and healthcare management.
- Application fee
- Students whose primary language is not English must show English language proficiency by attaining one of the following:
 - TOEFL score of 79 or higher (after conversion for test type)
 - IELTS test score of 6.5 or higher
 - Duolingo English test score of 105 or higher
 - Demonstration of a degree award from an acceptable English language institution, as formally documented by an appropriate institutional official.

For specific information about the degree program or the application process, students should contact the HMSS Program Coordinator (sphishms@louisville.edu).

Application Deadline

Applications are accepted for the Fall semester. Preferred, to facilitate processing, application deadlines are August 1st. There are no Spring or Summer admissions.

Program Information

This certificate includes twelve (12) credit hours of required coursework.

Academic Standing

To maintain good academic standing in the Certificate in Population Health Management program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any Certificate in Population Health Management student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Code	Title	Hours
PHMS 505	Governance and Management of Healthcare Organizations	3
PHMS 520	Foundations of Public Health in Health Management	3
PHMS 610	Health Policy and Analysis	3

PHMS 509	Health Finance and Financial Management	3
Minimum Total Hours		12

If a student chooses to pursue the Master of Science in Health Administration (MHSA) degree at any time after enrolling in or completing the Certificate program, then all coursework completed within the preceding three years with a grade of B or better may be applied towards the coursework for the MSHA degree.

MSHA graduates or currently enrolled MSHA students are not intended to be eligible to receive their certificate as the CAHME-accredited degree is appropriate and sufficient development and credentialing.

Formerly enrolled MSHA students may apply for certificate admission and utilize previously earned credits (grades of B or higher) toward certificate completion.

Accreditation

The School of Public Health and Information Sciences is accredited by the Council on Education for Public Health (CEPH).

The University of Louisville is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

For more information, see the School of Public Health and Information Sciences accreditation webpage (<http://louisville.edu/sphis/accreditation/>).

Psychological Science (MS)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Science in Psychological Science

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Psychological and Brain Sciences (<http://louisville.edu/psychology/>)

Academic Plan Code(s): EPSYMS, EPSYMS ACC

Program Information

Psychological scientists conduct research to better understand human and animal behavior. Their scientific findings provide insights that improve teaching and learning methods, promote healthy child development, and improve visual and hearing aids, to list a few examples.

The MS in Psychological Science program is only open to students accepted in the Accelerated BS/MS or the combined MS/PhD programs in Psychological Science at the University of Louisville.

Admission Requirements

The MS in Psychological Science program is only open to students accepted in the Accelerated BS/MS or the combined MS/PhD programs in Psychological Science at the University of Louisville.

Accelerated BS/MS Application Requirements

Students must be admitted majors to the BS in Psychology or the BS in Neuroscience at UofL and in good academic standing.

Interested students must apply to the program by December 1 of their Junior year. Applicants must have completed PSYC 201, PSYC 301, PSYC 302*, and PSYC 491 or PSYC 492 prior to application. Applicants must have a minimum overall GPA of 3.0 and a 'C' grade or better in courses required for their BS. Students must maintain a GPA of greater than 2.5 during their enrollment in the BS/MS program. Students must enter the BS/MS program with no more than 24 **credit** hours remaining to complete their BS degree, and they must enter the program with 9 hours of elective **credit** remaining in their BS degree.

* Students may be currently enrolled in PSYC 302 when applying to the BS/MS program.

For more information on admission requirements to the Accelerated BS-MS program, please visit the BS in Psychology (<https://catalog.louisville.edu/undergraduate/majors/psychology-bs/>) or BS in Neuroscience (<https://catalog.louisville.edu/undergraduate/majors/neuroscience-bs/>) page.

MS-PhD Application Requirements

For admission requirements to the combined MS-PhD program, please visit the PhD in Psychological Science (<https://catalog.louisville.edu/graduate/programs-study/doctor-philosophy-psychology-experimental/#text>) page.

Program Requirements

Code	Title	Hours
PSYC 610	Advanced Statistics I	3
PSYC 611	Advanced Statistics II	3
PSYC 605	Independent Study (Research) (or PSYC 500-level Research)	12
Select two PSYC 600-level core courses from the following list:		6
PSYC 621	Cognitive Processes	
or PSYC 638 Cognitive and Behavioral Decision Sciences		
PSYC 631	Sensation and Perception	
PSYC 642	Behavioral Neuroscience	
or PSYC 645 Cognitive Neuroscience		
500- or 600-level Electives ¹		6
PSYC 661	Advanced Developmental Psychology	
Minimum Total Hours		30

¹ 500-level courses taken as electives must be offered for graduate credit.

To earn the MS degree, with an approval of the student's mentor, the student will prepare a portfolio of written work featuring research efforts and training primarily undertaken as a graduate student in the program at the University of Louisville. The portfolio should demonstrate scope and quality of research commensurate with the degree. The portfolio is typically completed in or after the summer of the second year and must be approved by the student's Master's Portfolio Committee. After approval of the MS portfolio and completion of 30 credit hours of graduate study, including the Statistics and Program Core and electives, the student is awarded the Master of Science degree.

Important Notes for Program Pathways

It is recommended (but not required) that Accelerated BS-MS students attend PSYC 602 (Research and Professional Development Seminar – RAPDS).

Students in the MS-PhD program must take additional courses during their MS degree years required for the PhD program (e.g., PSYC 602 during both Fall and Spring, and PSYC 605 in the summer). Please visit the PhD in Psychological Science (<https://catalog.louisville.edu/graduate/programs-study/doctor-philosophy-psychology-experimental/>) catalog page for more information.

Psychological Science (PhD)

Doctor of Philosophy in Psychological Science

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Psychological and Brain Sciences (<http://louisville.edu/psychology/>)

Program Website (<https://louisville.edu/psychology/graduate/experimental/>)

Academic Plan Code(s): EPSYPHD

Program Information

Psychological scientists conduct research to better understand human and animal behavior. Their scientific findings provide insights that improve teaching and learning methods, promote healthy child development, and improve visual and hearing aids, to list a few examples.

The Psychological Science doctoral program at the University of Louisville is designed to prepare students for careers in academic, clinical, and applied research settings as well as industry positions involving psychological science, data analysis, and management. Our students are trained in core areas of psychology, research design and methods, data analysis, teaching, and oral and written communication, all of which makes our students highly employable.

Research Training

Students in our program get extensive training in research. From their first day of the program to the last, students are actively involved in research. A student's specific graduate training experience will depend in part on whom the student chooses as a graduate mentor and the student's specialized area of interest. Faculty mentors for the Psychological Science program are listed on the graduate program website (<http://louisville.edu/psychology/graduate/experimental/>). Areas of specialized training are:

- Cognition
- Development
- Visual and Auditory Sciences
- Neuroscience

Curriculum

Our curriculum is designed to be flexible and meet the needs of individual students in our program. Students in our program take classes in two of four core areas of psychology (selected by student and mentor), two statistics courses (required of all students in our program), and five electives or specialized seminars on special topics (selected by student and mentor). Additionally, first-year students attend a pro-seminar called First Year Introduction in the fall semester, in which Psychological

Science faculty introduce students to the research used in their labs. Students also develop their own presentation skills in a weekly Research and Professional Development (RAPDS) seminar held in both the fall and spring semesters. Finally, students in our program complete a Master's Research Portfolio (typically right after the second year), a Preliminary Exam (typically in their third year), and a Dissertation.

Professional Development

Professional development is an important piece of our program. Graduate students in our program are highly encouraged to publish, present their research, attend research conferences, and gain teaching experience either as a GTA or instructor of record. They are also encouraged to take advantage of the Graduate Schools' PLAN workshops, academies, and resources (<http://louisville.edu/graduate/plan/>), which are designed to help graduate students develop their professional skills. Their programs are geared toward students who want to develop their teaching, grant writing, publishing, community engagement, and entrepreneurial skills, just to name a few.

The department offers an intellectually enriching environment with a departmental Colloquium Series, the Psychological Science Research and Professional Development talk series, and the Clinical Psychology Colloquium and Professional Development Series. The department also hosts the Grawemeyer Award in Psychology (<https://louisville.edu/psychology/grawemeyer-award/>), a large monetary award given annually to a psychologist with a creative, influential idea in psychology.

Financial Support

Financial support for graduate students in the Psychological Science PhD program is available in the form of research assistantships, teaching assistantships, and University Fellowships. Most forms of support are for 12 months and include a stipend, full tuition, and health insurance.

Admission Requirements

We take a holistic approach to reviewing prospective student applications. Applicants who are admitted to our program typically possess the following qualifications, but they are not required:

- Complete graduate admissions application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Undergraduate GPAs of 3.0 or higher
- Strong letters of recommendation that speak to the applicant's scholarly ability and potential to succeed in a doctoral program
- A match between the applicant's and faculty mentor's research interests
- A psychology or neuroscience major

All applicants will be considered without discrimination on the basis of differences in age, ethnic or racial background, gender, physical abilities, sexual orientation or preference, or social background. Our program values diversity and has accepted applicants that vary on the above characteristics.

For more information, please visit our program's Application Instructions (<http://louisville.edu/psychology/graduate/experimental/apply/>) page.

PhD Program Requirements

Code	Title	Hours
Statistics Core		6
<i>Students are required to take the following two courses:</i>		
PSYC 610	Advanced Statistics I	
PSYC 611	Advanced Statistics II	
Program Core		6
<i>Students are required to take two of the following courses:</i>		
PSYC 621	Cognitive Processes	
or PSYC 638 Cognitive and Behavioral Decision Sciences		
PSYC 631	Sensation and Perception	
PSYC 642	Behavioral Neuroscience	
or PSYC 645 Cognitive Neuroscience		
PSYC 661	Advanced Developmental Psychology	
Electives ¹		15
<i>Students are required to take five additional 600-level or above graduate seminars/courses</i>		
Other Course Requirements		33
PSYC 602	Research in Experimental Psychology (PSYC 602-02, required first fall semester) ²	
PSYC 602	Research in Experimental Psychology (PSYC 602-01, repeated until in doctoral candidacy) ³	
PSYC 605	Independent Study (Research) (Repeated until in doctoral candidacy) ⁴	
PSYC 701	Dissertation Research ⁵	
or DOCT 600 Doctoral Candidacy		
Minimum Total Hours		60

¹ Students who take more than two of the Program Core courses listed above may count the additional core courses as electives.

² In this weekly 50-minute proseminar, faculty will rotate meetings to introduce students to the research used in their labs.

³ The weekly 50-minute Research and Professional Development (RAPDS) series provides a forum for students and faculty to present completed or ongoing research, invite guest speakers, and discuss professional development topics.

⁴ Students are required to register for PSYC 605 Independent Study (Research) with the student's graduate research mentor every semester until the Preliminary Examination is successfully completed.

⁵ Upon passing the preliminary examination, students must maintain continuous enrollment at the University of Louisville until receiving their degree in one of two ways:

1. Enrolling in classes and/or PSYC 701 (Dissertation Research), **OR**
2. Enrolling in DOCT 600 Doctoral Candidacy.

Preliminary Examination

The Preliminary Examination consists of an original written review and critique of a research area. The Preliminary Examination will be evaluated based on the breadth of knowledge, integration of literature, critical thinking, and quality of scientific writing. Students will plan the preliminary examination in collaboration with their mentors and Preliminary Examination Committees. The Preliminary Examination is typically completed by the end of the third year of training.

Dissertation

An original research project conducted and described in a report (the doctoral dissertation) by the student. The dissertation is conducted in consultation with a faculty committee and must be approved by the committee.

Clinical Psychological Science (PhD)

Doctor of Philosophy in Clinical Psychological Science

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Program Website (<http://louisville.edu/psychology/graduate/clinical/>)

Academic Plan Code(s): CPSYPHD

Program Information

Mission Statement

The mission of the Clinical Psychological Science Doctoral Program at the University of Louisville is to produce scientist-practitioners who are:

- Competent to conduct and evaluate research;
- Competent in implementing research-supported practice;
- Ethical and professional in their relationships with clients, students, and colleagues; and
- Prepared to be professionals in a diverse world.

General Information

The Department of Psychological and Brain Sciences, in the university's College of Arts and Sciences, offers PhD programs in Clinical Psychological Science and Psychological Science. We do not offer any terminal master's degree programs in our department.

The Clinical Psychological Science PhD program usually requires five years of full-time coursework, research, and clinical activities. Each student must also complete a one-year approved internship, typically in their sixth year. Students are required to complete a Master's Research Portfolio. After completion of the Master's Portfolio, students write the preliminary examination and then move on to dissertation work. A dissertation proposal must be defended by October 1 in the year the student intends to apply for an internship.

Financial support for graduate students in the PhD program is available in the form of teaching and research assistantships, University Fellowships, Scholarships, and placements in community service settings.

Accreditation

The Clinical Psychological Science PhD program is fully accredited by the American Psychological Association, Office of Program Consultation and Accreditation:

Office of Program Consultation and Accreditation

750 First Street, NE
Washington, DC 20002-4242
Phone: (202) 336-5979
Fax: (202) 336-5978

Admission Requirements

The Clinical Psychological Science PhD Program application deadline is December 1.

Completed graduate applications should be submitted online (<https://graduate.louisville.edu/admission/apply/>) to the University of Louisville, Graduate School. For additional information regarding the admissions application students may call the Graduate School at (502) 852-6495.

Our PhD programs admit students to begin in the fall semester, with a usual start date of August 1. Applicants must provide the following:

1. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.
2. Transcripts of college records from all schools attended must be submitted to the Graduate School. Students must have earned an undergraduate degree from an accredited college or university.
3. Three letters of recommendation from academic sources are required and must be submitted to the Graduate School.

Application materials are available online (<https://graduate.louisville.edu/admission/apply/>) and additional information can be found here (<https://louisville.edu/psychology/graduate/clinical/apply/>).

The Clinical Psychological Science PhD curriculum contains department/general core courses, clinical core courses, and other required courses in areas such as diversity and history. The curriculum closely follows guidelines for accreditation established and maintained by the American Psychological Association's Office of Program Consultation and Accreditation (<https://accreditation.apa.org/>).

General Core

Code	Title	Hours
Area A: Cognitive Aspects of Behavior		
PSYC 620 or PSYC 621	Human Learning Cognitive Processes	3
Area B: Biological Aspects of Behavior		
PSYC 642 or PSYC 643 or PSYC 645	Behavioral Neuroscience Principles of Neuroscience Cognitive Neuroscience	3
Area C		
PSYC 670	Advanced Social Psychology	3

PSYC 661	Advanced Developmental Psychology	3
PSYC 673	Advanced Personality Theory	3

Area D: Statistical Analysis

PSYC 610 & PSYC 611	Advanced Statistics I Advanced Statistics II	6

Minimum Total General Core Hours 21

Clinical Core

Code	Title	Hours
PSYC 656	Professional and Ethical Issues in Clinical Psychology	3
PSYC 679 & PSYC 680	Introduction to Assessment and Clinical Skills Intellectual and Cognitive Assessment	6
PSYC 683	Advanced Research Methods in Psychology	3
PSYC 684	Psychological Interventions	3
PSYC 685	Clinical Psychology Practicum (multiple semesters) ¹	6
PSYC 686	Assessment Practicum	1
PSYC 689	Clinical Psychopathology	3
PSYC 693	Interviewing Skills Practicum	3
PSYC 694	Supervision Practicum	1
Minimum Total Clinical Core Hours		29

Other Degree Requirements

Code	Title	Hours
PSYC 601	History of Modern Psychology	3
Culture & Diversity		3
Students are required to complete one graduate course in culture and diversity. This course is typically taken in the department but can be taken in another department with consent of the Director of Clinical Training.		
Seminar		3
Students are required to complete a minimum of one graduate seminar offered within the department. A seminar/course offered in other departments may be considered to fulfill this requirement with the consent of the Director of Clinical Training.		
Research		6
Students will complete six (6) research credit hours for the master's degree (PSYC 603). Students will complete at least five (5) research credit hours of independent study (PSYC 604 and/or PSYC 605). Students may also complete dissertation (PSYC 701) credit hours.		
Clinical Internship		0
Students will complete a one-year approved internship (PSYC 795 - Fall, Spring, Summer)		
Minimum Total Other Hours		20
MINIMUM TOTAL HOURS		70

¹ A minimum of six (6) cumulative credit hours are required for the PhD; students are expected to have an **annual minimum** of 160 direct contact hours in order to fulfill this requirement. Students get additional contact hours when they do external practicum placements (PSYC 785).

The Doctor of Philosophy in Clinical Psychology program prepares students to meet the requirements for certification and/or licensure.

If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Public Administration (MPA)

Master of Public Administration

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Urban and Public Affairs (<https://louisville.edu/upa/>)

Program Website (<https://louisville.edu/upa/programs/mpa/>)

Academic Plan Code(s): PADMMPA, PADMMPADML, PADMMPANPM, PADMMPAURG

Program Information

General Information

The Master of Public Administration (MPA) Program at the University of Louisville is central to the University's urban/metropolitan mission. The academic curriculum provides students with a solid foundation in public and nonprofit administration and prepares graduates for placement and advancement in public, private and nonprofit sector careers. The MPA faculty also advances knowledge in the field of public administration through their theoretical and applied research. The MPA is fully accredited by the National Association of Schools of Public Affairs and Administration.

The MPA requires 36 credit hours for completion. A student can enroll on either a part-time or full-time basis. Classes are offered in formats and at times that accommodate students who work full time. Traditional classes are offered Monday through Thursday, one evening a week, from 5:30 until 8:15 PM. Hybrid-distance courses have fewer classroom meetings. Some courses are offered entirely online.

The program includes faculty from various disciplines and is aimed at providing recent college graduates, public sector practitioners, and persons in related fields with a mix of theoretical knowledge and applied skills. The degree program is available to qualified individuals holding a bachelor's degree from an accredited college or university. No specific undergraduate major is required.

Dual Degree Programs

The Master in Public Administration Program offers dual degree programs with the Master in Urban Planning, as well as the Master of Arts in Art (Creative) and Art History (Concentration in Critical and Curatorial Studies). In addition, the Master of Public Administration coordinates with the Brandeis School of Law to offer a joint MPA/JD. For more information about the dual programs please go to the program webpage (<https://louisville.edu/upa/programs/mpa/mpa-ma/>).

Admission Requirements

The procedures for admission to the MPA program are as follows:

1. Submit a completed online graduate application (<https://graduate.louisville.edu/admission/apply/>) to the University of Louisville, Graduate School. Program candidates may be admitted for fall, spring or summer semesters.
2. Official transcripts verifying the receipt of a baccalaureate degree from an accredited institution must be submitted to the Graduate School.
3. A written personal statement is required. The statement should indicate why the applicant wishes to pursue the MPA degree.
4. Two letters of recommendation are required. Normally, at least one letter should be from someone who can comment on the applicant's academic performance.
5. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

Program Requirements

The MPA requires 36 credit hours for completion: a core curriculum of 21 credit hours, three (3) credit hours of practicum internship or thesis, and twelve (12) credit hours from one of the three areas of concentration.

Code	Title	Hours
URBS 651	Foundations of Public Administration	3
URBS 603	Applied Research Methods	3
URBS 652	Program Evaluation	3
URBS 653	Urban Policy Analysis	3
URBS 654	Ethics in Public Administration	3

Public Health (MPH)**Master of Public Health**

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>) (GH)

Program Website (<https://louisville.edu/sphis/academics/mph-program/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information**Introduction**

The Master of Public Health (MPH) degree program is designed to graduate students with skills in the core competencies in public health and additional competencies in one of the following concentrations: Biostatistics, Epidemiology, Health Policy, Health Promotion and Behavioral Sciences, or Public Health Research.

Graduates of the MPH program are prepared for positions in the public health workforce, in health-related industries, and in academic organizations and for further professional or academic education.

Competencies

The MPH program has adopted the foundational competencies published by the Council on Education for Public Health (CEPH 2016 MPH Foundational Competencies (https://storage.googleapis.com/media.ceph.org/wp_assets/2016.Criteria.pdf)) and each MPH concentration has developed concentration-specific competencies.

The learning objectives for each core course in the MPH curriculum are mapped to these targeted foundational CEPH competencies and the learning objectives for courses offered in each concentration are mapped to the specific competencies developed for that concentration.

Concentrations

Concentrations are offered in each of the following areas of public health. Each concentration is designed to develop the competencies needed by a public health worker in the corresponding area.

Concentration	Department
Biostatistics	Bioinformatics and Biostatistics
Epidemiology	Epidemiology and Population Health
Health Policy	Health Management and System Sciences
Health Promotion and Behavioral Sciences	Health Promotion and Behavioral Sciences
Public Health Research	School-wide

Students are encouraged to declare their concentration at the time of application, though applications from students that do not declare a concentration are also accepted. For students declaring concentrations, the faculty in each concentration reviews applicants for acceptance. Applications from students that do not declare a concentration are reviewed for acceptance by the MPH Program Director.

Requirements for declaring concentrations in the MPH program after matriculation are:

- Undeclared students will need to identify a concentration prior to November 15 of their first semester.
- The student must be in good standing in the MPH program.

- Any undeclared student will first meet with the department chair or director of the concentration prior to declaring that concentration to determine if there are any additional criteria for admission to that concentration.

Accreditation

The School of Public Health and Information Sciences is accredited by the Council on Education for Public Health (CEPH). For more information, see the School's accreditation webpage (<http://louisville.edu/sphis/accreditation/>).

Soaring Scholar (Accelerated) Bachelor's-MPH in Public Health

For more information, please refer to the School of Public Health and Information Sciences Undergraduate Programs (<https://louisville.edu/sphis/academics/bs-ba-public-health/bs-ba-in-public-health/>) page.

Dual MD - MPH in Public Health Research

The Dual MD-MPH in Public Health Research is designed for medical students pursuing an MPH alongside their medical degree. This concentration equips future clinicians with critical skills in epidemiological methods, biostatistics, health data analysis, and evidence-based research to address complex public health challenges. Students will develop competencies in study design, data interpretation, and the translation of research findings into effective public health interventions. Graduates are prepared to lead research initiatives that inform health policy, enhance clinical practices, and contribute to the advancement of population health.

Dual MPH in Health Policy - Masters in Health Administration

The dual MPH (Health Policy) - MSHA degree program facilitates development of advanced population and public health management professionals that may leverage knowledge and practices from both public health science and healthcare management domains to serve in leadership roles within public health institutions, federal-state-local agencies, and healthcare organizations. For more information about the dual program, please visit the program webpage (<https://louisville.edu/sphis/departments/hmss/academics-1/dual-mph-in-health-policy-msha-program/>).

Admission Requirements

The ideal candidate for admission to the MPH program has received the equivalent of a bachelor's degree or higher, can comprehend and communicate effectively in English, has the recommendations of at least three persons in a health-related or advanced education field, has performed satisfactorily on one or more standardized test, and is interested in pursuing a career in public health or a related field.

The requirements for admission to the MPH program are:

- Bachelor's degree from an accredited institution or its equivalent
- Recommended minimum GPA of 3.0 on a 4.0 scale
- If a candidate's primary language is not English, one of the following:
 - Test of English as a Foreign Language (TOEFL) exam with a minimum score of 79 (after conversion for test type), official

IELTS scores of at least 6.5 overall band score from the academic module exam, or official Duolingo overall score of 105.

- Degree from an accredited U.S. institution

Applicants must apply through the Centralized Application Service for Public Health, SOPHAS (<https://sophas.org/>).

An application is considered after the following requirements have been received:

- Three letters of recommendation written within the last twelve months from persons in a health-related or advanced education field.
- Official transcripts of all degrees.
- One-page personal statement written by the applicant that is a clear, substantive description of his or her goals in public health, noting any professional or research experience.
- GRE scores are not required for the following MPH concentrations: Health Promotion and Behavioral Sciences, Health Policy, Epidemiology, and Public Health Research.
- GRE scores are required for the MPH concentration in Biostatistics.
- **International applicants:** Foreign credential evaluation of all degrees from non-U.S. institutions. Please contact the MPH program prior to completing this requirement.
- **Health Policy concentration applicants** must be interviewed by the HMSS Health Leadership Committee.
- **Public Health Research concentration applicants** must show successful completion of college level algebra (or higher level math) with a grade of B or higher, evidenced via college transcripts. High School AP credit does not satisfy this requirement.

Application Deadline

Fall semester – March 1 (International applicants). Applications are accepted on a rolling basis for domestic students.

Domestic students are encouraged to apply no later than 30 days prior to the start of the fall semester.

Spring semester – Applications are not accepted.

Summer semester – Applications are not accepted.

For information on the application process, please contact:

MPH Program
School of Public Health and Information Sciences
University of Louisville
485 East Gray Street
Louisville, KY 40202

sphismph@louisville.edu

Phone: (502) 852-3289

Fax: (502) 852-3294

Faculty Advisor

On matriculation, each student is assigned a faculty advisor and is requested to meet at least twice each semester with his or her advisor.

If a student is admitted to a specific concentration, the director of the concentration will assign a specific faculty member as advisor. If students are admitted to the program as undeclared, the MPH program director will serve as their advisor. Undeclared students admitted to a

specific concentration by the end of the first semester will be assigned a faculty advisor by the director of the concentration.

The faculty advisor serves as academic practicum advisor, academic mentor, and counselor on career and employment opportunities, professional development, and opportunities beyond graduate school.

Program Requirements

The MPH curriculum consists of core courses, concentration courses in one of the areas of public health, completion of a practicum experience, and completion of an integrating experience. The core courses are completed prior to taking concentration courses, the integration experience, and the practicum.

Full-time students are expected to complete the program and graduate in two years. Part-time students are required to complete the program and graduate within six years.

Coursework

42-48 total credit hours:

- Twelve (12) credit hours of core courses
- Four (4) credit hours of Practice Experience
- Two (2) credit hours of Integrative Experience
- 24-30 credit hours of concentration coursework

Students must successfully complete core, concentration, practicum, and integrating experience coursework with a minimum GPA of 3.0.

Academic Standing

To maintain good academic standing in the MPH program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any MPH student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Dual Master of Public Health, Health Policy - Master of Science, Health Administration

Dual Master of Science, Health Administration - Master of Public Health, Health Policy

Unit: [Public Health and Information Sciences](#)

Academic Plan Code: [PH_ _MPHHP, HEADMS](#)

Program Information

The dual MPH (Health Policy) - MS Health Administration degree program facilitates development of advanced population and public health management professionals that may leverage knowledge and practices from both public health science and healthcare management domains to serve in leadership roles within public health institutions, federal-state-local agencies, and healthcare organizations. For more information about the dual program, please visit the [program webpage](#).

Admission Requirements

Students must apply to and be accepted into both the MPH-HP and MS-HA programs. Only MS-HA Evening track students may apply. Each program will require a separate application and application fee.

The dual program is not available to MSHA Online track students.

Public Health Sciences: Specialization in Epidemiology (PhD)

Doctor of Philosophy in Public Health Sciences, specialization in Epidemiology

Unit: School of Public Health and Information Sciences (<http://louisville.edu/sphis/>) (GH)

Department: Epidemiology and Population Health (<http://louisville.edu/sphis/departments/epidemiology-population-health/>)

Program Website (<http://louisville.edu/sphis/departments/eph/academics/>)

Academic Plan Code(s): PHSCPHDEPI

Program Information

The specialization in Epidemiology in the PhD program in Public Health Sciences is designed to develop academic researchers in population-based epidemiology.

Competencies

To graduate, students in the PhD specialization in Epidemiology must be able to demonstrate the following competencies:

- Explain the evolving paradigms of epidemiological theory and study design and their impact on public health services
- Critically evaluate scientific literature on an epidemiologic problem to identify strengths and limitations, biases and gaps in knowledge
- Formulate epidemiologic research questions and testable hypotheses
- Apply epidemiologic study designs for specific research hypotheses
- Apply computer software for data management and analysis

- Design and apply methods for data collection and management for epidemiologic research
- Apply advanced quantitative methods to analyze an epidemiologic problem
- Integrate cross-disciplinary knowledge from molecular to population levels to make appropriate causal inferences
- Communicate in written and oral presentations epidemiologic concepts and findings to diverse audiences
- Demonstrate mastery of a substantive area of epidemiology
- Complete a hypothesis-based epidemiologic research study suitable for publication in a peer-reviewed journal

In greater detail, a PhD student must specifically demonstrate:

- In-depth knowledge of the history and philosophy of epidemiology
- Mastery of experimental and observational study designs and the ability to identify optimal designs for specific hypotheses
- Ability to develop and apply:
 - Questionnaires
 - Biomarkers for health status, exposure, and susceptibility
- Mastery of multivariable analytic methods for evaluating risk and prognosis
- Ability to critically evaluate the published epidemiologic research
- Expertise in one or more epidemiologic specialties such as nutritional, molecular, clinical, genetic, cancer, or chronic disease epidemiology
- Practical knowledge of issues in research management including:
 - Formation and leadership of multidisciplinary teams
 - Staffing, budgeting, tracking
 - Subject recruitment and retention
 - Data quality control and data safety management
 - Funding mechanisms and grantsmanship
 - Research ethics and regulations
- Professional quality peer-review, oral and poster presentation, report, grant, and manuscript writing
- Mentoring of junior peers
- Development, conduct, completion and defense of a dissertation on an original research project

Competencies are demonstrated by passage of the proficiency and candidacy examinations, by successful mentoring of master's students or doctoral students not yet in candidacy, and by successful completion and defense of the dissertation.

Faculty Advisor

Upon admission to the specialization, each student is assigned a faculty advisor who works with the student to develop a program of study.

Admission Requirements

Students who have satisfactorily completed a master's degree in a relevant discipline (for example MPH, MBBS) or other advanced degree (for example, MD or DO) may be accepted into the PhD in Public Health Sciences, specialization in Epidemiology pending evaluation of appropriate training, experience, and coursework. Previous coursework in mathematics and/or statistics and biological or health sciences (for example, biology, biochemistry, anatomy, physiology, microbiology) is strongly recommended.

The following are required for admission to the University of Louisville and should be submitted to the Graduate School:

- Formal graduate application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Curriculum vitae
- A one-page personal statement describing the applicant's background and interest in epidemiology
- Two letters of recommendation
- Undergraduate GPA at least 3.0 on 4.0 scale
- Official transcripts of all degrees
 - International applicants: Foreign credential evaluation of all degrees from non-U.S. institutions.
- International students for whom English is not their primary language must show English language proficiency by one of the following:
 - Test of English as a Foreign Language (TOEFL) score 79 or higher on the internet-based test, 213 or higher on the computer-based test.
 - Official IELTS score of at least 6.5 overall band score from the academic module exam.
 - Official Duolingo overall score of 105.
 - Hold a bachelor's or advanced degree from an accredited institution in the United States.

Application Deadline

Fall semester - January 1 (all applicants)

Spring semester - Applications are not accepted.

Summer semester – Applications are not accepted.

Program Requirements

The Public Health PhD specialization in Epidemiology is designed to consist of 56 credit hours of coursework over a minimum of two years plus one to four years for completion of the dissertation. The coursework is organized into two blocks of 25 and 31 credit hours. The curriculum outlined below represents an *ideal* sequence for a full-time student. Completion of the first block of coursework is prerequisite for sitting for the proficiency examination. After passing the proficiency examination, the student can proceed with the second block of coursework. Successful completion of the second block is prerequisite to sitting for the candidacy examination.

After passing the candidacy examination, the student is admitted to doctoral candidacy. A doctoral candidate must then successfully develop and defend a dissertation proposal that describes an original and independent research project. Upon successful defense of the proposal, the student may then proceed to dissertation research. Upon successful completion of the research, oral defense of the dissertation, and demonstration of the required competencies listed above, the student is awarded the PhD degree.

Academic Standing

To maintain good academic standing in the PhD in Epidemiology program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any PhD in Epidemiology student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in

probationary status for two consecutive terms may be considered for dismissal from the program.

Coursework

56 total credit hours (beyond admission requirements) consisting of the following:

- 26 credit hours of required courses
- 7 credit hours of seminars in Epidemiology
- 23 credit hours of elective/selective/independent study courses

Note: Students who have completed the MS degree and have been accepted to the PhD program will advance to Block 2/Year 2 of the PhD curriculum upon matriculation. These students will still be required to complete the Seminar and Content Course Electives credits listed in Block 1/Year 1.

Year 1		
Fall		
PHEP 621	Statistical Foundations for Epidemiology	4
PHEP 622	Population Pathology	3
PHEP 623	Theoretical Foundations of Epidemiology	3
PHEP 632	Epidemiologic Methods II	3
Hours		13
Spring		
PHEP 633	Epidemiologic Methods III	3
PHEP 626	Introduction to Social Epidemiology	3

Hours		9
Year 2		
Fall		
PHEP 701	Advanced Epidemiologic Methods	3
PHEP 702	Epidemiologic Research Management	4
PHEP 778	Doctoral Independent Study in Epidemiology and Population Health (OR Content Course Elective (see list below))	3
PHEP 751	Seminar II in Epidemiology	3
Hours		13
Spring		
Content Course Electives (see list below)		3-6
PHEP 778	Doctoral Independent Study in Epidemiology and Population Health	5-2
PHEP 752	Seminar III in Epidemiology	1
Hours		9
Minimum Total Hours		56

Elective and Selective Coursework

Content Course Electives consist of courses specialized in either an exposure or disease category and offerings will vary from semester to semester based upon faculty workloads and student programs of study. These may include:

- PHEP 607 Epidemiology of Cancer
- PHEP 611 Nutritional Epidemiology
- PHEP 613 Epidemiology of Aging and Disability

- PHEP 615 Foundations of Global Maternal and Child Health
- PHEP 620 Environmental and Occupational Epidemiology
- PHEP 624 Methods in Reproductive and Perinatal Epidemiology
- PHEP 625 Child Health & Development

NOTE:

- A minimum of 25 credit hours of coursework is required before taking the Proficiency Exam.
- A minimum of 56 credit hours of coursework is required before taking the Candidacy Exam.

Proficiency Examination

Upon successful completion of the first block of required coursework, the student is eligible to sit for the written proficiency examination, which is administered by a committee of departmental faculty appointed by the chair. The timing of the proficiency examination is determined by the student's faculty advisor and the department chair. The subject matter includes basic knowledge of disease biology and pathophysiology; theory and skills in epidemiologic research methods, including study design and management; and quantitative analytic methods. A student who does not successfully pass the proficiency examination is allowed a second opportunity to pass the exam. Failing the proficiency examination the second time results in dismissal from the program.

Candidacy Examination

After passing the proficiency examination and upon completion of the second block of coursework, the student is eligible to sit for the written and oral candidacy examination, which is administered by a committee appointed by the department chair and composed of graduate faculty. The subject matter includes knowledge of advanced epidemiologic methods; specialized knowledge pertaining to the minor field of specialization; disease biology and pathophysiology, which may be tailored to the student's special area of interest; and knowledge of the research process. Successful passage of the candidacy examination admits the student to doctoral candidacy. A student who does not successfully pass the candidacy examination may be required to take additional or remedial coursework and is allowed a second opportunity to pass the exam. Failing the candidacy examination the second time results in dismissal from the program.

Dissertation

A dissertation is required of every candidate for the degree of Doctor of Philosophy in Public Health Sciences, specialization in Epidemiology. The dissertation is a scholarly achievement in research and presents an original contribution to knowledge. It should demonstrate a thorough understanding of research techniques in epidemiology and the ability to conduct independent research. The following sections summarize the basic requirements for the dissertation committee, dissertation proposal, and defense. Additional details are available in the department's document "Student Advising, Thesis and Dissertation Committees."

Dissertation Committee

A dissertation committee consists of five members. The committee chair must be an active member of the Department of Epidemiology and Population Health, and the majority of the committee must hold primary appointments in the department. Co-chairs are not allowed. At least one member must be from another department in SPHIS, another school or unit in the university, or outside of the university pending approval of

graduate faculty status. Adjunct faculty to the department may serve as an outside committee member.

The dissertation must be approved by the committee and the chair of the department.

Dissertation Proposal

After successful completion of the qualifying examination, a doctoral candidate must submit a written dissertation proposal to the members of the dissertation committee. The candidate is then orally examined on the dissertation proposal.

Dissertation Preparation

The dissertation is prepared with the formatting according to the guidelines of the Graduate School (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>).

Dissertation Approval

The dissertation is submitted in completed form to the chair of the department at least thirty days before the end of the term in which the candidate expects to be graduated, and the candidate is not eligible for final examination until the dissertation has been received by the committee and chair.

The dissertation committee schedules an oral defense by the candidate. The time and place for the defense is published to the general academic community, members of which are free to attend the defense. The dissertation is approved by a majority vote of the committee and the concurrence of the department chair.

Dissertation Submission

The following steps must be taken to submit the final copy of the dissertation electronically after oral defense and approval of the committee:

1. Final document must be converted to a PDF (following the guidelines as noted above) and sent to the Graduate School and the department's administrative assistant.
2. Submit as advised by the Graduate School through the ThinkIR repository. The directions on submission will be provided upon review of the dissertation by the Graduate School.
3. The signature page within the electronic version must have the names of your committee members typed under the signature line; the signatures cannot be scanned into the document.
4. Submit a signed signature page, digital/electronic signature page (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) can be found on the Graduate School web-site.

A copy of the final, signed dissertation must also be deposited with the department office.

Public Health Sciences: Specialization in Health Management and Policy (PhD)

Doctor of Philosophy in Public Health Sciences, specialization in Health Management and Policy

Unit: School of Public Health and Information Sciences (<http://louisville.edu/sphis/>) (GH)

Department: Health Management and Systems Sciences (<http://louisville.edu/sphis/departments/health-management-systems-sciences/>) (HMSS)

Program Website (<http://louisville.edu/sphis/departments/hmss/academics-1/>)

Academic Plan Code(s): PHSCPHDHMP

Program Information

The specialization in health management and policy is designed to prepare graduates for careers as researchers and academicians involved in efforts to protect and promote the health and well-being of communities and populations. Successful completion of this program provides graduates with the knowledge and skills necessary to attain academic positions involving scholarly research and instruction in the disciplines of public health management and policy. Graduates are also prepared for management and technical positions in governmental, private, and non-profit organizations with a focus on public health-related policies. In addition to an in-depth understanding of the infrastructure and context of public health management and policy-making, graduates of this specialization are expected to be able to identify issues and questions of importance with regard to the management of the resources of public health and to design and carry out a program of research to address or evaluate these issues and questions. Graduates should be able to demonstrate abilities as independent investigators as well as team collaborators.

