# **MATHEMATICS (MATH)**

Subject-area course lists indicate courses currently active for offering at the University of Louisville. Not all courses are scheduled in any given academic term. For class offerings in a specific semester, refer to the Schedule of Classes (https://csprd.louisville.edu/psp/ps\_class/ EMPLOYEE/PSFT\_CS/c/COMMUNITY\_ACCESS.CLASS\_SEARCH./x/? state=62dab551a0d600a5e8237359c50704e59007&duo\_code=sjUx20STj21WYEE48337feffijeffapaleyecific term, refer to the Schedule

500-level courses generally are included in both the undergraduate- and graduate-level course listings; however, specific course/section offerings may vary between semesters. Students are responsible for ensuring that they enroll in courses that are applicable to their particular academic programs.

## **Course Fees**

Some courses may carry fees beyond the standard tuition costs to cover additional support or materials. Program-, subject- and course-specific fee information can be found on the Office of the Bursar website (https:// louisville.edu/bursar/tuitionfee/university-fees/).

MATH 501. Introduction to Analysis I - CUE 3 Units Term Typically Offered: Fall, Spring Prerequisite(s): MATH 301, MATH 311 and MATH 325. Description: Foundations of the real number system, sequences and series, topology of the line, continuity, differentiation of functions of one variable Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors MATH 521. Modern Algebra I - CUE with at least 90 earned credits/senior-level status. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm) MATH 502. Introduction to Analysis II 3 Units Term Typically Offered: Spring Only Prerequisite(s): MATH 501. Description: Riemann integration on the line, sequences and series of functions, uniform convergence, metric spaces. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm) MATH 505. Introduction to Partial Differential Equations 3 Units Term Typically Offered: Fall, Summer Prerequisite(s): MATH 301 and MATH 405 or PHYS 350. Description: Techniques for solving standard heat, wave, and potential equations, including discussion of Fourier analysis techniques. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm) MATH 507. Fourier Analysis 3 Units Term Typically Offered: Spring Only Prerequisite(s): MATH 301 and MATH 405. Description: Introduction to Fourier series and transforms.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

## MATH 511. Complex Analysis I

Term Typically Offered: Occasionally Offered

Prerequisite(s): MATH 301 or ENGR 201; MATH 311; MATH 325 or ENGR 330.

Description: Geometry of the complex plane, analytic and meromorphic functions, linear fractional transformations. Cauchy's Theorem and the Residue Theorem. Emphasizes computational aspects of the course topics.

of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 512. Complex Analysis II Prerequisite(s): MATH 511.

Description: A continuation of MATH 511, including deeper properties of analytic, meromorphic, harmonic functions and conformal mappings. Emphasizes theoretical aspects of the course topics. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 520. Theory of Numbers

3 Units

3 Units

Prerequisite(s): MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.

Description: A study of the integers and their divisibility properties. Particular emphasis on the theory of congruencies, partitions, prime numbers, Diophantine analysis and quadratic residues. Note: Credit may be applied towards the MAT but not toward any other graduate degree in mathematics.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### 3 Units

Term Typically Offered: Fall, Spring Prerequisite(s): MATH 206 or ENGR 102; and MATH 311; and MATH 325; or consent of instructor.

Description: An introduction to the theory of groups, rings, integral domains, and fields.

Course Attribute(s): CUE - This course fulfills the Culminating Undergraduate Experience (CUE) requirement for certain degree programs. CUE courses are advanced-level courses intended for majors with at least 90 earned credits/senior-level status.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

MATH 522. Modern Algebra II 3 Units Term Typically Offered: Spring Only Prerequisite(s): MATH 521. Description: Continuation in greater depth of topics introduced in MATH 521; introduction to theory of ideals, field extensions, and abstract vector spaces. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/

setupSearchClassSchedule.cfm)

#### MATH 535. Modeling I

Prerequisite(s): MATH 325 or MATH 405 or equivalent. Description: Introduction to mathematical modeling of discrete and continuous dynamical systems.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 536. Modeling II

Prerequisite(s): MATH 535.