Competencies

To graduate, a student in the PhD specialization in Public Health Management and Policy must demonstrate the following competencies:

1. In-depth knowledge of the history of public health, health management, and health services research.
2. Mastery of experimental and non-experimental research study designs, including qualitative as well as quantitative, and the ability to identify optimal designs for specific hypotheses.
3. Ability to critically evaluate published research related to health management and health services research.
4. Expertise in one or more health services research specialties such as health policy analysis, health economics, healthcare systems sciences, and organization theory.
5. Practical knowledge of issues in research management including:
 - a. formation and leadership of multidisciplinary teams;
 - b. staffing, budgeting, and managing research progress;
 - c. data quality control and data safety management;
 - d. knowledge of research funding mechanisms and grantsmanship; and
 - e. knowledge of research ethics and regulations.
6. Author professional-quality peer-reviewed, oral and poster presentations, reports, grants, and manuscripts.

Demonstration of these competencies is achieved by passing the doctoral qualifying examination and by successful development, conduct, completion, and defense of the dissertation.

Program of Study

The program of study incorporates a foundation of courses related to health services research and healthcare management and policy and reflects its multidisciplinary nature.

At the PhD level, this requires that students take healthcare management and policy and theoretical foundation, healthcare policy research methods, and HMSS PhD seminar courses, and courses in an emphasis area related to providing in-depth knowledge related to effectively

managing the resources necessary to carry out the mission of improving access, cost, and quality within the healthcare system.

Students will work with their faculty advisor to develop a specific program of study and coursework based on the program requirements and emphasis area (see *Coursework*, below). A doctoral student's individualized program of study must be approved by the student, faculty advisor, and the HMSS PhD Committee.

Faculty Advisor

After admission to the PhD program, the PhD Program Director will serve as a doctoral student's faculty advisor until they pass the qualification exam. The PhD Program Director will set regular advising meetings with them, monitor their progress, and help them take elective courses and determine an emphasis area.

After passing the qualification exam, they will select a thesis advisor and form a thesis committee based on their research interests. The thesis advisor will serve as their faculty advisor. They will meet with their faculty advisor throughout the semester as needed. More details on advisor-advisee responsibilities are provided in the Student Handbook.

HMSS PhD Committee

The purpose of the HMSS PhD Committee is to oversee the overall quality of doctoral education within HMSS. The committee will:

1. annually review the progress of PhD students within the curriculum,
2. manage the qualifying exam process;
3. approve the dissertation committee composition;
4. approve preliminary dissertation proposals to move to the proposal defense stage;
5. approve Emphasis Area course selection; and
6. make curriculum quality improvement recommendations to the HMSS faculty for their approval.

Admission Requirements

An applicant who has satisfactorily completed a Master of Public Health degree, or another relevant master's degree or a health professional degree is considered for admission to the Public Health Management and Policy specialization. Applicants already holding an advanced degree are evaluated on the basis of appropriateness of previous coursework, training and experience. The graduate work by such applicants is reviewed on a case-by-case basis, and the applicant, if admitted, may be required to take additional course work prior to completing the minimum 51 credit hours required for post-master's doctoral work.

Application materials must be submitted to the Graduate School.

The minimum required documentation for full admission must include:

- Graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Resume or curriculum vitae
- A personal statement that is a clear, substantive one-page description of your professional and research experience as it relates to your goals in public health and the PhD program.
- A research-related writing sample separate from the personal statement (for example, a master's thesis, publication, capstone project, class project, etc.).
- Official transcript for previously earned degrees
- Official GRE score

- Three letters of recommendation written within the last three years from individuals who have direct knowledge and experience with the applicant's academic or professional work experience.
- If applicant's native language is not English, one of the following:
 - Official TOEFL, IELTS or Duolingo score
 - Degree from an accredited U.S. Institution.
- Foreign credential evaluation for each degree not from an accredited U.S. institution
- Admission interview(s) by the Admissions Committee (an interview provides the Admissions Committee with additional information and perspective about your potential fit for the University of Louisville).

The following are recommended criteria for admission:

- Undergraduate and graduate GPA each ≥ 3.0 on 4.0 scale.
- Students who have shown success in this program have had GRE performance in the 50th percentile or above for quantitative and verbal scores and 3.0 or above for analytical writing skills (comparable scores on the MCAT or DAT are considered).
 - The recommended GRE requirement for PhD admission may be waived based on the candidate's educational background. Considerations for the waiver may include a Master's degree in a quantitative discipline such as math, physics, engineering, statistics, and/or economics. Applicants must request a waiver as part of their initial application. The request for the waiver is assessed during initial application review and by the PhD Program Director and during the admissions interview if the application proceeds to this step.

Application Deadline

Fall semester – March 1st.

Applications received by January 1 will receive first consideration for available scholarships/fellowships.

Applications received after the March 1 admission deadline will be considered on a space-available basis.

Spring semester – Applications are not accepted.

Summer semester – Applications are not accepted.

Curriculum

Each doctoral student, in consultation with their faculty advisor and the HMSS PhD Committee, plans a course of study that uniquely fits the student's career goals. The design of a doctoral program of study that reflects each student's professional skills and research interests is the primary organizing principle of the proposed program.

Program Requirements

The PhD specialization in health management and policy is designed as a 51 credit hour program (minimum beyond a master's degree) in addition to a dissertation. Additional hours may be needed to complete the specialization program.

The emphasis in doctoral training goes beyond accumulating course credit. Completion of the coursework is the prelude to sitting for the qualifying examination. Successful passage of the qualifying examination allows the student to enter doctoral candidacy. A doctoral candidate must then successfully develop and present to the HMSS PhD Committee a preliminary dissertation proposal (PDP) that describes the dissertation committee, what the student wishes to accomplish with

the dissertation, and an original and independent research project in the prescribed format.

Once the PDP is approved by the HMSS PhD Committee, the student may schedule the proposal defense. Upon successful defense of the proposal, they may then proceed to dissertation research. Upon successful completion of the research, defense of the dissertation, and demonstration of the required competencies listed below, a student is awarded the PhD degree.

Academic Standing

To maintain good academic standing in the program, students must achieve a semester GPA of 3.3 or higher every semester.

Any student in the program who does not meet the criteria for good academic standing will be placed in probationary status, which may result in loss of funding and/or a Graduate Research or Teaching Assistantship. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program. Any student on probationary status may not sit for qualifying exams or proceed to candidacy. The decisions on discontinuing funding, graduate assistantship, permission for the qualifying exams, and dismissal from the program will be made in the PhD Committee and require the HMSS department chair's approval.

A student who fails a core course (i.e., the student's grade in the course is C- or lower) that is offered every other year may be considered for retaking the course as regularly scheduled or through an independent study upon the approval of the PhD Committee and the course instructor.

Coursework

51 total credit hours:

- 33 credit hours of required coursework,
- Three (3) credit hours of public health management seminars, and
- 15 credit hours within an emphasis area.

Some required or emphasis area courses may require additional credit hours in prerequisite courses not already taken by the student. The specific coursework for a student is established with the student's individualized program of study.

Coursework

Code	Title	Hours
CEPH Accreditation Course		
PHPH 523	Public Health in the United States ¹	3
Minimum Total Hours		3

¹ PHPH 523 fulfills the accreditation requirement that all graduates from the School of Public Health and Information Science receive foundational instruction in public health. The three (3) credit hours for PHPH 523 do not accrue toward the 51 credit hours required for PhD degree completion. Students with a prior degree and/or coursework from a CEPH accredited school or program of public health may be relieved of this requirement, per approval of the Associate Dean for Academic Affairs.

Code	Title	Hours
Required Coursework		
<i>Core Areas (36 credit hours minimum)</i>		
Health Management Foundations		9
PHMS 700	Introduction to Health Services Research	
PHMS 715	Health Policy Research	
PHMS 708	Population Health and Health Disparities	
Theoretical Foundations		6
PHMS 720	Organizational Theory in Health Services Research	
PHMS 740	Microeconomic Theory	
Health Management Research Methods		18
PHMS 705	Mixed & Qualitative Research Methods for Health Services Research	
PHMS 670	Statistical Data Management	
PHMS 671	Statistical Analysis for Population Health	
PHMS 645	Health Services Research Methods I	
PHMS 646	Health Services Research Methods II	
PHMS 725	Economic Evaluation in Health Care	
Seminars		3
PHMS 751	Seminar I in Public Health Management	
PHMS 752	Seminar II in Public Health Management	
PHMS 753	Seminar III in Public Health Management	
Minimum Total Hours		36

HMSS PhD Seminars

A student in the PhD specialization in Health Management and Policy is required to complete at least three (3) credit hours in the HMSS PhD Seminar series (PHMS 751, PHMS 752, PHMS 753). These group courses are designed to help students design and develop an innovative and impactful research agenda, write a successful PhD dissertation, and prepare for teaching responsibilities. The students will also be provided with a collegial experience to integrate learning from other courses, discuss hot topics, brainstorm research ideas, and acquire professional skills in scientific manuscript and grant writing, oral and poster presentations, grantsmanship, and peer review.

Emphasis Area

As a part of the approved program of study, a student selects fifteen credit hours of elective coursework that will support research in one of the offered emphasis areas by the HMSS: (1) General Health Management and Policy Research and (2) Quantitative Health Management and Policy Research. These emphasis areas are not mutually exclusive. That is, they are required to take three courses in their selected and approved emphasis area and two courses from the other emphasis area. For example, if they select General Health Management and Policy Research as the emphasis area, they still need to take two courses that can align with Quantitative Health Management and Policy Research.

Within each emphasis area, they can choose to focus on specific public health domains such as long-term care policy, healthcare delivery, maternal and child health, chronic diseases, and infectious diseases. Courses may be selected from those offered within the SPHIS, other schools or colleges within the university, or from sources outside the university with permission and acceptance of credit by the PhD Program, SPHIS, and the university.

Students starting the PhD Program in an Even Year need to select an emphasis area by the end of the second semester in the Program. Because some courses are only offered every other year, those starting the PhD Program in an Odd Year need to select an emphasis area by the end of the first semester in the Program. The students and the faculty advisor must plan the emphasis area sequence as soon as reasonably possible.

All emphasis areas need to be first approved by their faculty advisor and then presented to the HMSS PhD Committee for approval. The HMSS PhD Committee will review the chosen courses and confirm that they contribute to an overall expertise within the emphasis area. The student must provide a written rationale for the choices of elective coursework in their emphasis area. These can be updated while the student is in the program given the changes are approved by the HMSS PhD Committee.

Qualifying Examination

Upon completion of the required coursework (a minimum of 33 credit hours, not including 15 credit hours of emphasis area coursework) and public health management seminars (three (3) credit hours total) for the PhD, the student is eligible to sit for the qualifying examination.

The qualifying exam is held in person. Its components focus on the subject matter drawn from foundational courses and health management research methods. The timing of the qualifying exams is determined by the HMSS PhD Committee.

A student who does not pass the exam may be required to take additional or remedial coursework and is allowed one opportunity to retake the exam. A student who does not pass the qualifying exam after retaking it will be dismissed from the program.

Students are considered PhD candidates after successfully passing the qualification exams. After admission into candidacy, they will be responsible for completing the additional 15 hours of required emphasis area coursework if it has not been completed before the dissertation defense.

Dissertation

A dissertation is required of a candidate for the degree of Doctor of Philosophy in Public Health Sciences with a specialization in Health Management and Policy. It is to be a scholarly achievement in research and should demonstrate a thorough understanding of research techniques and the ability to conduct independent research. All dissertations use a three-paper format.

Dissertation Committee

The dissertation committee is responsible for reading and advising on the student's dissertation. The committee is appointed by the dean of the School upon the advice of the HMSS PhD Committee. The dissertation committee, chaired by the student's faculty advisor, shall consist of at least four members and must include one representative of an external department. The dissertation must be approved by the dissertation committee and the director of the HMSS PhD Program.

Preliminary Dissertation Proposal

The Preliminary Dissertation Proposal (PDP) process involves a student (1) forming the dissertation committee; (2) writing a preliminary dissertation proposal using the PDP format; (3) the dissertation chair presenting the PDP to the HMSS PhD Committee; and (4) the HMSS PhD Committee providing feedback and approving the PDP to move to the proposal defense stage.

Students may not move to the proposal defense stage without HMSS PhD Committee's approval of the PDP.

The PDP uses the National Institute of Health's (NIH) Agency for Health Research and Quality's (AHRQ) research proposal format. See the Student Handbook for more details.

Dissertation Proposal

Once approved by the HMSS PhD Committee, the candidate will submit a written dissertation proposal to all members of the dissertation committee. The candidate is then orally examined on the dissertation proposal at a time scheduled by the candidate in consultation with the committee chair and full dissertation committee.

Dissertation Preparation

The dissertation is to be prepared in format according to the guidelines of the Graduate School (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/thesis-dissertation-guidelines-1/>). All HMSS PhD students do a three-paper dissertation.

Three-Paper Dissertation Guidelines

Students will write a three-paper dissertation. The dissertation will include a brief introduction to the three papers and how they are related to one another (roughly ten pages). The research questions submitted and approved within the dissertation proposal will define the subject matter for each of the papers in the dissertation.

Prior to the dissertation defense, at least one of the three papers in the dissertation must be submitted for review to a reputable peer-reviewed journal that is agreed upon by the doctoral candidate's dissertation committee. The remaining two papers must be of high enough quality that the dissertation committee feels that they can be submitted to a

reputable journal, although they do not need to be submitted prior to the dissertation defense.

Each paper must report on original scholarship and address the research questions in the dissertation proposal. One of the papers may consist of a literature synthesis (meta-analysis, systematic review, or scoping review) which leads to the specification of a conceptual framework for addressing a research question or questions.

Prior to the dissertation defense, the student must specify a target peer-reviewed journal for each paper and format each paper according to the chosen journal's formatting rules. Each paper is expected to conform to the length requirements for the chosen peer-reviewed journal (typically 25-30 pages in length). Co-authors for each paper should be acknowledged in a "Statement of Contributors" but not included as authors in the dissertation itself. They can be listed as authors when the papers are submitted for publication, but not as authors in the dissertation itself.

The following information is in the current guidelines, please review and advise if you have additional questions or concerns. The information is as follows:

Published Work

With the approval of the student's adviser and the student's dissertation committee, the student may include parts (e.g., short direct quotes, tables, and figures) of manuscripts published in or accepted for publication by scholarly journals and proceedings as chapters in the student's or dissertation. This is intended to support the interpretation of original research results in the dissertation, not as research findings of the dissertation. If the student chooses this option, then they must:

1. Be a primary author—i.e., lead author—of the articles (i.e., a person principally involved in the data selection or collection, the data analysis or interpretation, and the writing of the papers).
2. Obtain the needed copyright clearance from the publisher—i.e., a letter granting permission to include the journal article in your thesis or dissertation.
3. Include a proper citation to the work, either a footnote or a citation in the reference section of the thesis or dissertation.
4. Format the work so that it conforms to the requirements as specified in "Guidelines for the Preparation and Processing of Theses and Dissertations" (The Guidelines). In other words, the journal publication cannot simply be pasted into the thesis or dissertation in its published format.

The content and format of each paper included may be similar to or the same as what you submit to the journal/proceedings, except the content must comply with the formatting requirements as outlined in The Guidelines. The bibliography or reference section of each article must become part of the final Reference Section in the thesis and dissertation, as stipulated in The Guidelines. There should be only one abstract and one list of acknowledgments for the thesis or dissertation.

If the publisher grants permission for the publication to be used, the publisher will give instructions on how the approval should be documented in the dissertation. The publisher's official notice of approval must be formatted accordingly and added as an Appendix. Permission to use previously published material in a thesis or dissertation doesn't necessarily give the student permission to sell that material. The student may need to put a restriction on the sale and availability of their work according to the publisher's guidelines.

Dissertation Approval

The dissertation is to be submitted in completed form to the director of the PhD Program at least thirty days before the end of the term in which the candidate expects to be graduated. The candidate is not eligible for final defense until the dissertation has been accepted by the committee and the PhD program director.

The doctoral candidate will prepare a dissertation document that will include:

1. An introduction of at least ten pages that summarizes the relationship between the three papers.
2. The papers themselves (refer to Published Work above).
3. A synthesis section after the three papers that addresses the implications of the research for practice, policy, and research, to the extent not addressed in the separate papers.
4. Any additional material, as appendices, that would not usually be part of a journal article (e.g. a survey instrument) but which the dissertation committee deems relevant.
5. Statement of contributions: a statement specifying his/her role and those of others in selecting study questions, designing analyses, identifying appropriate methods, analyzing the data, and writing and reviewing the papers. This statement will be signed by each contributor named.
6. Dissemination plan: this will specify the target peer-reviewed journal for each of the three papers. For each paper that has not been submitted for publication, the student is required to obtain a signature from a faculty member with experience publishing or reviewing for the target journal (or similar ones). The faculty member will sign a statement to the effect that, in their opinion, the paper is potentially publishable in the journal selected (these signatures will be required by the conclusion of the dissertation defense).

The oral defense is scheduled by the dissertation committee and doctoral candidate. The time and place for the defense is published to the general academic community, members of which are free to attend the defense. The dissertation is approved by a majority vote of the committee and the concurrence of the department chair.

Evaluation by Dissertation Committee

Dissertations will be evaluated by the dissertation committee using the following criteria:

Extent of the student's contribution: The committee should be persuaded that the student played the primary role in the formulation and write-up of the research for all three papers. For example, if a faculty member provided the data, selected the methodology, and directed the analyses, the student's role may not meet the required standard of independence.

Eventual publication of the three papers: The committee should only approve the dissertation if it feels that the three papers are potentially publishable, that is, ready for submission to peer-reviewed journals. Faculty endorsement of the Dissemination Plan will be relevant for this criteria.

Papers published before the final defense are acceptable as described below: In some cases, one or more of the papers may have already been accepted or published by a peer-reviewed journal at the time of the defense. While this satisfies the publication criterion, the committee will still need to evaluate the paper(s)

in light of the other criteria, and the paper(s) will need to be reformatted to meet the Graduate School requirements.

The HMSS PhD Committee will allow one paper to be included in the three paper dissertation that was developed while the student was in the PhD program, prior to dissertation proposal defense. The paper published prior to the dissertation proposal defense can only be considered if approved by the chair of the student's PhD committee and the HMSS PhD Committee.

Dissertation Submission

The following steps must be taken to submit the final copy of the dissertation electronically after oral defense and approval of the committee:

1. Final document must be converted to a PDF (following the guidelines as noted above) and sent to the Graduate School and the department's administrative assistant.
2. Instructions will be provided from the Graduate School regarding submission of the final dissertation through the University of Louisville Institutional Repository, ThinkIR.
3. The signature page within the electronic version must have the names of your committee members typed under the signature line; the signatures cannot be scanned into the document.
4. Submit a signed signature page, digital/electronic signature page (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) can be found on the the Graduate School web-site and the department administrative assistant.

For questions regarding preparation and submission of dissertations to the Graduate School, contact the Associate Director of Academic Support.

Public Health Sciences: Specialization in Health Promotion and Behavioral Sciences (PhD)

Doctor of Philosophy in Public Health Sciences, specialization in Health Promotion and Behavioral Sciences

Unit: School of Public Health and Information Sciences (<http://louisville.edu/sphis/>) (GH)

Department: Health Promotion and Behavioral Sciences (<http://louisville.edu/sphis/departments/health-promotion-behavioral-sciences/>)

Program Website (<http://louisville.edu/sphis/departments/hpbs/academics/>)

Academic Plan Code(s): PHSCPHDHP

Program Information

The PhD in Public Health Sciences, specialization in Health Promotion and Behavioral Sciences program at the University of Louisville, School of Public Health and Information Sciences is designed to prepare students for careers in higher education, upper-level management positions in government and private nonprofit health agencies, and research positions with universities, government agencies and in the private sector. In addition to gaining a solid foundation in the theories and concepts of the discipline, students also achieve competency as independent researchers.

Students interested in health equity and social justice will benefit from the multidisciplinary background of our faculty. In our department, students are uniquely trained to approach complex social and public health issues using theories, methods, and strategies from across diverse disciplines. In addition, our faculty possess a breadth of expertise in various designs, methods, approaches, and subject matter areas to support students in their academic and professional pursuits. Located in the heart of a metropolitan area, our hands-on training strengthens the science and practice of public health, equipping our graduates to be leaders in a variety of settings.

Please refer to the Student Handbook for additional information.

Competencies

By the end of the program, the successful student will be able to:

- *Demonstrate a social justice perspective in considering and being sensitive to issues that influence public health, health policy, and the delivery of health care;*
- *Appraise the role of structural, social, political, behavioral, and psychological determinants in producing and maintaining population health and health inequities;*
- *Apply and critically evaluate multi-level theoretical models of health and health behavior to understanding and intervening in societal, structural, community and organizational influences on public health issues;*
- *Demonstrate expertise in selecting and applying rigorous and ethical research methods to conduct research in the student's cognate area;*
- *Implement pedagogical techniques, with a focus on critical pedagogy, in the process of teaching and learning;*
- *Communicate effectively and clearly both orally and in writing, and present public health issues and research findings in their area of expertise to a variety of audiences; and*
- *Translate evidence into actionable information to develop and advocate for equitable policies and practices.*

It is expected that prior to graduation, students in the program have demonstrated these competencies by completing the curriculum, passing the qualifying exam, successfully defending the dissertation, and participating in collaborative research and service activities.

Curriculum

The typical progression through the health promotion and behavioral science curriculum is:

- Required and elective coursework of 48 credit hours (years one and two)
- Qualifying examination (year three)
- Candidacy
- Dissertation research and preparation (within four years of entering candidacy)
- Oral examination / dissertation defense

Faculty Advisor

The department will assign an academic advisor for each doctoral student upon admission. Upon matriculation in the program, each student will meet with his or her assigned advisor and develop a program of study, which will include courses in public health theory and principles, research design and statistics as well as selected cognate courses. The program of study will identify a set of courses for the development of competencies in areas of public health knowledge that are relevant to the

student's area of interest. The program of study may be modified as the student's needs change or course availability is altered.

Admission Requirements

Applicants should have a minimum GPA of 3.0 on a 4.0 scale and, in most cases, should have completed a master's or other graduate degree related to the theme of the doctoral program. Applicants who have a master's degree in a different discipline may be admitted with the stipulation that they complete foundational coursework during their enrollment for the doctoral degree. This coursework is in addition to the outlined curriculum and does not count towards the credit hours required for the program. Additional coursework is negotiated with the student's academic advisor on a case-by-case basis.

The application, curriculum vitae, personal statement, application fee, three professional or academic letters of recommendation, official transcripts of all college work, and academic writing sample must be submitted through the UofL Graduate School (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>).

International applicants are required to have a foreign credential evaluation for each degree not from an accredited U.S. institution.

The personal statement should be a one- to two-page essay and address the following:

- Discuss your academic and personal background. Explain what attracts you to the field of public health and health promotion.
- Describe your experiences with research, including your role in conducting research and designing research products (i.e., papers, presentations, reports, etc.).
- Discuss your research interests and explain the role health equity and social justice play in framing your research. Describe the type of research you would like to pursue if admitted into the program. Describe any other personal or professional experiences you believe are relevant.
- Explain your long-term career goals and how a PhD in public health sciences will help you reach these goals.

International students for whom English is not their primary language must show English language proficiency by one of the following:

- Test of English as a Foreign Language (TOEFL) score of at least 79 (internet).
- Official IELTS score of at least 6.5 overall band score from the academic module exam.
- Official Duolingo overall score of 105.
- Demonstrate an accredited degree awarded by an acceptable institution which uses English as the primary language of instruction.

For specific information about the degree specialization or the application process, students should contact the HPBS Department Coordinator at sphhpbs@louisville.edu.

Application Deadline

Fall semester – March 1 (International applicants); March 31 (Domestic applicants).

Applications received by December 31 will receive first consideration for admission and funding. Those received after

December 31 will be considered based on availability of space in the program.

Spring semester - Applications are not accepted.

Summer semester – Applications are not accepted.

Program Requirements

Curriculum

Students with a Master of Public Health (MPH) and those with master's degrees from other disciplines may be considered for admittance to the PhD program. An MPH degree from a CEPH-accredited school or program of public health verifies assessment of the required 12 Foundational Public Health Knowledge (FPHK) Competencies for the PhD. Students with some public health background or a Master of Public Health from a non-CEPH-accredited school or program of public health, if admitted, will be required to take PHPH 523 to verify assessment of the FPHK competencies.

The PhD curriculum consists of a minimum of 48 credit hours of course work and a dissertation.

Academic Standing

To maintain good academic standing in the PhD in PHS, Specialization in Health Promotion and Behavioral Sciences program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any PhD in PHS, Specialization in Health Promotion and Behavioral Sciences student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Coursework

Code	Title	Hours
Foundational Requirements		17
PHPB 701	Theoretical Basis of Health Promotion	
PHPB 703	Health Promotion Research Methods and Design	
PHPB 705	Policy to Advance Health Equity	
PHPB 709	Philosophy of Science & Evaluation Theory	
PHPB 710	Social Justice and Health Equity Research	
PHPB 750	Doctoral Seminar in Health Promotion & Behavioral Sciences ¹	
Methods & Analysis		15
PHST 501	Introduction to Biostatistics for Health Sciences II	
PHPB 711	Qualitative Research Methods in Public Health	
Additional courses in research design, instrumentation, and analysis (9 credit hours)		
Teaching Seminar & Lab		1-3
PHPB 730	Teaching Seminar in Health Promotion and Behavioral Sciences (required for all PhD students)	
PHPB 731	Teaching Lab in Health Promotion and Behavioral Sciences (optional for students wishing to gain teaching experience)	
Cognate Area of Study		15
Coursework determined by student and faculty advisor.		

Dissertation	as needed
Minimum Total Hours	48

¹ Students are required to register for four semesters of PHPB 750 Doctoral Seminar in Health Promotion & Behavioral Sciences at one-half (.5) credit hour each while pursuing doctoral coursework. The full course is completed over four semesters, with students producing a complete professional portfolio of materials annually.

Qualifying Examination

Upon completion of all formal course work, students will take a written qualifying exam to demonstrate their ability to synthesize and apply concepts from those courses. Results will be given to students within six weeks of completion of the exam. The exam will be evaluated on a pass/fail basis; students who do not pass the exam on their first attempt will be given time to prepare to sit for the exam one additional time. The retake of the exam must be attempted within 6 months at a regularly scheduled exam date (February, July, or October) following the first attempt at the discretion of the specialization and in consultation with the student. If a student fails to pass on the second attempt, the student will be dropped from the program. Once the qualifying exam is successfully completed, students will be admitted to candidacy for the doctoral degree.

See Student Handbook for additional information.

Dissertation

A dissertation, based on original research conducted by the student, is required of a candidate for the degree of Doctor of Philosophy in Public Health Sciences with a specialization in Health Promotion and Behavioral Sciences. The dissertation is to be a scholarly achievement that demonstrates the student's ability to conduct independent research and a thorough understanding of research principles, concepts, and techniques in health promotion. The dissertation must follow the guidelines of the Graduate School (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>).

See Student Handbook for additional information.

Dissertation Committee

The student's dissertation research will be guided by, and the final product approved by, a Dissertation Committee. The Chair of the Committee, who must come from within the department, will be appointed by the Dean of the School of Public Health and Information Sciences upon the advice of the Chair of the Department of Health Promotion and Behavioral Sciences.

The Dissertation Committee shall consist of at least four members to a maximum of six members. The Chair of the Committee and at least one other committee member must be from the department. At least one of the additional members must be from outside of the department. Students are encouraged to meet with their committee chair regarding prospective committee members who will mentor them throughout this process. A committee member must have a doctoral degree, be credentialed to teach graduate-level courses relevant to the degree, and have recent involvement in research, scholarship, or creative activity within the previous five years. The Dean of Academic Affairs at SPHIS must approve the members to serve on the committee. The Committee will subsequently be approved by the School of Public Health and Information Sciences.

Dissertation Proposal

The student will work with the Dissertation Committee and especially with the Chair throughout the process of preparing their Dissertation Proposal. The student will schedule meetings to present their dissertation proposal for approval once it has been reviewed by members of the committee. The final oral defense of the dissertation must be completed within four years of entering candidacy after passing the Qualifying Exam.

Dissertation Defense

Once the student has completed work on the dissertation, the student will schedule a date with his/her Dissertation Committee for the final oral examination during which the student will defend the dissertation. The dissertation must be approved by the committee and the Chair of the Department by majority vote before it can be submitted to the Graduate School. The defense is a public event to which members of the University community will be invited as well as those the student worked with on the project.

Dissertation Preparation

The dissertation copy must follow the guidelines of the Graduate School (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>).

Dissertation Submission

The following steps must be taken to submit the final copy of the dissertation electronically after oral defense and approval of the committee:

1. Final document must be converted to a PDF (following the guidelines as noted above) and sent to the Graduate School and the department's administrative assistant.
2. The document is submitted as advised by the Graduate School through the ThinkIR repository. The directions on submission will be provided upon review of the dissertation by the Graduate School.
3. The signature page within the electronic version must have the names of your committee members typed under the signature line; the signatures cannot be scanned into the document.
4. Submit a signed signature page, digital/electronic signature page (<http://louisville.edu/graduate/current-students/thesis-dissertation-information/>) can be found on the Graduate School web-site.

Public Health Training (CERT)

Graduate Certificate in Public Health Training

Unit: School of Public Health and Information Sciences (<https://louisville.edu/sphis/>) GH

Program Website (<https://louisville.edu/sphis/academics/public-health-training-certificate/>)

Academic Plan Code(s): PHTRCGRO

This program is completed 100% online (<https://louisville.edu/online/programs/certificate-programs/online-graduate-certificate-in-public-health-training/>).

Program Information

The Graduate Certificate in Public Health Training provides individuals with the skills required for a career in a public health setting, integrating the four core areas of public health with practical applications for public health practice and preparedness. The twelve (12) credit curriculum is affiliated with the MPH degree and consists of the four core courses that are required of all MPH graduates. Students will learn the foundational

theories and methods of epidemiology, biostatistics, health behavior, and health policy.

The Certificate also offers working public health professionals a flexible and convenient option for advancing their foundational public health knowledge, providing this knowledge to those professionals who may not be ready to fully commit to a traditional Master of Public Health (MPH) degree.

Those interested in the possibility of pursuing the Master of Public Health may use this program as a steppingstone towards completion of the MPH degree.

Admission Requirements

Admission Requirements

Applicants must have completed a baccalaureate degree from an accredited institution with a minimum of 2.75 GPA on a 4.0 scale

The application requirements for programs at the University of Louisville are submitted to the Graduate School and include:

- Graduate application (<https://graduate.louisville.edu/admission/apply/>) submitted to the Graduate School
- Official transcripts indicating conferral of a bachelor's degree
- Curriculum vitae
- A minimum of two letters of recommendation related to the applicant's academic or professional history
- Application fee
- Students whose primary language is not English must show English language proficiency by attaining one of the following:
 - TOEFL score of 79 or higher (after conversion for test type)
 - IELTS test score of 6.5 or higher
 - Duolingo English test score of 105 or higher
- Demonstration of a degree award from an acceptable English language institution, as formally documented by an appropriate institutional official.

Application Deadline

Applications are accepted for the Fall and Spring semester. There are no Summer admissions. There is no formal deadline.

For specific information about the degree program or the application process, please contact the MPH Program Coordinator at:

Email: sphismph@louisville.edu

Phone: (502) 852-6263.

Certificate Requirements

Curriculum

Twelve (12) credit hours of required coursework

Academic Standing

To maintain good academic standing in the Certificate in Public Health Training program, students must maintain a cumulative GPA of 3.0 or higher for all coursework in the program. A student must be in good academic standing in order to receive the degree.

Any Certificate in Public Health Training student with a program cumulative GPA below 3.0 will be placed in probationary status. Any student who remains in probationary status for two consecutive terms may be considered for dismissal from the program.

Code	Title	Hours
PHST 500	Introduction to Biostatistics for Health Sciences I (Offered Fall semesters)	3
PHMS 501	Introduction to Public Health Practice and Administration (Offered Fall semesters)	3
PHPB 501	Introduction to Public Health Behavior (Offered Spring semesters)	3
PHEP 501	Introduction to Epidemiology (Offered Spring semesters)	3
Minimum Total Hours		12

If a student chooses to pursue the Master of Public Health (MPH) degree at any time after enrolling or completing the Certificate program, then all coursework completed within the preceding three years with a grade of B or better may be applied towards the coursework for the MPH degree.

Public History (CERT)

Graduate Certificate in Public History

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: History (<http://louisville.edu/history/>)

Program Webpage (<http://louisville.edu/history/graduate-studies/graduate-certificate-in-public-history/>)

Academic Plan Code(s): PHISCHI

Program Information

The graduate certificate in Public History is a specialized program of study that trains students for careers in museums, archives, historical interpretation, and historic preservation. Students may pursue the certificate either in combination with a Master of Arts in History (or a closely related field) or as an independent credential.

Students enrolled in the program take seminars in history and electives in history and related fields. All students are required to complete an internship at a historical institution.

Admission Requirements

Students seeking the certificate as a stand-alone program should apply through the Graduate School (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>). Create an account. When asked to choose a program, select "Graduate - non-degree." On the next page, select "College of Arts and Sciences," then "Public History (CHI)."

The following materials are required for the certificate program:

- Two letters of recommendation
- Undergraduate transcripts
- GRE scores
- Personal statement of interest in public history (500 words)
- Application fee

History MA students who wish to enroll in the certificate program must complete the online application (see link above) and submit:

- A letter of recommendation from a University of Louisville faculty member
- A personal statement of interest in public history.

All materials from applications for the MA program will also be considered.

Program Requirements

Code	Title	Hours
HIST 597	Introduction to Public History	3
HIST 608	Practicum in Public History (Internship)	3
Two 600-level non-public history courses in the Department of History		6
Two public history electives at the 500 level or above		6
Minimum Total Hours		18

Students in the MA program in History may apply up to six (6) credit hours from the degree program toward the Public History certificate.

Sample of public history electives:

- HIST 607 Oral History
- HIST 610 Introduction to Historic Preservation
- ARTH 647 Introduction to Critical and Curatorial Studies I and ARTH 648 Critical and Curatorial Studies II
- URBS 666 Nonprofit Management

Real Estate Development (CERT)

Graduate Certificate in Real Estate Development

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Urban and Public Affairs (<https://louisville.edu/upa/>)

Program Webpage (<http://louisville.edu/upa/programs/gcred/>)

Academic Plan Code(s): RED_CRE

Program Information

The Department of Urban and Public Affairs offers an twelve (12) credit hour Graduate Certificate in Real Estate Development designed to equip graduates with the skills needed to make better real estate decisions with respect to investment considerations and site analysis and planning. The program will be particularly attractive to Urban Planning students desiring to work in the private sector; however, the program will also be appealing to students enrolled in other graduate programs at the university or who wish to complete the certificate on a stand-alone basis.

The program may be completed in conjunction with the Master of Urban Planning (MUP) program without the need to take any additional coursework beyond what is required for the MUP program. For MUP students, the certificate courses satisfy the requirements for the specialization in Community Development.

The Graduate Certificate in Real Estate Development program is designed to introduce students to the real estate development industry. The program was not designed to prepare students to take the Real Estate Sales Associate national or state exam administered by PSI Services or to earn a real estate sales license in any US state or other jurisdiction.

However, completing 6 credit hours of real estate coursework in the

program curriculum would qualify students to meet the education requirement for a real estate sales associate license exam in Kentucky.

Admission Requirements

Applicants must have a bachelor's degree (any major is acceptable), and provide a completed graduate admissions application (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>), transcripts of all undergraduate/graduate course work, letters of recommendation and a personal statement.

Admission is competitive and generally requires a minimum undergraduate GPA of 3.00. All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.

Program Requirements

The program requires twelve (12) credit hours, and may be completed in one semester as a full-time student. It may be completed in-person in up to four years as a part-time student. Courses may be waived by the Program Coordinator based on previous study; however, substitute course work will be required.

The following courses are required:

Code	Title	Hours
Required Courses:		
URBS 613	Real Estate Market Analysis	3
URBS 611	Real Estate Principles	3
Electives (Choose 2 from the list below):		6
URBS 602	Urban Economics	
URBS 604	Land Use & Planning Law	
URBS 667	Budgeting and Finance	
Minimum Total Hours		12

Although the program does not require an internship, students who are also in the MUP program may wish to complete the required planning internship by working in a real estate development firm.

School Social Work (RANK1)

Rank 1 Program in School Social Work

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood, and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Program Website (<https://louisville.edu/education/degrees/rank1>)

Academic Plan Code(s): SW_ _RK1

Program Information

Rank 1 programs are not degree programs.

The Rank 1 program in School Social Work includes the School Social Work Concentration. It is designed for the Advanced Practitioner P-12.

Rank 1 programs are planned graduate level programs designed for Kentucky teachers seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank 1 status is sixty (60) credit hours of approved graduate credit including a master's degree.

Admission Requirements

Students in this Rank-1 program are required to satisfy/provide the following:

- Complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) to the Graduate School
- Signed Professional Code of Ethics/Technology User Agreement
- Completion of Official Program along with School Social Work specialization program sheet.

Students may apply to the program by first going to the Graduate School (<https://graduate.louisville.edu/admission/apply/>) website. Admission requirements include the following credentials:

- Teaching certificate
- TOEFL/IELTS/Duolingo (Students holding a baccalaureate or advanced degree from an accredited institution in the U.S. are exempt from this requirement.)
- There may be additional admission requirements, depending on the Rank 1 program that you select. Please contact the Teaching and Learning Department for specific information.
- Official transcripts with a GPA of 2.75 in the Bachelor's degree and a GPA of 3.0 in the Master's degree.
- Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services) (<http://wes.org/>) or ECE (Educational Credential Evaluators) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.

Please have transcripts sent to:

MSSW 657	Group Methods	
MSSW 660	Motivation and Change: The Process of Change and Strategies to Elicit Intrinsic Motivation.	
EDSP 510	Legal Issues in Special Education	
EDSP 671	Behavior Intervention	
EDSP 673	Research Seminar in Autism Spectrum Disorders	

Minimum Total Hours **33**

Exit Requirements

Hallmark Assessment Task for EDSP 669 or equivalent project that demonstrates proficiency in the Advanced-Level Kentucky Teacher Standards.

Course project must address all of the Advanced-Level Kentucky Teacher Standards. Successful completion of portfolio.

Additional Requirements

Up to fifteen (15) credit hours of graduate credit may be transferred to the Rank 1 program, as long as the student will have completed 60 credit hours of approved graduate credit.

Including a master's degree at the end of the Rank 1 program: transfer credit must be officially accepted by the advisor and final acceptance is dependent upon receipt of official transcripts.

In the Rank I program at least fifteen (15) credit hours of new graduate coursework must be taken at the University of Louisville.

To complete the program, students must have a minimum 3.0 cumulative grade point average. No credit shall be accepted for carrying a grade lower than a B-minus.

Some courses are required for students completing the School Social Work specialization and Rank I program.

This degree program sheet must be accompanied by a signed School Social Work specialization program sheet as well.

¹ One of these courses in the Diversity section must be completed for School Social Work Specialization

² Courses are required for students completing the School Social Work Specialization and Rank I program.

Secondary Education (RANK1)

Rank I Program in Secondary Education

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Elementary, Middle and Secondary Education (<https://louisville.edu/education/departments/mise/>)

Program Webpage (<https://louisville.edu/education/degrees/rank/>)

Academic Plan Code(s): SE_RK1SAP

Program Information

Rank I programs are not academic degree programs.

Rank I programs are planned, graduate-level programs designed for Kentucky teachers seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank I status is 60 credit hours of approved graduate credit including a master's degree.

Teachers who complete a Rank I program may obtain a rank change for salary purposes in Kentucky. Through a Rank I program, teachers may increase their depth of knowledge in their teaching areas or in additional areas of certification, as appropriate.

Admissions Requirements

Students may apply to the program by first going to the Graduate School web site and completing the graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Admission requirements include the following credentials:

- Official transcripts with a GPA of 2.75 in the Bachelor's degree and a GPA of 3.0 in the master's degree.
- Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services) (<http://wes.org/>) or ECE (Educational Credential Evaluators) (<http://ece.org/>). Please note that transcript evaluations can sometimes take several weeks.
- TOEFL/IELTS/Duolingo (Students holding a baccalaureate or advanced degree from an accredited institution in the U.S. are exempt from this requirement.)

- Teaching certificate in grades 8-12, P-12, or 5-12 and a master's degree/Rank II
- Signed Professional Code of Ethics/Technology User Agreement

Please have transcripts sent to:

Up to fifteen (15) credit hours of graduate credit may be transferred to the Rank I program, as long as the student will have completed 60 credit hours of approved graduate credit including a master's degree at the end of the Rank I program. Transfer credit must be officially accepted by the advisor and final acceptance is dependent upon receipt of official transcripts.

In the Rank I program, at least fifteen (15) credit hours of new graduate coursework must be taken at the University of Louisville.

To complete the program, students must have a minimum 3.0 cumulative grade point average. No grade lower than B-minus will be accepted.

Midpoint Requirement

Candidates are required to submit a mid-point performance assessment at the completion of fifteen (15) credit hours of coursework. The faculty advisor will assess the candidate's performance assessment, which must be at the exemplary or target level. The performance assessment must address content, classroom environment, teaching, assessing, and reflection, through an artifact (such as a video), to document professional learning.

Exit Requirements: Hallmark Assessment Task to be completed in EDAP 681 or equivalent project that demonstrates proficiency in the Kentucky Academic Standards.

Secondary Education (MAT)

Master of Arts in Teaching in Secondary Education (SE MAT)

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Elementary, Middle, and Secondary Education (<https://louisville.edu/education/departments/mise/>)

Program Website (<https://louisville.edu/education/degrees/mat-se/>)

Academic Plan Code(s): By subject area, see below.

Program Information

The Master of Arts in Teaching degree in Secondary Education leads to certification in:

- Biology (SE_ _MATBIO)
- Chemistry (SE_ _MATCHE)
- Earth & Space Science (SE_ _MATESS)
- English (SE_ _MATENG)
- Mathematics (SE_ _MATMAT)
- Physics (SE_ _MATPHY)
- Social Studies Education (grades 8-12) (SE_ _MATSST)
- World Language Education (Spanish and French) (grades P-12) (SE_ _MATSPA and SE_ _MATFRE)

Early Start Program

The Master of Arts in Teaching program in conjunction with the undergraduate programs in Chemistry, Biology, and Mathematics offers a comprehensive and professionally-focused program leading to an additional degree of MAT Middle or Secondary Education. This early start program enables superior students to receive two degrees within five years. A total of 149-152 credits are required for the dual degrees: 122-125 credits of coursework devoted toward the baccalaureate degree and 36 credit hours toward the MAT, with nine (9) credit hours double-counted. This program will be available for students who are entering their junior year. They may take graduate level courses in the College of Education and Human Development in their 4th year of study.

The current qualifications for the joint degree program have been agreed upon by discipline faculty from the College of Arts and Sciences and the College of Education and Human Development. The criteria vary by discipline. Students enrolling in the accelerated program will be non-thesis students and must adhere to all policies pertaining to Graduate Students. All interested students must submit an application to the

College of Education and Human Development MAT program and meet the admission criteria.

Admission Requirements

Candidates considering application to the MAT program should contact the Education Advising and Student Services office (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission.

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program:

1. Graduate application (<https://graduate.louisville.edu/admission/apply/>) to Graduate School. This should be completed three to four weeks prior to the application deadline.
2. Praxis II (<http://louisville.edu/education/degrees/info/mat-mse-praxis-ii/>) Content Exam registration and/or scores
3. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with major in content area with a minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
4. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-mse-prereq/>)
5. C or higher in ENGL 102
6. C or better in oral communication course
7. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
8. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
9. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
10. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
11. Acceptable interview

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

Program Requirements

Code	Title	Hours
EDTP 631	Integrated Teaching and Learning I	3
EDTP 632	Integrated Teaching and Learning II	3
EDTP 633	Integrated Teaching and Learning III	3
<i>The above courses must be completed prior to the content methods course.</i>		
Content Methods, choose one from the following courses:		3
EDTP 622	High School English Methods	
EDTP 623	High School Mathematics Methods	
EDTP 624	High School Science Methods	
EDTP 625	High School Social Studies Methods	
EDTP 629	World Language Methods, P-12	
EDTP 619	Student Teaching: High School	9
or EDTP 618	Student Teaching: Middle and High School	
or EDTP 612	Student Teaching: P-12	

EDTP 503	Developing Cross-Cultural Competence: Teaching Students from Diverse Backgrounds ¹	3
EDTP 620	Reading and Writing Across the Curriculum ¹	3
EDAP 688	Designing a Technology Integrated Curriculum	3
Minimum Total Hours		30

¹ Can be taken at any point in the program.

Mid-Point Assessment: Prior to Student Teaching

Satisfactory dispositions assessment; no lower than a "C" in content methods class; within three (3) credits of meeting content requirements; all course(s) passed; electronic documentation of 200 hours of diverse and approved field experiences; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Certification Assessment: After Student Teaching

Satisfactory dispositions assessment; passing scores on required PRAXIS exams; completion of degree requirements.

Degree Assessment

All certification and degree course work completed with a 3.0 cumulative GPA (no more than two "C"s in degree courses); 2.5 cumulative GPA in content course requirements; a "C" or higher in student teaching; satisfactory performance on all Hallmark Assessment Tasks; Target performance or better on all rubrics.

Degree Candidacy

Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

Praxis Disclaimer

Teacher certification requirements are subject to change. Before registering for certification test(s), please refer to the Education Professional Standards Board (EPSB) website at epsb.ky.gov (<http://www.ets.org/praxis/ky>) for current requirements.

The Master of Arts in Teaching in Secondary Education program and all related content areas prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us?tab=disclosures>).

Secondary Education - Alternative Certification 8-12 (MAT)

Master of Arts in Alternative Route to 8-12 Certification in Secondary Education

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Elementary, Middle and Secondary Teacher Education (<http://louisville.edu/education/departments/mise/>)

Program Website (<https://louisville.edu/education/degrees/mat-ac/>)

Academic Plan Code(s): By subject area, see below.

Program Information

The Alternative Certification program is designed to assist the local school districts in meeting the demand for qualified teachers in high need content areas. The program provides candidates with an opportunity to pursue initial teacher certification while working as a full-time teacher on a temporary provisional certificate.

Employment is not required for initial acceptance to this program.

However, candidates must be employed in a Kentucky-accredited school by the start of the school year in order to continue in the program. This program is a two-year, 30 credit hour program resulting in initial teacher certification and a Master of Arts in Teaching degree.

The Master of Arts in Teaching degree in Secondary Education leads to certification in:

- Biology (SE_ _MATBIO)
- Chemistry (SE_ _MATCHE)
- Earth & Space Science (SE_ _MATESS)
- English (SE_ _MATENG)
- Mathematics (SE_ _MATMAT)
- Physics (SE_ _MATPHY)
- Social Studies Education (grades 8-12) (SE_ _MATSST)
- World Language Education (Spanish and French, grades P-12) (SE_ _MATSPA and SE_ _MATFRE)

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Alternative Certification program. Candidates considering application to the MAT program should contact the Education Advising and Student Services office (teacher@louisville.edu) (<http://louisville.edu/cgi-bin/uofl.mail?teacher>) prior to applying for admission. Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

1. Complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>). This should be completed three to four weeks prior to the application deadline.
2. Passing scores on Praxis II Content Exam(s) (<http://louisville.edu/education/degrees/info/mat-ac-praxis-ii/>)
3. Bachelor's Degree (<http://louisville.edu/education/degrees/info/bachelors/>) in content area from Accredited College or University with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
4. Prerequisite Course Requirements (<http://louisville.edu/education/degrees/info/mat-mse-prereq/>) – Applicants may apply to the program with up to six credit hours of content remaining to complete.

5. C or better in ENGL 102 (or equivalent)
6. C or better in oral communication course
7. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
8. Professional Writing Requirements (<https://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
9. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
10. Experience working with multiple groups of children/adolescents
11. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
12. Acceptable interview

For programs with an online option, more information about certification or licensure is available here: <http://louisville.edu/online/About-Us> (<http://louisville.edu/online/About-Us/>) (please scroll down near the bottom of the page and click on the licensing disclosures tab).

Secondary Education - Teacher Residency (MAT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Arts in Teaching in Middle School Education, Teacher Residency

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Program Website (<https://louisville.edu/education/degrees/mat-ac/>)
Academic Plan Code(s): By subject area, see below.

Program Information

The MAT in Secondary Education leads to certification in:

- Biology (SE_ _MATBIO)
- Chemistry (SE_ _MATCHE)
- Earth & Space Science (SE_ _MATESS)
- English (SE_ _MATENG)
- Mathematics (SE_ _MATMAT)
- Physics (SE_ _MATPHY)
- Social Studies Education (SE_ _MATSST)
- World Language Education - French (grades P-12) (SE_ _MATFRE)

- World Language Education – Spanish (grades P-12) SE_
_MATSPA)

The MAT enables graduate students to earn their initial teaching certification for Kentucky in the subject areas above for grades 8-12, or P-12 in French and Spanish.

Teacher candidates learn to teach through instruction in pedagogy, child development, special education, gifted education, technology and diversity. They develop their skills in field experiences through student teaching in area schools. The CEHD prepares future teachers who are committed to helping every student learn. The MAT program emphasizes meeting the needs of the individual learner through understanding and using the best instructional practices in a standards-based environment. Through coursework and clinical field experiences, UofL teacher education students become critical thinkers who are prepared to meet the demands of 21st century secondary schools.

The Teacher Residency program is designed to assist local school districts in meeting the demand for a diverse cadre of qualified teachers. Residents are enrolled in a one-year MAT program at the University of Louisville while employed with JCPS as a resident. Candidates receive personalized instruction throughout the process to help them succeed in the classroom. Candidates selected for the Louisville Teacher Residency (LTR) program commit to teach in accelerated improvement schools (AIS) for five years.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Teacher Residency program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission. Admission is competitive.

Applicants must complete/satisfy the following:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Prerequisite Course Requirements (<https://louisville.edu/education/degrees/info/mat-mse-prereq/>)
3. Praxis II (<http://louisville.edu/education/degrees/info/mat-mse-praxis-ii/>) Content Exam registration and/or scores
4. Bachelor's degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with major in content area or appropriate prerequisite courses and a minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
5. Grade of C or higher in ENGL 102 (<https://catalog.louisville.edu/search/?P=ENGL%20102>) (or equivalent)
6. C or higher in oral communication course
7. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
8. Professional Statement (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
9. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)

10. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
11. Acceptable interview with school district

Six Sigma (CERT)

Graduate Certificate in Six Sigma

Unit: Speed School of Engineering (<http://engineering.louisville.edu>) (GS)
Department: Engineering Management (<https://engineering.louisville.edu/academics/areasofstudy/engineering-management/>)
Academic Plan Code(s): SSBBCGRO

Program Information

This program is completed 100% online (<https://engineering.louisville.edu/academics/graduate-programs/cert-in-six-sigma/>).

The Six Sigma graduate certificate delivers comprehensive knowledge and skills in process improvement. The program will prepare students and professionals to receive the Six Sigma Black Belt Certification from the Institute of Industrial and Systems Engineers (IISE) while taking nine Engineering Management credit hours that can be used towards a college degree.

Graduates of the certificate program will have the skills necessary to successfully lead Six Sigma projects in the manufacturing, healthcare, or service industry.

Admission Requirements

The admission standards for the Graduate Certificate program in Six Sigma are as follows:

1. All admission applications for the Graduate Certificate program shall include the following:
 - a. Completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - b. Application fee,

- c. Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.

2. The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).

GMAT/GRE scores are not required.

Students enrolling in this graduate certificate program will need to have sufficient statistics (one semester of Introduction to Statistics) and math (one semester of Calculus I) for program admission. Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

Certificate Requirements

Code	Title	Hours
EM 613	Operations Management	3
EM 661	Engineering Statistics II	3
EM 684	Applications for Process Improvement I	1.5
EM 685	Applications for Process Improvement II	1.5
Minimum Total Hours		9

The certificate program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Social Work (MSSW)

Master of Science in Social Work

Unit: Kent School of Social Work and Family Science (<https://louisville.edu/kent/>) (GK)

Department: Social Work (<http://louisville.edu/kent/>)

Program Website (<https://louisville.edu/kent/academics/master-of-science-in-social-work/>)

Academic Plan Code(s): SW_ _MSW30, SW_ _MSW300, SW_ _MSW60, SW_ _MSW600, or by concentration (See Concentrations Areas tab).

Program Information

This program has degree options that can be completed 100% online (<http://louisville.edu/online/programs/masters/master-of-science-in-social-work/>).

The mission of the Kent School of Social Work and Family Science MSSW program is to prepare students for ethical, evidence-informed,

advanced social work practice with diverse, vulnerable, and marginalized individuals, families, groups, organizations, and communities. We take an anti-oppressive stance in educating students for careers as advanced social work practitioners who apply critical thinking skills and available evidence to inform practice that responds to complex social problems. Graduates will use these skills to actively pursue social change, advocating with and on behalf of vulnerable and marginalized client systems. The program will contribute to the mission of the University as a great place to learn by providing engaged service and outreach opportunities that improve the quality of life for local and global communities. The educational part of our mission is accomplished through theoretically and empirically driven approaches to pedagogy in our on-campus and online instruction and transformative learning experiences.

Accreditation of the MSSW

The Master of Science in Social Work program is accredited by the Council on Social Work Education (CSWE).

BSW to MSSW Accelerated Program

Undergraduate students interested in the program's accelerated option should visit the catalog page for the Bachelor of Social Work (BSW) (<https://catalog.louisville.edu/undergraduate/majors/social-work-bsw/>) for more information.

MSSW Concentrations

Though it is not required for students to tailor their education while obtaining the MSSW degree, the MSSW program offers several concentration areas. In general, these concentrations require the student to take prescribed electives (please refer to the Concentration Areas tab) and may offer the opportunity to engage in a field placement tailored to their population of interest. Accepted students can declare their interest in pursuing a concentration through a designated form provided after admission.

Concentration options include:

Alcohol and Drug Counseling

Substance abuse is widely recognized as one of the top health problems in the USA and is attracting increasing attention and funding. However, there is an identified shortage of qualified addiction counselors—and students who prepare themselves for a career in chemical dependency can hope to gain immediate employment after graduation and possibly before. In this regard, students should be aware of professional certification, the Certified Alcohol and Drug Counselor (CADC) certification, that is valued by addiction treatment agencies with comparable respect and compensation as the Licensed Clinical Social Work (LCSW) qualification. Those who are interested in initiating their careers in a clinical substance abuse treatment setting can begin to fulfill specialized requirements of the CADC certification while completing normal requirements of the MSSW program. The Kent School's alcohol and drug concentration will:

- Satisfy many of the requirements of the CADC program,
- Teach specialized knowledge and skills, and

- Position students for employment and advancement in a broad array of specialized substance abuse roles.

Forensic Social Work

The forensic social work concentration equips students with unique knowledge and skills essential to multi-system, social justice oriented practice with vulnerable populations as related to law and legal systems, including criminal and civil issues surrounding juvenile and criminal justice, human trafficking, immigration, and mandated treatment.

Gerontology

The nation's burgeoning aging population is increasing the demand for well-trained and competent social workers to respond to the needs of older adults and their families. The US Department of Labor reports that geriatric social work is one of the most rapidly growing occupations, with the promise of job security.

Mental Health

The mental health concentration prepares students to enter into the mental health field by focusing on theoretical perspectives regarding the course and etiology of mental illness, diagnostic and assessment skills, evidence-based approaches, and knowledge of mental health services, policies, and programs in the context of social work practice and values.

Military Social Work

The military social work concentration is designed to prepare students to provide services to persons who have served or are serving in the military and their families. The concentration focuses on theoretical perspectives and policy implications concerning problems facing service members and their families, as well as programs and application of interventions to ameliorate them. It is recognized that those seeking assistance from problems associated with military service may be seen in a myriad of programs both inside and outside the frame of the more traditionally recognized military service delivery systems.

Psychosocial Oncology

The Kent School of Social Work and Family Science offers the first concentration in psychosocial oncology in the nation. The high rate of cancer on local, national, and global levels and the potential shortage of oncology social workers are creating a demand for skilled practitioners. Responding to the growing need for social workers who are trained in cancer care, this program will prepare students with the knowledge and skills to meet the psychosocial health needs of persons with cancer and their families. Students will learn how to apply skills such as assessment, counseling, palliative care, program planning, and evaluation in cancer care settings. Our students work in a variety of health settings in the full range of care for cancer patients. *This concentration requires an approved specialized practicum placement. Therefore, students must submit additional documentation and receive approval to pursue the concentration.*

School Social Work—available to KY residents only

MSSW students who want to practice social work in a school setting will complete the requirements to meet the criteria for the school social work certification in Kentucky. Students who select this concentration learn how to help children and families overcome barriers to learning through home intervention. Those who complete the specialization meet the Kentucky Council on Teacher Education's requirements for certification as a school social worker. *This concentration requires an approved specialized practicum placement. Therefore, applicants and*

students must submit additional documentation and receive approval to pursue the concentration.

MSSW Dual Programs

(*not available to exclusively online students*)

The Kent School offers a joint program that combines the MSSW with a graduate certificate in Latin American and Latino Studies. Additionally, the Kent School offers joint degrees with the Couple and Family Therapy Program (MSSW/MS CFT), the Brandeis School of Law (MSSW/JD), the Department of Pan-African Studies (MSSW/MA), the Department of Women's, Gender and Sexuality Studies (MSSW/MA), the Department of Philosophy/Healthcare Ethics (MSSW/MA), and the Louisville Presbyterian Seminary (MSSW/MDiv).

Applications must be submitted independently to each academic unit/institution. In general, these programs require that the student take additional coursework, take the three MSSW electives in the other program, and potentially take a targeted specialized practicum that has the focus of and is approved by the other program.

For more complete descriptions of these programs, please refer to the prospective students link on the Kent School website (<http://www.louisville.edu/kent/>).

MSSW/Latin American and Latino Studies (LALS) Graduate Certificate

The dual MSSW/LALS graduate certificate allows students to gain a comprehensive understanding of the diverse cultures of Latin America and Latino communities in the United States. By combining the MSSW and LALS Graduate Certificate, students can develop a deeper appreciation for the social, cultural, and economic issues facing Latin American and Latino communities in the US. The MSSW/LALS dual program prepares graduates to become effective and compassionate social work practitioners with a deep understanding and appreciation for the complexities of the Latin American and Latino communities.

MSSW/MS in Couple and Family Therapy

The dual MSSW/MS CFT degree program allows students to complete coursework accredited to educate and prepare future licensed professionals in both Social Work and Couple and Family Therapy (<https://louisville.edu/kent/academics/couple-and-family-therapy/>) (formerly Marriage and Family Therapy). This dual degree program within the Kent School of Social Work and Family Science is dedicated to developing professionals in CFT (MFT) and master's-level Social Work to work with at-risk individuals & families within their community contexts.

MSSW/Master in Divinity

The dual MSSW/MDiv program recognizes the value of professional education in two interrelated fields and encourages students who have an interest in both ministry and social work to pursue these degrees simultaneously. A student may enter the dual degree program from social work or theology.

MSSW/Juris Doctor

The dual MSSW/JD program recognizes the value of interdisciplinary study and encourages students having an interest in both social work and law to pursue these degrees simultaneously. Social workers and lawyers often seek to address identical or related societal concerns, albeit from different perspectives; understanding both disciplines

enhances one's effectiveness in both professional capacities. Law courses strengthen the social worker's understanding of legal doctrine and structures that have an impact on social institutions and human conditions; social work courses help lawyers to better understand human behavior, conflict resolution, and social welfare institutions.

MSSW/MA in Pan-African Studies

The dual MSSW/MA in Pan-African studies program recognizes the value of professional education in two interrelated fields and encourages students who have an interest in both Pan-African Studies and Social Work to pursue these degrees simultaneously. Social workers and Pan-African studies scholars often seek to address identical or related societal concerns, albeit from different perspectives; understanding both disciplines enhances one's effectiveness in both the analysis of and engagement with contemporary social and cultural issues. Pan-African Studies courses strengthen the social worker's understanding of the historical foundations for policies and structures that have an impact on social institutions and human conditions; social work courses help Pan-African scholars or activists to better understand human behavior, conflict resolution, and social welfare institutions. A Pan-African Studies and Social Work combination provides the tools of social change for a historic problem of racial injustice.

MSSW/MA in Women's, Gender and Sexuality Studies

The dual MSSW/MA in Women's, Gender and Sexuality program recognizes the value of professional education in two interrelated fields and encourages students who have an interest in both Women's, Gender and Sexuality and Social Work to pursue these degrees simultaneously. Social workers and Women, Gender, and Sexuality scholars often seek to address identical or related societal concerns, albeit from different perspectives; understanding both disciplines enhances one's effectiveness in both the analysis of and engagement with contemporary social and cultural issues. Women's, Gender and Sexuality courses strengthen the social worker's understanding of the historical foundations for policies and structures that have an impact on social institutions and human conditions; social work courses help Women's, Gender, and Sexuality scholars or activists to better understand human behavior, conflict resolution, and social welfare institutions. A Women's, Gender and Sexuality, and Social Work combination provides the tools of social change for a historic problem of gender inequality and injustice.

MSSW/MA in Applied Philosophy - Health Care Ethics

The dual MSSW/MA in Applied Philosophy - Health Care Ethics degree program focuses on providing our social work graduates with a contextual experience within the interdisciplinary fields that comprise health care ethics in addition to the development of social work skills. MA in Applied Philosophy - Health Care Ethics is an inherently interdisciplinary field, located principally at the intersection of philosophy, the law, and the health care professions, such as clinical medicine and nursing, but drawing as well from social science disciplines as diverse as sociology, clinical psychology, and social work. In addition to any career options presented by the MSSW, degree holders may then participate in hospital ethics committees, teach medical ethics and humanities, or be prepared for future doctoral-level work in medical ethics and humanities.

MSSW Admission Requirements

Admission to the Kent School of Social Work and Family Science MSSW program is competitive. The selection process includes an evaluation of each applicant's demonstrated and potential abilities as a student, practitioner, and leader in the social work field. Applicants should utilize the MSSW Application Checklist to ensure that all application

requirements and relevant deadlines are met, which can be found on the MSSW Admissions page of Kent's website (<https://louisville.edu/kent/admissions-1/mssw-admissions/mssw-admissions/>). Attending an MSSW prospective student session is beneficial and will likely assist applicants in strengthening their application. Please consult the Kent School website (<https://louisville.edu/kent/admissions-1/mssw-admissions/mssw-prospective-student-info-request-form/>) for a list of scheduled prospective student sessions. An undergraduate GPA of 3.0 is recommended for consideration to the MSSW program.

Applicants to the MSSW program must meet the following requirements:

- A bachelor's degree from a postsecondary institution that is institutionally accredited by an agency recognized by the U.S. Department of Education (USDE) (<https://www.ed.gov/laws-and-policy/higher-education-laws-and-policy/college-accreditation/institutional-accrediting-agencies/#RegionalInstitutional>)
- A minimum of 27 credit hours in the social sciences, i.e., communications (six (6) credit hours), natural sciences (three (3) credit hours), humanities (nine (9) credit hours), and social sciences (nine (9) credit hours)

The Graduate School Application Requirements

The application file is complete when all of the following are uploaded in your graduate application portal and received by the Graduate School.

Graduate Admission Application

All applicants must complete an online application through the University of Louisville Graduate School. The online application requires a non-refundable application fee. For information on application fee waiver eligibility criteria, review Application Fee Waiver Information (<https://graduate.louisville.edu/admission/appfee/>). Click Here to Apply (<https://graduate.louisville.edu/admission/apply/>)!

Official Academic Transcripts

Transcripts are required from every college/university attended, including those at which students were enrolled for academic credit as non-degree students and/or credits that transferred to another college. All transcripts must bear the official seal and signature of the institution attended. Official electronic transcripts are encouraged and must be sent directly to the UofL Graduate School.

- **UofL transcripts for the University of Louisville graduates will be provided automatically, with no request needed.**
- All other transcripts must be sent directly from the Registrar or appropriate officer of each institution. Electronic copies are encouraged; however, paper official transcripts can be sent from the Registrar or appropriate officer directly to:

Graduate School
University of Louisville
Houchens Building, Suite 105
Louisville, KY 40202

Letters of Recommendation

- **Regular 60 Credit Hour Program Applicants - Two Recommendation Letters.** List the email addresses of two recommenders in the "Recommendation" section of the Online Graduate Application (<https://graduate.louisville.edu/admission/apply/>). Recommendation

forms are automatically emailed after the recommender's information is entered and the send to recommender button is clicked.

- One recommendation must be from a former professor. Applicants who have not been enrolled in classes within the past two years must substitute a professional reference. Please direct all questions pertaining to acceptable recommenders to msswkent@louisville.edu.
- Personal recommendations are not accepted. These include relatives, co-workers, friends, mentors, personal therapists, clergy, advisors, etc.
- The Kent School of Social Work and Family Science reserves the right to request additional supportive material from persons acquainted with the applicant's academic or practice capabilities if deemed necessary.
- **Advanced Standing 30 Credit Hour Program Applicants:** Applicants who wish to be considered for the 30 credit hour Advanced Standing program must submit their BSW Final Practicum Field Evaluation (or a fall final evaluation if currently in a BSW program) and one letter of recommendation.
- Applicants who obtained a BSW within the last seven years from an undergraduate social work program accredited or in candidacy by CSWE may be eligible to apply to the Advanced Standing, 30 credit hour program. There is a preferred, though not required, cumulative GPA of 3.0 and a social work GPA of 3.25.

Resume

Please include current/past employment as well as volunteer and service roles served. This document can be uploaded in the "Upload Materials" section of the Online Graduate Application (<https://graduate.louisville.edu/admission/apply/>).

Admission Essay

Under the "Education and or Life Experiences Responses" section of the Online Graduate Application (<https://graduate.louisville.edu/admission/apply/>), applicants must respond to their choice of two prompts. Each response is limited to 300 words.

Personal Statement

The Kent School of Social Work and Family Science MSSW Program takes an anti-oppressive stance in educating students for careers as specialized social work practitioners who apply critical thinking skills and available evidence to inform practice that responds to complex social problems. Upload to the application a 2-part, three page double-spaced, 12-font essay with sources cited addressing the following:

- Analyze a systemic/institutionally oppressive policy or practice and discuss the scope, the population affected, causes and consequences, as well as what social workers can do to combat the oppressive policy or practice.
- Review the NASW Code of Ethics Preamble and Ethical Principles and discuss how your personal values and beliefs are or are not compatible with NASW values. How will you reconcile any conflicts between your personal values and the requirements of the profession? View the Code of Ethics here: <https://www.socialworkers.org/About/Ethics/Code-of-Ethics/Code-of-Ethics-English> (<https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fwww.socialworkers.org%2FAbout%2FEthics%2FCode-of-Ethics%2FCode-of-Ethics-English&data=05%7C01%7Ckrista.young%40louisville.edu%7Cb3521eab8e314f85b52108db6cf56f9d%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C6382235736199842>)

- Please contact msswkent@louisville.edu with any questions about the admissions essay.

Kent School BSW to MSSW Admission Criteria

The University of Louisville BSW students may be eligible for special Advanced Standing admission to the MSSW program by providing only one letter of recommendation from a BSW professor, a copy of their BSW Final or Fall Practicum Evaluation (current BSW seniors will have their evaluations provided for them automatically) in addition to the other application requirements. The University of Louisville transcripts will be provided automatically. For more information, contact msswkent@louisville.edu or visit the Kent School's Admission page (<https://louisville.edu/kent/admissions-1/mssw-admissions/mssw-admissions/>). The Admissions Committee may request additional admissions materials prior to admission if necessary.

MSSW Dual Programs

If you wish to pursue any of the dual degree programs, you must also complete the other unit's application process. All dual degree options may not offer fully online opportunities, so students in the Online MSSW program may be ineligible for some dual degrees.

International students

All MSSW candidates who completed their undergraduate degrees outside of the US are required to have their transcripts evaluated by the credential services World Education Services at [wes.org](http://www.wes.org/) (<http://www.wes.org/>) or Educational Credential Evaluators at [ece.org](http://www.ece.org/) (<http://www.ece.org/>). Any candidate may be required to participate in a brief telephone interview as part of the admissions process. Candidates who are required to complete an I-20 form should note that they will be placed in a practicum program as part of their education. Admitted students to the on-campus program should contact UofL's International Center to determine if any other immigration documentation is necessary to begin practicum at louisville.edu/internationalcenter (<http://louisville.edu/internationalcenter/>).

ALL candidates for whom English is not their primary language must:

- show English proficiency by demonstration of a specified level of proficiency on the TOEFL exam, IELTS, or Duolingo examination or by providing an official transcript from an acceptable English language institution
- Minimum TOEFL scores: 213 on the computer-based TOEFL or a score of 79 on Internet-based TOEFL is required. More information on TOEFL at www.ets.org/toefl (<http://www.ets.org/toefl>).
- Minimum IELTS score: 6.5 for more information review www.ielts.org (<https://www.ielts.org/>)
- Duolingo score of 105 for more information review englishtest.duolingo.com/applicants (<https://nam11.safelinks.protection.outlook.com?url=http%3A%2F%2Fenglishtest.duolingo.com%2Fapplicants&data=04%7C01%7Ccheryl.schroader%40louisville.edu%7C0baa30a62e8345914a7c08d9f80847%7Cdd246e4a54344e158ae391ad9797b209%7C0%7C0%7C637816765462146305%7CUnknown>)

MSSW Online US Citizens Living Abroad & Outside of Kentucky

Applicants who live outside of the US will need to consult with the Practicum Education Office in advance of applying to the MSSW program to ensure the feasibility of meeting the practicum placement requirements in accordance with CSWE policies by contacting the field education office. A qualified practicum supervisor must be readily available (e.g., the supervisor has an MSSW/MSW degree from a CSWE-accredited institution or similar CSWE-type accreditation), and/or the applicant must participate in identifying a qualified practicum supervisor with the support of the Practicum Education Office. Both applicants outside of the US and outside of Kentucky must be willing to participate in the process of identifying a qualified practicum supervisor with the support of the Practicum Education Office. MSSW Online applicants in rural areas must consider that they may be required to travel to their practicum placements if no qualifying practicums are available in their local area.

MSSW Admission Deadlines

The final deadline varies, as explained below, but because entry into the program is highly competitive, applicants are encouraged to submit their applications early to ensure a space. All admissions materials must be received in the Graduate School by the listed date in order for an applicant to be considered for admission by a particular deadline.

Kent School deadlines for admission are classified as follows:

Fall 2025 Start: August

- Deadline: July 1

Spring 2026 Start: January

- Deadline: November 1

Summer 2026 Start: May

- Deadline: March 20

Exceptions to deadlines

Applications submitted past the deadline may be considered on a case-by-case basis if space allows and only if the applicant is willing to pursue courses with availability and potentially delay field/practicum start until the following semester. Please contact the MSSW Admissions Office at msswkent@louisville.edu for questions about the MSSW Program and the Practicum Education Office for field/practicum questions.

Program Requirements

The MSSW program offers flexibility through its variety of degree completion options. Courses are offered on multiple days, times, and can be completed in a traditional classroom format, entirely online, or a combination of the two.

The coursework includes two academic year-long field/practicum placements that require on average 16 to 18 hours per week in the field/practicum placement.

Though not required, students have the opportunity to tailor their education by exploring an optional concentration while obtaining their MSSW.

For concentration elective course requirements, please refer to the Concentration Areas tab.

MSSW 60 Credit Hour Regular Program

Students who are admitted and do not have a Council on Social Work Education (CSWE) accredited Bachelor of Social Work degree enter the 60 credit hour **regular program**. This program can be completed on-campus or online within two to four years. The next listing provides a basic description of the courses needed to complete this program:

Generalist Coursework

Code	Title	Hours
MSSW 601	Human Behavior in the Social Environment I	3
MSSW 619	Human Behavior in the Social Environment II	3
MSSW 602	Social Welfare Policy I	3
MSSW 622	Social Welfare Policy II	3

MSSW 30 Credit Hour Advanced Standing Program

Students holding a CSWE-accredited Bachelor of Social Work degree who have demonstrated good academic performance in their social

work courses may be enrolled in the 30 credit hour **advanced standing** Program.

This program equates to completing the 30 credit hour specialized portion of the 60 credit hour program. No academic credit is given for life or work experience. Advanced Standing is limited to applicants who have earned BSW degrees within the last seven years, at the time of enrollment in the Kent School. This program can be completed on-campus or online within one to two years.

The next listing provides a basic description of the courses needed to complete this program;

The Master of Science in Social Work program and the concentration areas of Alcohol and Drug Counseling and School Social Work prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <http://louisville.edu/online/About-Us> (<http://louisville.edu/online/About-Us/>) (please scroll down near the bottom of the page and click on the licensing disclosures tab).

Doctor of Social Work (DSW)

Doctor of Social Work

Unit: Kent School of Social Work and Family Science (<https://louisville.edu/kent/>) (GK)Department: Social Work (<https://louisville.edu/kent/academics/dsw-doctor-of-social-work/>)Program Website (<https://louisville.edu/online/programs/doctoral/online-doctor-of-social-work/>)

Academic Plan Code(s): SW_ _DSWO

This program is completed entirely online (<https://louisville.edu/online/programs/doctoral/online-doctor-of-social-work/>).

The Doctor of Social Work degree is intended to prepare social workers to assume advanced professional roles such as master practitioner, educator, administrator, policy practitioner, or leader in settings where social workers practice.

The degree program will educate social workers offer advanced education, training, and mentoring to social workers holding a master's degree with at least three years of post-master's experience who wish to become social work teaching faculty or leaders in public or private social service organizations throughout Kentucky, the nation, and abroad.

The overall objective of the degree program is to lead its graduates to become future scholar-practitioners in teaching and social service leadership. The integrated curriculum will equip students with both leadership and teaching skills so they will be successful toward their personal and professional goals.

No campus residency is required for this program. Limited virtual synchronous sessions are incorporated each semester as scheduled by the course instructor(s).

Admission Requirements

To apply to the Doctor of Social Work (DSW) program in social work, send the following materials by March 15. Extended deadlines are not guaranteed but will be advertised on the Online Learning page here (https://louisville.edu/online/programs/doctoral/online-doctor-of-social-work/?tab=apply&utm_source=kent-website-referral). All materials should be directly submitted in the online graduate admissions portal, or mailed to:

Graduate School

Graduate Admissions

University of Louisville

Houchens Building, Suite 105
Louisville, KY 40292

- Completed Graduate Admissions Application (<http://louisville.edu/graduate/apply/>) for Admission to the University of Louisville's Doctor of Social Work (DSW) Program offered in the Kent School of Social Work and Family Science.
- Application fee
- Official transcripts from each college/university attended, and documentation of the receipt of a master's degree in Social Work, e.g. MSW, MSSW, from a CSWE accredited program or international equivalent.
- Master's GPA of 3.0 (note: applicants with a master's GPA of below 3.0 showing potential for success as demonstrated in their other submitted application materials and/or in the interview for admission into the Doctor of Social Work program will be given consideration for admission)
- Three years of post-master's degree social work experience
- Current Resume or Curriculum Vita
- Three letters of recommendation from individuals familiar with the applicant's work and/or academic ability and performance such as current or former supervisors and instructors
- A writing sample demonstrating the applicant's writing and analytical ability. Please view the Online DSW website (<https://louisville.edu/>)

online/programs/doctoral/online-doctor-of-social-work/?tab=apply) for required prompts to complete the personal statement.

- Personal statement of goals for pursuing the Doctor of Social Work degree. Please view the Online DSW website (<https://louisville.edu/online/programs/doctoral/online-doctor-of-social-work/?tab=apply>) for required prompts to complete the personal statement.