Description: Advanced mathematical modeling of discrete and continuous dynamical systems.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 545. Introduction to Fractal Geometry

3 Units Prerequisite(s): MATH 301 and MATH 325; MATH 501 recommended.

3 Units

3 Units

3 Units

Description: Recursively defined sets and self-similarity; metric spaces and iterated function systems; topological, fractal, and Hausdorff dimensions.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 550. Advanced Euclidean Geometry 3 Units Term Typically Offered: Occasionally Offered

Prerequisite(s): A year of high school geometry; MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.

Description: Theory of Euclidean geometry contrasted with non-Euclidean from both the axiomatic and algebraic approach. Of special value to secondary teachers.

Note: Credit may be applied toward the MAT but not toward any other graduate degree in mathematics.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 551. Geometry

Term Typically Offered: Spring Only

Prerequisite(s): MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.

Description: Study of projective spaces, transformations and invariants. Introduction to related geometries, such as affine, elliptic, and hyperbolic. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/

setupSearchClassSchedule.cfm)

#### MATH 561. Probability

Term Typically Offered: Fall, Spring Prerequisite(s): MATH 301.

Description: Probability spaces, probability distributions, moments, moment-generating functions, independence, transformation of variables, sampling distributions, laws of large numbers, central limit theorem, applications.

Note: Credit will not be granted for both MATH 561 and IE 360.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### 3 Units MATH 562. Mathematical Statistics

## Prerequisite(s): MATH 561.

Description: Random samples and statistics, point estimation, sufficiency and completeness, confidence regions, classical theory of hypothesis testing, linear regression, nonclassical procedures.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 564. Probability Models Prerequisite(s): MATH 561.

Description: Finite probability models, Markov chains, renewal and reliability theory, Brownian motion, stochastic differential equations. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/

setupSearchClassSchedule.cfm)

# MATH 568. Mathematical Models in Molecular Biology

Prerequisite(s): MATH 205 or instructor consent. Description: Introduction to probability models for representations of biochemical networks. Markov Processes. Stochastic simulation. Chemical and biochemical kinetics. Gillespie algorithm. Applications to intra-cellular kinetics.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

MATH 570. Foundations of Actuarial Science Prerequisite(s): MATH 561.

Description: Fundamental mathematical tools for quantitatively assessing risk. Application of these tools to problems encountered in actuarial science is emphasized. Covers the material of Examination 1 of the Society of Actuaries and Casualty Actuarial Society. Note: Credit may not be applied toward a graduate degree in mathematics.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 573. Actuarial Models I

Term Typically Offered: Occasionally Offered Prerequisite(s): MATH 570; MATH 372 or MATH 572.

Description: This course covers the material for the Society of Actuaries Exam MFE, Actuarial Models-Financial Economics (also CAS Exam 3F). The syllabus for Exam MFE develops the student's knowledge of the theoretical basis of financial models and the application of those models to insurance and other financial risks. A thorough knowledge of calculus, probability and interest theory is assumed. In addition, for Exam MFE/3F, students are assumed to be familiar with derivative securities (introductory material).

Note: Knowledge of risk management at the level of MATH 570 is assumed.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

3 Units

3 Units

3 Units

3 Units

Prerequisite(s): MATH 573.

Description: It further develops knowledge of the theoretical basis of actuarial models and the application of those models to insurance and other financial risks.

Note: Continuation of MATH 573.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 581. Introduction to Graph Theory

Term Typically Offered: Fall Only

Prerequisite(s): MATH 206 or ENGR 102; MATH 311; MATH 325 or consent of instructor.

Description: Provides an overview of graph theory. Topics include blocks, trees, connectivity, Hamiltonian and Eulerian graphs; topological problems, matrices and groups.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 587. Discrete Mathematics for MAT students Prerequisite(s): MATH 206 or ENGR 102; MATH 325.

Description: Topics include: Pigeon-hole principle, counting techniques, binominal coefficients, generating functions, stirling and catalan numbers, permutations and graphs.