The admission process involves the following:

- DSW Admissions Committee review of application materials
- Applicants may be interviewed per DSW Admissions Committee's recommendations
- DSW Program recommendation to the Graduate School

Program Requirements

Code	Title	Hours
Core Courses		
DSW 700	Social Service Leadership and Teaching & Learning: History, Philosophy & Current Practices	3
DSW 701	Ethics, Equity, and Social Justice: Theory and Practice	3
DSW 702	Implementation Science, Program Development, & Administration	3
DSW 705	Program Evaluation	3
DSW 706	Applied Social Service Leadership, Management & Practice	4
DSW 707	Program Planning, Finance, & Budgets	3
DSW 708	Social Work Teaching & Learning: Theories, Methods & Assessment	4
DSW 709	Teaching in Social Work: Course Design, Instruction & Evaluation	3
DSW 704	Research Methods	3
DSW 710	Policy Analysis & Advocacy: Contemporary Issues	3
DSW 711	Integrative Seminar & Qualifying Assessment	3
DSW 712	Capstone Project I	3
DSW 713	Capstone Project II	3
DOCT 600	Doctoral Candidacy	0
Minimum Total Hours		41

Practicum Experiences

Students complete two practicum experiences. In the fall semester of the second year, students complete a leadership practicum concurrently with Applied Social Service Leadership, Management & Practice typically in the student's place of employment. In the spring semester of the second year, students complete a teaching practicum concurrently with Social Work Teaching & Learning: Theories, Methods & Assessment.

Graduation Requirements

- Minimum cumulative GPA of 3.0 at program completion
- Successful completion of all courses in the curriculum plan
- Proficiency rating of at least 85% on the qualifying assessment
- Successful defense of a thesis or capstone project
- Completion of all school and university requirements for awarding of the degree
- Completion of the program within four years from the time of passing the qualifying assessment

Doctoral Qualifying Assessment

The qualifying assessment allows students to demonstrate their abilities to apply and integrate their skills and readiness to address complex issues within capstone projects.

Doctoral Capstone Project

After admission to candidacy, students complete an original capstone project under the supervision of a faculty mentor and other content expert mentors. Students will defend their capstone projects.

Social Work (PhD)

Doctor of Philosophy in Social Work

Unit: Kent School of Social Work and Family Science (<https://louisville.edu/kent/>) (GK)

Department: Social Work (<https://louisville.edu/kent/academics/doctor-of-philosophy-in-social-work/>)

Program Website (<https://louisville.edu/kent/academics/doctor-of-philosophy-in-social-work/>)

Academic Plan Code(s): SW_ _PHD

Program Information

Mission statement: The program develops scholars prepared to create knowledge through research that informs interventions and policies and educates future social workers to address critical social problems and pursue social justice. The program also prepares its graduates for positions in academic and related research settings.

Goals:

1. Graduates will demonstrate advanced critical thinking skills and knowledge necessary to be leaders in the social work profession as researchers, academicians and advocates for social justice.
2. Graduates will demonstrate mastery of an area of theoretical and methodological expertise to address specific social problems.
3. Graduates will demonstrate mastery of research methodology and advanced statistics, including both quantitative and qualitative methods.
4. Graduates will demonstrate mastery of the knowledge and skills necessary to prepare future social workers to address complex social problems.

For additional information about the PhD Program in the Raymond A. Kent School of Social Work and Family Science, click here (<http://louisville.edu/kent/academics/doctor-of-philosophy-in-social-work/>).

Program Components:

The components of the program include: (a) coursework, (b) comprehensive examination, (c) dissertation, and (d) mentoring and professional development. The program requires a total of 51 credit hours. A revised curriculum is nearing final stages; minor adjustments are possible.

Admission Requirements

Interested applicants will want to view the PhD Admissions page (<https://louisville.edu/kent/academics/phd-social-work-apply/>), and our PhD Application Guidance reference to walk through the general application process. Materials are due December 1st of each year. New cohort members can typically look forward to entry for the following Fall Semester.

Application materials include the following:

1. Graduate Admissions Application (<https://graduate.louisville.edu/admission/apply/>)
2. Doctoral program application
3. Non-refundable application processing fee
4. Official Transcripts
5. Letters of recommendation
6. Writing sample
7. Personal statement
8. Resume
9. TOEFL/IELTS/Duolingo (if required)

The admission process involves the following:

- Review of application materials by the doctoral admissions committee
- Admission committee interviews with those recommended
- Recommendations of selected applicants are forwarded to the Graduate School

*Note: Admission is typically limited to individuals who hold a Master in Social Work degree—i.e., MSW, MSSW—from programs accredited by the Council on Social Work Education (CSWE) or international equivalents. Two years of full-time post-master's degree experience is advised. However, applicants without a Master's degree in social work, but with a Master's degree in another related discipline are welcome to apply and will be considered on a case by case basis.

Program Requirements

Code	Title	Hours
Core Courses		
SW 729	Pro Seminar I: Foundations of Scholarly Writing	1
SW 732	Theory I: Philosophy of Science & the Development and Application of Theory in Social Work Research	3
SW 733	Foundation Research Methods	3
SW 734	Introduction to Social Statistics and Data Analysis	3
SW 741	Systemic Change: Identifying and Intervening in Issues of Social Justice	3
SW 742	Theory II: Theory-Driven Analysis of Social Problems to Inform Practice & Social Welfare Policy	3
SW 743	Advanced Research Methods	3
SW 744	Applied Regression Analysis	3
SW 750	Independent Study: Examination of Scholarly Literature	3
SW 751	Independent Study: Mentored Research Experience	3
SW 752	Qualitative Methods: Design, Data Collection, and Analysis (SW 751 Independent Study: Mentored Research)	3

SW 761	Advanced Scholarly Writing to Fund and Disseminate Research to Diverse Audience	3
SW 764	Teaching in Social Work	3
SW 765	Advanced Qualitative Research: Design, Data Collection, and Analysis	3
SW 780	Pro Seminar II: Comprehensive examination Preparation	1
SW 781	Teaching Practicum	3
Elective or Additional SW 750 or 751 Independent Study		6
SW 799	Dissertation Preparation	6
DOCT 600	Doctoral Candidacy	0
Minimum Total Hours		56

The coursework consists of 56 credit hours, including 38 credit hours of core curriculum, twelve (12) hours of individualized curriculum (i.e. independent studies and electives), and six (6) credit hours of dissertation preparation. Six (6) of the twelve (12) individualized credit hours must be in research methods or statistics.

Comprehensive Examination

The comprehensive examination evaluates knowledge and skill deemed critical prior to beginning the dissertation component. Students are eligible to write their comprehensive examination upon successful completion of all required coursework. A thorough description of the comprehensive examination details the following requirements: (a) eligibility, (b) students' exam committees, (c) exam committee roles and responsibilities, (d) expected content of the exam, (e) length of exam and time allotments, and (f) evaluation of student performance.

Following the passage of the comprehensive examination, students are admitted to *Candidacy* status and proceed with their dissertation:

2nd Year: Summer : Dissertation Preparation (six (6) credit hours)

Dissertation

The primary requirement of a dissertation is that it contributes to the knowledge base of the social work profession. It must represent independent work and be based on original research. Dissertation committees have at least four members and must include one member outside of the Kent School. If the outside member does not have a primary appointment as UofL faculty but is otherwise qualified, they may be granted ad hoc approval to participate. Dissertation information such as deadlines and preparation guidelines dictated by the University are at the Graduate School website (<https://louisville.edu/graduate/current-students/thesis-dissertation-information/>). Please note semester deadlines and that the Request to Schedule Final Oral Defense form must be completed by the student. The required steps to complete the dissertation at the Kent School can be found in the Dissertation Guidelines.

Sociology (MA)

Master of Arts in Sociology (SOCIMA)

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Sociology (<https://louisville.edu/sociology/>)

Program Website (<https://louisville.edu/sociology/graduate-studies/>)

Academic Plan Code(s): SOCIMA

Program Information

The Department of Sociology, in the College of Arts and Sciences, offers graduate training leading to the Master of Arts in Sociology. The 34 credit hour program of study seeks to provide graduate education at the highest standards, introducing students to the current state of sociological knowledge and methods through quality classroom instruction, faculty-student collaboration, and independent student research and practical learning opportunities.

The program is designed to prepare students for the pursuit of a PhD in sociology or for moving directly into the workforce for a career in government, nonprofits, or the private sector.

The Department of Sociology offers a master's degree in sociology, a doctoral degree in applied sociology, and a joint master's-doctoral degree in sociology which allows a student to be admitted to the master's program and, upon completion, enter the PhD program without having to re-apply.

Admissions Requirements

We are committed to a holistic review of applications, considering course grades and GPA(s) alongside writing samples, personal statements, and letters of recommendation. However, **admission into our program requires:**

For the MA or joint MA-PhD:

- An undergraduate degree from an accredited institution and a cumulative GPA of 3.2.
- Previous undergraduate coursework (and minimum grades) in statistics (B+), research methods (B), and social theory (B). (Students may be allowed to use equivalent courses for these prerequisites and should provide a course syllabus for the Department to review.)
- If an international student, either a TOEFL (<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.ets.org%2Ftoefl&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e15%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslIYiOilwLjAuMDA%3D%3D%7C0%7C%7C&sdata=JdwC%2FbZCcZBxKnulLaNiqti1%2BcPkjYtPbYuSQWkYTg4%3D&reserved=0>) score of 213 (on computer-based test) or 79-80 (on the internet-based test), an IELTS ([https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fenglishtest.duolingo.com%2F&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e15%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslIYiOilwLjAuMDA%3D%3D%7C0%7C%7C](https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.ielts.org%2F&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e15%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslIYiOilwLjAuMDA%3D%3D%7C0%7C%7C&sdata=5YlljqMQv63m46xUiZ4Psp1P%2FbWwrgA443HLb4ROJRA%3D&reserved=0)) score of at least 6.5, or Duolingo (<https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fenglishtest.duolingo.com%2F&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e15%7CTWFPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslIYiOilwLjAuMDA%3D%3D%7C0%7C%7C>)

Two letters of recommendation if applying to the MA program and three letters if applying to the joint MA-PhD or PhD program, preferably from former instructors and in sociology, if possible.

(Those serving as references should complete the online recommendation form emailed to them once the student has started an application *and* include a discursive letter of recommendation to that same site.)

- A curriculum vitae or résumé.
- Proof of English language proficiency in the form of TOEFL (<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.ets.org%2Ftoefl&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e158ae391ad9%7CTWfPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIsIIAIC%3D%3D%7C0%7C%7C%7C&sdata=w2f2x4EpodZoCk4tGUQ3cSTPlB33%2FkOoUGR8gqIVXXU%3D&reserved=0>), IELTS (<https://nam11.safelinks.protection.outlook.com/?url=http%3A%2F%2Fwww.ielts.org%2F&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e158ae391ad9%7CTWfPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIsIIAIC%3D%3D%7C0%7C%7C%7C&sdata=2wBollQaZqz0mn00IA%2FmU%3D&reserved=0>), or Duolingo (<https://nam11.safelinks.protection.outlook.com/?url=https%3A%2F%2Fenglishtest.duolingo.com%2F&data=05%7C02%7Cjonettaweber%40louisville.edu%7C5a054da3aa4a4a13d76808dd09a9e7d6%7Cdd246e4a54344e158ae391ad9%7CTWfPbGZsb3d8eyJFbXB0eU1hcGkiOnRydWUslYiOilwLjAuMDAwMCIsIIAIC%3D%3D%7C0%7C%7C%7C&sdata=XVO4sQbAhTq3HWZ1C%3D%3D%7C0%7C%7C%7C&sdata=5BsuU8bHDF5tMFKFB%2Fg%2FyblU%3D&reserved=0>), if an international student for whom English is not their native language.
- (A list of countries for which proficiency scores are waived, as well as other information for international students, can be found here (<https://catalog.louisville.edu/graduate/application-admission/#text>) and at the University's International Center webpage (<https://louisville.edu/internationalcenter/>)).
- A writing sample, such as a senior-level course paper (if applying to the MA or joint MA-PhD program) and either the student's written thesis or another completed original independent work of research (if applying to the PhD program).
- A personal statement (500-750 words) addressing *all* of the points below and giving the Department's Graduate Committee a basis for evaluating the student's interest in and ability to complete the program:

- Please explain your reasons for applying to the master's program in sociology at the University of Louisville.
- Discuss your professional or occupational objectives and how you envision the department's program fitting into those objectives.
- Describe the areas of sociology you find especially interesting for study and/or research and identify the sociology faculty with whom you might be interested in working.
- Reflect on your experiences, skills, and/or knowledge related to your potential to engage in applied research in this graduate program.

All applicants must submit to the Graduate Admissions Office:

- A graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>). (Directions for applying, submitting the following materials, and application fee information can be found here (<https://louisville.edu/graduate/futurestudents/application-directions/application-directions/>).)
- Official copies of transcripts from all accredited colleges/universities attended. (Students with international transcripts must abide by the Graduate School's requirements found here (<https://catalog.louisville.edu/graduate/application-admission/#text>).)

For the PhD:

- Please explain your reasons for applying to the doctoral program in sociology at the University of Louisville.
- Discuss your professional or occupational objectives and how you envision the department's program fitting into those objectives.
- Describe the areas of sociology you find especially interesting for study and/or research and identify the sociology faculty with whom you might be interested in working.

NOTE: Applicants must identify in their personal statement one or more of our faculty with whom they would like to work; however, individual faculty are not involved in selecting applicants nor does our department operate with research teams under the supervision of a particular faculty member, so applicants do not need to seek permission from individual faculty prior to applying and should direct all inquiries to the Graduate Program Advisor.

Students may supplement their application file with GRE scores, but **GRE scores are not required for admission.**

Application Deadlines

The **application deadline for fall admission** is January 5 for those wishing to be considered for department funding (<https://louisville.edu/sociology/graduate-studies/graduate-assistantships/>) (e.g., graduate teaching or research assistantships) and June 1 for those not seeking funding. For the PhD program, the application deadline for spring admission is October 15 whether seeking funding or not. (There are no spring admissions into the MA or joint MA-PhD program and no summer admissions into any programs in sociology.)

Funding Opportunities

Only applicants to the joint MA-PhD program or the PhD-only program are eligible for funding. Students wishing to be considered for funding should submit a letter of interest addressing why they would be a good candidate for an assistantship as described here (<https://louisville.edu/sociology/graduate-studies/graduate-assistantships/>).

Sociology, Applied (PhD)

Doctor of Philosophy in Applied Sociology

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)
Department: Sociology (<https://louisville.edu/sociology/>)
Program Website (<https://louisville.edu/sociology/graduate-studies/>)
Academic Plan Code(s): ASOCPHD

Program Information

The Department of Sociology offers a PhD in Applied Sociology, which is focused on training professional researchers at the highest level to follow the discipline's focus on bringing scientific understandings to the study of social issues and problems. Training is designed to prepare students for both academic careers and meeting the growing demand for applied sociologists who are qualified to address directly the problems facing not only our state but also our nation and the world.

The Department of Sociology offers a master's degree in sociology, a doctoral degree in applied sociology, and a joint master's-doctoral degree in sociology which allows a student to be admitted to the master's program and, upon completion, enter the PhD program without having to re-apply.

Admissions Requirements

We are committed to a holistic review of applications, considering course grades and GPA(s) alongside writing samples, personal statements, and letters of recommendation. However, **admission into our program requires:**

For the MA or joint MA-PhD:

- An undergraduate degree from an accredited institution and a cumulative GPA of 3.2.
- Previous undergraduate coursework (and minimum grades) in statistics (B+), research methods (B), and social theory (B). (Students may be allowed to use equivalent courses for these prerequisites and should provide a course syllabus for the Department to review.)

IELTS (

- Reflect on your experiences, skills, and/or knowledge related to your potential to engage in applied research in this graduate program.

For the PhD:

- Please explain your reasons for applying to the doctoral program in sociology at the University of Louisville.
- Discuss your professional or occupational objectives and how you envision the department's program fitting into those objectives.
- Describe the areas of sociology you find especially interesting for study and/or research and identify the sociology faculty with whom you might be interested in working.

NOTE: Applicants must identify in their personal statement one or more of our faculty with whom they would like to work; however, individual faculty are not involved in selecting applicants nor does our department operate with research teams under the supervision of a particular faculty member, so applicants do not need to seek permission from individual faculty prior to applying and should direct all inquiries to the Graduate Program Advisor.

Students may supplement their application file with GRE scores, but **GRE scores are not required for admission.**

Application Deadlines

The **application deadline for fall admission** is January 5 for those wishing to be considered for department funding (<https://louisville.edu/sociology/graduate-studies/graduate-assistantships/>) (e.g., graduate teaching or research assistantships) and June 1 for those not seeking funding. For the PhD program, the application deadline for spring admission is October 15 whether seeking funding or not. (There are no spring admissions into the MA or joint MA-PhD program and no summer admissions into any programs in sociology.)

Funding Opportunities

Only applicants to the joint MA-PhD program or the PhD-only program are eligible for funding. Students wishing to be considered for funding should submit a letter of interest addressing why they would be a good candidate for an assistantship as described here (<https://louisville.edu/sociology/graduate-studies/graduate-assistantships/>).

Program Requirements

Code	Title	Hours
<i>Year 1</i>		
Fall		9-10
	SOC 704 Proseminar in Sociology-PhD (only if SOC 604 Proseminar not taken in SOC MA Program) ^{1 hr}	
	SOC 735 Classical Theory OR SOC 738 Contemporary Theory (rotating each year) ^{3 hrs}	
	SOC 691 Topical Seminar (topic will vary from year to year) OR an outside elective ^{3 hrs}	
	SOC 665 Sociology of Gender, or SOC 675 Social Inequality & Stratification, or SOC 685 Race and Ethnicity (on rotating basis, offered every third year) ^{3 hrs}	
Spring		9
	SOC 710 Statistics II ^{3 hrs}	

SOC 740 Social Policy or SOC 691 Topical Seminar (these two courses will rotate each year; seminar topic will vary) ^{3 hrs}

SOC 790 Independent Study OR an outside elective ^{3 hrs}

Summer

SOC 706 Exam Prep (only taken by funded students) ^{3-9 hrs}

Year 2

Fall 9

SOC 715 Statistics III ^{3hrs}

SOC 735 Classical Theory or SOC 738 Contemporary Theory (rotating each year) ^{3 hrs}

SOC 665 Sociology of Gender, or SOC 675 Social Inequality & Stratification, or SOC 685 Race and Ethnicity (on rotating basis, offered every third year) ^{3 hrs}

Spring 9

SOC 740 Social Policy or SOC 691 Topical Seminar (these two courses will rotate each year; seminar topic will vary) ^{3 hrs}

SOC 795 Dissertation Research ^{6 hrs}

Summer

Doctoral Candidacy

Minimum Total Hours 36-37

Special Education, Non-Teaching (MEd)

Master of Education in Special Education

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood, and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Program Website (<http://louisville.edu/education/degrees/med-se/>)

Academic Plan Code(s): SPE_MED

Program Information

This program is not designed to lead to teacher certification.

The non-teaching master's degree in Special Education is designed to advance the knowledge and expertise of professionals who are delivering services for children and adolescents with disabilities through comprehensive-care centers, institutions, hospitals, clinics, day care centers, preschools, and community programs.

Admission Requirements

Admission requirements for this program include the following:

- Graduate Application to the Graduate School (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Admission to the College of Education and Human Development
- Baccalaureate degree in special education, psychology, speech language pathology, occupational therapy or social work from an accredited institution
- Professional certification/license/experience in a field related to autism/intellectual disability
- Statement of professional goals
- Two letters of recommendation

- Test of English as a Foreign Language required of all international students from countries in which English is not the native language; and
- 2.75 cumulative grade point average. (GRE – Not Required)

Program Requirements

Code	Title	Hours
Inquiry (Critical Thinker)		6
EDSP 540	Introduction to Exceptional Children

Select at least 15 credit hours		
Minimum Total Hours		30

Midpoint Assessment: Cumulative GPA of 3.0 or higher; grade no lower than "B-" in all coursework; Target performance or better on all Hallmark Assessment Tasks to date; scored Target or better on Rubrics for Advanced Candidates.

Exit Assessment: Cumulative GPA of 3.0 or higher, grade no lower than "B-" in all coursework; Target performance or better on all Hallmark Assessment Tasks; scored Target or better on Rubrics for Advanced Candidates; positive recommendation from the Special Education Program Committee.

Degree Candidacy: Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

Special Education (MEd)

Master of Education in Special Education

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)
 Department: Special Education, Early Childhood, and Prevention Science (<http://louisville.edu/education/departments/sped/>)
 Program Website (<https://louisville.edu/education/degrees/med-se/>)
 Academic Plan Code(s): See Degree Requirements tab.

Program Information

This program is completed 100% online (<http://louisville.edu/online/programs/masters/master-of-education-in-special-education/>).

The MEd in Special Education with a concentration in Learning and Behavior Disorders, or Moderate and Severe Disabilities, is designed for the Kentucky certified teacher to add certification. Bachelor's-level certified teachers may use the program to add certification in LBD or MSD, and complete the required Rank II/master's degree. Teachers who have already earned a master's degree may use the program to add certification and complete the Rank I.

Learning and Behavior Disorders

Through the MEd in Special Education with a concentration in Learning and Behavior Disorders program, teachers increase their knowledge and expertise in teaching students with Behavior Disorders, Learning Disabilities, Mild Mental Disabilities, and Orthopedic Impairments at all grade levels from kindergarten through high school.

Moderate and Severe Disabilities

The MEd in Special Education with a concentration in Moderate and Severe Disabilities program prepares candidates to teach students with intellectual disabilities that impede academic achievement and adaptive behavior skills (e.g., communication, social behavior, and daily living activities).

Elementary teachers work primarily with beginning or remedial skills in academic content (English language arts, math, science, and social studies) and adaptive behaviors. Middle Grades and Secondary teachers address these skills in addition to preparing students to transition to vocations or to post-secondary education.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Degree Summary

Code	Title	Hours
Core Coursework *		18
Area of Emphasis (Concentration)		18
Minimum Total Hours		36

* EDSP 540 and Teacher Certification are prerequisites for program entry.

Admission Requirements

Applicants are required to submit the following materials:

- Graduate Application to the Graduate School (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Admission to the College of Education and Human Development
- Baccalaureate degree or its equivalent from an accredited institution

- **Valid Kentucky Teaching Certificate or Statement of Eligibility** for candidates outside Kentucky (<https://louisville.edu/online/programs/masters/master-of-education-in-special-education/>).
 - If you are certified in Kentucky, please indicate that on your application. You are not required to submit this documentation as we have access through the Education Professional Standards Board.
 - If you are certified in another state, please read the Out of State (<https://louisville.edu/online/programs/masters/master-of-education-in-special-education/>) disclaimer.
- Official transcripts with a 2.75 minimum GPA in the Bachelor's degree and a 3.0 or higher GPA for graduate work
- Two letters of recommendation
- Personal statement
- Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines

Note: The GRE is no longer required for this degree program.

Candidates who earned a baccalaureate (and/or advanced) degree outside the United States and whose native language is not English must submit official TOEFL/IELTS/Duolingo scores that meet minimum criteria, and must submit an evaluated transcript from WES (World Education Services) or ECE (Educational Credential Evaluators).

Praxis Disclaimer:

"Teacher certification requirements are subject to change. Before registering for the test(s), please refer to the Education Professional Standards Board (EPSB) website at www.epsb.ky.gov (<http://www.epsb.ky.gov/>) or <http://www.ets.org/praxis/ky> (<http://www.ets.org/praxis/ky/>) for current requirements."

The Master of Education in Special Education program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us?tab=disclosures>).

Us?tab=disclosures (<https://louisville.edu/online/About-Us?tab=disclosures>).

Special Education - Advanced Practitioner P-12 (RANK1)

Rank 1 Program in Special Education - Advanced Practitioner P-12

Unit: College of Education and Human Developments (<http://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood, and Prevention Science (<http://louisville.edu/education/departments/sped/>)

Program Webpage (<http://louisville.edu/education/degrees/rank/>)

Academic Plan Code(s): SPE_RK1

Program Information

Rank 1 programs are not degree programs.

Rank 1 programs are planned graduate level programs designed for Kentucky teachers seeking rank change for salary purposes. They are recognized only in the state of Kentucky. By state regulation, Rank 1 status is 60 credit hours of approved graduate credit including a master's degree.

Admission Requirements

- Complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Official transcripts with a minimum 2.75 GPA in the Bachelors degree and 3.0 GPA or higher for graduate work
- Kentucky teaching certificate
- Master's degree/Rank II
- Signed Professional Code of Ethics/Technology User Agreement form

Candidates who earned a baccalaureate (and/or advanced) degree outside the U.S., and whose native language is not English, must submit official TOEFL/IELTS/Duolingo scores that meet minimum criteria, and must submit an evaluated transcript from WES (World Education Services) (<https://www.wes.org/>) or ECE (Educational Credential Evaluators) (<https://www.ece.org/ECE/>).

Program Requirements

Code	Title	Hours
Inquiry (Critical Thinker)		3
Select one of the following		
EDSP 639	Education Research in P-12 Setting	
LEAD 601	Applied Statistics	
Advocacy (Professional Leader)		
Leadership		3
Select one of the following:		
EDSP 651	Professional and Ethical Practice of Applied Behavior Analysis	
EDSP 652	Academic and Behavior Response to Intervention

EDTP 503	Developing Cross-Cultural Competence: Teaching Students from Diverse Backgrounds	
Action (Problem Solver)		3
Select one of the following:		
EDSP 669	Single Case Research Methods and Designs	
EDSP 650	Behavior Assessment (Or capstone course equivalency approved by advisor)	
Area of Emphasis		15
Elective		3
Minimum Total Hours		30

Midpoint Requirement: Candidates are required to submit a mid-program performance assessment to their faculty advisor at the completion of fifteen (15) credit hours of coursework. The faculty advisor will assess the candidate's performance, which must be at the exemplary or target level. The performance assessment must address content, classroom environment, teaching, assessing, and reflection, and an artifact such as a video, to document professional learning.

Exit Requirement: Project that demonstrates exemplary or target in all of the Kentucky Teacher Performance Standards.

Up to fifteen (15) credit hours of graduate credit may be transferred to the Rank 1 program, as long as the student will have completed 60 credit hours of approved graduate credit including a master's degree at the end of the Rank 1 program. Transfer credit must be officially accepted by the advisor and final acceptance is dependent upon receipt of official transcripts.

In the Rank 1 program, at least fifteen (15) credit hours of new graduate coursework must be taken at the University of Louisville.

To complete the program, students must have a minimum 3.0 grade point average. No credit shall be accepted for carrying a grade lower than B-minus.

Special Education, Concentration in Applied Behavior Analysis (MEd)

Master of Education in Special Education - Concentration in Applied Behavior Analysis

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood, and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Program Website (<https://louisville.edu/education/degrees/med-se-a/>)

Academic Plan Code(s): SPE_MEDAUO, SPE_MEDABI

Program Information

The non-teaching master's degree in Special Education is designed to advance the knowledge and expertise of professionals who are delivering services for children and adolescents with disabilities through comprehensive-care centers, institutions, hospitals, clinics, day care centers, preschools, and community programs. **This program is not designed to lead to teacher certification.**

The program offers two different options for students: the Intensive Practicum Option (Degree & Fieldwork) which requires in-person practicum coursework with all other courses online, and the Traditional Option (Degree only) that is completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-education-in-special-education-autism-spectrum-disorder-and-applied-behavior-analysis/>).

Intensive Practicum Option

The Master's in Special Education concentration in Applied Behavior Analysis program's Intensive Practicum Option is designed to prepare students for licensure as a Board Certified Behavior Analyst. Students in this face-to-face option will complete a course sequence that satisfies the course requirements for the Behavior Analyst Certification Board (BACB) Certification Exam. In addition to coursework requirements, students must complete 2,000 hours of supervised field experience to be eligible to take the BACB exam. With careful planning, students in this option may complete the 2,000 hours of supervised field experience during their time in the program. However, many students choose to complete a portion of the required supervised field experience hours after finishing the program and earning the degree. It is important for prospective students to understand that they will not be eligible to sit for the BCBA exam until they have completed all requirements, including 2,000 hours of supervised fieldwork.

Traditional Online Option

Students in the Master's in Special Education concentration in Applied Behavior Analysis program's traditional option will complete a course sequence that satisfies the course requirements for the Behavior Analyst Certification Board (BACB) Certification Exam, allowing them to meet the educational requirements for board certification. This option DOES NOT include supervision. In addition to coursework requirements, students must independently complete 2,000 hours of supervised field experience to be eligible to take the BACB exam. In this option, students will complete all of the required supervised field experience hours on their own outside of the program. It is important for prospective students to understand that they will not be eligible to sit for the BCBA exam until they have completed all requirements, including 2,000 hours of supervised fieldwork. Because the supervised fieldwork hours are not completed during the program, the traditional option within the MEd in Special Education concentration in Applied Behavior Analysis at University of Louisville is not designed to prepare students for licensure immediately upon graduation in any US state or other jurisdiction.

Admission Requirements

Admission requirements for this program include the following:

- Complete application for admission (<https://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- Admission to the College of Education and Human Development
- Baccalaureate degree in special education, psychology, speech language pathology, occupational therapy or social work from an accredited institution

- Professional certification/license/experience in a field related to autism/intellectual disability
- Statement of professional goals
- Two letters of recommendation
- Test of English as a Foreign Language required of all international students from countries in which English is not the native language; and 2.75 cumulative grade point average. (GRE – Not Required)

MEd in Special Education, concentration in Applied Behavior Analysis

Code	Title	Hours
EDSP 603	Experimental Analysis of Behavior	3
EDSP 605	Concepts and Principles in Behavior Analysis	3
EDSP 654	Radical Behaviorism	3
EDSP 669	Single Case Research Methods and Designs	3
EDSP 678	Comprehensive Review of Applied Behavior Analysis	3
EDSP 651	Professional and Ethical Practice of Applied Behavior Analysis	3
EDSP 680	Behavior Analytic Supervision and Consultation	3
EDSP 546	Behavior Analytic Approach to Communication	3
EDSP 650	Behavior Assessment	3
EDSP 671	Behavior Intervention	3
Supervision (optional)		
EDSP 653	Practicum in Applied Behavior Analysis ¹	
Minimum Total Hours		30

¹ Students in the Intensive Practicum Option will take EDSP 653 during each semester in the program, for up to a total of 15 credit hours in the course.

Exit Assessment: Cumulative GPA of 3.0 or higher; grades no lower than B-minus in all coursework; completion of intervention proposal and presentation with a rating of Satisfactory; Target performance or better on all Hallmark Assessments; scored Target performance or better on Advanced Program rubrics; positive recommendation from the Special Education Program Committee.

Degree Candidacy: Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

The program offers two different options for students: the Intensive Practicum Option (Degree & Fieldwork) which requires in-person practicum coursework with all other courses online, and the Traditional Option (Degree only) that is completed 100% online (<https://louisville.edu/online/programs/masters/online-master-of-education-in-special-education-autism-spectrum-disorder-and-applied-behavior-analysis/>).

The Master's in Special Education concentration in Applied Behavior Analysis program's Intensive Practicum Option is designed to prepare students for licensure as a Board Certified Behavior Analyst. Students in this option will complete a verified course sequence (VCS) for the Behavior Analyst Certification Board (BACB) Certification Exam. In addition to coursework requirements, students must complete 2,000 hours of supervised field experience to be eligible to take the BACB exam. With careful planning, students in this option may complete the 2,000 hours of supervised field experience during their time in the program. However, many students choose to complete a portion

of the required supervised field experience hours after finishing the program and earning the degree. It is important for prospective students to understand that they will not be eligible to sit for the BCBA exam until they have completed all requirements, including 2,000 hours of supervised fieldwork.

Students in the Master's in Special Education concentration in Applied Behavior Analysis program's traditional option will complete a verified course sequence (VCS) for the Behavior Analyst Certification Board (BACB) Certification Exam, allowing them to meet the educational requirements for board certification. In addition to coursework requirements, students must complete 2,000 hours of supervised field experience to be eligible to take the BACB exam. In this option, students will complete the required supervised field experience hours on their own outside of the program. It is important for prospective students to understand that they will not be eligible to sit for the BCBA exam until they have completed all requirements, including 2,000 hours of supervised fieldwork. **Because the supervised fieldwork hours are not completed during the program, the traditional option within the MEd in Special Education concentration in Applied Behavior Analysis at University of Louisville is not designed to prepare students for licensure immediately upon graduation in any US state or other jurisdiction.**

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Special Education, Concentration in Learning Behavior Disorders P-12 (MAT)

Master of Arts in Teaching in Special Education, Concentration in Learning Behavior Disorders P-12

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood and Prevention Science (<http://louisville.edu/education/departments/sped/>)

Program Website (<http://louisville.edu/education/degrees/mat-se-lbd/>)

Academic Plan Code(s): SPE_MATLBD, SPE_MATLBO

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-arts-in-teaching-in-special-education/>).

The special education licensure program provides a strong foundation in general education content, special education theory and methods, and teaching experience. Extensive classroom experience allows students to develop the skills, competencies, and confidence for successful teaching, including strategies for inclusion, behavior management, social skill instruction, and modifying instruction in the general curriculum. Students also benefit from the supervision and mentorship of experienced practitioners and field supervisors. The program's special education

professors are experienced practitioners who are experts in their fields as researchers, teachers, and administrators.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program:

1. Complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Grade of C or better in ENGL 102 (<https://catalog.louisville.edu/search/?P=ENGL%20102>), or equivalent
4. Grade of C or better in oral communication course
5. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IETLS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
6. Professional Writing Requirements (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
7. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
8. Acceptable interview
9. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines

Questions about admission should be directed to teacher@louisville.edu.

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

Special Education, Concentration in Learning Behavior Disorders P-12, Alternative Certification (MAT)

Master of Arts in Teaching Special Education, Concentration in Learning Behavior disorders P-12

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood and Prevention Science (<http://louisville.edu/education/departments/sped/>)

Program Website (<http://louisville.edu/education/degrees/mat-se-lbd/>)

Academic Plan Code(s): SPE_MATLBD, SPE_MATLBO

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-arts-in-teaching-in-special-education/>).

The special education licensure program provides a strong foundation in general education content, special education theory and methods, and teaching experience. Extensive classroom experience allows students to develop the skills, competencies, and confidence for successful teaching, including strategies for inclusion, behavior management, social skill instruction, and modifying instruction in the general curriculum. Students also benefit from the supervision and mentorship of experienced practitioners and field supervisors. The program's special education professors are experienced practitioners who are experts in their fields as researchers, teachers, and administrators.

The Alternative Certification program requires that students who are admitted to this program become employed as an LBD teacher on a temporary provisional certificate. Classes start in the Summer each year, and admitted students must secure employment before the start of the Fall term. Those who are not employed, have the option to pursue the traditional version of this program, which requires field placements and student teaching. Completion of this degree/licensure program will only lead to certification as an LBD teacher (not an Elementary, Middle or Secondary content area teacher).

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Special Education - Concentration in Learning Behavior Disorders - Teacher Residency (MAT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Arts in Teaching in Special Education – Concentration in Learning and Behavior Disorders P-12, Teacher Residency

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Program Website (<https://louisville.edu/education/degrees/mat-ac/>)
Academic Plan Code(s): SPE_MATLBD

Program Information

The special education licensure program provides a strong foundation in general education content, special education theory and methods, and teaching experience. Extensive classroom experience allows students to

develop the skills, competencies, and confidence for successful teaching, including strategies for inclusion, behavior management, social skill instruction, and modifying instruction in the general curriculum. Students also benefit from the supervision and mentorship of experienced practitioners and field supervisors. The program's special education professors are experienced practitioners who are experts in their fields as researchers, teachers, and administrators.

Licensure to teach students with learning and behavior disorders prepares candidates to teach students with learning disabilities, behavior disorders, and mild intellectual disabilities at all grade levels from kindergarten through high school. Students with learning and behavior disorders may spend all or part of their time in traditional classroom settings but may also receive special education instruction for part of the day in resource rooms, or in self-contained classrooms within the school.

The Teacher Residency program is designed to assist local school districts in meeting the demand for a diverse cadre of qualified teachers. Residents are enrolled in a one-year MAT program at the University of Louisville while employed with JCPS as a resident. Candidates receive personalized instruction throughout the process to help them succeed in the classroom. Candidates selected for the Louisville Teacher Residency (LTR) program commit to teach in accelerated improvement schools (AIS) for five years.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Teacher Residency program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>)) prior to applying for admission. Admission is competitive.

Applicants must complete/satisfy the following:

1. Application to Graduate School. (<https://graduate.louisville.edu/admission/apply/>) This should be completed three to four weeks prior to the application deadline.
2. Bachelor's degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with major in content area or appropriate prerequisite courses and a minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Grade of C or higher in ENGL 102 (<https://catalog.louisville.edu/search/?P=ENGL%20102>) (or equivalent)
4. C or higher in oral communication course
5. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
6. Professional Statement (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)

7. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
8. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines
9. Acceptable interview with school district

Degree Candidacy: Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (<https://catalog.louisville.edu/graduate/general-policies-procedures-requirements/#text>).

The Master of Arts in Teaching (MAT) in Special Education with a concentration in Learning & Behavior Disorder prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Special Education, Concentration in Moderate/Severe Disabilities P-12 (MAT)

Master of Arts in Teaching in Special Education, Concentration in Moderate/Severe Disabilities P-12

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Department: Special Education, Early Childhood and Prevention Science (<http://louisville.edu/education/departments/sped/>)

Program Website (<http://louisville.edu/education/degrees/mat-se-msd/>)

Academic Plan Code(s): SPE_MATMSD, SPE_MATMSO

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-arts-in-teaching-in-special-education/>).

This program leads to Kentucky certification for Moderate and Severe Disabilities, grades P-12. Applicants to the program should have excellent academic credentials as well as successful experience working with children and/or adults with Moderate and Severe Disabilities. Completion of this degree/licensure program will lead to certification as an MSD

teacher only (not an Elementary, Middle or Secondary content area teacher).

Students must complete weekly field hours in school or community placements that serve individuals with moderate and severe disabilities. Prior to the end of the program a 12-week student teaching placement must be successfully completed.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching program:

1. Complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's Degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with a Minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
3. Grade of C or better in ENGL 102, or equivalent
4. Grade of C or better in oral communication course
5. TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)
6. Professional Writing Requirements (<http://louisville.edu/education/degrees/info/mat-mse-professional-statement/>)
7. Three Letters of Recommendation (<http://louisville.edu/education/degrees/info/lor/>)
8. Acceptable interview
9. Signed Professional Code of Ethics/Technology User Agreement/Statement of Understanding of Admissions Guidelines

Questions about admission should be directed to teacher@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?teacher>).

Admission is competitive. Candidates who meet minimum academic requirements are not guaranteed admission to the program.

Department: Special Education, Early Childhood, and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Program Website (<https://louisville.edu/education/degrees/mat-se-msd-ac/>)

Academic Plan Code(s): SPE_MATMSO

Program Information

This program is completed 100% online (<https://louisville.edu/online/programs/masters/master-of-arts-in-teaching-in-special-education/>).

This program leads to Kentucky certification for Moderate and Severe Disabilities, grades P-12. Applicants to the program should have excellent academic credentials as well as successful experience working with children and/or adults with Moderate and Severe Disabilities (MSD). Completion of this degree/licensure program will lead to certification as an MSD teacher only (not an Elementary, Middle or Secondary content area teacher).

The Alternative Certification program requires that students who are admitted to this program become employed in an MSD classroom on a temporary provisional certificate. Classes start in the Summer each year. Admitted students must secure employment before the start of the fall term. Those who are not employed, have the option to pursue the traditional version of this program, which requires field placements and student teaching.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. **Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky.** Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Special Education - Concentration in Moderate and Severe Disabilities - Teacher Residency (MAT)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Master of Arts in Teaching in Special Education – Concentration in Moderate and Severe Disabilities P-12, Teacher Residency

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)

Program Website (<https://louisville.edu/education/degrees/mat-ac/>)
Academic Plan Code(s): SPE_MATMSD

Program Information

The special education licensure program provides a strong foundation in general education content, special education theory and methods, and teaching experience. Extensive classroom experience allows students to develop the skills, competencies, and confidence for successful teaching, including strategies for inclusion, behavior management, social skill instruction, and modifying instruction in the general curriculum. Students also benefit from the supervision and mentorship of experienced practitioners and field supervisors. The program's special education professors are experienced practitioners who are experts in their fields as researchers, teachers, and administrators.

Licensure to teach students with moderate and severe disabilities prepares candidates to teach students with intellectual disabilities that impede academic achievement and adaptive behavior skills (e.g., communication, social behavior, and daily living activities). Elementary teachers work primarily with beginning or remedial skills in academic content (English language arts, math, science, and social studies) and adaptive behaviors. Middle Grades and Secondary teachers address these skills in addition to preparing students to transition to vocations or to post-secondary education. Students with moderate and severe disabilities may spend all or part of their time in traditional classroom settings, but may also receive special education instruction for part of the day in resource rooms, or in self-contained classrooms within the school. Students with moderate and severe disabilities may have intellectual disabilities, autism, multiple disabilities, or other health impairments.

The Teacher Residency program is designed to assist local school districts in meeting the demand for a diverse cadre of qualified teachers. Residents are enrolled in a one-year MAT program at the University of Louisville while employed with JCPS as a resident. Candidates receive personalized instruction throughout the process to help them succeed in the classroom. Candidates selected for the Louisville Teacher Residency (LTR) program commit to teach in accelerated improvement schools (AIS) for five years.

Although this program has determined that it meets educational requirements for licensure in other US states and jurisdictions, this program is designed specifically to align with Kentucky certification requirements for the supervised student teaching or culminating clinical experience. Therefore, students in this program are required to complete their student teaching or clinical experience at an approved placement location in the state of Kentucky. Please contact the program director to discuss possible arrangements to complete culminating experiences in Southern Indiana before enrolling in the program.

Admission Requirements

Candidates who meet the following criteria may be eligible to apply to the Master of Arts in Teaching, Teacher Residency program. Candidates considering an application to the MAT program should contact the MAT admissions counselor (teacher@louisville.edu) (<http://louisville.edu/cgi-bin/uofl.mail?teacher>) prior to applying for admission. Admission is competitive.

Applicants must complete/satisfy the following:

1. Application to Graduate School (<https://graduate.louisville.edu/admission/apply/>). This should be completed three to four weeks prior to the application deadline.
2. Bachelor's degree from Accredited College or University (<http://louisville.edu/education/degrees/info/bachelors/>) with major in content area or appropriate prerequisite courses and a

- minimum 2.75 Grade Point Average (official transcripts (<http://louisville.edu/education/degrees/info/transcripts/>) required)
- Grade of C or higher in ENGL 102 (<https://catalog.louisville.edu/search/?P=ENGL%20102>) (or equivalent)
 - C or higher in oral communication course
 - TOEFL (<http://louisville.edu/education/degrees/info/toefl/>)/IELTS (<https://www.ielts.org/>)/Duolingo (<https://www.duolingo.com/>)

Speech-Language Pathology (MS)

Master of Science in Speech-Language Pathology

Unit: School of Medicine (<http://louisville.edu/medicine/>) (GM)
 Department: Communicative Disorders (<http://louisville.edu/medicine/degrees/speechpathology/>)
 Program Website (<http://louisville.edu/medschool/surgery/com-disorders/slp/>)
 Academic Plan Code(s): CMDSMS

Program Information

Speech-Language Pathology (formerly Communicative Disorders) is a well-established program that provides its students with comprehensive academic coursework and robust clinical experiences. Communicative Disorders is a Division within the Department of Otolaryngology—Head and Neck Surgery and Communicative Disorders in the School of Medicine. The graduate program offers a unique opportunity to pursue

a Master of Science degree to students *with* and *without* undergraduate degrees in speech-language pathology.

Preparatory Program

Applications from students without a background in speech-language pathology will be submitted automatically to the *Preparatory Program*. The *Preparatory Program* is a full-time, two-semester sequence, beginning each year in the fall (e.g., August).

Core Program

Applications from students who currently hold a bachelor's degree in speech-language pathology or who have completed prerequisite coursework will be submitted automatically to the *Core Program*. The *Core Phase* is a full-time, six-semester sequence beginning each year in the summer.

The Council on Academic Accreditation in Audiology and Speech Language Pathology (CAA) of the American Speech Language Hearing Association (ASHA) accredits the program. Graduating students will be eligible to apply for the Certificate of Clinical Competence by ASHA if all requirements are fulfilled (i.e., certification).

The program has cooperative arrangements with numerous schools, agencies, hospitals, and practice groups in the Kentuckiana region.

Degree Requirements

Candidates for the Master of Science degree in Speech-Language Pathology must complete at least 54 credit hours at the graduate level, exclusive of credits related to the completion of an (optional) master's thesis, any elective coursework, or courses required to complete ASHA certification requirements.

Please refer to the section on Academic Standing (p. 13) in this catalog entitled "Academic Probation" concerning program dismissal/retention in the program.

Summative Assessment

In order to graduate, students must either pass an eight-hour written comprehensive examination (across two days) or successfully defend a thesis. The comprehensive examination or thesis defense must be completed at least five weeks prior to the completion of the graduate program.

Clinical Practicum

The American Speech-Language-Hearing Association requires a minimum of 400 clock hours of supervised clinical practicum in speech-language pathology to be eligible for certification; 325 hours at the Graduate level. All students must have completed a minimum of 25 hours of observation. If these hours were obtained at the undergraduate level, they are not repeated.

Certain prerequisites and standards apply to the clinical practicum component of the program, including minimum coursework requirements, mandatory readings, observations, case report formats, and grading criteria. This information is available in the program office and it is the student's responsibility to become acquainted with these requirements prior to enrolling in clinical practicum.

Falling below a 3.0 GPA in practicum for two consecutive semesters may result in recommended dismissal from the program. Practicum assignments are made at the discretion of the faculty; however, student input is welcomed.

Admission Requirements

The application deadline for the **Preparatory Program** with a fall semester start is always the preceding February 1st. The application deadline for the **Core Program** with a summer semester start is always the preceding February 1st.

Application to the Preparatory Program and the Core Program is now completed via CSDCAS or the Communication Sciences and Disorders Centralized Application System. Applications must be completed and submitted through the CSDCAS Portal (<https://csdcas.liaisoncas.com/applicant-ux/#/login>). The completed application must be in place by February 1st of the admission year. Application materials received after the listed deadline will not be considered.

- A separate application to UofL's Graduate School **IS NOT** required.
- A fee to UofL's Graduate School **IS** required and will be communicated to each applicant via email once the application is processed in CSDCAS.

Admission Criteria

- CSDCAS Application: Applicants should select either Preparatory Program or Core program.
- *Minimum* undergraduate cumulative GPA of at least 3.0 (on a 4.0 scale)
- The GRE is no longer required.
- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement.
- Applicants must provide three letters of recommendation.
- A formal interview may be required of some applicants.
- A resume is required for admission.
- Each applicant must provide a personal statement/essay of less than 1,000 words.

The Master of Science in Communicative Disorders (Speech-Language Pathology) (CMDSMS) program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure> (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

Sport Administration (MS)

Master of Science in Sport Administration

Unit: College of Education and Human Development (<https://louisville.edu/education/>) (GE)
 Department: Health and Sport Sciences (<https://louisville.edu/education/departments/hss/>)
 Program Webpage (<https://louisville.edu/education/degrees/ms-sa/>)
 Academic Plan Code(s): SPADMS, SPADMS_O

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-science-in-sport-administration/>).

The Master of Science in Sport Administration is accredited by the Commission on Sport Management Accreditation (COSMA).

The College of Education and Human Development's Sport Administration program at the University of Louisville prepares students for a variety of management positions in the sport industry. The goals of the faculty and the program are to create an active learning environment for each student and to encourage students to demonstrate a commitment to education, community involvement, and their fellow students. A strong foundation in education, community service, peer networks, and alumni networks is invaluable to students as they prepare to enter the sport industry. Exceptional theoretical and practical knowledge gained through the Sport Administration Program will also provide students with the foundation to become the next generation of leaders, decision makers, and managers in the sport industry.

Degree Summary

Code	Title	Hours
Core Coursework		27
Electives		9
Minimum Total Hours		36

Admission Requirements

Admission will be based on a holistic approach using the following:

- GPA: Students are recommended to have earned a grade-point average of at least 2.75 on a 4.0 point scale in their undergraduate program.
- Prior course work
- Experience
- Two letters of recommendation
- Resume
- A personal statement explaining interest in the program and long-term objectives

In addition, the student must complete the application procedure as required by the Graduate School (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>).

Admission to the program is competitive.

To complete the program, students must have a minimum 3.0 GPA. No credit shall be accepted for carrying a grade lower than C (no C-minus).

Structural Engineering (CERT)

Graduate Certificate in Structural Engineering

Unit: Speed School of Engineering (GS) (<https://engineering.louisville.edu>)

Department: Civil and Environmental Engineering (<https://engineering.louisville.edu/academics/departments/civil/>)

Academic Plan Code(s): STENCSE, STENCSEO

Program Information

This program can be completed 100% online (<https://engineering.louisville.edu/academics/graduate-programs/cert-in-structural-engr/>).

The Civil and Environmental Engineering Department at the J.B. Speed School of Engineering offers an online graduate certificate program in structural engineering to help professionals gain expertise in the field. This certificate provides an excellent opportunity for professionals with a BS in Civil Engineering degree who:

- May have received a job assignment that requires knowledge in structural engineering

- May have fundamental knowledge in Civil Engineering but may need additional skills and formal education in the field of structural engineering
- May need a credential alternative to a full master's degree
- May want to save time and money by choosing to complete a certificate program

The graduate certificate in structural engineering is comprised of four courses (three required core courses and one elective) for a total of twelve (12) credit hours. The online program can be completed within one year.

Credits earned may be applied to the Master of Science in Civil Engineering. Students must apply and be admitted to the master's degree program separately.

Admission Requirements

The admission standards for the Graduate Certificate program in Structural Engineering are as follows:

1. All admission applications for the Graduate Certificate program shall include:
 - a. A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - b. An application fee,
 - c. Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is the baccalaureate degree in Civil Engineering or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).
4. International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79 or higher, an overall IELTS score of 6.5 or higher or a Duolingo score of 105.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the certificate program. Students who seek to return after such a period of time must contact the graduate program director.

Certificate Requirements

The following certificate requirements are mandatory for all Graduate Certificate candidates:

1. The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

2. Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Program Requirements

Code	Title	Hours
CEE 522	Fundamentals of Prestressed Concrete	3
CEE 626 or CEE 523	Masonry Design Timber Design	3
CEE 524	Bridge Design	3
Approved Engineering Electives (600 level)		
Students will choose one of the following:		3
CEE 523	Timber Design	
CEE 626	Masonry Design	
CEE 665	Pavement Design	
CEE 694	Special Topics in Civil Engineering (Building Information Modeling)	
Minimum Total Hours		12

The Certificate Program of Study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a graduate certificate.

Studio Art and Design (MFA)

Master of Fine Arts in Studio Art and Design

Unit: College of Arts and Sciences (<http://louisville.edu/artsandsciences/intro/>) (GA)

Department: Art and Design (<https://louisville.edu/art/>)

Program Website (<http://louisville.edu/art/graduate/mfa-in-studio-art-and-design.html>)

Academic Plan Code(s): SAD_MFA

Program Information

The Hite Institute of Art and Design offers a Master of Fine Arts (MFA) in Studio Art and Design, a 60 credit hour program structured according to the guidelines established by the College Art Association (CAA). The curriculum adheres to rigorous professional standards, with a diverse range of courses and a faculty mentoring model designed to help students meet program objectives and graduate prepared to thrive in a multicultural, global economy.

This selective program provides students with generous access to faculty, ensuring individual attention and guidance. Faculty members respect students' artistic direction while challenging them to explore new avenues of creative discovery. Students can focus on one medium or combine various media under the mentorship of a faculty advisor. Courses are offered in ceramics, drawing, glass, painting, photography, printmaking, sculpture, mixed media, and new media.

The program encourages a multidisciplinary approach, challenging students to develop their creative practice in relation to cultural, social, philosophical, and ethical issues, while gaining a broad understanding of art's role in society.

Students benefit from the Hite Institute's extensive resources, including multiple galleries on campus and downtown Louisville, partnerships

with local art museums and galleries, and an active speaker and colloquia series featuring internationally recognized artists, curators, and gallery directors. The program emphasizes engagement with the wider arts community, offering students opportunities for joint projects and internships with local and regional cultural institutions. These partnerships strengthen connections between the university and the community, giving students a unique chance to participate in civic life.

All MFA students receive either a scholarship or a teaching assistantship.

Admission Requirements

Successful applicants to the MFA program in Studio Art and Design will have a strong academic background and commitment to art, including a thorough understanding of the principles of form, proficiency in various media and technical skills, as well as a fluency in language and discourse in historic and contemporary contexts.

The minimum requirements for admission are:

- A bachelor's degree in studio art from an accredited institution, preferably a BFA.
- At least 48 credit hours in studio art courses and twelve (12) credit hours in art history.
- A minimum undergraduate GPA of 3.0 on a 4.0 scale.
- A portfolio demonstrating technical and conceptual competency.
- International students must meet all criteria outlined in the University's Graduate Catalog, including the English proficiency.

Students who do not meet the minimum requirements (e.g., those with a BA rather than a BFA) must address deficiencies by completing undergraduate courses prior to admission. These courses will not count toward the MFA degree. A minimum GPA of 3.0 must be maintained across all coursework, including any undergraduate courses taken to address deficiencies.

Application Requirements

Applicants to the MFA program must meet the general admission requirements of the College of Arts and Sciences. Specifically, applicants must:

- Hold a bachelor's degree from an accredited institution with a minimum GPA of 3.0 on a 4.0 scale.
- Have completed an undergraduate major (or its equivalent) in a relevant field of study.

In addition to meeting the College's general requirements, applicants must submit the following materials to the Graduate School:

1. An online Graduate Application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
2. An application processing fee
3. At least two letters of recommendation specific to the program, addressing the applicant's academic and/or artistic achievements and potential.
4. Official transcripts of all college work.

The **GRE** is not required for the MFA program. However, applicants for whom English is a second language must submit proof of English proficiency. This can be done by submitting:

- Official **TOEFL** scores of 79 or higher on the internet-based test (IBT), or 213 or higher on the computer-based test (CBT),

- IELTS scores with a minimum overall band score of 6.5 on the academic module, or
- Duolingo scores of at least 105 overall.

Coursework Requirements:

Applicants must have completed a minimum of:

- 48 credit hours in studio art courses
- Twelve (12) credit hours in art history courses

Additional Materials for the Hite Institute of Art and Design:

Applicants must submit the following materials directly to the Hite Institute via SlideRoom (a \$10 fee applies). Access the online SlideRoom portal here: hite.slideroom.com:

1. A portfolio of 20 images demonstrating competence in both conceptual and technical skills;
2. An Artist's Statement (up to 500 words) relevant to the submitted artwork;
3. A Statement of Intent (up to 500 words) outlining the applicant's educational and professional goals in the field of Art and Design;
4. A **résumé** (maximum two pages).

Program Requirements

The MFA program requires a minimum of 60 credit hours, with at least 31 credit hours at the 600 level.

Upon entering the MFA program, students may choose between the three-year or the two-year accelerated track. Each student will select a faculty advisor/mentor with whom they will develop a personalized plan of study. In consultation with their mentor, students will select courses that align with their goals and ensure timely progress toward graduation. Course instructors will evaluate students' achievement and progress in each individual class. Additionally, students' progress will be reviewed in two required seminar courses.

Students' overall progress will be monitored by their faculty mentor, who will regularly assess their work and provide necessary information for the Director of Graduate Studies in Studio Art and Design. This information will be used to conduct an annual review for the Graduate School.

For students in the three-year program:

- After completing the first year and a minimum of 18 credit hours, and again after completing the second year and a minimum of 36 credit hours, students will undergo an MFA Review. This review will be conducted by a committee of at least three faculty members, with the student's mentor serving as the committee chair.

For students in the two-year program:

- The MFA Review will occur after the first year, upon completion of a minimum of 30 credit hours.

In both cases, students who receive a favorable evaluation will continue in the program and begin preparing for their thesis exhibition. Students who do not pass the MFA Review will be re-evaluated in the following semester. Two unsatisfactory reviews may lead to a recommendation for dismissal from the program.

Each MFA candidate will work closely with their mentor to develop a body of work for the thesis exhibition. In the final semester of study, students must demonstrate their artistic accomplishments through:

- A thesis exhibition,
- A written thesis,
- A final oral exam.

The thesis committee will evaluate the student's artistic achievements and determine their successful completion of the MFA program.

Required Coursework

Code	Title	Hours
Graduate Seminar Requirements		6
ART 600	Graduate Seminar (first semester)	
ART 689	MFA Seminar (third semester)	
Teaching, Internship/Service Learning, Professional Development		3-6
ART 696	Teaching Internship I (second semester, prior to receipt of a GTA)	
ART 697	Teaching Internship II (third semester, taken after receipt of a GTA)	
ART 698	Internship in Studio Art / Service Learning (second semester) ¹	
ART 688	Professional Development (second semester)	
Studio Art Practice ²		9
ART 690 MFA Projects (second semester)		
ART 690 MFA Projects (fourth semester)		
ART 690 MFA Projects (sixth semester)		
Studio Art Courses ³		21-24
ART 500/600 level		
Art History and Art Theory Courses ⁴		9
ARTH 642	Theories & Methods in the Visual Arts (first semester)	
ARTH 500/600 level		
500/600 level elective		
Cultural Studies electives outside the Department		6
TWO (2) 500/600 level electives outside the department (Outside department electives must be determined in consultation with the mentor)		
MFA Thesis Project		3
ART 699	MFA Thesis Project	
Minimum Total Hours		60

Satisfactory progress toward the degree requires fulfilling several key requirements, including regular enrollment in graduate courses, meeting course requirements within specified time limits, and maintaining a minimum grade point average of 3.0.

¹ Students who do not choose to teach must select two (2) credit hours of ART 698 instead of ART 696 in their second semester and take a three (3) credit hour studio course in place of ART 697 in their third semester.

² ART 690 is required in the second, fourth, and sixth semesters.

³ Students who choose not to teach must select a three (3) credit hour studio course in place of ART 697 in their third semester.

⁴ A minimum of six (6) credit hours must be in Art History (ARTH), including ARTH 642, which is required and must be taken in the first

semester. The remaining ARTH elective may be taken online or at another university, with the approval of the department chair.

Teaching and Learning (LEADMEd)

Master of Education in Teaching and Learning (LEADMED)

Unit: College of Education and Human Development (<http://louisville.edu/education/>) (ED)

Departments: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>) and Special Education, Early Childhood, and Prevention Science (<https://louisville.edu/education/departments/sped/>)

Program Website (<https://louisville.edu/education/degrees/med-tl/>)
Academic Plan Code(s): See Degree Requirements tab.

Program Information

This program can be completed 100% online (<https://louisville.edu/online/programs/masters/master-of-education-in-teacher-leadership/>).

The Master of Education in Teaching and Learning at the University of Louisville was created in collaboration with P-12 classroom teachers, school district specialists, university faculty and school administrators to enhance the skills, knowledge and expertise of the Rank III certified Kentucky teacher, who has earned a bachelor's degree and wants to build his or her capacity to be a leader in the classroom, school and district.

Core courses (EDAP 637, EDAP 638, EDAP 639, EDAP 677, & EDAP 681) in this program are offered online.

Concentration Areas

The curriculum provides opportunities for customization including endorsements, concentrations, or certificates within the program. Concentration options include:

1. Interdisciplinary Early Childhood Education
2. Elementary Education
3. Middle Grades Education
4. Secondary Education
5. Social Justice Education
6. Content Area or Teaching Specialty
7. Special Education Core
8. Autism
9. Learning and Behavior Disorders (for teachers already certified in Special Education)
10. Moderate and Severe Disabilities (for teachers already certified in Special Education)

Concentration coursework is selected by the student in consultation with the faculty advisor.

Program Highlights

- Individualized to meet professional goals
- Based on three levels of leadership development
- Specialized courses specific to content areas and grade levels
- Preparation pathway to National Board Application
- Courses taught by nationally recognized faculty
- Focused on meeting needs of diverse learners

- Emphasizes coaching and mentoring
- Places your classroom and school as the focus of course discussions and assessments

Admission Requirements

Applicants to the Master of Education in Teacher Leadership program must submit the following:

- **Online Graduate Application for Admission** (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>)
- **Application fee** (non-refundable)
- **Valid Kentucky Teaching Certificate** or **Statement of Eligibility** for candidates outside Kentucky (<http://louisville.edu/online/programs/masters/master-of-education-in-teacher-leadership/apply/#outky>).
 - If you are certified in Kentucky, please indicate that on your application. You are not required to submit this documentation as we have access through the Education Professional Standards Board.
 - If you are certified in another state, please read the Out of State (<http://louisville.edu/online/programs/masters/master-of-education-in-teacher-leadership/apply/#outky>) disclaimer below.
- **Two letters of recommendation** – please list the email addresses for two recommenders in the online application. Recommenders will receive instructions and forms that they will complete online.
- **Signed code of ethics/technology statement** – use Professional Code of Ethics and CEHD Technology Agreement form [PDF] (<http://louisville.edu/education/degrees/files/ethics-tech-form-08.pdf>). Please upload this document to your online application.
- **Current Résumé**
- **Professional Writing Requirement** - please complete the following and upload with your application. Your response should be double-spaced (Times New Roman 12 point font) and no more than three pages.

Written Response

Please review the Professional Dispositions Rubric [PDF] (<http://louisville.edu/education/degrees/forms/dispositions-rubric.pdf>) and consider how you would evaluate your areas of strength as well as those for potential growth in each of the categories. In your essay, please identify three categories that you would rate yourself as "target" or "exemplary" and explain why. Then, identify one area for professional growth, and explain how you envision this program supporting your growth in this area.

- **Official transcripts** for any undergraduate work (minimum GPA of 2.75 preferred) and any graduate work (minimum GPA of 3.0 required)

Please have transcripts sent to:

Graduate School
University of Louisville
Louisville, KY 40292

For electronic transcripts, please have them sent to: gradadm@louisville.edu

Note: Meeting GRE score and/or GPA minimums does not guarantee admission to the program.

Out-of-State Students

Out-of-state prospects who have teacher certification should be advised that we cannot guarantee the program will meet licensure, salary, advancement or other requirements in their state. As part of the admission process, we will require a written statement confirming their interest in the program for personal development and they understand the program is designed to meet Kentucky certification requirements only. For more information, please contact our academic advisor at betty.hampton@louisville.edu (<http://louisville.edu/cgi-bin/uofl.mail?betty.hampton>)

International Students

Applicants who have attended a college or university outside of the United States are also required to submit an evaluation of their transcript through either WES (World Education Services (<http://wes.org/>)) or ECE (Educational Credential Evaluators (<http://ece.org/>)) and other NACES approved evaluators found here: www.naces.org/members. Please note that transcript evaluations can sometimes take several weeks.

- **TOEFL/IELTS/Duolingo** – required of all foreign students from countries in which English is not the native language.
 - Students who hold a baccalaureate or advanced degree from an accredited institution in the U.S. are exempt from this requirement.

Enrollment Requirements

Upon admission to the program, students will be assigned a faculty advisor and will work collaboratively with that advisor to complete any additional requirements needed before enrolling.

Program Requirements

Master of Education in Teaching and Learning

Academic Program Code(s): LEADMEDCON, LEDMEDCOO, LEADMEDELE, LEADMEDIEC, LEADMEDMID, LEADMEDSEC, LEADMEDSJE, LEADMEDSJO

Code	Title	Hours
Teaching and Learning - Level I		
EDAP 637	Using Assessment to Improve Student Achievement	3
EDAP 638	Instructional Strategies for Diverse Learners	3
EDSP 639	Education Research in P-12 Setting	3
<i>Mid-point Assessment</i>		
Successful completion of 15 credit hours; scored Target or better on Rubrics for Advanced Candidates including dispositions assessment, minimum GPA of 3.0.		
Teaching and Learning - Level II		
Concentration Courses ¹		12-15
Elective		0-3
Teaching and Learning - Level III		
EDAP 677	Developing Collaborative Groups: Facilitating, Coaching and Mentoring	3
EDAP 681	Teacher Leadership in Practice	3
Minimum Total Hours		30

Minimum of 15 credit hours in 600-level courses is required.

Transfer credit hours must be officially accepted by the advisor (maximum of six (6) credit hours); final acceptance is dependent upon receipt of official transcripts.

A maximum of nine (9) credit hours taken in non-degree status can be applied toward a master's degree (upon approval of advisor).

All courses must be completed within six years of admission to the program.

Exit Assessment

Successful completion of all required coursework; scored Target or better on Rubrics for Advanced Candidates including dispositions assessment; minimum 3.0 GPA with no grade lower than C.

Degree Candidacy

Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

¹ Concentration coursework is selected in consultation with the student's faculty advisor.

Master of Education in Teaching and Learning—Special Education

Academic Program Code(s): LEADMEDAUT, LEADMEDAUO, LEADMEDSPE, LEADMEDSPO

Code	Title	Hours
Teaching and Learning - Level I		
EDSP 639	Education Research in P-12 Setting	3
EDSP 644	Applied Behavior Analysis	3
EDSP 669	Single Case Research Methods and Designs	3
<i>Mid-point Assessment</i>

Teaching and Learning - Level III		
EDSP 652	Academic and Behavior Response to Intervention	3
EDSP 653	Practicum in Applied Behavior Analysis	3
or EDSP 687	Practicum/Action Research	
Minimum Total Hours		30

Minimum of 15 credit hours in 600-level courses is required.

Transfer credit hours must be officially accepted by the advisor (maximum of six (6) credit hours); final acceptance is dependent upon receipt of official transcripts.

A maximum of nine (9) credit hours taken in non-degree status can be applied toward a master's degree (upon approval of advisor).

All courses must be completed within six years of admission to the program.

Exit Assessment

Successful completion of all required coursework; scored Target or better on Rubrics for Advanced Candidates including dispositions assessment; minimum 3.0 GPA with no grade lower than C.

Degree Candidacy

Students not enrolled during the semester in which they intend to graduate must register for degree candidacy as outlined in the Graduate Catalog (p. 13).

¹ Concentration coursework is selected in consultation with the student's faculty advisor.

Concentration Requirements

Concentrations in the MEd in Teaching and Learning consist of 12-15 credit hours of coursework selected in consultation with the student's faculty advisor.

Teaching English to Speakers of Other Languages - TESOL (CERT)

Graduate Certificate in Teaching English to Speakers of Other Languages

Unit: College of Education and Human Development (<https://louisville.edu/education/>)

Department: Elementary, Middle and Secondary Teacher Education (<https://louisville.edu/education/departments/mise/>)

Program Webpage (<https://louisville.edu/online/programs/certificate-programs/certificate-in-teaching-english-as-an-international-language/>)
Academic Plan Code(s): TEILCLO

Program Information

This program is completed entirely online (<http://louisville.edu/online/programs/certificate-programs/certificate-in-teaching-english-as-an-international-language/>).

The twelve (12) credit hour graduate certificate program in Teaching English to Speakers of Other Languages (TESOL) prepares candidates both inside and outside of the teacher education programs who wish to teach English language learners in a variety of settings.

There are two tracks in the TESOL graduate certificate: educator and non-educator.

The **educator track** is for certified P-12 classroom teachers who wish to add the English as a Second Language endorsement to their initial teaching license. This track addresses the growing demand for classroom teachers to have specialized training qualifying them to teach this diverse, yet distinct population of multilingual learners. The educator track of the graduate certificate program is not designed to lead to initial licensure in any state and is intended to prepare certified Kentucky teachers to earn an endorsement to their license. Although some or all of the program's coursework may count toward stand-alone licenses or endorsements in other states, this program is not an approved endorsement in states other than Kentucky. Out of state students who intend to pursue licensure or an endorsement should check with their state licensing board before making a decision about whether this program will meet their needs. For Kentucky certified teachers, completion of the certificate leads to a teaching endorsement.

The **non-educator track** is for non-educators wishing to teach/tutor English language learners (both in the U.S. and internationally) where state licensure may not be required. These settings include (but are not limited to) private/parochial schools, humanitarian organizations, and other settings where refugee and immigrant populations are in need of English language instruction and support. The non-educator track of the graduate certificate program is not designed to lead to initial licensure or endorsement in any state.

The learning outcomes of the Graduate Certificate in Teaching English to Speakers of Other Languages (TESOL) are to provide students with:

1. The ability to analyze the context of teaching English to multilingual language learners.
2. A mastery of the various teaching methods and approaches used to teach English.
3. The role of English when used both locally and globally.
4. Considerations of the dynamics between language and power in society.
5. An understanding of the differences between first and second language acquisition.
6. The connections between theoretical and applied linguistics as it applies in English language learning environments.
7. The impact of cultural contexts when teaching English to multilingual language learners.

Admission Requirements

The admission standards for the graduate certificate in Teaching English to Speakers of Other Languages are as follows:

- A completed Graduate application (<https://louisville.edu/graduate/apply/>);
- Application fee;
- Official transcript(s) for all previous post-secondary coursework. All transcripts not in English must be certified by an official agency as authentic and translated verbatim into English.
- The minimum requirement for admission is the baccalaureate degree or its equivalent from an accredited institution or current enrollment in a graduate program at the University of Louisville.
- The successful applicant will have an undergraduate grade point average of 3.0 or above (on a 4.00 scale).
- Applicants are required to submit a 500-word essay outlining their rationale for pursuing this certificate as part of their application package.
- International students whose primary language is not English must show English language proficiency. These applicants must either submit an official TOEFL, IELTS or Duolingo score, or hold a baccalaureate degree award from a U.S. Department of Education recognized English language institution.
- The successful applicant will have a total TOEFL score of 80 or higher on the internet based test, 213 or higher on the computer-based test for verification of English proficiency. English proficiency can also be met by submitting an official IELTS score of 6.5 or higher on the academic module or Duolingo score of 105.

Students can be simultaneously enrolled in another University of Louisville graduate degree program and this graduate certificate program.

Certificate Requirements

All students enrolled in the graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate by taking at least one course each academic semester (excluding Winter and Summer sessions). Students who are not enrolled for a period of one academic calendar year will be considered to have withdrawn from the certificate program and must re-apply for re-admission into the program.

The certificate program of study must be completed with a 3.00 overall GPA and with a grade of B-minus or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward this graduate certificate program.

Coursework

Code	Title	Hours
EDAP 518	Survey of Linguistics for Educators	3
EDAP 525	World Englishes	3
EDAP 530	Language, Society & Power	3
EDAP 521	Teaching English Learners in the Classroom ¹	3
or EDAP 535	Teaching English as an International Language	
Minimum Total Hours		12

¹ EDAP 521 is REQUIRED for Kentucky certified teachers who are seeking the English as a Second Language (ESL) endorsement to attach to their Kentucky teaching license.

Certification Requirements:

Kentucky certified teachers who are seeking endorsement as an ESL teacher must:

- (1) Complete 30 hours of field work in a P-12 classroom setting with English language learners under the supervision of a Kentucky certified ESL endorsed classroom teacher;
- (2) Successfully complete all course requirements including final ESL Portfolio containing artifacts representing ESL coursework;
- (3) Pass the ESOL PRAXIS examination;
- (4) Apply (with the assistance of the Educator Preparation Student Services office) for the ESL endorsement with the Kentucky Education Professional Standards Board.

Translational Bioengineering (PhD)

This program was approved for students entering the university in the Summer 2025-Spring 2026 catalog year. For more information about catalog year, go to Catalog Year Information (<https://catalog.louisville.edu/undergraduate/university-wide-unit-specific-policies/catalog-year/>).

Doctor of Philosophy in Translational Bioengineering

Unit: Speed School of Engineering (<https://engineering.louisville.edu/>) (GS)

Department: Bioengineering (<https://engineering.louisville.edu/academics/departments/bioengineering/>)

Academic Plan Code(s): TBE_PHD

Program Information

The Translational Bioengineering PhD program is designed to provide multidisciplinary training in translational bioengineering preparing students to lead research and development in academia, industry and governmental agencies and/or to advance bioengineering technologies through start-up companies as entrepreneurs or within established biomedical companies. The intended audience includes applicants interested in a PhD degree in Bioengineering that have a minimum of a Bachelor's Degree in Engineering from an accredited program, or similar field.

In this program, students will have the opportunity to customize their graduate-level training by selecting one of four concentration areas and one of three tracks. The concentration areas offered include:

- Bioelectronics and Biomedical Devices
- Bioimaging and Biocomputational Modeling
- Biomechanics and Rehabilitation
- Molecular and Tissue Engineering

The three tracks offered are:

- Traditional Bioengineering Research
- Clinical Translational Research
- Entrepreneurship of Bioengineering Technologies

Students who successfully complete the program will demonstrate excellence in designing and conducting research leading to an intellectual contribution to the field; demonstrate in-depth knowledge of their focus area and associated scientific literature; have an understanding of the clinical relevance and ethical implications of their research; have the ability to critically analyze, evaluate and interpret research methods and findings; and have the ability to effectively communicate knowledge of their focus area.

The requirements for the Doctor of Philosophy degree are explained in more detail in the Degree Requirements section (p. 16) of this catalog.

Applicants must meet Graduate School admission requirements along with additional program requirements. Applicants must, as a minimum, have completed a Bachelor's Degree in Engineering from an accredited program or a similar field with a 3.25 cumulative GPA to be considered for admission. Applicants with an undergraduate GPA of 3.0 will be considered for provisional acceptance. The ideal applicant will have completed or be in the process of completing either a Master's (MS or MEng) Degree in Engineering at the time of application.

Applicants must submit:

- a. A completed graduate application (<https://graduate.louisville.edu/admission/apply/>) for the Graduate School
- b. An application fee
- c. Official transcript(s) from each college attended certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
- d. Personal statement (include intended area of study and/or research interest, previous experience related to bioengineering and

how the PhD in Translational Bioengineering will allow them to fulfill their career goals as identified by their focus area of interest).

e. Resume/CV

f. Three letters of recommendation

g. Students whose native language is non-English or degree is from a non-US accredited institution are required to submit TOEFL scores (administered by the Educational Testing Service). A minimum TOEFL score of 79 or high on the internet-based test is required. Alternatively, a minimum of 6.5 on the International English Language Testing System will be accepted or Duolingo score of 105

h. Optional Graduate Record Exam (GRE)

Program Requirements

To earn the Doctor of Philosophy in Translational Bioengineering, students are required to successfully complete the following:

1. 47 credit hours of course work beyond their bachelor's degree (18 core credit hours, 9 specialty are credit hours, and 20 guided elective credit hours)
2. Participate in the Bioengineering Seminar Series (75% attendance rate and one presentation/year as a Doctoral candidate)
3. Pass the preliminary examination
4. Pass the Dissertation proposal
5. Successfully defend a dissertation
6. Submit three or more peer-reviewed journal papers representing their original dissertation research

BE 639	Injury Biomechanics	
BE 658	Rehabilitation Engineering and Assistive Technology	
ME 651	Kinematics and Kinetics of Human Movement	
ME 650	Biofluid Mechanics	

Minimum Total Hours 9

Specialization Area Guided Electives

Courses in Specialization Area must be unique from those taken to fulfill the Focus Area requirement, and must follow a track listed below. Students must work with their advisor to establish a Plan of Study for Specialization Courses. All Specialization courses must be approved by the student's advisor prior to registration.

Traditional Bioengineering (T)

18 credit hours from those listed below with a minimum of six (6) credit hours in engineering courses and Teaching Practicum, BE 668 (two (2) credit hours).

Clinical Translational Bioengineering (C)

12 credit hours from list below designated as ASNB, BIOC, MBIO, OBIO, or PHZB; remaining six (6) credit hours in engineering courses and Clinical Practicum, BE 692 (two (2) credit hours).

Entrepreneurship of Bioengineering Technologies (E)

12 credit hours from list below designated as ENTR; remaining six (6) credit hours in engineering courses and Teaching Practicum, BE 668 (two (2) credit hours).

Transportation Engineering (CERT)

Graduate Certificate in Transportation Engineering (TRENCE)

Unit: Speed School of Engineering (GS) (<https://engineering.louisville.edu>)

Department: Civil and Environmental Engineering (<https://engineering.louisville.edu/academics/departments/civil/>)

Academic Plan Code(s): TRENCE, TRENCEO

Program Information

This program can be completed 100% online (<https://engineering.louisville.edu/academics/graduate-programs/cert-in-transportation-engr/>).

The Civil and Environmental Engineering Department at the J.B. Speed School of Engineering offers an online graduate certificate program to help professionals gain proficiencies in the field of transportation engineering. This certificate provides an excellent educational opportunity for engineers with a BS in Civil Engineering who:

- May have received a job assignment that requires knowledge in transportation engineering;
- May have fundamental knowledge in civil engineering but may need additional skills and formal education in the field of transportation engineering;
- May need an alternative to a full master's degree; or
- May want to save time and money by choosing to complete a certificate program.

The Graduate Certificate in Transportation Engineering program is comprised of four courses (three required core courses and one elective) for a total of twelve (12) credit hours. The online program can be completed within one year.