Note: Does not count towards the mathematics major or minor. Note: Credit may be applied toward the MAT degree but not towards any other graduate degree in mathematics.

Note: Credit not allowed for both MATH 387 and MATH 587.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 590. History of Mathematics - WR

Prerequisite(s): 500-level course in math (except MATH 560). Description: Mathematical history from Mesopotamia to present. Emphasis on doing mathematics, identifying the growth of mathematical concepts and studying prominent mathematicians. Note: Approved for the Arts and Sciences upper-level requirement in written communication (WR).

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 591. Selected Topics in Mathematics

1-3 Units

3 Units

Prerequisite(s): Announced in Schedule of Courses. Description: An examination of one or more topics in mathematics not usually treated in a regularly offered course. For class offerings for a specific term, refer to the Schedule

of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 601. Real Analysis I Prerequisite(s): MATH 502.

Description: Basic set theory and real topology, Lebesgue measure and integration on the real line, differentiation of integrals, L(p) spaces. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

# MATH 602. Real Analysis II

Prerequisite(s): MATH 601.

Description: Elementary Hilbert space theory, abstract measure spaces and integration, product spaces. Applications to other areas. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 605. Functional Equations I Prerequisite(s): MATH 601.

3 Units

Description: Introduction to the theory and application of functional equations in several variables, including Cauchy equations, d'Alembert equation, quadratic functionals.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 606. Functional Equations II

3 Units

Prerequisite(s): MATH 605 or consent of department. Description: It extends further the theory of functional equations to applications in various branches of mathematics, information theory, and the natural and social sciences. Note: Continuation of MATH 605.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

## MATH 607. Seminar on Applied Analysis

3 Units

Prerequisite(s): MATH 605 or consent of department. Description: Advanced topics in applied analysis. Topics will be determined by the research interests of the students and those of the instructor

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

## MATH 611. Complex Variables I

Prerequisite(s): MATH 502.

Description: Geometry of the complex plane and complex analysis. Topics include analytic and meromorphic functions, linear fractional transformations, Cauchy's Theorem and the Residue Theorem. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 612. Complex Variables II Prerequisite(s): MATH 611.

3 Units

3 Units

3 Units

Description: Including deeper properties of the space of meromorphic functions, harmonic functions and conformal mappings. Note: Continuation of MATH 611.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

## MATH 621. Algebra I

Prerequisite(s): MATH 522.

Description: Advanced theory of Groups, Rings, Integral Domains and Fields.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

Linear Statistical Modeling Prerequisite(s): MATH 667 or consent of department. Description: This course covers linear and related models includin a discussion of fixed, mixed, and random effects models as well as regression and ANOVA models. The discussion will include estima	<b>3 Units</b> g s
<ul> <li>MATH 636. Mathematical Modeling II</li> <li>Prerequisite(s): MATH 635.</li> <li>Description: Advanced mathematical modeling of discrete and continuous dynamical systems.</li> <li>For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/setupSearchClassSchedule.cfm)</li> </ul>	3 Units	hypothesis testing, confidence intervals, model fitting, and model diagnostics. Violations of the assumptions of the linear model will be examined. Statistical software will be used frequently. A strong background in linear algebra is needed. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)	
MATH 641. Topology I Prerequisite(s): MATH 502 or MATH 541. Description: Continuous functions, connectedness, compactness countability, separation, metrizability, and completeness in the co topological spaces. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)	3 Units , ntext of	MATH 670. Introduction to the Stochastic Calculus Prerequisite(s): MATH 660 or consent of the department. Description: Levy Process, local martingale, stochastic integrals, quadratic variation, Ito's formula, existence and uniqueness of stoc differential equation. Applications to financial engineering, no arbit and martingale measure, Black-Scholes model, edging. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/	<b>3 Units</b> chastic trage
MATH 642. Topology II Prerequisite(s): MATH 641. Description: Introduction to algebraic topology, including the Fundamental Group and Covering Spaces. Note: A continuation of MATH 641. For class offerings for a specific term, refer to the Schedule	3 Units	setupSearchClassSchedule.cfm) MATH 673. Actuarial Models I Prerequisite(s): MATH 570 and MATH 572. Description: Theoretical basis of actuarial models and the applicat of those models to insurance and other financial risks. The followi specific models are introduced: Contingent Payment Models, Surv Models, Frequency and Severity Models, Compound Distribution N	3 Units tion ng ival lodels,