Credits earned may be applied to a master's degree in Civil Engineering. Students must apply and be admitted to the master's degree program separately.

Admission Standards

The admission standards for the Graduate Certificate program in Transportation Engineering are as follows:

1. All admission applications for the Graduate Certificate program must include:
 - A completed graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for the Graduate School,
 - An application fee, and
 - Official transcript certifying at least a bachelor's degree. All transcripts not in English must be certified as authentic and translated verbatim into English.
2. The minimum requirement for admission is a baccalaureate degree in Civil Engineering or its equivalent from an accredited institution.
3. The successful applicant will typically have an undergraduate grade point average of 2.75 or above (on a 4.00 scale).
4. International students whose primary language is not English must show English language proficiency. Applicants must either submit an official TOEFL, IELTS or Duolingo score, or demonstrate a degree award from an acceptable English language institution. The successful applicant will typically have a total TOEFL score of 79 or

higher, an overall IELTS score of 6.5 or higher or a Duolingo score of 105.

Students can enroll in a Graduate Certificate program either as a non-degree seeking student or as a student simultaneously enrolled in a graduate degree program and this graduate certificate program. Students who wish to earn a graduate degree must meet all admission criteria for the degree program.

All students enrolled in a graduate certificate program are expected to make steady and satisfactory progress toward the completion of the certificate. Students who are not enrolled for a period of more than 12 months will be considered to have withdrawn from the certificate program. Students who seek to return after such a period of time must contact the graduate program director.

Certificate Requirements

Code	Title	Hours
Core Courses		
CEE 560	Traffic Engineering	3
CEE 562	Geometric Design of Highways	3
CEE 664	Fundamentals of Intelligent Transportation Systems	3
Approved electives		
Students will choose one of the following:		3
CEE 660	Transportation Planning and Urban Development	
CEE 661	Environmental Analysis of Transportation Systems	
CEE 662	Airport Planning & Design	
CEE 663	Advanced Traffic Operations	
CEE 665	Pavement Design	
CEE 694	Special Topics in Civil Engineering (Transportation Safety)	
Minimum Total Hours		12

The certificate program of study must be completed with a 3.00 GPA or better for all graduate courses used to satisfy certificate requirements.

Graduate certificate students must take all certificate course work at the University of Louisville. No transfer credits will be accepted toward a Transportation Engineering graduate certificate.

Urban and Public Affairs (PhD)

Doctor of Philosophy in Urban and Public Affairs

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Urban and Public Affairs (<https://louisville.edu/upa/>)

Program Website (<https://louisville.edu/upa/programs/phd/>)
Academic Plan Code(s): UPA_PHD

Program Information

The PhD in Urban and Public Affairs is an interdisciplinary degree that prepares graduates for careers in teaching and research, policy analysis, public administration, land use and environmental planning, and economic development. Three field areas are offered: Public Administration, Urban Planning, and Sustainability.

Students are required to complete 48 credit hours of study, of which twelve (12) credit hours are dissertation research. Students must pass a qualifying examination before commencing formal dissertation work. Students should consult the Program Guidelines for details.

Academic Policies

Waivers And Prerequisites

Students who have recently and satisfactorily completed equivalent courses elsewhere may request that up to twelve (12) credit hours of coursework count towards their 48 credit hours of required PhD classes. Students who are not prepared for advanced study or do not hold the prerequisites for a particular course will be required to complete remedial work. Such courses do not count toward degree credit. Students should consult the Program's Student Guide (<http://louisville.edu/upa/programs/phd/>) for details.

Dismissal and Academic Standing

Any student with a grade point standing below 3.0, or experiencing similar academic problems, will be placed on academic probation by the Graduate School. Students are ordinarily not permitted to continue on academic probation for more than one semester. Students not rectifying these academic problems after one semester will be recommended for dismissal. In addition, students receiving more than two grades below a B-minus in any graduate-level course (600 level or above) will be dismissed from the program. No grade below a C-minus will be counted towards the fulfillment of degree requirements. The Program Director will review the performance of students each semester to ensure students are making satisfactory progress. Students not making satisfactory progress are subject to dismissal from the program.

Students who do not complete all program requirements within four years of reaching doctoral candidacy status ordinarily will be dismissed from the program.

Qualifying (Comprehensive) Exam

To qualify for PhD candidacy, students must satisfactorily complete a Comprehensive (or Qualifying) Examination. Students must sit for this exam as soon as they are eligible. The Comprehensive (Qualifying) Examination is held in summer each year.

Consult with the Program Director and refer to the Program's Student Guide (<http://louisville.edu/upa/programs/phd/>) for details about the examination.

Page Photo: Chris Watson, 2005, CreativeCommons 2.0.

Admission Requirements

Students must complete the Online Graduate Application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>) for admission and submit all original documents required for admission to the Graduate School.

The recommended qualifications for admission to the Urban and Public Affairs doctoral program are as follows:

- Bachelor's degree with at least a 3.0 GPA (on 4.0 scale);
- Master's degree with at least a 3.5 GPA (on a 4.0 scale);
- GRE scores;
- All applicants for whom English is a second language must also submit official TOEFL scores of 79 or higher on the internet-based test, 213 or higher on the computer-based test. English proficiency can also be met by submitting official IELTS scores of at least 6.5 overall band score from the academic module exam or official Duolingo overall score of 105. Students holding a bachelor's or advanced degree from an accredited institution in the United States may be exempt from this requirement;
- A personal interview with members of the PhD Admissions Committee may be required for applicants not fully satisfying (normal) admissions requirements. Interviews will be conducted online.

Applications must include:

- All transcripts from all institutions attended;
- A statement of purpose of approximately 1000-1500 words, describing the students' background, research interests in Urban and Public Affairs, and intended career goals;
- At least two letters of recommendation (preferably from former professors).

The program gives preference to applicants who intend to study full-time and who can be supported with financial aid (i.e., a Graduate Research Assistantship or a Fellowship). A few (exceptionally qualified) part-time students may be admitted if they can demonstrate they have very flexible schedules, can attend daytime courses, and can fully participate in program and department functions.

Students should consult the Program's Student Guide (<http://louisville.edu/upa/programs/phd/>) for additional details and requirements.

Deadlines

Fall Admissions Deadline: July 15 (before February 1 for a University Fellowship or a Graduate Assistantship)

Spring Admissions Deadline: November 15

Program Requirements

The PhD in Urban and Public Affairs consists of 48 credit hours.

Code	Title	Hours

Doctoral Candidacy

After completing all required coursework, including twelve (12) credit hours of dissertation research, and passing the qualifying exam, each student is required to maintain continuous enrollment in DOCT 600 Doctoral Candidacy until they graduate.

Departmental Colloquia

The Department presents colloquia on a variety of urban-related topics 3-4 times per semester. PhD student attendance at these meetings is required.

¹ Courses require approval of the Program Director.

Urban Planning (MUP)

Master of Urban Planning

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)
Department: Urban and Public Affairs (<https://louisville.edu/upa/>)
Program Website (<https://urbanlouisville.org/master-of-urban-planning/>)

Academic Plan Code(s): See Concentration Requirements tab.

Program Information

Fully accredited by the Planning Accreditation Board (PAB) and ranked #23 nationally according in Planning Educators in the 2012 Planetizen guide, the Master of Urban Planning (MUP) Program strives to play an important role in the University of Louisville's urban/metropolitan mission by creating the best possible learning environment for the student whose goal is to become a planning practitioner, by advancing the state of knowledge in the planning field through faculty research, and by bringing that knowledge to bear on the challenges facing the community.

The MUP Program prepares students to work in a wide variety of fields, including land use and environmental planning, urban design, historic preservation, transportation planning, community development, housing planning, economic development planning, real estate development, and sustainability. With the continuing expansion of Louisville and the nation's other metropolitan areas, urban planning is one of the leading professional fields in terms of demand and job satisfaction, according to surveys by Jobs Rated Almanac and the Encyclopedia of Careers and Vocational Guidance.

Students have the option to specialize in one of two concentration areas: community development or sustainability. Students have the opportunity

to benefit from working on real planning problems through the required internship and studio courses. Studio courses are taught at the Urban Design Studio, located in downtown Louisville and operated by the MUP Program.

The degree requires 39 credit hours (two years of full-time study or the equivalent in part-time study), although up to six (6) credit hours of relevant graduate course work may be transferred into the program. Students may enroll on a part-time or full-time basis. Classes are held in the evenings to meet the scheduling needs of persons holding full-time jobs.

Accelerated BA/BS and MUP

Undergraduate students interested in the program's accelerated options should visit the catalog pages for the BA in Sustainability (<https://catalog.louisville.edu/undergraduate/majors/sustainability-ba/>) or the BS in Urban Studies (<https://catalog.louisville.edu/undergraduate/majors/urban-studies-bs/>) for more information.

Degree Requirements

Code	Title	Hours
Core Coursework		18
Internship and Studio		6
Concentration or Approved Electives in Non-Concentration Option		15
Minimum Total Hours		39

Admission Requirements

Applicants must hold a bachelor's degree (any major is acceptable) and must submit two letters of reference (at least one from someone familiar with the applicant's academic abilities) and a statement of purpose. Graduate Record Examination (GRE) scores are recommended but are not required. Applicants whose native language is not English and who do not hold a degree from a university where the language of instruction is English must submit the results from an English proficiency exam. The minimum acceptable scores are 105 for Duolingo English, 80 for TOEFL, and 6.5 for IELTS.

Admission is competitive; successful candidates have a minimum undergraduate GPA of 3.0 (B).

An application form can be obtained from the Graduate School (<https://graduate.louisville.edu/admission/apply/>), all required application materials must be submitted including the application for admission.

Juris Doctor/Master of Urban Planning Dual Degree Program

The Brandeis School of Law will allow students in the dual degree program to apply nine (9) credit hours of approved courses in urban planning as electives toward the JD degree. The Brandeis School of Law will accept each of these urban planning courses on a pass/fail basis, provided that the student earn at least a B (3.0) in the course. The following MUP courses are approved to be counted as electives toward the JD degree:

Code	Title	Hours
URBS 601	Planning Theory & History	3
URBS 614	Transportation and Land Use Planning	3
URBS 672	Mediation and Dispute Resolution	3
URBS 615	Environmental Policy	3
URBS 662	Public Budgeting and Finance	3
URBS 655	Human Resources Management	3
URBS 651	Foundations of Public Administration	3
URBS 624	Urban Transportation Planning	3
URBS 621	Housing and Community Development	3
URBS 622	Historic Preservation & Sustainable Practice	3
URBS 611	Real Estate Principles	3

Any other MUP course approved by the Associate Dean of Student Life at the Brandeis School of Law, upon individual petition by a dual-degree student.

The urban planning program will allow students in the dual degree program to apply nine (9) credit hours of approved courses in law as electives toward the MUP degree. The urban planning program will accept each of these law courses on a pass/fail basis, provided that the student earn at least a C (2.0) in the course. The following JD courses are approved to be counted as electives toward the MUP degree:

- LAW 862 Administrative Law
- LAW 841 Energy Law
- LAW 931 Environmental Law
- LAW 820 Constitutional Law II
- LAW 807 Property II
- LAW 902 Real Estate Transactions
- LAW 839 Water Resources Law and Policy
- Any other JD course approved by the Director of the MUP Program in the School of Urban and Public Affairs, upon individual petition by a dual degree student.

In addition to the above cross-application of urban planning credits toward the JD degree and of law credits toward the MUP degree, students in the dual degree program shall be required to take URBS 604/LAW 904, a three (3) credit hour interdisciplinary course cross-listed in both law and urban planning. URBS 604/LAW 904 shall count as a three (3) credit hour

graded elective toward the JD degree, and likewise shall count as a three (3) credit hour graded elective toward the MUP degree. To receive MUP credit, the student must earn at least a B (3.0) in the course.

The Master of Urban Planning program prepares students to meet the requirements for certification and/or licensure. If you plan to pursue professional licensure or certification you should first determine your state's criteria for examination and licensure to see how/if our program meets those requirements prior to enrollment. We recommend that you also contact your state's licensing board directly to verify that the requirements have not changed recently and to answer any questions especially those regarding additional requirements beyond the degree.

More information about certification or licensure is available at the following website: <https://louisville.edu/about/departments/academic->

planning-accountability/disclosures/professional-licensure (<https://louisville.edu/about/departments/academic-planning-accountability/disclosures/professional-licensure/>).

For programs with an online option, more information about certification or licensure is available here: <https://louisville.edu/online/About-Us?tab=disclosures> (<https://louisville.edu/online/About-Us/?tab=disclosures>).

Women's, Gender and Sexuality Studies (CERT)

Graduate Certificate in Women's, Gender and Sexuality Studies

Unit: College of Arts and Sciences (<https://louisville.edu/artsandsciences/>) (GA)

Department: Women's, Gender and Sexuality Studies (<https://louisville.edu/wgs/>)

Program Website (<https://louisville.edu/wgs/graduate-studies/>)

Academic Plan Code(s): WGSTCWG

Program Information

The Women's, Gender and Sexuality Studies graduate certificate is a 15 credit hour program for students who have completed a BS or BA degree in any field. Students with no prior coursework in Women's, Gender and Sexuality Studies may be required to take additional classes in preparation for admission to the certificate program.

Admission Requirements

Admission to the graduate certificate in Women's, Gender and Sexuality Studies is open to any student who has completed a BA or BS degree with a 3.0 overall GPA. Students may pursue the certificate outside the framework of a graduate degree program or in conjunction with a graduate degree program in another University of Louisville department.

Students wishing to pursue the certificate must apply for admission to the Graduate School by:

1. Completing the online graduate application (<https://graduate.louisville.edu/admission/apply/>) and submitting the application fee, and
2. Submitting an official transcript reflecting previous degrees earned.
3. At least two letters of recommendation.

Students must also send directly to Women's, Gender and Sexuality Studies a one-to-two page letter of intent, describing how the Women's, Gender and Sexuality Studies graduate certificate will further their personal or professional goals.

Students wishing to pursue the graduate certificate in conjunction with a graduate degree program in another University of Louisville department should first apply and be admitted to the degree program before applying for admission to the Women's, Gender and Sexuality Studies graduate certificate program.

Program Requirements

1. Students must complete a total of 15 credit hours in courses approved for graduate credit in accordance with the policies of the Graduate School, approved by the Women's, Gender and Sexuality Studies director of graduate studies.

2. One course among the 15 credit hours must be selected from the list of approved Core Courses (Community Engaged Research Methods, History, or Theory); twelve (12) credit hours must be WGST electives. Core courses may also be used to satisfy electives.
3. At least two courses must be at the 600-level.
4. Coursework toward the graduate certificate in Women's, Gender and Sexuality Studies may also count toward the student's graduate degree.

Master of Arts in Women's, Gender and Sexuality Studies

The Women's, Gender and Sexuality Studies Master of Arts degree program is open to qualified individuals with a bachelor's degree from an accredited college or university. Any undergraduate major is acceptable for admission; however, students without some Women's, Gender and Sexuality Studies background may be required to take preparatory courses before beginning the MA curriculum or in addition to the MA curriculum.

The 36 credit hour interdisciplinary degree program is organized around a nine (9) hour core, and a selection of electives in WGST. In addition, students complete either a thesis, a culminating exam or project, or an applied/creative project.

Faculty in the Women's, Gender and Sexuality Studies Department, as well as faculty in other departments of the university, offer courses in the MA program.

Degree Summary

Code	Title	Hours
	Program Core	9
	Electives	21-27
	Thesis/Project/Exam Option	3-6
	MINIMUM TOTAL HOURS	36

The Women's, Gender and Sexuality Studies MA may be completed in four semesters (fall/spring). Many courses can be taken online. Limited summer offerings may be available.

Soaring Scholar Program Accelerated BA-BS/MA in Women's, Gender and Sexuality Studies

Undergraduate students interested in the program's accelerated options should visit the catalog pages for the BA in Women's, Gender and Sexuality Studies (<https://catalog.louisville.edu/undergraduate/majors/womens-and-gender-studies-ba/>) or the BS in Women's, Gender and Sexuality Studies (<https://catalog.louisville.edu/undergraduate/majors/womens-gender-studies-bs/>) for more information.

Dual MSSW/MA in Social Work and Women's, Gender and Sexuality Studies

The dual Master of Science in Social Work/Master of Arts in Women's, Gender and Sexuality Studies program recognizes the value of professional education in two interrelated fields and encourages students who have an interest in both Women's, Gender and Sexuality Studies and Social Work to pursue these degrees simultaneously. Social workers and Women's, Gender and Sexuality Studies scholars often seek to address identical or related societal concerns, albeit from different perspectives; understanding both disciplines enhances one's effectiveness in both the analysis of and engagement with contemporary social and cultural issues. Women's, Gender and Sexuality Studies courses strengthen the social worker's understanding of the historical foundations for policies and structures that have an impact on social institutions and human conditions; Social Work courses help Women's, Gender and Sexuality Studies scholars or activists to better understand human behavior, conflict resolution and social welfare institutions. A Women's, Gender and Sexuality Studies and Social Work combination provides the tools of social change for an historic problem of gender inequality and injustice.

The curriculum leading to a dual degree is a 78 credit hour program which combines credits in Women's, Gender and Sexuality Studies and the Kent School of Social Work and Family Science. Students take the core curriculum in both programs, but substitute elective credit hours with MA and MSSW credit hours. In addition, the Kent School of Social Work and Family Science has tailored its second year-long practicum to focus on issues of gender and women, adding that content and experience for the student.

Students must apply and be admitted to both programs in order to pursue the dual degree.

Admission Requirements

Master of Arts in Women's Gender Sexuality Studies

Students wishing to be admitted to the MA in Women's, Gender and Sexuality Studies must meet the following requirements for admission:

1. Students must meet the admission criteria established by the Graduate School. Submit a complete graduate application (<http://louisville.edu/graduate/futurestudents/apply-materials/application/>), submit official transcripts verifying the receipt of a baccalaureate degree from an accredited institution, and pay application fee.
2. Students must have a 3.0 GPA in undergraduate work. Provisional admission is possible for students who do not meet this requirement.
3. Students must submit two letters of recommendation (submitted to the Graduate School). Letters of recommendation must be current (written within the last year), and letter writers must be familiar with the applicant's academic preparation for graduate study. Members of the Women's Gender and Sexuality Studies Graduate Admissions Committee may not be letter writers.

- Students must submit one academic writing sample of at least five pages (a paper written as part of the requirements of a university or college course). The Graduate Admissions Committee will determine whether the student has the necessary level of competence in written communication to enter the MA program.
- Students must submit a personal statement of one-two pages discussing how the MA in Women's, Gender and Sexuality Studies relates to the student's professional or personal goals.

Any undergraduate major is acceptable for admission; however, students without Women's, Gender and Sexuality Studies background may be required to take preparatory courses before beginning the MA curriculum or in addition to the MA curriculum. This will be determined by the Graduate Admissions Committee.

Up to six (6) credit hours of graduate level coursework (receiving a minimum grade of B- or above) completed in Women's, Gender and Sexuality Studies at another institution may be applied toward the student's University of Louisville degree, upon approval of the director.

Students enrolled in the University of Kentucky or Western Kentucky University graduate certificate programs may transfer up to twelve (12) credit hours of graduate-level work (graded a minimum of B- or above), upon approval of the director, Unit Dean and Vice Provost of Graduate Affairs.

Students must maintain a 3.0 average in order to be in good standing.

Admission Requirements: Dual MSSW/MA

Students must apply and be admitted to both programs in order to pursue the dual MSSW/MA degree program. WGST admission requirements for the dual degree are the same as for the standalone MA. Admission requirements for the Kent School of Social Work & Family Science (p. 314) can be found on the MSSW page.

Program Requirements for MA

The Women's, Gender and Sexuality Studies M.A. curriculum includes:

- Nine (9) core credit hours, including three (3) credit hours in Community Engaged Research Methods, plus three (3) credit hours of approved Theory and three (3) credit hours of Approved History courses
- a thesis, non-thesis project, practicum, creative/applied project or exam option

At least 18 of the 36 credit hours must be in courses at the 600 level.

Thesis, Project, Practicum, or Exam Option ¹

6

Select the thesis, non-thesis project, applied/creative project, practicum or exam option

WGST 695 Women's, Gender and Sexuality Studies Practicum (or elective, which need not be in WGS)

WGST 698 Master's Degree Project

WGST 699 Thesis

Exam Option (requires completion of 37 credit hours, plus an exam) ¹

Minimum Total Hours 39

¹ Credit hours in each category may vary depending on whether thesis, project, or exam option is selected. Students who select the thesis, project, or practicum option will typically take 18-21 elective hours. Students who select the exam option will typically take 24 elective hours. Please see your advisor to discuss the path to completion of 37 minimum hours required for the degree that will best fit your individual needs.

² As approved by the Director of Graduate Studies.

Up to six (6) credit hours of graduate level coursework (graded a minimum of B- or above) completed in Women's, Gender and Sexuality Studies at another institution may be applied toward the student's University of Louisville degree, upon approval of the director.

Students enrolled in the University of Kentucky or Western Kentucky University graduate certificate programs may request a variance to transfer up to twelve (12) credit hours of graduate level coursework (graded a minimum of B- or above), approval is required from the Director of Graduate Studies (DGS), Unit Dean and Vice Provost of Graduate Affairs.

Students must maintain a 3.0 average in order to be in good standing.

Program Requirements for Dual MSSW/MA

The Women's, Gender and Sexuality Studies MSSW/MA curriculum includes:

- Nine (9) credit hours of core courses (three (3) credit hours of Community Engaged Research Methods, plus three (3) credit hours approved History and three (3) credit hours of Approved Theory courses)
- 18 credit hours of WGST electives at the graduate level;
- 51 credit hours of courses at the Kent School

Total 27 credit hours in WGST graduate-level courses

Rhodes, Che	MFA, Temple University, 1998	Fine Arts	College of Arts & Sciences	Rote, Sunshine Marie	PhD, Florida State University, 2012	Kent School of Social Work	Kent School of Social Work
Richards, Christopher	PhD, The Ohio State University, 1998	Mechanical Engineering	Speed School of Engineering	Rothe, Lucian	PhD, University of Wisconsin-Madison, 2020	Modern Languages	College of Arts & Sciences
Ridley, Glynis Batey	PhD, Trinity College Oxford, 1992	English	College of Arts & Sciences	Rouchka, Eric Christian	DSc, Washington University in St Louis, 2002	Biochemistry & Molecular Genetics	School of Medicine
Riedel, Thomas	PhD, University of Massachusetts Amherst, 1990	Mathematics	College of Arts & Sciences	Rouffet, David Michel	PhD, Université Claude Bernard Lyon 1, 2007	Health & Sports Sciences	College of Education and Human Development
Riff, Diane Frye	DNP, Eastern Kentucky University, 2019	Nursing	School of Nursing	Rougier, Guillermo Walter	PhD, Universidad de Buenos Aires, 1993	Anatomical Sciences and Neurobiology	School of Medicine
Ritz, John T	DMA, University of Illinois at Urbana-Champaign, 2011 MM, University of Illinois at Urbana-Champaign, 2005	Music	School of Music	Roussel, Thomas	PhD, University of Louisville, 2014	Bioengineering	Speed School of Engineering
Roach, Krista Gail		Nursing	School of Nursing	Royer, David		Special Education	College of Education & Human Development
Robertson, Sara Elizabeth	DNP, University of Kentucky, 2013	Nursing	School of Nursing				
Robinson, Brian Scott	PhD, University of Louisville, 2014 ME, University of Louisville, 2009	Engineering Fundamentals	Speed School of Engineering	Running, Mark Paul	PhD, California Institute of Technology, 1997	Biology	College of Arts & Sciences

Ruther, Matthew H	PhD, University of Pennsylvania, 2012	Urban & Public Affairs	College of Arts & Sciences	Scarfe, William C.	DDS, University of Adelaide, 1982	Diagnosis and Oral Health	School of Dentistry
Rutledge Roof, Casey		Audiology	School of Medicine	Schaefer, Brian P	PhD, University of Louisville, 2015	Health Promotion & Behavioral Sciences	School of Public Health and Information Sciences
Ryan, Susan Marie	PhD, University of North Carolina at Chapel Hill, 1999	English	College of Arts & Sciences				
Ryan, Lisa Kathleen	PhD, University of Pittsburgh-Pittsburgh Campus, 1992	Oral Immunology & Infectious Diseases	School of Dentistry	Schirmer, Sarah		Nursing	School of Nursing
Sabey, Kent Allen	DDS, University of the Pacific, 1982	Diagnosis and Oral Health	School of Dentistry	Schneider, Stephen Anthony	PhD, Pennsylvania State University Penn State University Park, 2007	English	College of Arts & Sciences
Sabo, Thomas Michael	PhD, University of Louisville, 2007	Medical Oncology and Hematology	School of Medicine	Schultz, David Jay	PhD, Pennsylvania State University, 1996	Biology	College of Arts & Sciences
Saleem, Jason Jamil	PhD, Virginia Polytechnic Institute And State University (now Virginia Tech), 2003	Industrial Engineering	Speed School of Engineering	Schuman, Olivia	PhD, York University, 2020	Philosophy	College of Arts & Sciences
				Scobee, Matthew W	PhD, University of Kentucky, 1997	Mathematics	College of Arts & Sciences
Samuelson, Chad L	PhD, Florida State University, 2009	Anatomical Sciences and Neurobiology	School of Medicine	Scott, David Albert	PhD, McGill University, 1997	Oral Immunology & Infectious Diseases	School of Dentistry
Samuelson, David J	PhD, University of Arizona, 2001	Biochemistry & Molecular Genetics	School of Medicine	Scott, Terry M	PhD, University of Oregon, 1994	Special Education	College of Education and Human Development
Sandell, Lisa Leopold	PhD, University Of Washington, 1994	Oral Immunology & Infectious Diseases	School of Dentistry	Scott, Patrick Alan	PhD, Boston University School of Medicine, 2011	Pharmacology & Toxicology	School of Medicine
Sanders, Sharon W	MSW, University of Louisville, 1983	Kent School of Social Work	Kent School of Social Work		OD, New England College of Optometry, 2006		
Sandhu, Harpal		Physiology	School of Medicine	Sears, Clara Graber	PhD, University of Louisville, 2017	Environmental Medicine	School of Medicine
Sansbury, Brian Edward	PhD, University of Louisville, 2014	Environmental Medicine	School of Medicine	Segal, Janna G	PhD, University of California-Irvine, 2008	Theatre Arts	College of Arts & Sciences
Santaella, Gustavo		Dentistry	School of Dentistry	Segall, Lorna E	PhD, Florida State University, 2016	Music	School of Music
Sar, Bibhuti K.	PhD, Virginia Commonwealth University, 1994	Kent School of Social Work	Kent School of Social Work	Segura Sangucho, Luis Javier	PhD, SUNY College at Buffalo, 2022	Industrial Engineering	Speed School of Engineering
	MSW, University of North Carolina, 1984			Seif, Steven W	PhD, University of Illinois, Chicago, 1988	Mathematics	College of Arts & Sciences
Saraswat, Sujata	PhD, Jawaharlal Nehru University, 2003	Neurological Surgery	School of Medicine	Seiffert, Brittany Kyzer		Audiology	School of Medicine
Sathitsuksanoh, Noppadon	PhD, Virginia Tech, 2011	Chemical Engineering	Speed School of Engineering				

Sekula, Michael N	PhD, University of Louisville, 2020	Bioinformatics & Biostatistics	School of Public Health and Information Sciences	Shuster, Brett Arthur	DMA, Arizona State University, 2002 MM, Northwestern University, 1993	Performance Studies	School of Music
Sen, Utpal	PhD, University of Kalyani, 2001	Physiology	School of Medicine	Sichel, Jennifer Augusta	PhD, University of Chicago, 2018	Fine Arts	College of Arts & Sciences
Sephton, Sandra	PhD, Brigham Young University, 1995	Psychology	College of Arts & Sciences	Singel, Rachel Jeanne	MA, University of Iowa, 2012	Fine Arts	College of Arts & Sciences
Sha, Shuying	PhD, University of North Carolina at Greensboro, 2016	Nursing	School of Nursing	Singh, Mahavir	PhD, University of Delhi (now Delhi University), 2001 DVM, Guru Angad Dev Veterinary and Animal Sciences University, 1987	Physiology	School of Medicine
Shakib, Shaminul	PhD, University of Louisville, 2024	Health Management & Systems Sciences	School of Public Health and Information Sciences	Singleton, Jacqueline Ann	PhD, University of Louisville, .	Diagnosis and Oral Health	School of Dentistry
Shao, Hui	PhD, Freie Universität Berlin, 1990 MD, Shanghai Medical College, Fudan University, 1982	Ophthalmology and Visual Sciences	School of Medicine	Siskind, Leah J	PhD, University of Maryland-College Park, 2003	Medicine	School of Medicine
Sharma, Vivek R.	MBBS, University Of Poona (now Savitribai Phule Pune University), 1992	Medical Oncology and Hematology	School of Medicine	Skinner, Mary		Nursing	School of Nursing
Sheehan, Kendra Nicole	PhD, University of Louisville, 2017	Modern Languages	College of Arts & Sciences	Skorodzyevskiy, Vitaliy	PhD, Mississippi State University, 2023	Entrepreneurship	College of Business
Sheffield, Caroline Connors	PhD, University of South Florida, 2009	Middle and Secondary Education	College of Education and Human Development	Sledge, Samiyyah Masina	PhD, University of Louisville, 2021	Biology	College of Arts & Sciences
Sheridan, Mary P	PhD, University of Illinois at Urbana-Champaign, 2000	English	College of Arts & Sciences	Sloan, Chad Richard	MM, The Juilliard School, .	Performance Studies	School of Music
Sherman, Randall E	PhD, University of Notre Dame, 2001	Comparative Humanities	College of Arts & Sciences	Smadici, Serban	PhD, Columbia University in the City of New York, 2005	Physics	College of Arts & Sciences
Shreffler, Megan Beth	PhD, University of Minnesota-Twin Cities, 2013	Health & Sports Sciences	College of Education and Human Development	Smalley, Sandra		Nursing	School of Nursing
Shuck, Michael B	PhD, Florida International University, 2010	Educational Leadership, Evaluation, and Organizational Development	College of Education and Human Development	Smallwood, Ashley Michelle	PhD, Texas A & M University, 2011	Anthropology	College of Arts & Sciences
Shumaker, Shannon C.	PhD, University of Kentucky, 2016	Nursing	School of Nursing	Smith, Alan F	EdD, Liberty University, 2014	Otolaryngology, Head & Neck Surgery and Communication	School of Medicine
Shumway, Brian S	DDS, The Ohio State University, 2003	Diagnosis and Oral Health	School of Dentistry	Smith, Remington Spencer Drew	MFA, University of Iowa, 2014		College of Arts & Sciences
				Smith, Jason Wayne	MD, The Ohio State University, 2002	General Surgery	School of Medicine
				Smith, Melissa Laird	PhD, Harvard University, 2009	Biochemistry & Molecular Genetics	School of Medicine
				Smith, Nathan Glenn	March, Rice University, 2006	Fine Arts	College of Arts & Sciences

Smith, Jackie Jong		Nursing	School of Nursing	Steffen, Joseph M.	PhD, University of New Mexico-Main Campus, 1980	Biology	College of Arts & Sciences
Smith Jones, Siobhan Elizabeth	PhD, University of Missouri, 2010	Communicati	College of Arts & Sciences	Sterrett-Hong, Emma Maria	PhD, University of North Carolina at Chapel Hill, 2011	Kent School of Social Work	Kent School of Social Work
Smith-Tone, Daniel C	PhD, Indiana University-Bloomington, 2010	Mathematics	College of Arts & Sciences	Stetson, Barbara Ann	PhD, Vanderbilt University, 1991	Psychology	College of Arts & Sciences
Snyder, James Walter	PhD, University of Dayton, 1974	Pathology	School of Medicine	Stevens, Forrest Robert	PhD, University of Florida, 2015	Geography/ Geosciences	College of Arts & Sciences
Snyder, Cara	PhD, University of Maryland-College Park, 2019	Women's & Gender Studies	College of Arts & Sciences	Stewart Jr, Thomas William	PhD, The Ohio State University, 2004	Comparative Humanities	College of Arts & Sciences
Sohn, Steve H	PhD, University of Connecticut, 2006	Communicati	College of Arts & Sciences	Stirling, David Paul	PhD, University of British Columbia, 2005	Neurological Surgery	School of Medicine
Sokoloski, Kevin J	PhD, Colorado State University, 2010	Microbiology and Immunology	School of Medicine	Stivers, Christopher Todd	PhD, University of North Carolina at Chapel Hill, 1998	Finance	College of Business
Song, Zhao-Hui	PhD, University of Minnesota-Twin Cities, 1992	Pharmacology and Toxicology	School of Medicine	Stocke, Sanaya Kendall	PhD, University of Louisville, 2016	Biology	College of Arts & Sciences
Song, Wei	PhD, The Ohio State University, 2000	Geography/ Geosciences	College of Arts & Sciences	Storer, Heather Lynn	PhD, University Of Washington, 2015	Kent School of Social Work	Kent School of Social Work
Soucy, Patricia Sara Arauz	PhD, Johns Hopkins University, 2010	Bioengineering	Speed School of Engineering	Storey, Angela Diane	PhD, University of Arizona, 2016	Anthropology	College of Arts & Sciences
Speck, Frederick Alan	DMA, University of Maryland-College Park, 1984 MM, Bowling Green State University-Main Campus, 1982	Performance Studies	School of Music	Story, Kaila A	PhD, Temple University, 2007	Women's & Gender Studies	College of Arts & Sciences
Srivastava, Sanjay		Pharmacology & Toxicology	School of Medicine	Strickley, Sarah Anne	PhD, University of Cincinnati, 2016 MA, Ohio University, 2002	English	College of Arts & Sciences
Stanev, Hristomir Atanasov	PhD, University of Chicago, 2009	English	College of Arts & Sciences	Sullivan, Clare Elizabeth	PhD, New York University, 2002	Modern Languages	College of Arts & Sciences
Stansel, Ian Robert	PhD, University of Houston, 2012 MFA, University of Iowa, 2005	English	College of Arts & Sciences	Sullivan, Janice E		Medicine	School of Medicine
Stark, Geneva A.	PhD, University of Louisville, 2005	Educational Leadership, Evaluation, and Organizational Development	College of Education and Human Development	Sumanasekera, Gamini U.	PhD, Indiana University-Bloomington, 1995	Physics	College of Arts & Sciences
				Sun, Zhihui +	PhD, Northwestern University, 2005 ME, National University of Singapore, .	Civil & Environmental Engineering	Speed School of Engineering
Starr, Thomas L.	PhD, University of Louisville, 1976	Chemical Engineering	Speed School of Engineering				
States, J. Christopher	PhD, Albany Medical College, 1980	Pharmacology and Toxicology	School of Medicine				

Sun, Jeffrey C.	PhD, Teachers College at Columbia University, 2012 JD, The Ohio State University, 1998 MBA, Loyola Marymount University, 1994	College of Education and Human Development	College of Education and Human Development	Thomas, Tammi Alvey	PhD, University of Louisville, 2021 MSW, University of Louisville, 2013	Health Management & Systems Sciences	School of Public Health and Information Sciences
Sunkara, Mahendra K.	PhD, Case Western Reserve University, 1993	Chemical Engineering	Speed School of Engineering	Thompson, Angela Knight	PhD, University of Louisville, 2011 MSE, University of Louisville, 2007	Engineering Fundamentals	Speed School of Engineering
Swanson, David	PhD, Indiana University-Bloomington, 2000	Mathematics	College of Arts & Sciences	Thompson, Lee Michael	PhD, Imperial College, 2013	Chemistry	College of Arts & Sciences
Swartz, Kristin M	PhD, University of Cincinnati, 2012	Criminal Justice	College of Arts & Sciences	Thompson, Natasha		Nursing	School of Nursing
Swinehart, Karl Frederic	PhD, University of Pennsylvania, 2012	Comparative Humanities	College of Arts & Sciences	Tillquist, Christopher R.	PhD, University of Arizona, 2002	Anthropology	College of Arts & Sciences
Tamarit-Galdon, Marc		Modern Languages	College of Arts & Sciences	Tkweme, W S	PhD, University of Massachusetts, 2007	Pan African Studies	College of Arts & Sciences
Tan, Yi	PhD, Chongqing University, 2004	Pediatric Research Institute	School of Medicine	Tomlinson, Cameron	PhD, Virginia Commonwealth University, 2023 MSW, North Carolina State University, 2016	Kent School of Social Work	Kent School of Social Work
Tang, Tian	PhD, University of Alabama, 2008	Finance	College of Business	Tone, Cristiana	PhD, Indiana University-Bloomington, 2010	Mathematics	College of Arts & Sciences
Taniguchi, Hiromi	PhD, Princeton University, 1997	Sociology	College of Arts & Sciences	Touron, Dayna		Psychology	College of Arts & Sciences
Taylor, Kira Creswell	PhD, Emory University, 2009	Epidemiology & Population Health	School of Public Health and Information Sciences	Tretter, Thomas R	EdD, University of North Carolina at Chapel Hill, 2004	Middle and Secondary Education	College of Education and Human Development
Telang, Sucheta	MBBS, Delhi University, 1992	Medical Oncology and Hematology	School of Medicine	Trujillo, Glenn	PhD, Vanderbilt University, 2019	Philosophy	College of Arts & Sciences
Temmen, Chelsie Denise	PhD, University of Nebraska-Lincoln, 2018	Counseling and Human Development	College of Education and Human Development	Tucker, Shona	MFA, New York University, 1989	Theatre Arts	College of Arts & Sciences
Terson de Paleville, Daniela	PhD, University of Louisville, 2011	Physiology	School of Medicine	Turner, Karen Diane	DSN, University of Kentucky, 2009	Nursing	School of Nursing
Theriot, Nancy	PhD, University of New Mexico, 1983	Women's, Gender & Sexuality Studies	College of Arts & Sciences	Turner, Joseph A	PhD, University of Delaware, 2014	English	College of Arts & Sciences
Thomas, Mary Shelley	EdD, Columbia University in the City of New York, 2003	Middle and Secondary Education	College of Education and Human Development	Tyagi, Suresh C Tyagi, Neetu Tyler, Larry D.	PhD, Aligarh Muslim University, 1980 PhD, Central Drug Research Institute, 2002 PhD, University of Louisville, 1985 MA, University of Louisville, 1967	Physiology Physiology Engineering Fundamentals	School of Medicine School of Medicine Speed School of Engineering

Ugiliweneza, Beatrice	PhD, University of Louisville, 2011	Anatomical Sciences and Neurobiology	School of Medicine	Walker, Kandi L	PhD, University of Denver, 1999	Communication College of Arts & Sciences
Uriarte, Silvia Mercedes	PhD, Universidad de Buenos Aires, 2003	Oral Immunology & Infectious Diseases	School of Dentistry	Walker, Margath Alexya	PhD, University of Kentucky, 2009	Geography/ College of Arts & Sciences
Valdes, Roland	PhD, University of Virginia, 1976	Pathology	School of Medicine	Wallace, Sherri L	PhD, Cornell University, 1995	Political Science College of Arts & Sciences
Valentine, Jeffrey C	PhD, University of Missouri-Columbia, 2001	Counseling and Human Development	College of Education and Human Development	Wallace, Joshua	PhD, University of Wisconsin-Madison, 2024	Counseling and Human Development College of Education and Human Development
Vatsalya, Vatsalya	MD, Odessa State Medical University, 2002	Medicine	School of Medicine	Wallace-Boaz, Krista Brooke	DMA, Northwestern University, 2004 MM, Northwestern University, 1994	Music School of Music
Veeneman, Sarah		Nursing	School of Nursing	Wallis, Anne Baber	PhD, Johns Hopkins University, 2003	Epidemiology & Population Health School of Public Health and Information Sciences
Venkatasubramanian, Kalpana	PhD, Rutgers, The State University of New Jersey, 2016	Geography/ Geosciences	College of Arts & Sciences			
Vetvicka, Vaclav	PhD, Czechoslovak Academy of Science, 1983	Pathology	School of Medicine	Walsh, Kevin M.	PhD, University of Cincinnati, 1992	Speed School of Engineering
Vickneswaran, Tharshikka	PhD, Clemson University, 2022 MSE, Clemson University, 2020	Civil & Environmental Engineering	Speed School of Engineering	Walter, Bernadette Ruth	ME, University of Louisville, 1985	Psychology College of Arts & Sciences
Vidoni, Carla	PhD, The Ohio State University, 2005	Health & Sports Sciences	College of Education and Human Development	Wang, Yi	PhD, University of Connecticut, 2015	Communication College of Arts & Sciences
Vito, Gennaro Francis	PhD, Ohio State University-Main Campus, 1978	Criminal Justice	College of Arts & Sciences	Wang, Hui	PhD, Michigan Technological University, 2013	Mechanical Engineering School of Engineering
Volpert, Elisabeth Marie	DNP, University of Louisville, 2018	Nursing	School of Nursing	Wang, Xiaomei	PhD, University at Buffalo, 2020	Industrial Engineering School of Engineering
Voor, Michael		Bioengineering	Speed School of Engineering & School of Medicine	Wang, Shuoyang	PhD, Auburn University, 2022	Bioinformatics & Biostatistics School of Public Health & Information Sciences
Wade, Michael F	MAcc, Florida Atlantic University, 2015	Accountancy	College of Business	Warawa, Jonathan Mark	PhD, University of Bristol, 2002	Microbiology and Immunology School of Medicine
Wagner, Lisa	PhD, The Ohio State University, 1999	Modern Languages	College of Arts & Sciences	Washington, Ahmad Rashad	PhD, University of Iowa, 2013	Counseling and Human Development College of Education and Human Development
Wahlang, Banrida	PhD, University of Louisville, 2014	Medicine	School of Medicine	Watson, Corey T	PhD, Simon Fraser University, 2012	Biochemistry & Molecular Genetics School of Medicine
Wahlig, Patricia	MFA, Illinois Institute of Technology, 2002	Fine Arts	College of Arts & Sciences	Watson, Walter Herbert	PhD, University of Kentucky, 1999	Medicine School of Medicine

Watters, James Charles	PhD, University of Maryland, 1977	Chemical Engineering	JB Speed School of Engineering	Williamson, Russell	PhD, University of Kentucky, 2019	Accountancy	College of Business
Welch, Karla Conn	PhD, Vanderbilt University, 2009	Electrical & Computer Engineering	JB Speed School of Engineering	Williger, Gerard Michael	PhD, University of Cambridge, 1992	Physics	College of Arts & Sciences
Werking, Kathy Jo	PhD, Purdue University, 1992	Communications	College of Arts & Sciences	Willing, Gerold A	PhD, Auburn University, 2001	Chemical Engineering	Speed School of Engineering
Westerfeld, Jennifer Taylor	PhD, University of Chicago, 2010	History	College of Arts & Sciences	Wilson, Andrew James	PhD, The University of Texas at Austin, 2015	Chemistry	College of Arts & Sciences
Whetstone, Randy Carl	Edd, Spalding University, 2020	Educational Leadership, Evaluation, and Organizational Development	College of Education and Human Development	Windhorst, Cody Christine		Middle and Secondary Education	College of Education and Human Development
Whiteside, Jasmine La'Shae	PhD, The Ohio State University, 2022	Sociology	College of Arts & Sciences	Winters, Andrew Madison	PhD, University of Maryland-Baltimore, 2018	Kent School of Social Work	Kent School of Social Work
Whitney, Jeremy T	PhD, University of Louisville, 2011	Special Education	College of Education and Human Development	Wise, John Pierce	PhD, George Washington University, 1994	Pharmacology and Toxicology	School of Medicine
Whitt, Devin		Nursing	School of Nursing	Wise, Sandra Suanne	PhD, University of Maine, 2013	Pharmacology and Toxicology	School of Medicine
Widdowson, Alex Oswald	PhD, Florida State University, 2018	Criminal Justice	College of Arts & Sciences	Wise, John	PhD, Purdue University-Main Campus, 2018	Pediatric Research Institute	School of Medicine
Wieland, John J	PhD, Marquette University, 2001	Educational Leadership, Evaluation, & Organizational Development	College of Education and Human Development	Wittebort, Richard J.	PhD, Indiana University-Bloomington, 1978	Chemistry	College of Arts & Sciences
Wildstrom, David Jacob	PhD, University of California-San Diego, 2007	Mathematics	College of Arts & Sciences	Wolek, Krzysztof	PhD, University of Chicago, 2008	Music	School of Music
Wiley, Ann Elizabeth	PhD, Northwestern University, 1993	English	College of Arts & Sciences	Woo, Hong Ryun	PhD, University of Iowa, 2013	Counseling and Human Development	College of Education and Human Development
Williams, Stuart Joseph	PhD, Purdue University, 2009	Mechanical Engineering	Speed School of Engineering	Wooten Burnett, Stefanie C		Psychology	College of Arts & Sciences
Williams, Bronwyn T.	PhD, University of New Hampshire, 2000	English	College of Arts & Sciences	Woodruff-Borden, Janet		College of Education and Human Development	College of Education and Human Development
Williams, Kim Allan	MD, University of Chicago, 1979	Medicine	School of Medicine	Worley, Micah J	PhD, Oregon Health & Science University, 2000	Biology	College of Arts & Sciences
Williams, Kennetha Porter		Nursing	School of Nursing	Worley, Daniel		Academic & Professional Studies	School of Music
Williams Coleman, Beverly Renee	DNP, Spalding University, 2016	Nursing	School of Nursing	Wright, Margaret Imelda	PhD, University of Louisville, 2019	Nursing	School of Nursing

Wu, Dongfeng	PhD, University of California-Santa Barbara, 1999	Bioinformatics & Biostatistics	School of Public Health and Information Sciences	Yu, Ming	PhD, Hokkaido Institute of Technology, 1995	Physics	College of Arts & Sciences
				Yu, Jerry	PhD, University of California-San Francisco, 1987	Pulmonary, Critical Care, and Sleep Disorders	School of Medicine
Wu, Ming	PhD, Communications University of China, 2008	Modern Languages	College of Arts & Sciences	Yu, Rui	MD, Shanghai Medical University, 1977	Medi	
Wysoczynski, Marcin	PhD, Pomeranian Medical University, 2009	Environmental Medicine	School of Medicine		PhD, Pennsylvania State University-Main Campus, 2023	Computer Engineering & Computer Science	Speed School of Engineering
Xu, Yongzhi Steve	PhD, University of Delaware, 1990	Mathematics	College of Arts & Sciences	Zahorik, Pavel		Audiology	School of Medicine
Yaddanapudi, Kavitha	PhD, Indian Institute of Science, 2003	Surgery	School of Medicine	Zamborini, Francis Patrick	PhD, Texas A & M University, 1998	Chemistry	College of Arts & Sciences
Yampolskiy, Roman Vladimirovich	PhD, SUNY College at Buffalo, 2008	Computer Engineering & Computer Science	Speed School of Engineering	Zeng, Wei-Bin	PhD, University of Pittsburgh-Pittsburgh Campus, 1988	Mathematics	College of Arts & Sciences
Yan, Jun	PhD, Shanghai Medical University, 1997	Immunotherapy	School of Medicine	Zeng, Li	PhD, University of Toronto, 1997	College of Arts & Sciences	College of Arts & Sciences
	MD, Jiangsu University, 1985			Zhang, Qunwei	PhD, Fukui Medical University, 2000	Epidemiology & Population Health	School of Public Health and Information Sciences
Yang, Li	PhD, North Carolina State University, 2022	Industrial Engineering	Speed School of Engineering		MD, Fujian Medical University, 1989	Health	
Yankeelov, Pamela Anne	PhD, University of Louisville, 1995	Kent School of Social Work	Kent School of Social Work	Zhang, Charlie Haifeng	PhD, University of South Carolina-Columbia, 2006	Geography/Geosciences	College of Arts & Sciences
Yanoviak, Stephen P	PhD, University of Oklahoma, 1999	Biology	College of Arts & Sciences	Zhang, Sumei	PhD, The Ohio State University, 2008	Urban & Public Affairs	College of Arts & Sciences
Yarborough, Rachel		Educational Leadership, Evaluation, & Organizational Development	College of Education & Human Development	Zhang, Xiang	PhD, Purdue University, 2001	Chemistry	College of Arts & Sciences
				Zhang, Huang-Ge	PhD, Mississippi State University, 1994	Microbiology and Immunology	School of Medicine
Yingling, Marissa Ellen	PhD, University of South Carolina-Columbia, 2016	Kent School of Social Work	Kent School of Social Work		DVM, Inner Mongolia Agricultural University, 1985		
					MD, Inner Mongolia Medical College, 1982		
Yingling, Charlton Wesley	PhD, University of South Carolina-Columbia, 2016	History	College of Arts & Sciences	Zhang, Wei t	PhD, Pennsylvania State University Penn State University Park, 2003	Computer Engineering & Computer Science	Speed School of Engineering
Yoder-Himes, Deborah Ruth	PhD, Michigan State University, 2005	Biology	College of Arts & Sciences	Zhang, Lixia	PhD, University of Wisconsin-Milwaukee, 2019	Kent School of Social Work	Kent School of Social Work
York, Paul Andrew Diebold		Performance Studies	School of Music		MA, East China Normal University, 2010		
Young, Jamie Lynn	PhD, University of Louisville, 2020	Pharmacology and Toxicology	School of Medicine	Zhao, Jianhua	PhD, University of Pittsburgh-Pittsburgh Campus, 2008	Anthropology	College of Arts & Sciences

Zheng, Qi	PhD, Clemson University, 2013	Bioinformatics School & of Public Biostatistics Health and Information Sciences
Zheng, Jian	PhD, University of Hong Kong, 2011 MBBS, Southern Medical University (First Military Medical University), 2003	Microbiology School of and Medicine Immunology
Ziegler, Charles E.	PhD, University of Illinois at Urbana-Champaign, 1979	Political Science College of Arts & Sciences
Zurada, Jacek M.	PhD, Gdansk University of Technology, 1975	Electrical & Computer Engineering School of Engineering
Zwerg, Anne Marie	PhD, EAFIT University, 2022	Entrepreneurship College of Business

//

†Department Chair, *Endowed Chair, ^Distinguished Scholar

Faculty census term: Fall 2024

Graduate Courses A-Z

Graduate Course Index

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (https://csprd.louisville.edu/ps/ps_class/EMPLOYEE/PSFT_CS/c/COMMUNITY_ACCESS.CLASS_SEARCH./x/?state=62dab551a0d600a5e8237359c50704e59007&duo_code=sjUx20STj21blWVUuQ3Z1YRjHmfxpqoV).

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

Course Fees

Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (<https://louisville.edu/bursar/tuitionfee/university-fees/>).

Courses By Subject Code

A

- Accounting (ACCT) (p. 392)
- Anatomical Sciences & Neurobiology (ASNB) (p. 394)

Accounting (ACCT)

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (https://csprd.louisville.edu/psp/ps_class/EMPLOYEE/PSFT_CS/c/COMMUNITY_ACCESS.CLASS_SEARCH./x/?state=62dab551a0d600a5e8237359c50704e59007&duo_code=sjUx20STj21blWVEU)

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

Course Fees

Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (<https://louisville.edu/bursar/tuitionfee/university-fees/>).

ACCT 500. Fundamentals of Accounting 3 Units

Description: Fundamental principles of accounting needed by the manager. Topics include the assumptions of accounting, recording and reporting transactions; interpretation of data for decision-making purposes.

Note: Fulfills a Foundation Core requirement only.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 501. Intermediate Accounting I 3 Units

Term Typically Offered: Fall, Spring, Summer

Prerequisite(s): ACCT 201 or ACCT 205.

Description: The first of two courses dealing with financial reporting as reflected in Generally Accepted Accounting Principles. The course will discuss the theoretical underpinnings and the practical applications of income determination and balance sheet valuations. Focus is on the accounting cycle and the nature of the financial statements.

Note: Cross-listed with ACCT 301 and FIN 305.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 502. Intermediate Accounting II 3 Units

Term Typically Offered: Fall, Spring, Summer

Prerequisite(s): ACCT 301.

Description: A continuation of the study of income determination and balance sheet valuations which was begun in ACCT 301 (ACCT 501).

Note: Cross-listed with ACCT 302.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 503. Introduction to Accounting Information Systems 3 Units

Term Typically Offered: Fall, Spring, Summer

Prerequisite(s): ACCT 301 or ACCT 501 or FIN 305.

Description: An introduction to Accounting Information Systems, covering systems and control concepts, procedures and technologies, as well as systems development processes and software applications.

Note: Cross-listed with ACCT 310.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 504. Auditing Theory and Practice 3 Units

Term Typically Offered: Fall, Spring

Prerequisite(s): ACCT 302 and ACCT 310.

Description: A survey of the role of the certified public accountant as independent auditor of financial statements. Topics include professional ethics, generally accepted auditing standards, legal liability, statistical sampling, audits of EDP systems, internal control, audit work programs, and the auditor's opinion.

Note: Cross-listed with ACCT 430.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 526. Finance and Accounting Applications in Logistics and Distribution 3 Units

Prerequisite(s): MKT 525.

Description: Fundamental principles of accounting and finance as applied to logistics and distribution as needed by managers.

Note: This course does not fulfill credit for MBA.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 611. Cost and Operations Management 3 Units

Prerequisite(s): Admittance to the Master of Accountancy Program.

Description: An integrated course using traditional and innovative cost accounting and production management techniques and concepts to analyze decisions necessary to produce goods and provide service.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 615. Advanced Financial and Governmental Accounting 3 Units

Prerequisite(s): Admittance to the Master of Accountancy program.

Description: Coverage of financial reporting rules and processes for business combinations and governmental and not-for-profit organizations from both a reporting and decision - making perspective.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 620. Management Control Systems 3 Units

Term Typically Offered: Occasionally Offered

Prerequisite(s): MBA 625.

Description: Uses of accounting systems in aiding management control. Transfer pricing, managed costs, cost centers, performance centers, investment centers, activity based management.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 631. Federal Taxation 3 Units

Prerequisite(s): Admittance to the Master of Accountancy Program.

Description: Focus is on the individual taxpayer. Coverage includes federal income tax of the individual, income taxation of estates and trusts, retirement and family tax planning, and the estate and gift tax.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ACCT 641. Financial Accounting and Professionalism 3 Units**Prerequisite(s):** Admittance to the Master of Accountancy Program.**Description:** Covers the standard setting process for generally accepted accounting principles. Includes application of GAAP to create financial statements. Additional focus on the ethical and professional expectations of the CPA.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ACCT 651. Auditing and Systems 6 Units****Prerequisite(s):** Admittance to the Master of Accountancy Program.**Description:** Focuses on the design, implementation and documentation of accounting information systems. Emphasis also placed on the internal control system and proper audit trails.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ACCT 655. Special Topics in Accounting 3 Units****Prerequisite(s):** Admittance to the Master of Accountancy Program.**Description:** Explores a variety of topics in accounting, auditing, or taxation.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ACCT 661. Enterprise Resource Planning Systems 3 Units****Prerequisite(s):** CIS 610 and CIS 615; or admittance to the Master of Accountancy Program.**Description:** Focuses on the features of an ERP system, the implementation of ERP systems, and internal control issues related to ERP systems. The use of ERP systems in conjunction with electronic commerce will be featured.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ACCT 680. Special Topics in Accounting 1-6 Units****Description:** An advanced study of one or more selected topics or issues related to the study of Accounting.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ACCT 698. Research Seminar in Accounting 1-3 Units****Prerequisite(s):** MBA 625 and permission of the Director of the School of Accountancy.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

Anatomical Sciences and Neurobiology (ASNB)

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (https://csprd.louisville.edu/psf/ps_class/EMPLOYEE/PSFT_CS/c/COMMUNITY_ACCESS.CLASS_SEARCH./x/?state=62dab551a0d600a5e8237359c50704e59007&duo_code=sjUx20STJ21bWVEUQ3Z1YRjHm1xpqov).

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings

may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

Course Fees

Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (<https://louisville.edu/bursar/tuitionfee/university-fees/>).

ASNB 502. Fundamentals of Neuroscience 3 Units**Term Typically Offered:** Fall Only**Prerequisite(s):** PSYC 355 or permission of instructor.**Description:** Basics of cellular and systems neuroscience are taught through a combination of lectures and laboratories. Topics include: electrical potentials in the nervous system, synaptic transmission, somatosensory pathways, special senses (vision, hearing, balance, taste, and smell), eye movements, motor systems and higher functions (language, sleep and wakefulness, cognition, emotion and memory).**Note:** Credit may not be earned in both ASNB 502 and ASNB 602.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ASNB 514. Molecular Neuroscience - CUE 3 Units****Term Typically Offered:** Fall Odd Years**Description:** Prerequisites or corequisites: ASNB 502, BIOL 241, BIOL 329, BIOL 415, Instructor Permission The purpose of this course in Molecular Neuroscience is to explore the molecular and cellular basis of nervous system development, function and diseases. The course will provide intellectual tools and skills to evaluate novel hypotheses and mechanisms in neuroscience. Special emphasis of the course will be to provide basic technical knowledge and tools to apply molecular biology concepts in the ongoing research in any area of neuroscience.**Course Attribute(s):** CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ASNB 517. Seminar on Developmental Neurobiology - CUE 3 Units****Term Typically Offered:** Spring Even Years**Prerequisite(s):** ASNB 502, and BIOL 329 or ASNB 514.**Description:** The purpose of this course is to provide the student with a basic understanding of the processes and mechanisms of neural development. Specific topics include emergence of the neural primordium, patterning and growth of the nervous system, neuronal determination, axonal navigation and targeting, neuron survival and death, synapse formation, synaptic refinement and the formation of specific connections.**Course Attribute(s):** CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 530. Origin of Mammalian Sensory Systems and Comparative Neurobiology - CUE 3 Units**Term Typically Offered:** Fall Even Years**Prerequisite(s):** PSYC 305, or permission of instructor.

Description: This course examines the phylogenetic and developmental history of the mammalian senses with a focus on the integration of anatomy, neurobiology, and fossil evidence. We will study how our understanding of non-human vertebrates (both model and non-model organisms) can provide important insights into the structure and function of the modern mammalian senses and their brain correlates.

Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 566. Synaptic Organization of the Central Nervous System - CUE 3 Units**Term Typically Offered:** Spring Odd Years**Prerequisite(s):** ASNB 502.

Description: The purpose of this course is to provide the student with a basic understanding of synaptic circuits and the techniques used to study them. Each week we will focus on a different brain region or circuit. During the first meeting of each week the instructor will provide an overview of the topic which includes both lecture and reading material. During the second meeting of each week, students will meet with a graduate student teaching assistant to review and discuss the course material presented that week.

Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 601. Gross Anatomy 6.5 Units**Prerequisite(s):** Permission from course director at least two weeks before beginning of course.

Description: Primarily a laboratory course. Major emphasis is upon cadaver dissection, but lectures, group discussions, informal laboratory conferences, demonstrations, X-ray presentations are frequent. Correlation of function with structure is stressed in all areas. See Medical School Freshman Schedule for time.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 602. Fundamentals of Neuroscience 4 Units

Description: Basics of cellular and systems neuroscience are taught through a combination of lectures, laboratories, and independent study. Lectures concurrent with ASNB 502; one added lecture hour each week covers advanced topics through recent article readings and discussion. Topics covered include: electrical potentials in the nervous system, synaptic transmission, somatosensory pathways, special senses (vision, hearing, balance, taste, and smell), eye movements, motor systems, and higher functions (language, sleep and wakefulness, cognition, emotion and memory).

Note: Credit may not be earned for both ASNB 502 and ASNB 602.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 605. Human Embryology 3 Units**Prerequisite(s):** Permission from course director at least two weeks before beginning of course.

Description: The 2012 embryology course is trying to emphasize the clinical aspect of embryology and to allow students to better understand the importance of this particular pre-clinical subject in their medical education. The embryology material is divided into 7 modules, organized by anatomical systems. Although embryology course runs over 8 weeks period, as much as possible, we tried to match your embryology material with the gross anatomy and histology. Modules contain: descriptive developmental embryology lectures, clinical lectures.

Note: Cross-listed with IDEP 865.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 606. Anatomy Seminar 1 Unit**Prerequisite(s):** ASNB 602 as a pre-requisite or a co-requisite and restricted to Anatomical Sciences or Neurobiology graduate students.

Description: Presentations and discussions of individual research or topics of current anatomical interest throughout the year.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 608. Neural Systems 4 Units**Prerequisite(s):** ASNB 607 or consent of course director at least 2 weeks before course begins.

Description: Topics covered include: electrical potentials in the nervous system, synaptic transmission, somatosensory pathways, special senses (vision, hearing, balance, taste, smell), eye movements, motor systems, higher functions (language, sleep and wakefulness, learning and memory). Emphasis is placed on clinical relevance.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 609. Fundamentals of Neuroscience Discussion 1 Unit**Term Typically Offered:** Fall Only**Prerequisite(s):** ASNB 502.

Description: The goal is for students to gain a better understanding of techniques used to study the nervous system. Select topic areas will be taught using an interactive approach that enables students to process course material through thinking, talking, writing, and/or problem solving. For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

- ASNB 610. Neuroscience Methods** 1-2 Units
Grading Basis: Pass/Fail
Prerequisite(s): ASNB 502 or ASNB 602, or consent of the Course Director.
Description: The primary goal of the Methods course is to provide graduate students with the framework to become familiar with key tools and techniques used in neuroscience research. One method will be learned per credit hour in a laboratory of the students choosing. By the end of the semester, each student will generate a written step-by-step protocol of the technique learned along with a two page description (double-spaced) of the method and its use.
Note: Cross-listed with BIOC 610, MBIO 610, PHTX 610, and PHXB 610.
- For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 614. Molecular Neuroscience** 4 Units
Prerequisite(s): Consent of instructor.
Description: Structure and function of the nervous system from a molecular perspective. Includes description of membrane proteins, channels and receptors in neurons and glia. Discussion of the role of such molecular structures in the nervous system.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 616. Special Projects in Anatomy** 1-15 Units
Prerequisite(s): Permission from instructor at least two weeks before beginning of course.
Description: This course, to be arranged to fit individual needs, is intended primarily to accommodate students with special backgrounds in anatomy; it may also be offered for others who have special needs for other advanced training. May be offered each quarter. Schedule to be arranged.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 617. Seminar on Developmental Neurobiology** 3 Units
Prerequisite(s): Consent of instructor.
Description: Covers neural development from neurulation through development of integrated systems. Emphasis will be on the cellular level.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 618. Laboratory Rotation** 1-3 Units
Grading Basis: Pass/Fail
Prerequisite(s): Consent of instructor.
Description: This course will expose new graduate students to the research conducted in laboratories of the faculty of the Department of Anatomical Sciences Neurobiology. The objectives of the laboratory rotations are to expose doctoral students to different approaches and areas of research, and to assist the student in choosing a laboratory for dissertation research.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 619. Original Investigations** 1-15 Units
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 620. Thesis** 1-6 Units
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 621. Introduction to Scientific Computing** 2 Units
Grading Basis: Pass/Fail
Term Typically Offered: Summer Only
Description: The goal of this course is to provide the student with a sufficient understanding of the MATLAB work environment for scientific computing to begin to use MATLAB for their own research purposes. The course covers syntax, data import/export, data visualization, data analysis process design, and data organization and management. For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 622. Analytics in Biomedical Science** 3 Units
Term Typically Offered: Fall Only
Prerequisite(s): Course is restricted to students enrolled in an IPIBS Program (ASNB, BIOC, MBIO, PHTX, PHZB) or IPTN.
Description: Others require instructor permission The purpose of this course of Analytics in biomedical science is to explore quantitative methods used in biomedical science research. A heavy emphasis will be placed on learning descriptive and inferential analytics along with available tools (software) that can be used to this end. Towards the end, there will also be an introduction to large observational studies and predictive analytics. Also, storytelling with data will be briefly explored along with academic writing. Mastery will be evaluated through assignments, exams, and most importantly a project which will be presented at the end of the course.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 630. Origin of Mammalian Sensory Systems and Comparative Neurobiology** 4 Units
Term Typically Offered: Fall Even Years
Prerequisite(s): ASNB 502 or ASNB 602 or permission of instructor.
Description: This course examines the phylogenetic and developmental history of the mammalian senses with a focus on the integration of anatomy, neurobiology, and fossil evidence. We will study how our understanding of non-human vertebrates (both model and non-model organisms) can provide important insights into the structure and function of the modern mammalian senses and their brain correlates.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 666. Synaptic Organization of the Central Nervous System** 3 Units
Description: An overview of the synaptic organization of the central nervous system will be covered through lectures and discussion of seminal systems neuroscience journal articles.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ASNB 671. General and Oral Histology** 5 Units
Prerequisite(s): Oral Biology major or related field.
Description: Provides knowledge of histological structure including ultrastructure of tissues and organs. Oral structures presented in detail.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 672. Integrated Biomedical Sciences II**11 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** Enrollment in the School of Dentistry, Oral Biology major or related field or consent of course director.

Description: This course is designed specifically for first-year dental students. The primary goal of the course is to introduce clinically-oriented principles of the gastro-intestinal (GI) tract, head, and neck regions integrating gross anatomy, neuroanatomy, histology, physiology, biochemistry, and embryology. The course is also designed to foster critical thinking skills necessary for students to utilize their knowledge of these regions to evaluate the health of patients and to solve clinical problems. Anatomical donor prosection is the focal point of all teaching activities, allowing students to develop a three-dimensional/functional appreciation for the relationships of the various structures of these regions.

Note: Cross-listed with BMSC 809.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 675. Advanced Head and Neck Anatomy**2 Units****Prerequisite(s):** One of the following: 1) Admission to the MS Oral Biology program; 2) a DDS, DMD, MD, or DO degree or its foreign equivalent; 3) consent of the course director.

Description: Advanced topics in the anatomic relations of the head and neck as applicable to the post-graduate health professional, with major emphasis on cadaver dissection.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ASNB 677. Current Topics in Sensory Systems Research**1 Unit****Grading Basis:** Pass/Fail**Prerequisite(s):** Consent of course director at least 2 weeks before course begins.

Description: Recent research directed toward understanding the organization and function of the auditory, gustatory, olfactory, somatosensory, and visual systems will be presented and critiqued.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

Anthropology (ANTH)

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (https://csprd.louisville.edu/ps/ps_class/EMPLOYEE/PSFT_CS/c/COMMUNITY_ACCESS.CLASS_SEARCH./x/?state=62dab551a0d600a5e8237359c50704e59007&duo_code=sjUx2OSTj21bIWVEuQ3Z1YRjHmfxpqoV).

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

Course Fees

Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (<https://louisville.edu/bursar/tuitionfee/university-fees/>).

ANTH 507. Space, Place and Culture**3 Units****Term Typically Offered:** Occasionally Offered**Prerequisite(s):** Graduate status, or consent of instructor.

Description: This course is organized around the question of how culture is spatially distributed. How are specific spaces and places constructed, connected, and interpreted through cultural practices?

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 508. History of Anthropology - CUE, WR**3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** Anthropology majors or consent from instructor, and 18 hours of Anthropology credits.

Description: The course provides an integrated introduction to a history of theory and practice in anthropology. Interleaving examples from cultural, archaeological, and biological anthropology, the course delves into understanding anthropological work as the production of knowledge. Encountering elements from the traditional corpus of anthropological literature, as well as contrarian pieces, students will refine their abilities to hold an informed anthropological perspective, even as they reconcile and come to understand inconsistencies in the past practice of anthropology. This course is designed to furnish a strong basis for postbaccalaureate study and applied anthropological practice. Approved for the Arts and Sciences upper-level requirement in written communication (WR).

Note: Anthropology graduate students cannot enroll in this class.

Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 509. Archaeological Theory and Methods - WR**3 Units****Prerequisite(s):** Junior or senior status, and 18 hours of Anthropology credits.

Description: Archaeological theory and methods emphasizing basic practices and procedures in research skills and writing in archaeology.

Note: Approved for the Arts and Sciences upper-level requirement in written communication (WR).

Note: Anthropology graduate students cannot enroll in this class.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 510. Methods in Biological Anthropology - WR 3 Units

Term Typically Offered: Fall, Spring

Prerequisite(s): ANTH 202, and either ANTH 303 or ANTH 353 or Junior status.

Description: Bio-anthro methods, general approaches to research, and data management skills. Covers anthropometric variation and analysis of molecular data.

Note: Approved for the Arts and Sciences upper-level requirement in written communication (WR).

Note: Anthropology graduate students may not enroll in this course.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 511. Ethnographic Methods - WR 3 Units

Term Typically Offered: Occasionally Offered

Prerequisite(s): Junior or senior status, and 18 hours of Anthropology credits.

Description: Explores the range of qualitative research methods and techniques. Emphasis is on designing and developing a research project and conducting ethnographic fieldwork.

Note: Approved for the Arts and Sciences upper-level requirement in written communication (WR).

Note: Anthropology graduate students cannot enroll in this class.

Course Attribute(s): CBL - This course includes Community-Based Learning (CBL). Students will engage in a community experience or project with an external partner in order to enhance understanding and application of academic content.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 512. Methods in Skeletal Forensics - WR 3 Units

Term Typically Offered: Occasionally Offered

Prerequisite(s): ANTH 202 or ANTH 204, and ANTH 327, and ANTH 410.

Description: This course trains students in the methods for documenting and preparing a skeletal forensics analysis report. Students will analyze a set of skeletal remains of an "unknown" individual or individuals, catalog and enter each element into a database for analysis, analyze the results, and write a report of the unknown individual(s) including species, age, ancestry, stature, sex and any trauma or pathologies present. Students will produce a documented report of the remains that could be entered as evidence and stand scrutiny of a court or coroner's rendering.

Note: Approved for the Arts and Sciences upper-level requirement in written communication (WR).

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 517. Anthropology of China 3 Units

Term Typically Offered: Fall Only

Prerequisite(s): Graduate standing or permission of the instructor.

Description: It is widely acknowledged that China is a rising power in the global political economy. However, with the coexistence of tradition and modernity, the nature of Chinese culture and society remains heavily debated. This course explores a wide range of topics and issues that constitute the socio-cultural fabric of contemporary mainland Chinese society. These topics include, but are not limited to, family, gender, ethnicity, religion, education, politics, and economics. Our investigation will focus on two broad themes: 1) the unity and diversity of Chinese society, and 2) the continuity and change that took place from late traditional China to the present. The goal of this course includes learning various aspects of Chinese culture and society, studying diverse anthropological approaches to the study of China, and examining the political dimensions of representation.

Note: Cross-listed with AST 517.

Note: Students may not receive credit for this course and ANTH 317 or AST 317.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 522. Ecology, Politics and Culture 3 Units

Description: This course examines the relations between ecology, economic system, culture, ideology and power relations. The focus moves back and forth between theoretical synthesis and case studies. The case studies are both ethnographic and historical. A few of the themes treated in detail: the role of religious ritual in regulating certain environments; the mutual influences of ecology and political economy in the making of "the Third World"; the local and global politics of national parks; combined and uneven development. Stress is laid on political ecology as a complex, shifting, analytical framework. Questions of sustainability weave in and out of the proceedings. Also emphasized: the story of ecological analysis over the last seventy years is a story about changing relations between anthropology and other social sciences.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 526. Archaeology as Practice 3 Units

Prerequisite(s): ANTH 204.

Description: This course focuses on the analytical techniques that archaeologists use to study the past. Students will learn the practice of archaeology emphasizing modern methods of survey, excavation and analysis used to investigate the past. By the end of the course, students will have learned how to construct their own research plan, collect and analyze their data and draw inferences about the past.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 528. Animals and Humans**3 Units**

Description: This course explores the complex and often contradictory ways that humans interact with animals. We cover a range of topics emerging from a multidisciplinary perspective including the origins of hunting and domestication; modern animal economies; cross-cultural attitudes toward animals; symbolic representations of animals in art, literature, religion and folklore; animals as companions; and the status of animals, both wild and domestic, in contemporary society. Students will gain a broad, cross-cultural perspective on the relationship humans have with the rest of the animal kingdom, focused mainly on other mammals. For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 529. Zooarchaeology**3 Units**

Prerequisite(s): Graduate student status.

Description: The course will provide basic instruction in the identification of animal remains commonly recovered from archaeological sites. It will follow a taphonomic approach to zooarchaeology with an emphasis on understanding and interpreting the formation of archaeological faunal assemblages. The course examines approaches to using bone data to construct and investigate archaeological questions. Students will engage in hands-on identification and interpretation of animal remains commonly found in archaeological sites.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 530. Human Impacts on Past Environments**3 Units**

Prerequisite(s): Graduate status, or consent of instructor.

Description: This course is about the archaeological and paleoecological record of past human impacts on Earth. We will explore a number of concepts regarding socio-natural systems including land degradation, perception, resilience and sustainability. The course will provide a background for understanding the ways archaeologists and paleoecologists reconstruct past environments and recognize human impacts. We will examine a number of global case studies and discuss the possible lessons for current and future decision-making in human land-use.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 531. Anthropology of Water**3 Units**

Description: Explores the political ecology of water from prehistory to present; integrates the archaeological and historical record with contemporary examples of water management; emphasis on privatization, globalization, and health.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 534. Food and Farm Movements in the Americas**3 Units**

Description: An overview of social and political activism associated with agriculture and food.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 535. Nutritional Anthropology**3 Units**

Description: This course provides students with a broad overview of topics in nutritional anthropology; an area of study that is highly multidisciplinary. Students will learn to critically think about the impact of culture concerning the current understanding of nutrition in a biocultural context. The course will range over nutritional aspects of human evolution, federal perspectives on nutrition, aspects of nutritional epidemiology, food and ethnicity, food and self, and obesity as culture bound syndrome.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 536. The American South: History, Culture, Political Economy**3 Units**

Description: An examination of the anthropological literature of the American South focusing on its history and the intersection of race, class and political economy through time and space.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 540. Health and Civilization**3 Units**

Term Typically Offered: Occasionally Offered

Prerequisite(s): Graduate status, or consent of instructor.

Description: The central goal of this course is to understand how at multiple bio-cultural levels human populations (past and present) respond to their surroundings and social contexts, and how their responses can affect human health, the environment, and their own adaptation. To achieve this goal, the course will be focused on human lifestyle changes, the emerging of new diseases, and epidemiological transitions developed after the agricultural revolution and after the rise of complex, interdependent, and crowded societies.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 549. Modes of Consciousness**3 Units**

Term Typically Offered: Occasionally Offered

Description: This course is devoted to examining how consciousness mediates between humans and the wider material world. While all of the concepts central to anthropology and the other social sciences-culture, society, evolution, history, mind, politics, economics-are premised in consciousness, the premise receives attention only sporadically. The attention that has been paid reveals that consciousness is not uniform. It has various modes. Thus the course focuses on these.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 555. Black Death: The Pandemic that Changed Human History 3 Units**Term Typically Offered:** Fall Even Years

Description: The Black Death of the fourteenth century is, perhaps, one of the most studied and discussed pandemics in human history, but still we are trying to answer different questions such as: Where did it start? How accurate is retrospective diagnosis? How did different societies and countries react against the Black Death? What were the religious and social responses to the Black Death? How did the Black Death change human populations and lifestyles? The interplay and dialogue among disciplines such as history, anthropology, and biology help us to understand how infectious diseases affect our species, and a bio-cultural approach will create a more comprehensive and holistic scenario when reconstructing the impact of epidemics on human populations.

Note: Cross-listed with ANTH 355.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 562. Special Topics in Cultural Anthropology 3 Units**Prerequisite(s):** Consent of instructor.

Description: An examination of one or more specific areas of social-cultural anthropology. Details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 563. Special Topics in Biological Anthropology 1-3 Units

Description: An examination of one or more specific areas of biological anthropology. Details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 564. Special Topics in Archaeology 1-3 Units**Term Typically Offered:** Occasionally Offered**Prerequisite(s):** ANTH 202 and ANTH 204.

Description: An examination of specific areas of archaeology. Details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 576. Quantitative Analysis in Anthropology 3 Units**Term Typically Offered:** Fall Even Years

Description: This course provides an introduction to the use of quantitative analysis methods in anthropological research. Topics will include descriptive statistics, hypothesis testing, and multivariate statistics. The course will focus on choosing the appropriate statistical tests to answer specific research questions, proper interpretation of results, and visual and graphical methods for displaying results. This course is not intended to be an advanced math class, and derivation of statistical tests will not be covered in detail. However, students will be expected to gain an understanding of the logic and assumptions behind each test, when it should be used, and how results should be interpreted.