of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

on Models, Stochastic Process Models, Ruin Models. Together with its continuation, MATH 674, covers the material on the Examination 3 of the Society of Actuaries and the Casualty Actuarial Society.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### Prerequisite(s): MATH 673.

Description: It further develops knowledge of the theoretical basis of actuarial models and the application of those models to insurance and other financial risks. The following specific models are introduced: Contingent Payment Models, Survival Models, Frequency and Severity Models, Compound Distribution Models, Stochastic Process Models, Ruin Models. Together with its predecessor, Mathematics 673, covers material on the Examination 3 of the Society of Actuaries and the Casualty Actuarial Society.

Note: Continuation of Math MATH 673.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 676. Actuarial Modeling I

3 Units

3 Units

3 Units

3 Units

Prerequisite(s): MATH 673 and MATH 674. Description: Approximately half of the material on the Society of Actuaries/Casualty Actuarial Society examination 4, Actuarial Modeling. Topics include: statistical analysis of simulated data, statistical validation techniques, actuarial credibility, empirical estimation, loss distributions, and introduction to estimation of survival functions. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 677. Actuarial Modeling II

Prerequisite(s): MATH 676.

Description: The rest of the material on the Society of Actuaries/Casualty Actuarial Society examination 4, Actuarial Modeling. Topics: Estimation of survival and hazard function. Regression analysis. Multiple regression. Regression in actuarial modeling. Time series models. Properties of stochastic time series. Estimating and forecasting with time-series models. Actuarial modeling with time series.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 681. Combinatorics and Graph Theory I

Prerequisite(s): MATH 521, or MATH 580, or MATH 581, or consent of department.

**Description:** Fundamental topics in Graph Theory and Combinatorics through Ramsey theory and Polya's theorem respectively. Motivation will be through appropriate applications.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

## MATH 682. Combinatorics and Graph Theory II

Prerequisite(s): MATH 681.

Description: Fundamental topics in Graph Theory and Combinatorics through Ramsey theory and Polya's theorem respectively. Motivation will be through appropriate applications.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

Mathematics (MATH) 5

#### 3 Units MATH 683. Advanced Combinatorics and Graph Theory I 3 Units Prerequisite(s): MATH 681.

Description: Advanced topics in Combinatorics and Graph Theory, including finite planes, coding theory, combinatorial optimization, groups, graphs, and graphs on manifolds.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 684. Advanced Combinatorics and Graph Theory II 3 Units Prerequisite(s): MATH 681 and MATH 682.

Description: Course extends the study of advanced topics in Combinatorics and Graph Theory, including Extremal Graph Theory and Algebraic Combinatoris.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 687. Seminar on Discrete Mathematics

Prerequisite(s): MATH 683 or consent of department. Description: Advanced topics in discrete mathematics. For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 690. An Overview of Mathematics

Prerequisite(s): Undergraduate mathematics major or at least four mathematics courses in the graduate program or consent of instructor. Description: History of mathematics, survey of the major content areas of modern mathematics, discernment of current directions in various mathematical fields.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 691. Independent Study

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 693. Seminar in Teaching Mathematics

2 Units Prerequisite(s): Must be admitted to a graduate program in the Department of Mathematics and consent of instructor.

Description: Topics in teaching mathematics to college students. Note: Does not count as part of the 18-hour minimum in mathematics for the MA in Mathematics.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 694. Graduate Internship

Description: Students participating in a graduate internship must be registered for this course.

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)

#### MATH 695. Thesis Guidance

For class offerings for a specific term, refer to the Schedule of Classes (http://htmlaccess.louisville.edu/classSchedule/ setupSearchClassSchedule.cfm)