Note: Cross-listed with ANTH 376.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 578. Lithic Technology 3 Units**Prerequisite(s):** Graduate status or consent of instructor.**Fee:** An additional \$25.00 is charged for this course.

Description: This course provides an introduction to the study of stone tool technology. Topics to be covered include broad examination of major changes in stone tool technology during the course of human prehistory (~3.3 million - 10,000 years ago), analytical approaches commonly employed by archaeologists to interpret the lithic record, and experiential learning through knapping and lab exercises. In addition to the hands-on exercises, the course material is supported by films, and readings from the textbooks, and journal articles. Students are required to submit a literature based term paper focusing on ethnographic or archaeological case studies that incorporate lithic datasets.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 579. Ceramic Analysis 3 Units

Description: Pottery is abundant in many archaeological sites, and the study of pottery has a long history in archaeology. Analysis and interpretation of ceramics has been used by archaeologists to accomplish varied ends: to establish a time scale, to document interconnections between different areas, sites or groups of people, and to suggest what activities were carried out at particular sites. Archaeologists also use ceramics as a basis to understand the organization of ceramic production itself as an important activity. The varied means that archaeologists use to bridge the gap between the recovery of ceramics and their interpretation is the focus of this course.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 581. Geoarchaeology 3 Units**Term Typically Offered:** Spring Even Years

Description: A firm grasp of geologic principles is essential for interpreting prehistoric archaeological sites, and this course provides students with a basic understanding of geoarchaeology. No prior geologic or archaeological knowledge is required to take this course. The course begins with the basics of sediments, soils, stratigraphy, and dating. This is followed by discussion of different depositional environments and their impacts on the archaeological record. Key topics include site formation processes, landscape reconstruction, and interpretation of climate change.

Note: Cross-listed with ANTH 381.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 582. Kentucky Archaeology 3 Units

Description: This course introduces students to the archaeology of Kentucky with a focus on the precontact record. We begin with Paleoindian hunter-gatherers and end with Euro-American Settlement, Antebellum, Civil War, and Postbellum Records. We review key sites and assemblages and discuss models of cultural change. We situate past populations on the landscape by learning about biotic and geographic variation across the Commonwealth and consider how changes in resource availability impacted humans through time. We also visit archaeological sites and/or research laboratories.

Note: Cross-listed with ANTH 682.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 583. Who Owns the Past?**3 Units****Prerequisite(s):** Instructor approval required.

Description: This course explores the complexity of how the past and cultural heritage are used in political, professional, and everyday contexts, focusing on archaeological case studies from the 19th-21st Centuries. Over the course of the semester, students explore questions like: How is the past defined, and who should own objects and information about it? How are these questions culturally determined, and how do nationalism and issues of representation factor into the discussion? Why should we preserve the past, and how do we do so in meaningful and culturally sensitive ways? Through readings, written assignments, and discussion with peers, students examine these key ethical and epistemological issues in anthropology. Students apply principles learned throughout the course to develop a research project that explores a particular issue in cultural heritage.

Note: Cross-listed with ANTH 683.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 584. Anthropology of Death**3 Units**

Description: Students will learn how anthropologists (cultural anthropologists, biological anthropologists, and archaeologists) employ theory, methods, and data to understand past and present societies through their treatment of the dead. Through in-class discussions, community-engaged activities, and culminating projects, students will learn how death is fundamentally transformative - how it physically transforms human landscapes, how it inevitability transforms societies, and how its passage transforms populations directly and indirectly affected.

Note: Cross-listed with ANTH 384.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 607. Emergence of Human Culture**3 Units****Prerequisite(s):** Graduate status.

Description: Traces of the origins and development of human culture; focus on technology, social organization, language, food acquisition and sharing, religion and art in both Old and New World.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 608. Social and Cultural Theory**3 Units****Prerequisite(s):** Graduate status.

Description: Examination of how social and cultural theorists construct accounts of human existence that compliment and diverge from one another.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 609. Research Design: Archaeology**3 Units****Prerequisite(s):** Graduate status.

Description: Basic practices and procedures in research skills and writing in archaeology; focus on preparing grant proposals; publications and oral presentations.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 610. Research Design: Biological Anthropology**3 Units****Prerequisite(s):** Graduate status and consent of instructor.

Description: Review of methods, models, and theory from seminal papers and new research in anthropological genetics.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 611. Research Design: Socio-Cultural Anthropology**3 Units****Prerequisite(s):** Graduate status.

Description: Course focuses on developing a substantive research project in cultural anthropology; students will integrate a literature review, theoretical and methodological approaches, and data collection strategies to produce a research proposal.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 612. Seminar: Contemporary Issues in Anthropology**3 Units****Prerequisite(s):** Graduate status.

Description: Team taught course focused on the intertwined contributions of archaeology, biological and cultural anthropology to understandings of theory and method in anthropology. Themes will vary year to year.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 622. Anthropology of Violence**3 Units****Prerequisite(s):** Graduate status.

Description: Seminar on anthropological approaches to the study of violence and human suffering, including political, structural, domestic, and criminal violence. Case studies come from different regions of the world.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 624. Black Cultural Traditions**3 Units****Prerequisite(s):** Graduate status.

Description: Intensive and interdisciplinary approach to production of African-based traditions in the Diaspora; explores sociocultural implications of African-based literacy and arts.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 625. Globalization, Transnationalism, and Anthropology**3 Units****Prerequisite(s):** Graduate status.

Description: Focus on globalization at the local level; how it bears on identities and how subjects construct identities in transnational spaces.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

- ANTH 626. Food Justice** 3 Units
Prerequisite(s): Graduate status.
Description: This course explores the political, economic, cultural dimensions of hunger, food security, and food justice globally and locally. The concept of food justice has been deployed to capture consumption-based inequalities in access to tasty and nutritious food. The course considers not only justice in terms of dietary and culinary consumption but also such matters as land rights, intellectual patrimonies, migrant farm labor, restaurant working conditions, the concentration of grocery chains, food regulation, international trade rules related to agricultural commodities, and the environmental impacts of farming. The course concludes with a look at transnational efforts to build more just and sustainable food systems.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 627. Political Economy and Culture** 3 Units
Prerequisite(s): Graduate status.
Description: Examines how anthropologists have used concepts and methods derived from political economy to understand markets, production, power, and cultural practices.
Course Attribute(s): CBL - This course includes Community-Based Learning (CBL). Students will engage in a community experience or project with an external partner in order to enhance understanding and application of academic content.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 640. Linguistic Anthropology** 3 Units
Prerequisite(s): LING 325 or LING 327 or graduate standing.
Description: This course provides an introduction to the field of linguistic anthropology. Topics include: the semiotic properties of human language; principles of linguistic and cultural categorization; language use in social interaction; markers of social identity and relationship; registers of social conduct; the textual organization of discourse; the role of discourse in the formulation of norms, and the institutionalization of modes of conduct.
Note: Cross-listed with LING 640.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 650. Health and Disease: A Bio-Cultural Approach** 3 Units
Prerequisite(s): Graduate student.
Description: Focus on the adaptations that made us human and may not fit as well at the present; how human biology and evolution were and are shaped by lifestyles, health, and disease.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 651. Seminar in Biological Anthropology** 3 Units
Prerequisite(s): Graduate status.
Description: Discusses current issues and debates in biological anthropology; discuss selected papers that have made a fundamental contribution to understanding human evolution.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 653. Human Molecular Evolutionary Genetics** 3 Units
Prerequisite(s): Graduate status and consent of instructor.
Description: Introduction to population genetics theory and a review of the peopling of the world as conceptualized using both molecular and anthropometric data.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 661. Special Topics in Anthropology** 3 Units
Term Typically Offered: Fall, Spring, Summer
Prerequisite(s): Consent of instructor, or department chair.
Description: Outlines vary as to area of expertise of instructors; objectives aim at the maximum of staff utilization and meeting program needs within the University which call for studies in anthropology as that discipline interrelates with other special knowledge.
Note: Students may take the course as often as topics vary, up to 6 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 662. Special Topics in Cultural Anthropology** 3 Units
Prerequisite(s): Consent of instructor.
Description: An examination of one or more specific areas of social-cultural anthropology.
Note: Details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 663. Special Topics in Biological Anthropology** 1-3 Units
Description: An examination of one or more specific areas of biological anthropology.
Note: Details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 664. Special Topics in Archaeology** 3 Units
Term Typically Offered: Fall, Spring, Summer
Description: An examination of one or more specific areas of archaeology.
Note: Details announced each semester.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 670. Independent Study (Reading)** 1-6 Units
Prerequisite(s): Graduate status.
Description: Intensive reading course under the supervision of a faculty member.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)
- ANTH 671. Independent Study (Research)** 1-6 Units
Prerequisite(s): Graduate status.
Description: Intensive research course under the supervision of a faculty member.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ANTH 672. Thesis**Prerequisite(s):** Graduate status.**Description:** Reading, research, and writing of thesis under the supervision of a faculty member.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**1-6 Units**

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

ANTH 673. Internship**Prerequisite(s):** Graduate status.**Description:** Internship in a social service, governmental, or NGO under the supervision of a faculty member. A substantial paper related to the internship is required.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**1-6 Units****Course Fees**Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (<https://louisville.edu/bursar/tuitionfee/university-fees/>).**ANTH 682. Kentucky Archaeology****Description:** This course introduces students to the archaeology of Kentucky with a focus on the precontact record. We begin with Paleoindian hunter-gatherers and end with Euro-American Settlement, Antebellum, Civil War, and Postbellum Records. We review key sites and assemblages and discuss models of cultural change. We situate past populations on the landscape by learning about biotic and geographic variation across the Commonwealth and consider how changes in resource availability impacted humans through time. We also visit archaeological sites and/or research laboratories.**Note:** Cross-listed with ANTH 582.**3 Units**For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ANTH 683. Who Owns the Past?****Prerequisite(s):** Instructor approval required.**Description:** This course explores the complexity of how the past and cultural heritage are used in political, professional, and everyday contexts, focusing on archaeological case studies from the 19th-21st Centuries. Over the course of the semester, students explore questions like: How is the past defined, and who should own objects and information about it? How are these questions culturally determined, and how do nationalism and issues of representation factor into the discussion? Why should we preserve the past, and how do we do so in meaningful and culturally sensitive ways? Through readings, written assignments, and discussion with peers, students examine these key ethical and epistemological issues in anthropology. Students apply principles learned throughout the course to develop a research project that explores a particular issue in cultural heritage.**Note:** Cross-listed with ANTH 583.**3 Units**For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (https://csprd.louisville.edu/ps/ps_class/EMPLOYEE/PSFT_CS/c/COMMUNITY_ACCESS.CLASS_SEARCH./x/?state=62dab551a0d600a5e8237359c50704e59007&duo_code=sjUx20STj21bIWVEuQ3Z1YRjHmfxpqoV).**ART 501. Concepts in Painting****3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 301 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Exploration of conceptual and technical issues in painting.**Note:** May be repeated up to a maximum of 12 hours.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ART 502. Advanced Concepts in Painting****3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 301 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Exploration of individual (self-generated) conceptual issues and techniques in painting.**Note:** Formerly Directed Study Painting.**Note:** May be repeated up to a maximum of 12 hours.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ART 503. Special Topics in Painting****3 Units****Term Typically Offered:** Occasionally Offered**Prerequisite(s):** ART 301 and BFA candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Focused exploration of a painting topic, process, technique or issue.**Note:** May be repeated up to 12 credit hours.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)**ART 504. Directed Study in Painting****3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 502 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** A focused, in-depth exploration of self-generated problems in painting.**Note:** May be repeated up to a maximum of 12 credit hours.For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 505. Advanced Figure Drawing Term Typically Offered: Fall, Spring Prerequisite(s): ART 305 and BFA Candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Advanced study of the human figure exploring more complex problems as a means of developing an individual approach to drawing. Coursework may include work from nude models. Note: May be repeated to a maximum of 12 hours. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 510. Information Visualization Term Typically Offered: Spring Only Prerequisite(s): BFA Graphic Design Candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Intermediate-level studio to create and refine visual forms with emphasis on presenting numerical data and relational information in visually engaging ways with accuracy and integrity for a general audience. Formerly taught as Design for Visualizing Data and Information. Cross-listed with DES 510. Note: This course is a requirement for completion of the BFA in Graphic Design. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 506. Themes and Concepts in Drawing Term Typically Offered: Occasionally Offered Prerequisite(s): ART 305 and BFA Candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Individual problems stressing development of personal imagery and concepts and optional media and approaches. Coursework may include work from nude models. May be repeated to a maximum of 12 hours. Note: Formally taught as Advanced Drawing Concepts. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 511. Advanced Glassmaking Techniques Term Typically Offered: Fall, Spring Prerequisite(s): ART 311 and BFA candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Specialized exploration of glassmaking techniques. Emphasis on professional and academic issues pertaining to glass. Note: May be repeated up to 12 hours. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 507. Directed Study in Drawing Term Typically Offered: Fall, Spring Prerequisite(s): ART 505 or ART 506; and BFA Candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Experimentation on individual problems in drawing. Note: May be repeated to a maximum of 12 hours. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 512. Directed Study in Glass Term Typically Offered: Fall, Spring Prerequisite(s): ART 511 and BFA Candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Experimentation on individual problems in Glass. Emphasis is placed on realization and execution of ideas. Note: May be repeated up to 12 hours. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 508. Art Education Methods and Research I Prerequisite(s): Fine Arts majors only. Fee: An additional \$50.00 is charged for this course. Description: Art education methods and current research readings to satisfy Kentucky certification requirements for teachers of art in grades K-6. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 516. Advanced Digital Illustration Term Typically Offered: Fall, Spring Prerequisite(s): ART 306; and BFA Candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: Further exploration of modern and traditional illustration techniques in a digital setting. Students will examine how illustration, narrative writing, and layout intersect to create cohesive and engaging visual storytelling through a combination of short-term studio exercises, readings, and critiques. Emphasis will be placed on character design, world-building, narrative pacing, and the integration of text with visual elements. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 509. Anatomy & Life Drawing Term Typically Offered: Occasionally Offered Prerequisite(s): ART 305 and BFA candidacy; or faculty consent. Fee: An additional \$50.00 is charged for this course. Description: The study of human anatomy for the artist as visual structural form with emphasis on skeletal system, and movement; muscle system, and surface features. Course work may include drawing from nude models. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 518. Art Education Methods and Research II Term Typically Offered: Occasionally Offered Prerequisite(s): Fine Arts majors only. Fee: An additional \$50.00 is charged for this course. Description: Art education methods and current research readings to satisfy Kentucky certification requirements for teachers in grades 7-12. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units

ART 520. Adventures in Design Methods and Processes 3 Units**Term Typically Offered:** Spring Odd Years**Prerequisite(s):** ART 572; BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** An in-depth investigation of experimental methods of the design process within the context of designing effective visual communications. This studio-based exploration of graphic design revolves around Adventures: unconventional projects with emphasis placed on experimentation and observation.**Note:** This course satisfies an elective for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 521. Practice of Sculpture 3 Units**Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 321 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Introduction to a wide range of sculpture processes and media with an exploration of concepts and issues in contemporary sculpture.**Note:** Formerly taught as Sculpture II.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 522. Sculpture Strategies 3 Units**Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 321 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Exploration of sculpture at the advanced level with emphasis on developing an individual direction in sculpture.**Note:** Formerly taught as Advanced Sculpture.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 523. Directed Study in Sculpture 3 Units**Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 521 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Experimentation on individual problems in sculpture.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 530. Environmental Graphic Design and Wayfinding 3 Units**Term Typically Offered:** Occasionally Offered**Prerequisite(s):** ART 572; BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Problems in architectural, environmental, and placemaking graphic design.**Note:** This course satisfies an elective for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 531. Advanced Ceramics: Wheelthrowing 3 Units**Term Typically Offered:** Fall Only**Prerequisite(s):** ART 331 and BFA Candidacy; or consent of instructor.**Fee:** An additional \$50.00 is charged for this course.**Description:** Focus on individual expression, experimentation and development of subject in wheelthrown vessels. Loading and firing of kilns is expected.**Note:** Formerly taught as Advanced Ceramics I.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 532. Advanced Ceramics: Sculptural Forms 3 Units**Term Typically Offered:** Spring Only**Prerequisite(s):** ART 331 and BFA Candidacy; or consent of the instructor.**Fee:** An additional \$50.00 is charged for this course.**Description:** Focus on individual expression, experimentation and development of content driven sculptural forms. Students explore abstraction, observation and narrative through singular or modular pieces. Loading and firing of kilns is expected. May be repeated to a maximum of 12 hours.**Note:** Formerly taught as Advanced Ceramics II & Handbuilding Techniques.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 533. Clay Glazes and Firing 3 Units**Term Typically Offered:** Occasionally Offered**Prerequisite(s):** ART 331 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** The study of the chemistry of clay and glazes. Students will develop and test formulas for clay bodies, slips and glazes. The theories and practice of firing ware will also be explored.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 534. Directed Study in Ceramics**3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 531 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Experimentation on individual problems in clay and ceramics.**Note:** May be repeated up to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 540. Art, Design and Meaning**3 Units****Term Typically Offered:** Spring Even Years**Prerequisite(s):** ART 572; BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Readings and experiments applying semiotics to visual communication problems in the fine and design arts.**Note:** This course satisfies an elective for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 541. Studio Practice in Printmaking**3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 341.**Fee:** An additional \$50.00 is charged for this course.**Description:** Advanced projects in all printmaking media. Emphasis is on the unique qualities of print media for personal expression.**Note:** Formerly ART 525.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 542. Digital Printmaking**3 Units****Term Typically Offered:** Occasionally Offered**Prerequisite(s):** BFA Candidacy or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Using the computer to create imagery for printmaking. An introduction to digital techniques to be used alone or in conjunction with traditional printmaking media to produce fine art prints. May be repeated to a maximum of 12 hours.**Note:** Formally ART 526.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 543. Directed Study in Printmaking**3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 541 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Experimentation on individual problems in printmaking.**Note:** Formerly ART 527.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 550. Lettering and Font Design**3 Units****Term Typically Offered:** Spring Odd Years**Prerequisite(s):** ART 572; BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** In-depth investigation of the contemporary world of handmade work marks and typeface design.**Note:** This course satisfies an elective for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 551. Studio Lighting**3 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** ART 351 or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** This course focuses on all aspects of lighting including studio strobes, on-camera flash, and natural light for digital photography. Explored themes will include portraiture, still-life, and landscapes, both interior and exterior. Formerly taught as Photography Techniques and Processes. Students are required to have a digital camera to take this course. May be repeated to a maximum of 6 hours.**Note:** Formerly taught as Lighting.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 552. Digital Photography**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 351 or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Exploration of color photography concepts and digital media utilizing photographic principles and techniques. Formerly Color Photography.**Note:** May be repeated to a maximum of 6 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 554. Hybrid Photography**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 351 or Faculty Consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** An introduction to historic photographic techniques through the use of hand-crafted pinhole cameras, toy cameras, and view cameras. May be repeated to a maximum of 6 hours.**Note:** Formerly taught as Experimental Photography I.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 555. Directed Study in Photography**3 Units****Term Typically Offered:** Fall, Spring**Prerequisite(s):** ART 351, BFA Candidacy, or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Experimentation on individual problems in photography.**Note:** May be repeated to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 556. Experimental Photography**3 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** ART 351; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Experimentation with historic and alternative photographic methods of image making. May be repeated up to 6 hours.**Note:** Formerly taught as Experimental Photography II.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 557. Advanced Photography Seminar**3 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** ART 551 and ART 552, or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Students will work on long-term individual self-designed projects that focus on exhibitions and professional portfolios. The course will emphasize production, research, critique, and revision. This course includes readings on contemporary photographic theory, student-led slide lectures, research presentations, field trips, and writing as an important component of developing advanced photographic work.**Note:** Formerly taught as Advanced Photography.**Note:** May be repeated to a maximum of 6 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 558. Special Topics in Photography**3 Units****Term Typically Offered:** Occasionally Offered**Prerequisite(s):** ART 351 or faculty consent Focused exploration of a photography topic, process, technique or issue.**Fee:** An additional \$50.00 is charged for this course.**Description:****Note:** May be repeated with different subtitles to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 559. Computer Applications for Interiors I**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 361 or DES 361; BFA Candidacy or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** An introduction to professional applications for graphic communication skills, specifically the technical drawings used in construction. Students will develop a set of construction drawings and schedules for a project of their own design. The course will introduce professional industry-standard software applications and drawing skills, and foster the continuing development of those skills. This course is a requirement for completion of the BFA in Interior Design.**Note:** Cross-listed with DES 559.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 560. Sustainable Design**3 Units****Prerequisite(s):** ART 361 and ART 362; BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Principles and theory of sustainable design in order to prepare students for the LEED (Leadership in Energy and Environmental Design) accreditation exam. Students will also learn to apply LEED professional standards into practical design solutions through interdisciplinary projects.**Note:** This course is a requirement for completion of the BFA in Interior Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 561. Interior Design Studio I**3 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** ART 361 or DES 361 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Introduction to small scale interior design projects emphasizing process and techniques in relation to special populations.**Note:** Cross-listed with DES 561.**Note:** Formerly taught as Interior Architecture Studio I.**Note:** This course is a requirement for completion of the BFA in Interior Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 562. Interior Design Studio II**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 561 or DES 561 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Study of three-dimensional space through model making. Formerly taught as Interior Architecture Studio II. This course is a requirement for completion of the BFA in Interior Design.**Note:** Cross-listed with DES 562.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 563. Interior Design Studio III 3 Units**Term Typically Offered:** Spring Only**Prerequisite(s):** ART 562 or DES 562 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Design of projects involving such areas as historic preservation, hospitality, and retail sales. Formerly taught as Interior Architecture Studio III. This course is a requirement for completion of the BFA in Interior Design.**Note:** Cross-listed with DES 563.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 564. Interior Design Studio IV 3 Units**Term Typically Offered:** Fall Only**Prerequisite(s):** ART 563 or DES 563 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Large scale office design involving programming, space planning and specifying materials. Practice for NCIDQ exam.**Note:** Cross-listed with DES 564.**Note:** Formerly taught as Architecture Studio IV.**Note:** This course is a requirement for completion of the BFA in Interior Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 565. Directed Projects in Interior Design 3 Units**Term Typically Offered:** Spring Only**Prerequisite(s):** Senior standing; BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Development of advanced research and project design.**Note:** Cross-listed with DES 565.**Note:** Formerly taught as Directed Projects in Interior Architecture.**Note:** May be repeated to a maximum of 6 hours.**Note:** This course is a requirement for completion of the BFA in Interior Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 566. Interiors Construction 3 Units**Term Typically Offered:** Fall Odd Years**Prerequisite(s):** ART 361 or DES 361 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** A study of interiors construction components and materials. A review of building codes, specifications and terminology.**Note:** Cross-listed with DES 566.**Note:** This course is a requirement for completion of the BFA in Interior Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 567. Interior Finishes 3 Units**Term Typically Offered:** Spring Only**Prerequisite(s):** ART 361 or DES 361 and BFA Candidacy; or faculty consent.**Description:** A study of interior materials, such as wall coverings and floor coverings and their fabrication, and marketing and installation procedures.**Note:** Cross-listed with DES 567.**Note:** Formerly taught as Textiles and Finishes for Interior Design.**Note:** This course is a requirement for completion of the BFA in Interior Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 568. Building Systems 3 Units**Term Typically Offered:** Fall Even Years**Prerequisite(s):** ART 361 or DES 361 and BFA Candidacy; or faculty consent.**Description:** An investigation of building systems including - HVAC, plumbing, electrical, lighting and acoustics and other systems. Formerly taught as Environmental Systems. This course is a requirement for completion of the BFA in Interior Design.**Note:** Cross-listed with DES 568.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 569. Computer Applications for Interiors II 3 Units**Term Typically Offered:** Spring Only**Prerequisite(s):** ART 559 or DES 559 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Intensive use of industry-standard software applications in the exploration, documentation, and presentation of design projects. Course will take students from 2-D drafting to 3-D modeling, rendering, and animation. Formerly Computer Applications in Interior Design. This course is a requirement for completion of the BFA in Interior Design.**Note:** Cross-listed with DES 569.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 570. Design for Public Issues I 3 Units**Term Typically Offered:** Fall Only**Prerequisite(s):** Senior standing and BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Advanced studio to understand dimensions of a public issue and propose system-level interventions in a collaborative, human-centered design process, with emphasis on problem identification. Formerly taught as Design for Public Issues. Cross-listed with DES 570.**Note:** This course is a requirement for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 571. Typography I**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Studio course on typography, covering the anatomy of type, typefaces, and the function of typography in visual communication, with an emphasis on practical skills related to print and digital forms. Cross-listed with DES 571.**Note:** This course is a requirement for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 572. Typography II**3 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** ART 571 or DES 571 and BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** An intermediate studio focused on the study and use of type to solve visual communication problems with advanced skills of typography in organizing, arranging, and presenting information in complex forms. Cross-listed with DES 572.**Note:** This course is a requirement for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 573. Typography III**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 572 or DES 572 and BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Advanced studio on the development of a cohesive visual and verbal system through a systematic combination of typography, color, image style and layout across a variety of forms. Formerly taught as Identity Systems. Cross-listed with DES 573.**Note:** This course is a requirement for completion of the BFA in Graphic Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 574. The Book Form**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 572 and BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** The communication and expressive possibilities of bound pages as a medium for words and images.**Note:** This course is a requirement for completion of the BFA in Graphic Design.**Note:** Formerly taught as Graphic Design V.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 575. Packaging Design**3 Units****Term Typically Offered:** Occasionally Offered**Prerequisite(s):** BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Problems in designing for packaging structures. Formerly taught as Packaging. This course satisfies an elective for completion of the BFA in Graphic Design.**Note:** Cross-listed with DES 575.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 576. Interaction Design I**3 Units****Term Typically Offered:** Spring Only**Prerequisite(s):** BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Studio course on the conceptualization and development of human experiences in digital environments; covering the process from research to delivery with an emphasis on stakeholder engagement. This course is a requirement for completion of the BFA in Graphic Design. Cross-listed with DES 576.**Note:** Formerly taught as Web Site Design.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 577. Interaction Design II**3 Units****Term Typically Offered:** Fall Only**Prerequisite(s):** ART 576 or DES 576 and BFA Graphic Design Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Intermediate-level studio covering special problems of digital environments including interface issues, design systems, and consistency across interactions; with discussions about implementation and delivery. This course satisfies an elective for completion of the BFA in Graphic Design. Cross-listed with DES 577.**Note:** Formerly taught as Design for Interaction.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 578. Image and Installation**3 Units****Term Typically Offered:** Occasionally Offered**Prerequisite(s):** ART 351 and BFA Candidacy; or faculty consent.**Fee:** An additional \$50.00 is charged for this course.**Description:** Students will construct artwork designed to transform site-specific spaces by using analog and digital approaches. Multi-sensory experiences of space and time will be explored through basic video editing, drone flying, sculptural, perceptual and interdisciplinary-based assignments. Installation work will be contextualized with respect to other forms of aesthetic experience and constructed with meaningful connections between individuals, sites, history, technology and materials. Artists and collaborative groups who utilize a variety of methods in order to activate public space or site-specific locations will also be studied.**Note:** May be repeated to a maximum of 6 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 579. Directed Study in Graphic Design	1-3 Units	ART 583. Papermaking	3 Units
Term Typically Offered: Fall, Spring		Term Typically Offered: Occasionally Offered	
Prerequisite(s): ART 571 and BFA Graphic Design Candidacy; or faculty consent.		Prerequisite(s): BFA Candidacy, faculty consent for graduate credit.	
Fee: An additional \$50.00 is charged for this course.		Fee: An additional \$50.00 is charged for this course.	
Description: Experimentation on individual problems in graphic design.		Description: Introduces the basic procedures of handmade paper while investigating papermaking as a means for contemporary expression. May be repeated to a maximum of 6 hours.	
Note: This course satisfies an elective for completion of the BFA in Graphic Design.		Note: May be taken for graduate credit.	
Note: May be repeated to a maximum of 12 hours.			
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)		For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	
ART 580. Design for Public Issues II	3 Units	ART 584. Directed Study in Fiber and Mixed Media Art	3 Units
Term Typically Offered: Spring Only		Term Typically Offered: Fall, Spring	
Prerequisite(s): BFA Graphic Design Candidacy; or faculty consent.		Prerequisite(s): ART 581 or ART 582; and BFA Candidacy; or faculty consent.	
Fee: An additional \$50.00 is charged for this course.		Fee: An additional \$50.00 is charged for this course.	
Description: Advanced studio to understand dimensions of a public issue and propose system-level interventions in a collaborative, human-centered design process, with emphasis on program development. This course satisfies an elective for completion of the BFA in Graphic Design.		Description: Experimentation on individual problems in fiber and mixed media art.	
Note: Cross-listed with DES 580.		Note: May be repeated to a maximum of 12 hours.	
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)		For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	
ART 581. Advanced Fiber/Surface Design	3 Units	ART 585. Book Art Concepts	3 Units
Term Typically Offered: Fall, Spring		Term Typically Offered: Occasionally Offered	
Prerequisite(s): ART 381 and BFA Candidacy; or faculty consent.		Prerequisite(s): BFA candidacy or faculty consent.	
Fee: An additional \$50.00 is charged for this course.		Fee: An additional \$50.00 is charged for this course.	
Description: Traditional as well as non-traditional fiber techniques are used as a means for developing conceptual skills and problem solving ability in pursuit of a personal direction. Emphasis on surface development using printing, painting, and photo techniques.		Description: An introduction to traditional and non-traditional book arts with focus on the construction of traditional book forms such as folded bindings, Japanese stab bindings, portfolios, as well as types of multi-signature bindings. Emphasis will be placed on the book as an art form incorporating concept, design, content, and craft.	
Note: Formerly taught as Fiber: Surface.		Note: May be repeated to a maximum of 6 hours.	
Note: May be repeated to a maximum of 12 hours.		For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)		ART 588. Internship in Design	3 Units
ART 582. Advanced Fiber/ Mixed Media Art	3 Units	Grading Basis: Pass/Fail	
Term Typically Offered: Occasionally Offered		Term Typically Offered: Fall, Spring, Summer	
Prerequisite(s): ART 381 and BFA Candidacy; or faculty consent.		Prerequisite(s): BFA Graphic Design Candidacy or faculty consent.	
Fee: An additional \$50.00 is charged for this course.		Description: Internships in graphic design are paid, hands-on work experience to implement the skills learned during the course of graphic design program study. Internships are by special arrangement. This work/ learning arrangement must be overseen by a graphic design faculty member and by a designated employee of an organization. Registering for ART/DES 588 is contingent upon the student identifying a graphic design faculty member who will sponsor and oversee their work. May not be used to fulfill minimum requirements for the BFA in Graphic Design. May be repeated to a maximum of 6 hours.	
Description: Traditional as well as non-traditional fiber techniques are used as a means for developing conceptual skills and problem solving ability in pursuit of a personal direction. Emphasis on sculptural form, papermaking techniques and installation. May be repeated to a maximum of 12 hours.		Note: Cross-listed with DES 588.	
Note: Formerly taught as Fiber: Construction.		For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	
For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)			

ART 590. Special Topics in Studio Art 3 Units
Term Typically Offered: Occasionally Offered
Prerequisite(s): BFA Candidacy or faculty consent.
Fee: An additional \$50.00 is charged for this course.
Description: Advanced exploration of a particular theme, medium or combination of media outside the scope of established departmental curriculum, with emphasis on individual problems.
Note: May be repeated with different subtitles to a maximum of 12 hours.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 594. Directed Projects in Design 3 Units
Term Typically Offered: Fall, Spring
Prerequisite(s): BFA Graphic Design Candidacy or faculty consent.
Fee: An additional \$50.00 is charged for this course.
Description: Advanced studio for a personal interest project that demonstrates capacity to synthesize visual and written components into a compelling communication program with a variety of forms.
Note: Cross-listed with DES 594.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 595. Independent Study 1-3 Units
Prerequisite(s): Minimum grade point average of 3.0 overall, and minimum grade point average of 3.5 in the department, and at least 18 semester hours credit in the department.
Fee: An additional \$50.00 is charged for this course.
For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 596. Professional Development in Interior Design - CUE 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): ART 564 or DES 564 and BFA Candidacy; or faculty consent.
Fee: An additional \$50.00 is charged for this course.
Description: The professional aspects of interior design, with emphasis on the fundamental knowledge and technical skills required for practice in the interior design profession and the role, purpose, and study of professional development. Students will develop, prepare, and edit a resume and a portfolio of work for presentation within the interior design profession. This course is a requirement for completion of the BFA in Interior Design.
Note: Cross-listed with DES 596.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 597. Professional Development in Studio Arts - CUE 3 Units
Term Typically Offered: Fall, Spring
Prerequisite(s): Senior standing; BFA Candidacy and successful completion of BFA review.
Fee: An additional \$50.00 is charged for this course.
Description: The development, preparation, and editing of a resume, artist's statement, and a body of work for exhibition in Studio Art. This course is required for the completion of the BFA in Studio Art and is restricted to students completing the BFA program in the current semester. Permission to enroll will only be granted after the student successfully passes the BFA review in the semester prior.
Note: Exhibition must be scheduled within the same calendar year as graduation.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 598. Professional Development in Graphic Design - CUE 3 Units
Term Typically Offered: Spring Only
Prerequisite(s): Senior standing and BFA Candidacy; or faculty consent.
Fee: An additional \$50.00 is charged for this course.
Description: Advanced studio dedicated to the development of professional quality portfolio and resume representing undergraduate experience; plus, the organization and production of the senior design portfolio day.
Note: Formerly taught as Portfolio Development in Graphic Design - CUE.
Note: Cross-listed with DES 598.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 599. Studio Art Undergraduate Capstone Seminar - CUE 1 Unit
Term Typically Offered: Fall, Spring
Prerequisite(s): Senior standing and BA Candidacy; or faculty consent.
Fee: An additional \$50.00 is charged for this course.
Description: This course provides students with a culminating experience through research, critical thinking, analytical writing and fieldwork focused on the visual arts process and professions.
Note: This course is required for completion of the BA in Studio Art.
Note: Course must be scheduled within the same calendar year as graduation.
Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (<http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm>)

ART 600. Graduate Seminar Grading Basis: Pass/Fail Term Typically Offered: Fall Only Prerequisite(s): Graduate standing. Fee: An additional \$75.00 is charged for this course. Description: This course will provide an orientation to the University of Louisville and the MFA program. Students will plan and take a field trip to New York City (pending funding) in order to survey national and international art exhibits. Students will organize and mount a group exhibition at the MFA Gallery and learn the practice of professional presentation and promotion of art. Students will also learn the practice of producing an artist's lecture, receive library training, and write a research paper on a contemporary topic. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 610. Special Problems in Studio Art Term Typically Offered: Fall, Spring Prerequisite(s): MFA standing or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Advanced exploration of a particular theme, medium or combination of media outside the scope of established departmental curriculum, with emphasis on individual problems. Note: May be repeated, but no more than 18 hours may be counted toward MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 601. Workshop in Painting Term Typically Offered: Occasionally Offered Prerequisite(s): Four semesters of undergraduate painting. Fee: An additional \$75.00 is charged for this course. Description: Concentrated study in advanced contemporary painting problems, with strong emphasis on independent visual thought. Note: May be repeated, but no more than 18 hours can be credited to MA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 611. Workshop in Glass Prerequisite(s): Graduate status or consent of instructor. Fee: An additional \$75.00 is charged for this course. Description: Concentrated pursuit of creative concepts using glass. Refinement of conceptual and practical glassmaking fundamentals. Note: May be repeated, but no more than 18 hours may be counted toward MA or MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 602. Professional Practice in Painting Prerequisite(s): MFA Standing, or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Individual research and professional practice in painting. Note: May be repeated but no more than 18 hours may be applied to MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 612. Professional Practice in Glass Prerequisite(s): MFA standing or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Individual research and professional practice in glass. Note: May be repeated, but no more than 18 hours can be credited to MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 605. Workshop in Drawing Term Typically Offered: Occasionally Offered Prerequisite(s): Four semesters of undergraduate drawing. Fee: An additional \$75.00 is charged for this course. Description: Concentrated study of contemporary concepts and theories leading to independent visual thought expressed through drawing techniques. Note: May be repeated, but no more than 18 hours can be counted toward MA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 621. Workshop in Sculpture Term Typically Offered: Occasionally Offered Prerequisite(s): Four semesters of undergraduate sculpture. Fee: An additional \$75.00 is charged for this course. Description: Concentrated study of sculptural problems and techniques. Note: May be repeated, but no more than 18 hours can be credited to MA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 606. Professional Practice Drawing Term Typically Offered: Occasionally Offered Prerequisite(s): MFA standing, or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Individual research and professional practice in drawing. Note: May be repeated, but no more than 18 hours may be applied MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 622. Professional Practice in Sculpture Prerequisite(s): MFA standing or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Individual research and professional practice in sculpture. Note: May be repeated, but no more than 18 hours may be applied to MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units

ART 631. Workshop in Ceramics Term Typically Offered: Occasionally Offered Prerequisite(s): Consent of instructor. Fee: An additional \$75.00 is charged for this course. Description: Advanced individual projects and experimentation. Note: May be repeated, but no more than 18 hours can be credited to MA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 646. Thesis Guidance Fee: An additional \$75.00 is charged for this course. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 632. Professional Practice in Ceramics Term Typically Offered: Occasionally Offered Prerequisite(s): MFA standing or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Individual research and professional practice in ceramics. Note: May be repeated, but no more than 18 hours may be applied to MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 651. Workshop in Photography Term Typically Offered: Occasionally Offered Prerequisite(s): Four semesters of undergraduate photography, and consent of instructor. Fee: An additional \$75.00 is charged for this course. Description: Concentrated study of photographic techniques and theory leading to independent visual thought. Note: May be repeated, but no more than 18 hours can be counted toward a MA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
ART 641. Workshop in Printmaking Term Typically Offered: Occasionally Offered Prerequisite(s): Four semesters of undergraduate printmaking. Fee: An additional \$75.00 is charged for this course. Description: Concentrated study leading to independent visual thought. Note: May be repeated, but no more than 18 hours can be credited to MA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units	ART 652. Professional Practice in Photography Prerequisite(s): MFA standing, or faculty consent. Fee: An additional \$75.00 is charged for this course. Description: Individual research and professional practice in photography. Note: May be repeated, but no more than 18 hours may be applied to MFA. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)	3 Units
